The SACCO Societies Regulatory Authority (SASRA) © 2023

The SACCO Supervision Annual Report is a statutory publication of the Sacco Societies Regulatory Authority (SASRA). It documents the performance, activities, and operations of SACCO Societies in Kenya in compliance with the requirements of Section 22 of the Sacco Societies Act No. 14 of 2008, as read together with Regulation 92 of the Sacco Societies (Non-Deposit Taking Business) Regulations 2020.

This Report, is however, not an investment prospectus and members of the public are advised to always undertake utmost due diligence and care before making any financial transactions with any individual SACCO Society and/or other entity in respect of which this Report relates.

All Rights Reserved

OUR VISION

A Financially Inclusive, Member Centric and Stable SACCO Industry

OUR LEGAL MANDATE

License SACCO Societies to carry out Deposit-Taking Business in Kenya	The Authority licenses qualifying SACCOs to undertake deposit-taking business pursuant to Section 23 of the SACCO Societies Act, as read with the SACCO Societies (Deposit Taking Business) Regulations, 2010 made thereunder
Regulate and Supervise SACCO Societies in Kenya	The Authority regulates and supervises the activities of qualifying SACCOs in accordance with Section 5 of the SACCO Societies Act and the Regulations made thereunder, including the Specified Non-Deposit taking SACCO business as prescribed under Section 3 of the SACCO Societies Act and read with the SACCO Societies (Non-Deposit Taking Business) Regulations, 2020.
Hold, manage and apply the General Fund of the Authority in accordance with the Act	The General Fund is the statutory fund created under Section 16 of the SACCO Societies Act and is managed by the Authority in accordance with Section 5(c) of the SACCO Societies Act
Do all such other things as may be lawfully directed by the Cabinet Secretary	The Cabinet Secretary has powers under Section 5(e) of the SACCO Societies Act and other written legislation to issue directions to the Authority to do any lawful thing with respect to supervision and regulation of SACCOs in Kenya
	The Authority performs any other functions that have been assigned to it under the Act or any other written law as provided in Section 5(f) of the SACCO Societies Act.

OUR LEGAL MANDATE

OUR MISSION

To regulate, supervise and develop the SACCO industry through promotion of prudent practices to protect member's interests, enhance access to financial services and foster financial stability

OUR MISSION

OUR CORE VALUES

I	Integrity	We act with honesty and promote a culture of trust in the conduct of our business
I	Innovation	
M	Mutual Respect	We value and respect the diversity of our Board, employees, customers, and partners, and strive to create an inclusive environment
P	Professionalism	We strive to abide by the professional codes of ethics in our business including but not limited to those applicable to public service officers
A	Accountability	We render a prompt account of our decisions, actions, and results to our stakeholders
C	Collaboration	We establish and nurture mutually beneficial partnerships with all our stakeholders
T	Transparency	We endeavour to be open and transparent in the conduct of our business and execution of our mandate

OUR CORE VALUES

MESSAGE FROM THE BOARD

Hon. Mr. Jack Ranguma

Chairman, Board of Directors

Introduction

Regulated SACCOs total assets to national GDP marginally dropped to 6.66% in 2022 from 6.67% in 2021

Despite the hard economic times experienced in the country during most of the year 2022 as evidenced by the severe droughts, high inflation and rising interest rates, the Regulated SACCO industry continued to play its rightful role in the economy through mobilization of savings for national development and provision of credit facilities to many household economies. Coming immediately against the backdrop of the impacts of the COVID-19 Pandemic, these economic shocks slowed down the growth trajectory of Regulated SACCOs despite their overall resilience with their total assets to the nominal GDP remaining the same at about to 6.66% in 2022 as it was in 2021.

50.61% of all the employees within the Regulated SACCOs' industry were female

Nevertheless, the savings and deposits mobilised still grew by 9.84% in 2022 compared to 9.80% in 2021, while the loan advances grew by 11.76% in 2022 compared to 9.67% in 2021. The total membership served by the Regulated SACCOs on the other hand increased by 7.02% to 6.42 Million Kenyans in 2022 compared to an increase of 3.03% reported in 2021. Together with provision of reliable employment opportunities to a total of 11,188 Kenyans, out of whom 50.61% were female and 49.39% were male, these statistics demonstrates that the Regulated SACCO industry continued to play a critical role in the country's economic development as well as the realization of the government's Bottom-Up Economic Transformation Agenda and the attainment of the sustainable development goals. The Authority has therefore put in place new strategies to safeguard on these gains, while exploring new developmental initiatives to further deepen the role of Regulated SACCOs in national development.

Use of ICT enabled financial services delivery channels gaining root among Regulated SACCOs

It is also encouraging to report that the Regulated SACCO industry is largely adopting the application of alternative financial service delivery channels for the products and services through the deployment of ICT. In particular, the usage of SACCO agencies, ATMs and mobile money is slowly replacing the clamour for brick-and-mortar physical branches which are normally capital intensive to establish and expensive to maintain. In addition, the application of these alternative financial delivery channels also brings with them convenience and ease of accessibility to members of SACCOs being served and is critical if the SACCOs are to attract and retain into their membership the mostly techno-savvy generation who are currently in the country's productive economy. The availability of digital credit products among several of the Regulated SACCOs is another welcome development, which will continue to reposition Regulated SACCOs as a one-stop shop for all credit products and discourage their membership from straying away to other digital credit providers.

Proactive cyber security actions ensured reduction in incidences of cyber-attacks and breaches on Regulated SACCOs' systems.

Although the usage of ICT in the many alternative financial delivery channels being adopted by Regulated SACCOs is fraught with cyber-security risks, the Authority is satisfied with the cyber-security mitigation measures which are being implemented at the industry levels as well as at the individual SACCOs' level. The periodic regulatory alerts; the adoption of multi-faceted cyber-security solutions; the stringent terms and conditions for usage of third-party integrators and vendor systems which were discussed and adopted during by the industry at the Annual Regulatory Roundtable 2022, ensured that cyber-attacks on Regulated SACCOs Management Information Systems (MIS) and operations was largely contained during the year 2022. Regulated SACCOs must however not rest on their laurels on this containment since cyber-criminals remain active and are always devising new ways to breach the applicable security solutions.

Members of the Public should desist from undertaking regulated SACCO business with entities which are neither licensed nor authorised by the Authority to do so.

The Authority also notes with concern a continuing trend by members of the public undertaking regulated SACCO business with entities fraudulently styling themselves as SACCOs, while they are neither licensed and/or authorised to undertake the regulated SACCO business. To this end, many Kenyans have ended up losing their hard-earned savings to such fraudsters, and consequently the Authority calls upon members of the public, including private and public enterprises to cease and desist from undertaking any regulated SACCO business with any entity unless such entity is either licensed or authorised by the Authority. To this end, the Authority continues to publish in the Kenya Gazette and national newspapers the list of licensed and authorized SACCOs in the month of January of every year, and at the same time maintains such a list on its website www.sasra.go.ke throughout the year for ease of reference by the public. Additionally, the Authority has rolled-out an online complaint reporting and inquiry mechanism which is embedded on its website www.sasra.go.ke to enable members of the public quickly and efficiently report any suspicious operations of any entity purporting to be a SACCO or undertaking regulated SACCO business.

Non-Remitted Funds owed to Regulated SACCOs continues to undermine their stability, resilience, and growth.

A total of Kshs 2.67 Billion owed to 80-Regulated SACCOs belong to 66,452 individual SACCO's members in 2022

On the flipside however, non-remittance menace continues to undermine the stability, resilience, and growth performance of Regulated SACCOs. The data collated by the Authority showed that several employer-institutions owed a total of Kshs 2.67 Billion in 2022 affecting 80-Regulated SACCOs and 66,452 individual members of these SACCOs; out of which a sum of Kshs 2.02 Billion thereof were meant to repay members' loans. The net effect is that all these members' loans stood defaulted, and at the same time the ability of these 80-SACCOs to meet their financial obligations was severely hindered. Despite the fact that the total non-remittance funds owed to Regulated SACCOs substantially dropped from a sum of Kshs 3.40 Billion owed in 2021, thanks to the concerted governmental effort to tame the menace, the Authority continues to call out employer-institutions which are perennially guilty of this malpractice.

County Governments & Assemblies owed SACCOs Kshs 1.35 Billion (49.97%); while the public universities & tertiary colleges owed Kshs 620.52 Million (23.01%)

Like in the previous years, the County Governments and Assemblies owed the highest proportion of non-remitted funds owed to Regulated SACCOs which stood at 49.97% amounting to Kshs 1.35 Billion; followed by public universities and tertiary colleges which owed a sum of Kshs 620.52 Million accounting to 23.01% of the total non-remitted funds. The fact that these employer institutions are funded by exchequer funds has made recovery of the non-remitted deductions owed them not only cumbersome and subject to availability of funds, but equally riddled with conflict of interest by the key actors in the recovery process. In this regard, the Authority is considering putting in a framework to enable the recovery of such non-remitted SACCOs' deductions through the National Treasury directly from the exchequer grants or funds appropriated in favour of these governmental institutions.

Direct recovery of non-remitted funds owed by government agencies from their exchequer grants remains an option.

DT-SACCOs can reduce incidences of non-remittances through mandatory usage of member' FOSA savings accounts to process salaries or other income

In the meantime, the Authority calls upon the DT-SACCOs segment to fully implement the Authority's advisory on Non-Remitted Deductions Due to SACCOs from Various Employer-Institutions – Circular No. SASRA/800/2/2019 dated 11th June 2019, to minimise incidences of non-remitted funds by employer institutions. The advisory is premised on the opportunities offered to DT-SACCOs to utilize their memberships' FOSA savings account as the mandatory payment channel for processing of their members' emoluments or income, so as to secure upfront recovery from the members, rather than relying on the various employer-institutions for direct deductions

Authority's Strategic Plan 2018-2022 came to an end with objectives fully met

The year 2022 also saw the lapse of the Third Medium Term Plan (MTP -III) (2018-2022) of the Kenya Vision 2030, in which the Authority and the SACCO industry were key players to the realization of the objects thereof under the Financial Services Sector segment. As the stock of the achievements of the MTP-III are being chronicled, the Authority is content that its key deliverables of overseeing the SACCO stability and soundness during the plan period was attained with the Regulated SACCO industry operating above the prescribed minimum stability and soundness thresholds. The development and subsequent implementation of the Sacco Societies (Non-Deposit Taking Business) Regulations 2020 is also another important achievement realized by the Authority during the plan period, and which has overseen nearly the entire SACCO industry space being brought under the Authority's oversight. Only those SACCOs holding members' deposits below Kshs 100 Million mark are yet to be brought under a prudential supervision and oversight framework.

Authority's new Strategic Plan 2022-2027 fully anchored on the governments' Bottom-Up Economic Transformation Agenda (BeTA) Framework

The lapse of the MTP-III together with the Authority's Strategic Plan 2018-2022 herald the emergence of the MTP-IV (2023-2027) and the Authority's Strategic Plan 2023 - 2027, which are fully anchored on the government's Bottom-Up Economic Transformation Agenda (BeTA) Framework. The BeTA Framework puts SACCOs and cooperative enterprises as the forefront enablers in the realization of its key pillars of improvement in agriculture and nutrition; MSMEs' development; provision of affordable housing; improved digital and creative economy; health services as well as adaption to climate change. These pillars have indeed been the traditional forte of SACCOs and cooperatives in general, and there is no doubt that the renewed momentum anchored under the BeTA Framework will catapult the contribution of SACCOs and cooperatives towards economic prosperity to higher levels over the next five (5) years' plan period.

Key Thematic areas in the new Plan period include financial sustainability, inclusion & member protection; the promotion and development of the Regulated SACCOs' industry; and organizational capability of the Authority.

In this regard, the Authority's new Strategic Plan (2023-2027) takes stock of lessons, challenges and opportunities learned over the past five (5) years and commits to positively revolutionise the SACCO industry as a key driver of the national economic growth. The Plan is built on gains and achievements realised under the previous plan period and is premised on three (3) key result thematic pillars. In the first Pillar, the Authority commits to ensuring continued and sustained financial stability of Regulated SACCOs, the deepening of financial inclusion through the SACCO system; and strengthening the protection of members' rights in their financial transactions with SACCOs. In the second Pillar, the Authority shall endeavour to pursue projects, activities and programs that promote and develop the Regulated SACCO industry as a preferred investments destination for the Kenyan public, especially among the household economies. The third and last Pillar is anchored on the attainment of the Authority's organizational capability to deliver on its statutory mandate using the available limited resources.

Flagship programs in the new plan period to include operationalization of shared technological platform, a functional deposit insurance scheme, asset recovery mechanism, stabilization facility; and integration of Regulated SACCOs into the national payment system infrastructure.

The key flagship institutional infrastructures earmarked in the new plan period include deepening the digitization of the Regulated SACCOs' businesses and operations through shared technological services platforms which is line with the governments' digital economy agenda; the operationalization of a functional deposit insurance scheme for savings held in SACCOs in order to deepen trust and confidence in the industry; the setting up of dedicated asset recovery mechanism to trace and recover embezzled SACCOs' assets, and assure the reunification thereof to the respective SACCOs for the benefit of the members; and the integration of Regulated SACCOs into the national payment systems to improve accessibility of their financial services and products as well as mobilization and retention of savings (deposits).

In conclusion, the Authority forecasts a very productive year 2023 for the Regulated SACCOs industry with growth projections and momentum expected to be maintained. However, the high inflation and interest rates which are projected to continue in 2023 are likely to reduce the savings propensity of members' of SACCOs thus undermining the SACCOs' ability to mobilise savings from members, while expensive external borrowing will have the potential of increasing their cost of doing business. Consequently, Regulated SACCOs are entreated to be ingenious in sourcing for the funding of their assets, especially their loan book in order to maintain their competitiveness in the short to medium term.

Hon. Jack Ranguma
Chair, Board of Directors

FOREWORD BY THE CHIEF EXECUTIVE OFFICER

CPA (Mr.) Peter Njuguna

Legal Basis of the Report

Section 22(2) of the Sacco Societies Act and Reg. 92 of the Regulations 2020

The SACCO Supervision Annual Report is a statutory publication of the Authority prepared and published on an annual basis in fulfilment and compliance with the requirements of Section 22(2) of the Sacco Societies Act No. 14 of 2008. The Act provides inter alia that "the Authority shall prepare and submit to the Cabinet Secretary a report on the operations and performance of SACCO Societies to which the Act applies within four (4) months after the close of the government's financial year". The provisions Reg. 92 of the Regulations 2020 on the other hand provides that "the Authority shall pursuant to section 22 of the Act prepare and submit to the Cabinet Secretary a report on the operations and performance of the specified non-deposit taking Sacco businesses during that year." The SACCO Supervision Annual Report 2022 therefore documents the operations, activities, and performance of Regulated SACCOs in Kenya consisting of DT-SACCOs and NWDT-SACCOs during the year ended December 2022.

Licensing and Authorization status of SACCOs in Kenya

A total of 359-Regulated SACCOs had valid licenses and authorization to operate.

At the commencement of the year 2022, the Authority had a total of 361-Regulated SACCOs made up of 176-DT-SACCOs and 185-NWDT-SACCOs. However, two (2) - NWDT-SACCOs failed to meet their financial obligations to the members and did not maintain the prescribed prudential standards, and as such their authorization were revoked leaving a total of 359-Regulated SACCOs in 2023.

2-NWDT-SACCOs' had their Authorization revoked in 2022

There was however no new license or authorization granted during the year. However, the Authority received six (6) new applications to undertake specified non-deposit taking business out of which one (1) application was declined, while the remaining five (5) applications are in various stages of processing.

Growth and Performance indicators

Total assets grew by 10.31% to reach Kshs 890.30 Billion in 2022

The performance of Regulated SACCOs during the year 2022 remained stable and on the upward trajectory with overall increase in the rates of growth in key parameters of total assets, total deposits, gross loans, and membership. The total assets portfolio of Regulated SACCOs registered a growth rate of 10.31% to reach Kshs 890.30 Billion in 2022 from Kshs 807.30 Billion in 2021. The DT-SACCOs segment continued to hold the highest proportion of the total assets amounting to Kshs. 763.50 Billion accounting for 85.76% while the NWDT-SACCOs accounted for the remaining 14.37%. This is majorly attributed to the fact that DT-SACCOs have been under prudential regulation for over a decade, which enabled them to improve mobilization of membership driven by confidence created by regulation. Some of the these DT-SACCOs have also diversified the range of their products and services thereby attracting more membership.

The total deposits grew by 9.84% to reach Kshs 620.45 Billion in 2022.

The total deposits (savings) for the Regulated SACCOs on the other hand grew by 9.84% to reach Kshs 620.45 Billion in 2022 compared to Kshs 564.89 Billion recorded in 2021. These deposits were distributed as non-withdrawable (BOSA) amounting to Kshs 515.65 Billion; the withdrawable savings (FOSA) amounting to Kshs 83.78 Billion; and fixed deposits savings amounting to Kshs 21.02 Billion. The BOSA deposits remains the most dominant type of deposits and accounted to 83.11% of the total deposits, with the FOSA savings accounting for only 13.50%.

Whereas the BOSA savings held by all the Regulated SACCOs increased from Kshs 427.97 Billion reported in 2021 to Kshs 515.65 Billion in 2022; the FOSA savings held by the DT-SACCOs dropped from Kshs 114.59 Billion in 2021 to Kshs 83.78 Billion in 2022. The increase in the BOSA savings can be explained by the fact they are mandatory in nature, while the FOSA saving are voluntary and easily accessible by members in case of need. Additionally, the high inflation reported in 2022 reduced the savings' propensity of members of DT-SACCOs as it is with other segments of the population.

Gross loans grew by 11.76% to reach Kshs 680.35 Billion

The gross loans for the Regulated SACCOs increased by 11.76% to reach Kshs 680.35 Billion in 2022. The DT-SACCOs' segmental loans registered the highest growth rates at 12.24% to reach Kshs 586.16 Billion while the NWDT-SACCOs' segmental increase of gross loans was 8.90%.

Total membership grew by 7.02% to reach 6.42 Million members in 2022

There was an increase in the total membership of Regulated SACCOs from 5.99 Million members in 2021 to 6.42 Million members in 2022 representing an increase of 7.02%. The DT-SACCOs' segment recorded the highest increase in membership by 7.34% to reach 5.96 Million members in 2022; compared to the membership in the NWDT-SACCOs segment which increased by 3.14% to 475,270 members in 2022 from 460,785 members in 2021. The total number of dormant members decreased to 19.01% of the total membership of Regulated SACCOs in 2022 compared to a proportion of 19.70% of the total membership classified as dormant in 2021, and thus showing improved patronage of financial services offered by Regulated SACCOs.

The 49-Agriculture-Based Regulated SACCOs controlled 42.60% of the total membership.

The 117-Government-Based Regulated SACCOs controlled 35.35% of the total membership.

The 49-Agriculture Based Regulated SACCOs had the majority of the membership accounting for 42.60% of the entire membership in 2022. This was however a drop from a membership proportion of 43.19% reported in 2021 by the 49-Agriculture-Based Regulated SACCOs, which is explainable by the fact that the proportion of membership of the 117-Government-Based Regulated SACCOs increased to 35.35% in 2022 from 33.49% in 2021 thereby eating into the market share of the Agriculture Based Regulated SACCOs. The sharp increase in the proportion of membership in Government-Based SACCOs is explainable by the expansion of their individual common bonds beyond the traditional government employees.

Financial stability indicators for the Regulated SACCOs //

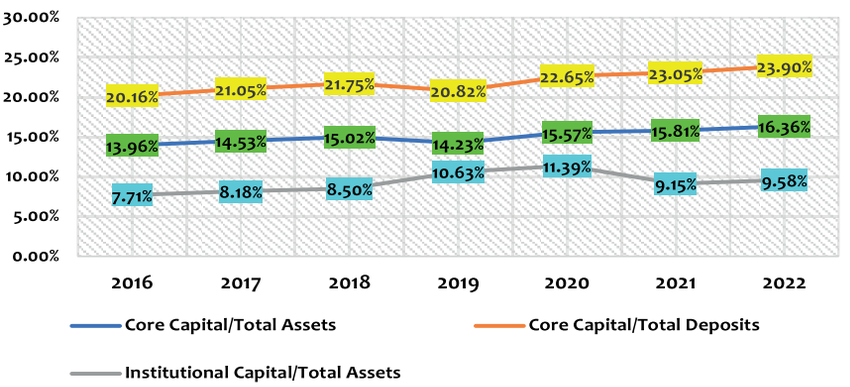

Core capital for DT-SACCOs grew to Kshs 124.89 Billion in 2022 against the prescribed minimum of Kshs 10 Million

Core capital for the NWDT-SACCOs segment grew to Kshs 10.65 Billion in 2022 against the prescribed minimum of Kshs 5 Million

The Regulated SACCOs industry recorded improvements in all the key stability measurement and indicators of capital adequacy, asset quality, liquidity, and earnings during the year 2022. The consolidated core capital for DT-SACCOs' segment increased to Kshs 124.89 Billion in 2022 from a sum of Kshs 109.29 Billion in 2021; while the core capital for the NWDT-SACCOs increased to Kshs 10.65 Billion in 2022 from Kshs 8.69 Billion in 2021. At the individual levels, 168-DT-SACCOs out of 176-DT-SACCOs maintained their respective core capital above the Kshs 10 Million mark and thus were fully compliant; while 178-NWDT-SACCOs out of 183-NWDT-SACCOs maintained their core capital above the Kshs 5 Million mark.

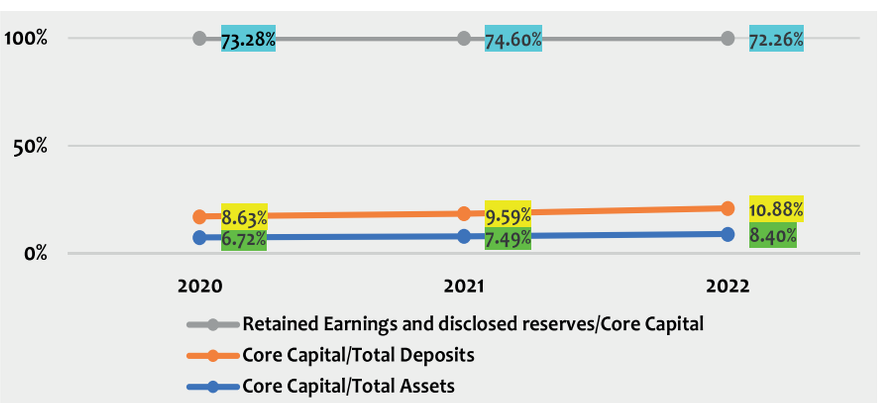

The average core capital to total assets ratio for DT-SACCOs also increased to 16.36% in 2022 from 15.81% in 2021 compared to the prescribed minimum of 10%. The average institutional capital to total assets for DT-SACCOs segment on the other hand increased to 9.58% in 2022 compared to 9.15% in 2021 against the prescribed minimum of 8% as illustrated below.

DT-SACCOs' segment compliance with Core capital to total assets; core capital to total deposits; and institutional capital to total assets ratios.

The NWDT-SACCOs segment on the other hand also recorded significant improvements in their respective capital adequacy ratios. The average core capital to total assets ratio stood at 8.40% above the prescribed minimum ratio of 8% while the core capital to total deposits stood at 10.88% against the minimum prescribed of 5%. The retained earnings and disclosed reserves to core capital which measures the level of retention of surpluses equally stood at 72.26% against the prescribed minimum of 50% as illustrated below.

NWDT-SACCOs' segment compliance with Core capital to total assets; core capital to total deposits; and the Retained earnings & disclosed reserves to core capital ratios

Quality of the loan book

Mean NPL ratio for Regulated SACCOs decreased to 8.34% in 2022 compared to 8.99% in 2021.

The quality of the loan book of Regulated SACCOs is another key stability indicator. During the year 2022, the loan book of Regulated SACCOs constituted 71.97% of the Regulated SACCOs' total assets, compared to a loan book of 70.95% of the total assets in 2021. The mean non-performing loans (NPL) ratio for the Regulated SACCOs decreased to 8.34% in 2022 compared to an NPL ratio of 8.99% reported in 2021. The foregoing shows that despite hard economic environment experienced during the year 2022, a majority of the Regulated SACCOs were able to ensure that the loans and other credit advances issued to their members were being repaid as scheduled in the contractual terms.

NPL ratio for DT-SACCOs stood at 8.40% while NPL ratio for the NWDT-SACCOs stood at 7.99%

At the segmental level, the NWDT-SACCOs segment reported the lowest NPL ratio at 7.99% in 2022 which is a drop for the NPL ratio of 9.78% reported in 2021. The DT-SACCOs segment on the other hand had their NPL ratio decrease to 8.40% in 2022 compared to 8.86% reported in 2021.

Non-Remittances of Deductions

Total Non-Remitted funds owed to 80-Regulated SACCOs amounted to Kshs 2.70 Billion in 2022 compared to Kshs 3.40 Billion in 2021

The perennial failure by various employer institutions continues to undermine the financial performance of Regulated SACCOs, despite various policy and administrative measures being put in place to address the problem. During the year 2022, a total of 80-Regulated SACCOs were owed a total sum of Kshs 2.70 Billion as non-remitted funds belonging to a total of 66,452 members, either as loan repayment deductions or non-withdrawable (BOSA) savings deductions as at September 2022. The bulk of the non-remitted deductions amounting Kshs 2.02 Billion which is equivalent of 74.78% of the total non-remitted funds related to loan repayment deductions, implying that loan portfolios of proportional amounts stood defaulted, besides undermining the liquidity position of the affected Regulated SACCOs to meet their financial obligations. The failure by various employer-institutions to promptly remit the BOSA savings' deductions on the other hand have the effect of reducing the borrowing capabilities of individual members of the Regulated SACCOs, since most of the borrowing are pegged on the BOSA savings, which acts as collateral.

Alternative financial services delivery channels

Regulated SACCOs have deployed alternative financial services delivery channels to deepen ease of accessibility, ward-off competition and access the national payment system infrastructures.

To deepen the ease of access to their financial services; ward-off the stiff competition from the many credit financial services institutions; and access the national payment systems infrastructures, Regulated SACCOs have continued to partner with commercial banks, payment service providers and other third-party fintechs to deploy alternative financial services delivery channels. The main channels deployed in these partnerships include –

a) Financial services provision through the USSD Code mobile connectivity which has been deployed by 209-Regulated SACCOs.

b) Financial services provision through internet and/or app-based connectivity which has been deployed by 103-Regulated SACCOs

c) ATM financial services which has been deployed by 34.09% of all the DT-SACCOs

d) Pesalink Integration which has been deployed by 13.64% of the DT-SACCOs.

e) SACCO agencies which had been deployed by 36-DT-SACCOs with over 3340 agents spread throughout the country, and which undertook 1.89 Million transactions valued at Kshs 26.50 Billion in 2022.

The foregoing underscores the progressive transition of the Country's Regulated SACCOs system, especially the DT-SACCOs' segment towards maturity stage wherein key infrastructure necessary for deposit taking financial institutions such as deposit guarantee scheme, central liquidity facility and lender of last resort mechanism are a prerequisite.

Appreciation

The Authority's key priorities remains to protect the SACCO industry and ensuring that it remains stable.

On behalf of the management team, the Authority extends it appreciation to the Cabinet Secretary, Ministry of Cooperative & Micro, Small & Medium Enterprises (MSMEs) Development and the Principal Secretary for State Department for Co-operatives for the continued provision of policy guidance aimed at realization of the Authority's legal mandate. The Authority also wishes to sincerely thank the members of the Board of Directors in setting the vision and mission for achieving the Authority's statutory mandate, as well as continued provision of resources and general oversight in the execution of the Authority's mandate.

A special recognition also goes to Management and Staff of the Authority whose support has been fundamental in realizing our set goals. The unwavering support and cooperation received during the year 2022 from the leadership of the regulated SACCOs, as well as the entire co-operative movement also deserves a mention, even as the Authority looks forward to a fruitful year 2023.

Peter Njuguna

Chief Executive Officer

CHAPTER I

THE ARCHITECTURE OF COOPERATIVES

1.0.THE COOPERATIVE MODEL

1.1. The Statement on the Cooperative Identity

The International Cooperative Alliance (ICA) is the worldwide apex body representing cooperatives as well as providing a global voice and forum for knowledge, expertise, and co-ordinated action for and about cooperatives. The ICA was founded in 1895 and is the custodian of the Statement on the Cooperative Identity which includes a definition, ten (10) values and seven (7) operational principles. The statement on the Cooperative identity is the common denominator for all cooperatives in all sectors and all regions, and Cooperatives in Kenya, including SACCOs are no exception. According to the ICA, the Cooperative identity and values are immutable, but the principles have been reviewed and reformulated by ICA. Additionally, the ICA acknowledges the fact that the Statement on the Cooperative Identity is the central hallmark towards legislative and regulatory recognition of the Cooperative Model's unique character.

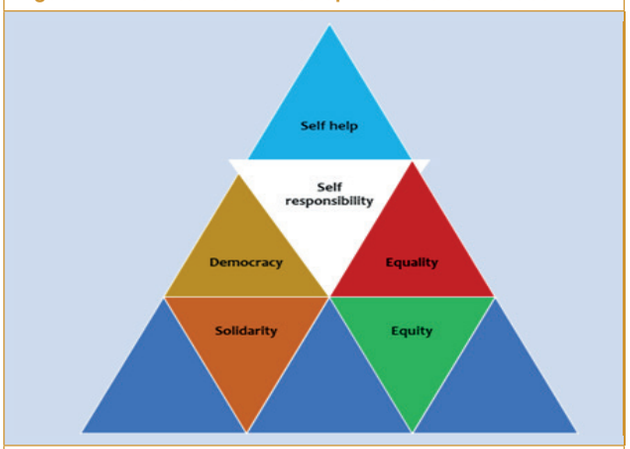

1.2. The Cooperative Definition

The universal definition of a cooperative as adopted by the ICA in the Statement on the Cooperative Identity is that a cooperative is an autonomous association of persons united voluntarily to meet their common economic, social, and cultural needs and aspirations through a jointly owned and democratically controlled enterprise. Unlike other corporate legal entities or unincorporated bodies, co-operatives are not for profit but are for service; they are people-centered enterprises owned and run by, and for the benefit of the members thereof in a democratic and equal way, based on the 'one-member, one-vote rule'. The Kenyan Cooperative Societies Act is the principal statute providing the legal framework for the promotion and registration of cooperatives. It simply defines cooperatives as one registered under Section 4 thereof without succinctly incorporating the definition provided by the ICA. Section 4 of the Cooperative Societies Act provides that for a cooperative to be registered thereunder, it must have as its objects, "the promotion of the welfare and economic interests of its members or adherence to the principles of Islamic law" and has incorporated in its By-Laws the co-operative principles.

1.3 The Cooperative Values and Ethical Beliefs

The Statement on the Cooperative Identity encompasses ten (10) values and ethical beliefs upon which every Cooperative must be anchored upon. The values include self-help, self-responsibility, democracy, equality, equity, and solidarity, while the ethical beliefs include honesty, openness, social responsibility and caring for others which is in accordance with the tradition of the founders of cooperatives. These are summarised in Figures 1 and 2.

Figure 1: The International Cooperative Core Values

Source: International Cooperative Alliance

Figure 2: The Co-operative Ethical Beliefs

Source: International Cooperative Alliance

1.4 The International Cooperative Principles

There are seven (7) Cooperative Principles which have been adopted and applied by the ICA and thus applies uniformly to all Cooperative enterprises. These principles include voluntary and open membership; democratic member control; economic participation by members; autonomy and independence; education, training and information; co-operation among co-operatives, and concern for the community in general. In the Kenyan context, these principles have been incorporated in Section 4 of the Cooperative Societies Act which mandatorily requires all Cooperatives to incorporate these principles in their respective By-Laws, and regulated SACCOs are not an exception to this statutory requirement. The ICA has developed and issued Guidance Notes to the Cooperative Principles providing for their practical application in contemporary times of the 21st Century, a summary of which is provided in Table 1.

Table 1: Summary of the Cooperative Principles and their Application to Cooperative enterprises

#	PRINCIPLE	ABRIDGED GUIDANCE NOTES ON THE PRINCIPLE
1ST PRINCIPLE	VOLUNTARY AND OPEN MEMBERSHIP	Co-operatives are voluntary organisations, open to all persons able to use their services and willing to accept the responsibilities of membership, without gender, social, racial, political or religious discrimination.
2ND PRINCIPLE	DEMOCRATIC MEMBER CONTROL	Co-operatives are democratic organisations controlled by their members, who actively participate in setting their policies and making decisions. Men and women serving as elected representatives are accountable to the membership. In primary co-operatives members have equal voting rights (one member, one vote) and co-operatives at other levels are also organised in a democratic manner.
3RD PRINCIPLE	MEMBER ECONOMIC PARTICIPATION	Members of Cooperatives contribute equitably to, and democratically control, the capital of their co-operative. At least part of that capital is usually the common property of the co-operative. Members usually receive limited compensation, if any, on capital subscribed as a condition of membership. Members allocate surpluses for any or all of the following purposes: developing their co-operative, possibly by setting up reserves, part of which at least would be indivisible; benefiting members in proportion to their transactions with the co-operative; and supporting other activities approved by the membership.
4TH PRINCIPLE	AUTONOMY AND INDEPENDENCE	Co-operatives are autonomous, self-help organisations controlled by their members. If they enter into agreements with other organisations, including governments, or raise capital from external sources, they do so on terms that ensure democratic control by their members and maintain their co-operative autonomy.

Table 1: Summary of the Cooperative Principles and their Application to Cooperative enterprises

#	PRINCIPLE	ABRIDGED GUIDANCE NOTES ON THE PRINCIPLE
5TH PRINCIPLE	EDUCATION, TRAINING, AND INFORMATION	Co-operatives provide education and training for their members, elected representatives, managers, and employees so they can contribute effectively to the development of their co-operatives. They inform the general public - particularly young people and opinion leaders - about the nature and benefits of co-operation.
6TH PRINCIPLE	CO-OPERATION AMONG CO-OPERATIVES	Co-operatives serve their members most effectively and strengthen the co-operative movement by working together through local, national, regional and international structures.
7TH PRINCIPLE	CONCERN FOR COMMUNITY	Co-operatives work for the sustainable development of their communities through policies approved by their members.

2.0 THE ORGANIZATION OF COOPERATIVES IN KENYA

2.1 Introduction

The Cooperative sector in Kenya has over the years and traditionally been organised into three (3) major categories namely vertical structuring; nature of intermediation or services or business undertaken; and the legal and regulatory framework applicable to the Cooperative enterprise. The major categories of cooperative enterprises on their part leads to the micro-typology of the cooperatives under each of the major category. The classification of cooperative enterprises is critical in providing a basis for identification of the risks attendant to each of the category or class, and the formulation of appropriate policy and legal policy interventions relevant to the risk.

2.2 Vertical Organization of Cooperatives

The vertical organizations of cooperatives in Kenya, as it is elsewhere in the world of cooperatives, is informed by the cooperative principle of cooperation among cooperatives which provides inter alia that "Co-operatives serve their members most effectively and strengthen the co-operative movement by working together through local, national, regional and international structures". It is also closely associated with the Cooperative value of solidarity which opines that Co-operatives are better together, and that by working together, co-operatives gain the expertise, scale, and support necessary to heighten awareness, sustainability, and impact, especially where fixed costs and resources can be shared. In this, the Guidance Notes to the Cooperative Principles by the ICA exhorts co-operatives to co-operate with each other in competitive markets through forming co-operative groups, secondary co-operatives, and federations to realise the co-operative advantage and create commonwealth for mutual benefit.

The vertical organization of cooperative sector is compromised of the Primary Cooperatives, the Secondary Cooperatives, the Tertiary Cooperatives, and the Apex Cooperatives. These four (4) clusters of vertical organization of cooperatives are recognized in the principal legislation governing the registration of Cooperatives in Kenya, namely the Cooperative Societies Act and are summarised in Table 2.

Figure 2: Summary of the Vertical Classification of Cooperatives in Kenya

CLASSIFICATION OF COOPERATIVE	KEY CHARACTERISTIC OF THE CLASS OF THE COOPERATIVE
THE APEX COOPERATIVE	It is the national co-operative formed at the national level by the Co-operative movement to promote co-operative development and represents the interests of co-operative societies locally and internationally. Currently, the Apex Co-operative Society in Kenya is the Co-operative Alliance of Kenya (CAK)
TERTIARY COOPERATIVES	The membership may comprise both primary and secondary Co-operatives, and not individual persons. They serve those affiliate members and not individual persons.
SECONDARY COOPERATIVES	The membership is restricted to two or more primary Co-operatives. They are supposed to strictly serve their affiliate primary Co-operatives only and should not serve individual person membership. They are also called Co-operative Unions and defined in Section 2 and 5 of the CSA.
PRIMARY COOPERATIVES	Their membership is restricted to individual persons, and they serve the individual members. They are defined in Section 2 and 5 of the CSA. Both DT-SACCOs and Non-WDT-SACCOs are primary cooperatives. Section 16 of the CSA however allows corporate and unincorporated entities to join membership of Primary Cooperatives, subject to resolution of the general meeting.

2.3. Nature of Intermediation Classification of Cooperatives

Cooperatives all over the world are economic enterprises and thus engage in very defined business lines which are usually contained in their respective objects as enshrined in their By-laws. Two (2) main lines of businesses have emerged overtime in the Cooperative sector, namely financial intermediation business and non-financial intermediation business. In the first instance, Cooperatives which are registered with the objects of undertaking financial intermediation business services constitute the Financial Cooperatives cluster, and such financial intermediation services may include mobilization of deposits, issuance of credit and loan facilities, and undertaking financial investments on behalf of their members. The two main micro-typologies of cooperatives under this class are the SACCOs (Savings and Credit Cooperatives); and the Investments or Housing Cooperatives. In the second place, cooperative which are registered with the objects of undertaking any business which does not entail intermediating finances on behalf of their members constitute the non-financial cooperatives.

There are several micro-typologies of the non-financial cooperatives such as Marketing Cooperatives, Worker Cooperatives, Consumer Cooperatives, Transport Cooperatives among others. Table 3 shows a summary of the distribution of the micro-typologies of cooperatives in Kenya as either Financial Cooperatives or Non-Financial Cooperatives.

Table 3: Summary of the Nature of Intermediation Classification of Cooperatives

	TYPES	CHARACTERISTICS	EXAMPLES
1	FINANCIAL COOPERATIVES	These are the cooperatives which are registered with the objectives of financial intermediation on behalf of their members in one way or the other. A Financial Cooperative may be a primary, a secondary or tertiary cooperative. The Apex Cooperative may not directly provide financial intermediation services.	1. DT-SACCOs 2. Regulated Non-WDT-SACCOs 3. Non-Regulated Non-WDT-SACCOs 4. Investment Cooperatives 5. Housing Cooperatives
2	NON-FINANCIAL COOPERATIVES	These are cooperatives registered with the key objectives of furthering the socio-economic interest of their members, without the cooperative intermediating financial services between the counterparties as a financial institution. A Non-Financial Cooperative may be a primary, a secondary or tertiary cooperative. The Apex Cooperative may not directly provide financial intermediation services.	1. Marketing Cooperatives 2. Consumer Cooperatives 3. Transport Cooperatives, 4. Worker Cooperatives

Given the underlying risks associated with financial intermediation business services, Financial Cooperatives also known in the international financial circles as Cooperative Financial Institutions (CFIs), tend to be strenuously regulated than their Non-Financial Cooperatives counter-parts. In Kenya however only the DT-SACCOs and the regulated Non-WDT-SACCOs have been subjected to stringent financial regulations vide the provisions of the Sacco Societies Act and the Regulations made thereunder. The non-regulated Non-WDT-SACCOs (compromised of those SACCOs with deposits below the threshold of Kshs 100,000/-). The Non-Financial Cooperatives on the other hand are only subject to the provisions of the Cooperative Societies Act and leads to the last clustering of Cooperatives namely the Legal and Regulatory Framework clusters.

2.4 The Legal and Regulatory Framework Clustering of Cooperatives

There are two (2) main legislations governing Cooperative enterprises in Kenya and thus the legal and regulatory framework clustering. Firstly, is the Cooperative Societies Act which provides for the "constitution, registration and regulation of co-operative societies and for purposes incidental thereto". All cooperatives in Kenya, including

SACCOs are therefore registered and governed by the provisions of the Cooperative Societies Act. However, SACCOs as financial institutions are additionally subject to the provisions of the Sacco Societies Act and the Regulations made thereunder, with the Regulations 2010 dealing with DT-SACCOs and the Regulations 2020 dealing with the regulated Non-WDT-SACCOs.

The Sacco Societies Act and the Regulations made thereunder provides for a comprehensive regulatory and supervisory framework for financial deposit-taking and specified non-deposit taking businesses of SACCOs in Kenya. It lays down the minimum prudential and market conduct standards including consumer protection mechanisms aimed at ensuring the financial soundness, and stability of the regulated SACCOs as well as the safety of the financial deposits held by the regulated SACCOs on behalf of their membership. It is important to note that the provisions of the Cooperative Societies Act apply to DT-SACCOs and the regulated Non-WDT-SACCOs in all matters which are not provided for in the Sacco Societies Act by dint of Section 67 of the Sacco Societies Act which provides that the "provisions of the Co-operative Societies Act shall apply to a SACCO carrying out deposit-taking business ... with respect to any matter, to the extent that the matter in question is not dealt with in [Sacco Societies] Act".

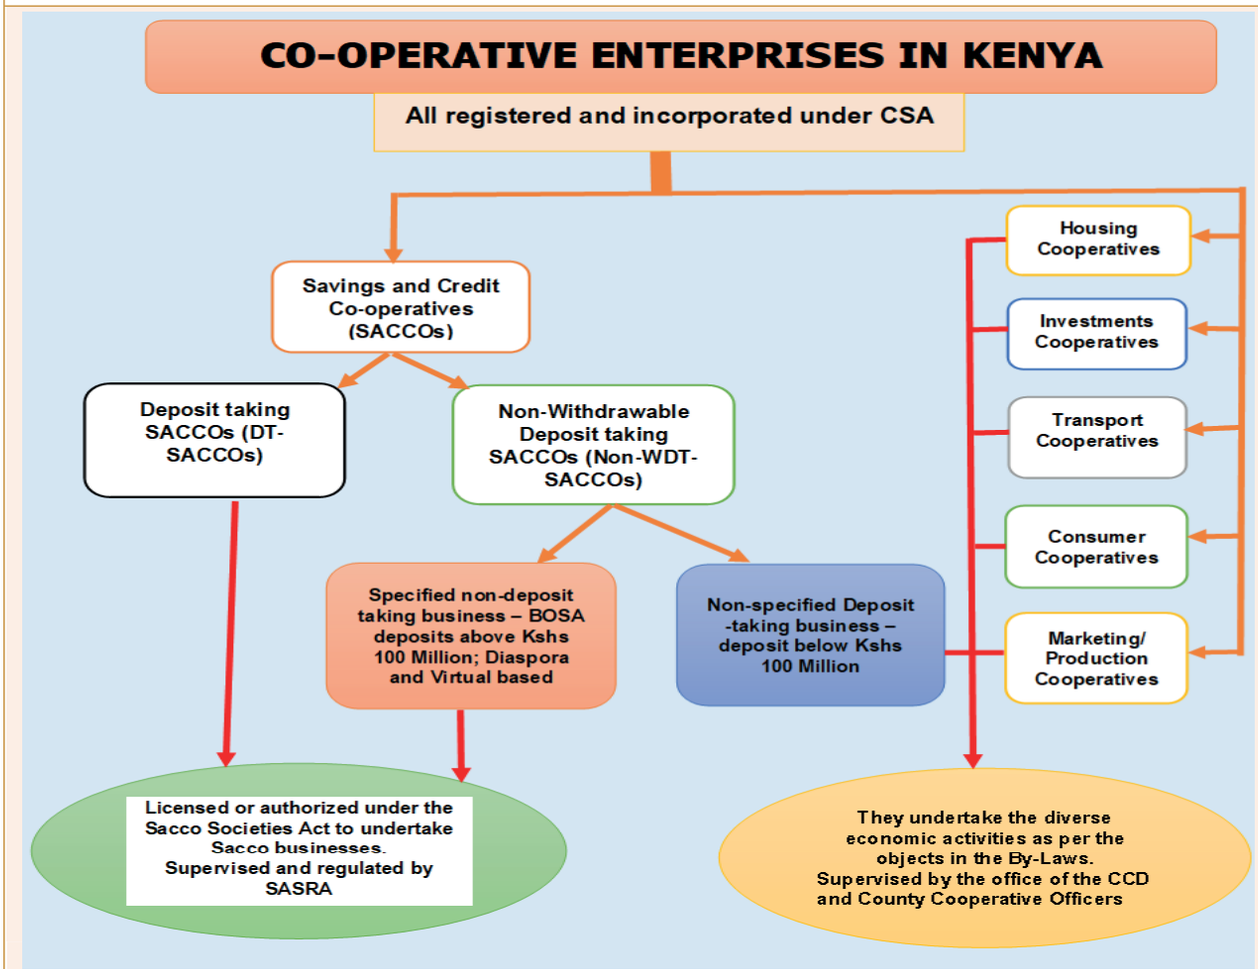

The Cooperative Societies Act on the other hand provides for manner of registration and incorporation of cooperative entities. It is thus the point at which a cooperative entity becomes a legal entity. It also provides the general structure of governance of all cooperative entities (whether primary, secondary, tertiary or Apex), the procedure and processes for deregistration and liquidation of cooperative entities among others. The Cooperative Societies Act is administered by the Commissioner for Cooperative Development which is an office in the public service; but also establishes the Cooperative Tribunal as the dispute resolution forum for all cooperative disputes arising from the implementation of both the Cooperative Societies Act but also the Sacco Societies Act.

2.5. The Typology of Primary Cooperatives in Kenya

Figure 3 provides the various types of Primary Cooperative enterprises in Kenya. These typologies have arisen out of practice over the years, and not by fiat of any legislative framework, and can either be financial or non-financial cooperative enterprise. The National Cooperative Policy has enumerated the two categories of financial and non-financial co-operative enterprises. Financial co-operatives include DT-SACCOs; the Regulated Non-WDT-SACCOs, Investment Co-operatives, and Housing Co-operatives. They are considered financial because they collect deposits from their membership and intermediates the same in one way of the other. The DT-SACCOs and the Regulated Non-WDTs are licensed or authorized by the Authority and intermediate the deposits collected from the members as credit and other loan advances. The Investments and the Housing Co-operatives on the other hand are supervised by the Commissioner for Co-operatives Development and respective county governments where they are situated. They intermediate the deposits collected from their members for purposes of investments in different portfolios in accordance with the members' resolutions mainly in purchase and/or construction of houses or purchase of land or stock in other entities.

On the other hand, the non-financial co-operatives include Transport Co-operatives, Consumer Co-operatives and production or marketing Co-operatives which are supervised by the Commissioner for Co-operatives Development. They are considered non-financial because they do not engage in any financial intermediation on behalf of their membership. Any funds collected from the members are therefore meant for the Cooperative as an institution and members collectively, and the members may thus not lay any direct claim thereto.

Figure 3: Types of co-operative enterprises in Kenya

Source: SASRA Database

2.6 The Organization of The Authority's Supervisory Structure

The Authority is established under the provisions of Section 4 of the Sacco Societies Act, and thus acts as the government's principal agency responsible for the regulation and supervision of SACCOs in Kenya. Despite the aforesaid wide legal mandate, it is important to observe that Section 3 of the Act limits the Act's application to those SACCOs that undertake deposit taking SACCO business and those SACCOs that undertake specified non-deposit taking SACCO business. Towards this end, two regulations have been made pursuant to Section 3 of the Sacco Societies Act. Firstly, are the Sacco Societies (Deposit-Taking SACCO Business) Regulations, 20210 (the Regulations 2010) which applies to SACCOs undertaking deposit-taking business and also known as the DT-SACCOs. All DT-SACCOs are thus required to be licensed, regulated, and supervised by the Authority, and any person undertaking the deposit-taking SACCO business in Kenya without a valid license from the Authority, is doing so illegally. Secondly, are the Sacco Societies (non-deposit taking business) Regulations 2020 (the Regulations 2020) which applies to the SACCOs which undertake the specified non-deposit taking businesses. The Regulations 2020 defines the specified non-deposit taking businesses to include the -

a) non-deposit taking business in which the total non-withdrawable deposits, from members is equal to or exceeds the sum of one hundred million shillings;

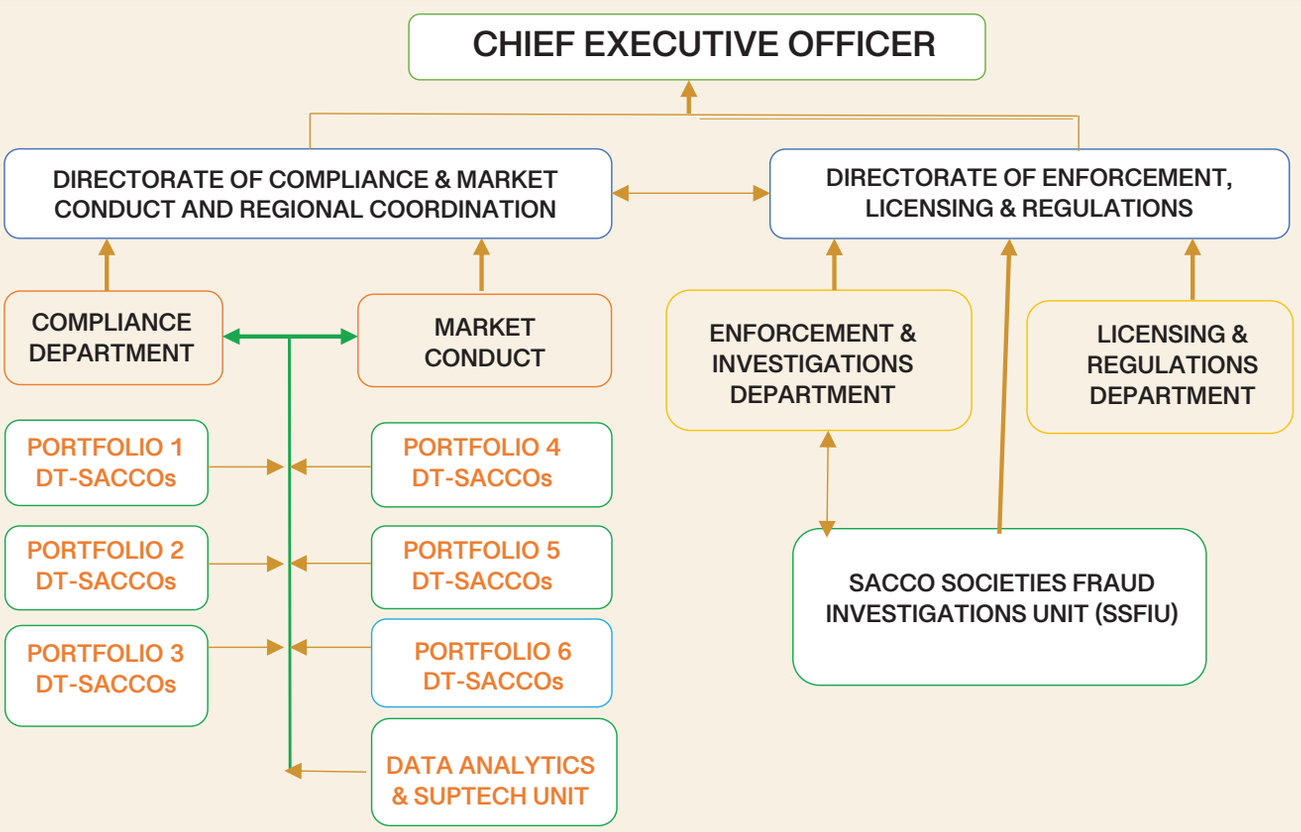

b) non-deposit taking business in which the SACCO mobilises membership and subscription to its share capital through digital or other electronic payment platforms; or

c) non-deposit taking business in which the SACCO mobilises membership and

subscription to its share capital from persons who are ordinarily resident outside the country.

To achieve its regulatory and supervisory objectives over the regulated SACCOs, the Authority has adopted a Risk Based Supervisory approach which aims at early identification of risks in the various regulated SACCOs and assigning the limited resources towards deploying early prompt correct actions in SACCOs exhibiting higher risks profiles than those with lesser risk profiles. To support the Risk Based Supervisory approach, the Authority's supervision has been organised in the manner summarised in Figure 4 which includes two Directorates namely the Directorate of Compliance, Market Conduct & Regional Coordination and the Directorate of Enforcement, Licensing and Regulations. Each of the Directorates are subdivided into departments with the Directorate of Compliance and Market Conduct consisting of the Compliance Department and the Market Conduct Department; while the Directorate of Enforcement, Licensing and Regulations is constituted of the Enforcement and Investigations Department incorporates the activities of the SACCO Societies Fraud Investigations Unit (SSFIU); and the Licensing and Regulations Department.

Figure 4: The Organization of the Authority Supervisory Structure for Regulated SACCOs

Source: SASRA Organization Organogram

The Directorate of Compliance, Market Conduct and Regional Coordination is responsible for implementing the Authority's core mandate of Regulation and Supervision of the activities of Regulated SACCOs in accordance with Section 5 of the Sacco Societies Act and its attendant Regulations as well as other relevant laws. While the Compliance function oversees the prudential regulation of ensuring safety, stability, and soundness of the Regulated SACCOs; the Market Conduct function handles issues relating to member protection and conduct of business in the Regulated SACCO industry. The Enforcement Department on the other hand oversees the implementation of the supervisory enforcement actions provided under the Sacco Societies and thations Unit (SSFIU) which detects

and investigates suspected incidences of criminal conduct within the Regulated SACCO industry, and where appropriate make recommendations for prosecution. The Licensing department receives and processes new applications for deposit-taking licenses and new applications for authorization to undertake specified non-deposit taking businesses. The Regulations department develops and issues supervisory and regulatory instruments including but not limited to regulatory policies, guidance notes and circulars among others.

3.0. THE REGULATED SACCOs AND THE NATIONAL FINANCIAL SECTOR

3.1 General Overview of the national financial sector

The national financial sector in Kenya generally consists of the deposit-taking financial institutions; the non-deposit financial institutions; the financial market infrastructures providers; the informal financial service providers; and the financial sector regulators. Table 4 provides a summary of the key players within the domestic financial sector landscape.

Table 4: An Overview of the National Financial Sector Players

	CATEGORY OF INSTITUTIONS	NATURE OF BUSINESS	EXAMPLES
1	**DEPOSIT TAKING FINANCIAL INSTITUTIONS**	Take demand deposits and may intermediate such deposits on behalf of the depositors mainly as credit.	1. Commercial Banks. 2. Mortgage Finance Companies. 3. Microfinance Banks. 4. DT-SACCOs; and 5. Regulated Non-WDT-SACCOs
2	**NON-DEPOSIT TAKING FINANCIAL INSTITUTIONS**	They do not take demand deposits but provide different financial services to the public such as investments, advisory or credit.	1. Insurance, 2. Pensions, 3. Capital Markets, 4. Development Finance Institutions, and 5. Digital Credit Providers.
3	**FINANCIAL MARKETS INFRASTRUCTURE PROVIDERS**	Financial Market Infrastructure providers facilitate the clearing, settlement, and recording of monetary and other financial transactions.	1. National Payment and Settlement Services Providers. 2. Credit Reference Bureaus etc.
4	**INFORMAL FINANCIAL SERVICE PROVIDERS**	Informal finance providers offer financial services through different forms but are not subject to regulation. They have a relatively well-defined organizational structure.	1. Financial Cooperatives (Investments and Housing) 2. Non-Regulated NWDT-SACCOs 3. Rotational Savings Groups (Chamas and other collectives)
5	**FINANCIAL SECTOR REGULATORS**	The regulated financial sectors in Kenya include the banking; the insurance; the securities; the pensions; and the SACCO subsectors. Each subsector has a specific sector regulator	1. The Central Bank of Kenya. 2. The Sacco Societies Regulatory Authority (SASRA). 3. The Retirement Benefits Authority (RBA). 4. The Insurance Regulatory Authority (IRA). 5. The Capital Market Authority (CMA). 6. Government Ministries.

Since the onset of formal regulation and supervision of SACCOs in June 2010 with the operationalization of the Sacco Societies Act, the regulated SACCOs in Kenya composed of DT-SACCOs and Non-WDT-SACCOs have been integrated as part and parcel of the national financial sector as deposit-taking financial institutions. Other deposit-taking financial institutions include commercial banks, micro-finance banks, and mortgage refinance companies.

3 .2. Comparative Performance of Regulated SACCOs in the Financial Sector

Table 5(a) indicates the trend in financial performance in selected parameters of the DT-SACCOs on the one hand, and the Commercial and Microfinance banking financial institutions on the other hand. Commercial banking institutions dominated the deposit taking institutions with total assets of Kshs. 6.59 Trillion in 2022 followed by the Regulated SACCOs at Kshs. 890.30 billion while the Microfinance Banks' total assets stood at Kshs. 70.43 billion. In addition, Customer deposits in Commercial banking institutions stood at Kshs. 4,761.70 Billion compared to the Regulated SACCOs whose members (customers') deposits stood at Kshs. 620.45 billion while those of Microfinance institutions stood at Kshs 46.49 billion in 2022 respectively. In the Gross Loans and Advances front, again Commercial

banking Institutions led with Kshs. 3,630.25 Billion in 2022 followed by Regulated SACCOs with Kshs. 680.35 Billion while the Microfinance Banks stood at Kshs. 39.33 Billion in the same period. Notably, unlike Commercial Banks and MFBs, SACCOs' loans and advances outweigh the deposits, an indication that SACCOs are the preferred loaning institutions by savers due to their competitive rates, social collateral (guarantee) model. It is worth noting that variance is funded by capital and to a small extent external borrowing. The Regulated SACCOs have continued to record a lower non-Performing loan at 8.40% in 2022 compared to 13.80% for Commercial Banking Institutions and 31.78% for Microfinance Banks in the same period.

Table 5(a): Comparative financial performance of Regulated SACCOs, Commercial Banks and Microfinance Banks

	Year	Total Assets ** (Kshs Billion)	Gross Loans & Advance (Kshs Billion)	Net Loans & Advances (Kshs. Billions)	Gross NPL/Gross Loans (%)	Customer Deposits (Kshs. Billion)	No. of Institutions	No. of Branches
DT-SACCOs*	2020	627.68	473.74	450.58	8.39%	430.11	175	537
	2021	691.09	522.25	488.20	8.86%	474.25	176	559
	2022	763.50	586.16	549.20	8.40%	522.59	176	596
NWDT-SACCOs	2020	106.54	80.28	79.42	N. A	83.00	185	N. A
	2021	116.02	86.50	84.48	9.78%	90.64	185	4

Source: *SASRA Database. The data in respect of commercial and microfinance banks were obtained from CBK. **These total assets are inclusive of the assets of (Non-Bank Financial Institutions) as designated by CBK. ***MFBs refer to Microfinance Banking Institutions regulated by CBK.

Figure 5(a) provides a summary of the proportionate distribution of the total assets, deposits, and gross loans within the three (3) sectors of deposit taking financial institutions comprising the commercial banks, the Micro-Finance banks and the Regulated SACCOs. The analysis shows that the Regulated SACCOs' total assets in 2022 accounted for 11.79% of the total assets of deposit taking financial institutions in Kenya. This reflected a marginal increase from a proportion of 11.69% of the total assets of the deposit-taking financial institutions in 2021. The commercial banks still have the largest share of the deposit-taking financial institutions' total assets with a proportion of 87.28% in 2022 but representing a small decline from a proportion of 87.24% in 2021. The Micro-Finance Banks accounted for the least amount and proportion of the total assets of the deposit-taking financial institutions in 2022 at 0.93% which is a drop from a proportion of 1.07% reported in 2021.

On the credit front, the Regulated SACCOs gross loans accounted for 15.60% of the gross loans issued in 2022 by all the deposit-taking financial institutions in Kenya. This also represented a marginal increase in the proportion of gross loans in 2021 which stood at 15.54%. The commercial banking sector remains the most dominant in the credit provisioning with a market share of 83.25% in 2022 representing only a slight drop from a market share of 83.09% in 2021; while the Micro-Finance Banks remains the least dominant with a market share of 1.15% in 2022 compared to a market share of 1.38% in 2021. On the deposits front, the Regulated SACCOs market share stood at 11.43% in 2022 compared to 11.15% in 2021. The market share for the commercial banks on the other hand stood at 87.71% in 2022 compared to a market

share of 87.86%; while the Micro-Finance Banks had a market share of 0.86% of the deposits among the deposit-taking financial institutions compared to a market share of 0.99% reported in 2021.

Table 5(b): Comparative Market share in Total Assets, Gross Loans, and Deposits of Regulated SACCOs, Commercial Banks and Microfinance Banks

Source: *SASRA Database. The data in respect of commercial and microfinance banks were obtained from CBK. **These total assets are inclusive of the assets of (Non-Bank Financial Institutions) as designated by CBK. ***MFBs refer to Microfinance Banking Institutions regulated by CBK.

The contribution of the Regulated SACCO industry to the national Gross Domestic Product measured on the basis of the total assets of Regulated SACCOs to the nominal GDP is summarised in Table 6. The analysis shows that the Regulated SACCOs total assets to the national GDP remained constant at 6.66% in 2022 as it was in 2021 with the DT-SACCOs segmental total assets to the national GDP being 5.71% in 2022 compared to 5.75% recorded in 2021, while the NWDT-SACCOs segmental total assets to the national GDP stood at 0.95% in 2022 compared to 0.96% in 2021. The foregoing shows that the national GDP has for the second consecutive year grown at an almost the same rate as the rate of growth of the Regulated SACCOs total assets as well as the segmental rate of growth.

Table 6: Share of Regulated SACCOs industry's Total Assets to the Gross Domestic Product (GDP)

YEAR	2020		2021		2022	
Nominal GDP (Billions)*	**10,715.1**		**12,098.2**		**13,368**	
Industry/Indicator	**Total Assets (Kshs. Billions)**	**Share of GDP (%)**	**Total Assets (Kshs. Billions)**	**Share of GDP (%)**	**Total Assets (Kshs. Billions)**	**Share of GDP (%)**
Banks (excluding MFBs) *	5,420.10	50.58%	6,022.15	49.78%	6,589.82	49.29%
Microfinance Banks*	74.88	0.70%	73.96	0.61%	70.43	0.53%
Insurance*	761.34	7.11%	845.83	6.99%	943.73	7.06%
Pensions*	1,398.95	13.06%	1,547.43	12.79%	1,576.22	11.79%
DT-SACCOs	627.68	5.86%	691.09	5.71%	763.50	5.71%
NWDT-SACCOs	106.54	0.99%	116.02	0.96%	126.80	0.95%
TOTALS	**8,389.49**		**9,296.48**		**10,070.50**	

Source: SASRA Database. *The GDP data obtained from the KNBS. The data from commercial and microfinance banks obtained from CBK while the data from the Pensions and Insurance industries obtained from the RBA and IRA respectively.

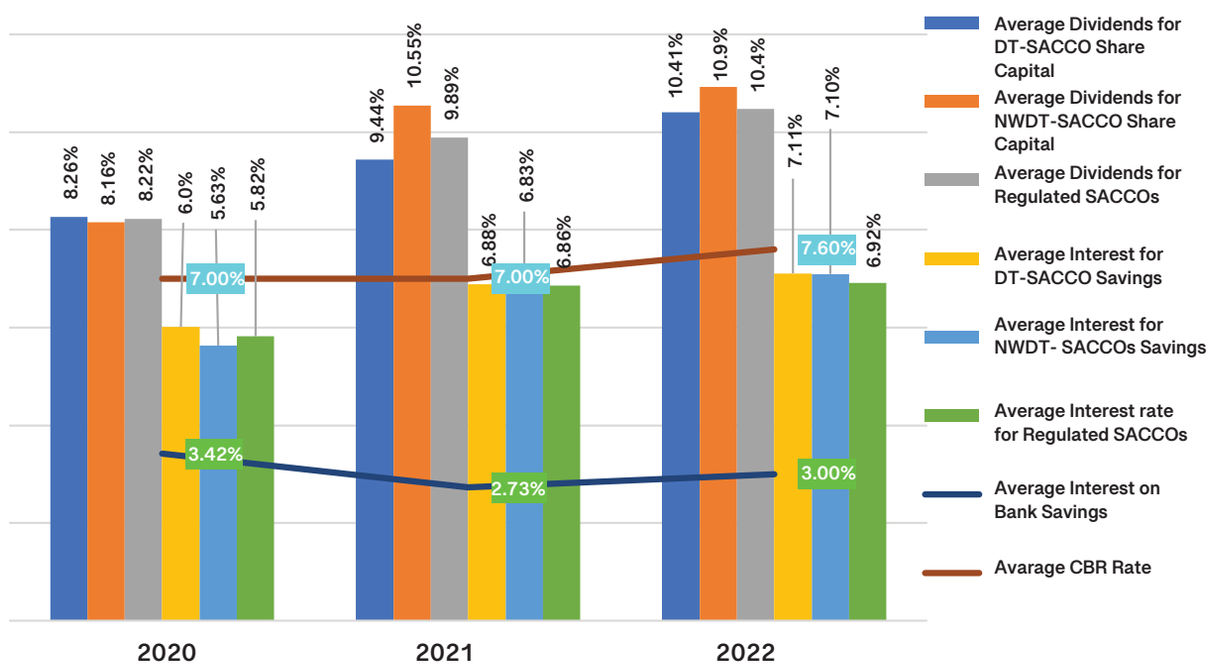

The commercial banking sectors' total assets to the national GDP remained the most dominant within the financial sector space accounting for over 48.90% of the national GDP in 2022 with the pensions and

insurance industry's following at 11.79% and 7.06% respectively. The contribution of the Regulated SACCOs coming at 6.66% is quite significant to the economy and cement the critical role which Regulated SACCOs play in the national development space. And since most of the Regulated SACCOs serve household economies especially those in the lower echelons of the economic pyramid, a lot more needs to be done to further deepen their contribution.

3.3. The Regulated SACCOs and Interest rates

Figure 5(b) provides a comparative interest rate for the Regulated SACCO industry and the commercial banking industries. The average interest rates paid by the Regulated SACCOs on member deposits in 2022 marginally increased to 6.92% in 2022 from 6.86% paid in 2021. The DT-SACCOs' segment paid the highest rates on their members' savings at 7.11% in 2022 compared to the NWDT-SACCOs which paid a mean interest rate of 7.10%. These returns on members' savings were however higher than the interest rates paid by commercial banks on savings which averaged 3% during the year 2022, and thus cements the dual comparative edge of savings in SACCOs which not only earns interest but also applied as collateral against loans advanced to members.

Figure 5(b): Comparative Interest Rates between Regulated SACCOs and the Commercial bank rates.

Source: SASRA Database. The data for commercial and micro-finance banks obtained from CBK while data for Regulated SACCOs obtained from SASRA database.

In addition, the Regulated SACCOs paid their members a return on their share capital at a mean rate of 10.47% in 2022 compared to a mean rate of 9.87% in 2021. The DT-SACCOs segment paid dividends on the members' shares at a rate of 10.41% in 2022 compared to a rate of 9.44% in 2021; while the NWDT-SACCOs' segment on the other hand paid a return on the members' shares as dividends at a rate of 10.92% in 2022 from a rate of 10.55% in 2021.

CHAPTER II
THE PERFORMANCE AND OPERATIONS OF REGULATED SACCOs IN KENYA

4.0. LICENSING, AUTHORIZATION AND MEMBERSHIP

4.1. The General Overview

Licensing of SACCOs to undertake deposit taking SACCO business is the entry point for supervision of DT-SACCOs. Section 23(1) of the Act provides inter alia that no person shall carry out deposit-taking SACCO business within the meaning of the Act, unless such person is a SACCO registered under the Co-operative Societies Act and holds a valid licence issued under the Act. The provisions of Part II of the Regulations 2010 enumerate the procedure for the issuance of licenses for DT-SACCOs, which are renewed on an annual basis subject to the DT-SACCO maintaining compliance with the standards set out in the Act and the said Regulations, 2010.

On the other hand, authorization is the entry point for supervision of NWDT-SACCOs by virtue of the provisions of the Regulations 2020, which provides for the manner of regulation and supervision of specified non-deposit-taking business. In particular, Reg. 4 of the Regulations 2020 defines specified non-deposit taking business as including –

(a) non-deposit taking business in which the total non-withdrawable deposits from members is equal to or exceeds the sum of one hundred million shillings;

(b) non-deposit taking business in which the SACCO Society mobilises membership and subscription to its share capital through digital or other electronic payment platforms; or

(c) non-deposit taking business in which the SACCO Society mobilises membership and subscription to its share capital from persons who are ordinarily resident outside the country.

It is also important to point out that NWDT-SACCOs shall not mobilise for membership and subscription to its share capital principally through digital or other electronic payment platforms or from persons who are ordinarily resident outside the Country unless it has been authorised to do so in writing by the Authority.

4.2. The Licensing Status

There were 176-DT-SACCOs licensed to undertake deposit taking SACCO business in Kenya at the commencement of the year 2022, all of which had their respective licenses renewed to operate for the year 2023. In full compliance with the requirements of Section 28 of the Act as read with Reg. 8 of the Regulations 2010, the list of DT-SACCOs whose licenses were renewed to undertake deposit-taking SACCO business in the year commencing January 2023 was duly published by the Authority in the Kenya Gazette Notice No. 781 dated 27th January 2023 and the Standard Newspaper dated 30th January 2023. The list may also be accessed and/or downloaded from the Authority's website at www.sasra.go.ke. The Authority thus continues to put members of the public on notice that any person undertaking deposit taking business with an entity purporting to be a SACCO Society, but which does not hold a valid license from the Authority, shall be doing so at his or her risk and peril.

4.3. The Authorization Status

There were 185-NWDT-SACCOs authorized to undertake specified non-deposit taking business at the beginning of the year 2022. However, two of the NWDT-SACCOs failed to apply for the renewal of their authorizations by 3oth November 2022 as required and hence their authorizations were not renewed while the remaining 183-NWDT-SACCOs had their respective authorizations renewed to operate in 2023. In compliance with the requirements of Reg. 6 of the Regulations 2020, the full list of the NWDT-SACCOs whose authorizations were successfully renewed to operate for the period commencing January 2023 was published by the Authority in the

Kenya Gazette Notice No. 781 dated 27th January 2023 and the Standard Newspaper dated 30th January 2023. The list may also be accessed and/or downloaded from the Authority's website at www.sasra.go.ke.

Consequently, the respective authorizations for the two (2) NWDT- SACCOs which failed to apply for renewal of their Authorization were revoked and as such they ceased to undertake specified non-deposit taking business in Kenya. Table 7 provides details of the two (2) NWDT-SACCOs whose authorization were not renewed and thus revoked, together with the overall reasons and basis for the non-renewal of their authorization and subsequent revocations of the same. In accordance with Reg. 10 of the Regulations 2020, the list of these SACCOs whose authorizations were not renewed and subsequently revoked was published in the in the Kenya Gazette Notice No. 781 dated 27th January 2023 and the Standard Newspaper dated 30th January 2023 as a caution to the members of the public as well as the members of the respective SACCOs thereof.

One (1) of the NWDT-SACCOs namely Digital Media Regulated SACCO Society Ltd has been authorised to operate as a digital SACCO Society by mobilising membership and subscription to its share capital through digital or other electronic payment platforms in accordance with Reg. 4(1)(b) of the Regulations 2010.

Three (3) of the NWDT-SACCOs were authorised to mobilise membership and subscription to its share capital from persons who are ordinarily resident outside the country (popularly known as Diaspora Based SACCOs) under Reg. 4(1)(c) of the Regulations 2020 namely the –

a) Kenya USA Diaspora Regulated NWDT-SACCO Society Ltd;
b) Grand Granite Regulated NWDT-SACCO Society Ltd; and
c) Stoke – UK Diaspora Regulated NWDT-SACCO Society Ltd.

The remaining 179-NWDT-SACCOs were authorised to operate on the basis that the members deposit liabilities held by them had reached and/or exceeded the Kshs 100 Million threshold in accordance with Reg. 4(1)(a) of the Regulations 2020. The Authority continues to warn the members of the public from undertaking any form of SACCO business with any SACCO Society falling within the three categories of specified non-deposit taking business unless such SACCO Society it duly authorized. In particular, members of the public including that resident outside the country (popularly referred to as diaspora) should not undertake SACCO business with any entity purporting to be digital SACCO Society or a diaspora SACCO Society, if the entity is not duly authorised.

Table 7: List of NWDT-SACCOs whose Authorizations were revoked in 2022 and thus not Renewed to operate for the year 2023

	Name of the SACCO Society	Physical Address	Location of Head Office	Reasons and grounds for non-renewal of authorization and revocation
1	NASCA Sacco Society Ltd	P.O Box 19010 - 00501, Nairobi	JKIA NAS Building, Mankuli, Nairobi City County	a) Did not apply for renewal. b) Technically insolvent c) Inability to meet the prescribed prudential ratios. d) Inability to meet financial obligations especially to members.
2	BORNEKA Sacco Society Ltd	P.O Box 9477 - 40141, Kisumu	Milimani Estate, Kisumu City County	a) Did not apply for renewal. b) Members resolved to wind-up the SACCO and cease business. c) Inability to meet the prescribed prudential ratios. d) Inability to meet financial obligations especially to members.

Source: SASRA Database

In terms of new application for authorization to undertake specified non-deposit taking business the Authority received a total of six (6) applications. The applications were considered, and onsite inspections undertaken. One (1) application was declined because the applicant SACCO Society did not meet the minimum standards for authorisation as prescribed in the Sacco Societies Act and the Regulations 2020, while the remaining five (5) applicant SACCO Societies were given advisories to improve their systems before further consideration of their

individual applications. Table 8 provides a summary of the status of the applications for authorizations received and considered by the Authority in 2022.

Table 8: Summary of the status of applications for authorization to undertake specified non deposit taking SACCO business.

	APPLICANT SACCO SOCIETY	DATE OF APPLICATION	TOWN LOCATED	COUNTY LOCATED	STATUS
1	GSK SACCO SOCIETY Ltd	4th March 2022	Industrial Area, Nairobi	Nairobi City	▪ Onsite inspection undertaken on 21st July 2022. ▪ SACCO Society issued with letter of corrective action to be implemented before Authorization. ▪ SACCO Society yet to submit to the Authority status of implementation of the correction actions
2	URBAN ROADS SACCO Society	22nd July 2022		Embakasi, Airport Area, Nairobi	▪ Onsite inspection undertaken on 21st July 2022. ▪ SACCO Society issued with letter of corrective action to be implemented before Authorization. ▪ SACCO Society yet to submit to the Authority status of implementation of the correction actions
3	TIMAFLOR SACCO Society Ltd	15th July 2022	Timau Town Centre	Laikipia	▪ SACCO Society inspected on 29th September 2022. ▪ SACCO Society issued with letter of corrective action to be implemented before Authorization. ▪ SACCO Society yet to submit to the Authority status of implementation of the correction actions.
4	PEHANI SACCO Society Ltd	6th May 2022	Ruiru Town	Kiambu	▪ SACCO Society inspected on 29th September 2022 ▪ SACCO Society issued with letter of corrective action to be implemented before Authorization. ▪ SACCO Society yet to submit to the Authority status of implementation of the correction actions
5	SECULARM SACCO Society Ltd		Parklands, Nairobi	Nairobi City	▪ SACCO Society inspected on 25th July 2022. ▪ A meeting with the Board of Directors held and application pending processing.
6	J-HELA SACCO Society Ltd	26th April 2022	Makongeni Estate, Thika Town	Kiambu	▪ Application for authorization rejected for failure to meet the prescribed minimum standards. The SACCO Society is thus not authorised to undertake specified non-deposit taking business.

Source: SASRA Database

Caution:

These NWDT-SACCOs are still not authorized to undertake specified non-deposit taking SACCOs and consequently their deposits must not exceed the prescribed threshold of one hundred million shillings (Kshs 100 Million).

4.4. The Membership in the Regulated SACCOs

In accordance with the International Cooperative Alliance (ICA) definition of Cooperative enterprises, SACCOs as cooperatives are member-based financial institutions which strictly serve their membership. The Cooperative Societies Act and the SACCO Societies Act therefore strictly forbids SACCOs from transacting SACCO business with persons or entities who are not members thereof. The membership of every SACCO is however defined by the minimum number of shares which every member must subscribe, in addition to any initial application fees as may be contained in the SACCOs By-Laws. SACCOs therefore operate on the trichotomy of member-owned, member-managed, and member-

customer concept and the more members a SACCO has, the more customers it will have.

The total number of individual memberships recorded in the registers of the 359-Regulated SACCOs (excluding the two (2) NWDT-SACCOs whose authorizations were revoked) during the year ended December 2022 was 6.42 Million persons which is an increase of 7.02% from a total membership of 5.99 Million members reported in 2021. Table 9 provides an analysis of the total membership in Regulated SACCOs during the year ended December 2022. The analysis shows that majority of the membership were concentrated among the 176-DT-SACCOs which had a total of 5.95 Million members accounting for 92.60% of the entire membership of Regulated SACCOs. The 183-NWDT-SACCOs on the other hand reported their membership at 475,270 members representing a paltry 7.40% of the total membership of Regulated SACCOs. Consequently, DT-SACCOs remain the most dominant segment of the Regulated SACCOs in terms of membership and thus customer base.

The total number of active members, that is, those who had transacted with their respective SACCOs during the six (6) months period for DT-SACCOs, and twelve (12) months for NWDT-SACCOs, prior to December 2022, stood at 5.20 Million persons, which was made up of 4.85 Million members drawn from the DT-SACCOs and 346,000 members drawn from the NWDT-SACCOs. The number of dormant members, that is, those who had not made any financial transactions with their respective SACCOs for the six (6) months period for DT-SACCOs, and twelve (12) months for NWDT-SACCOs, prior to December 2022 stood at 1.22 Million drawn from 1.10 Million members of DT-SACCOs and 129,270 members of NWDT-SACCOs.

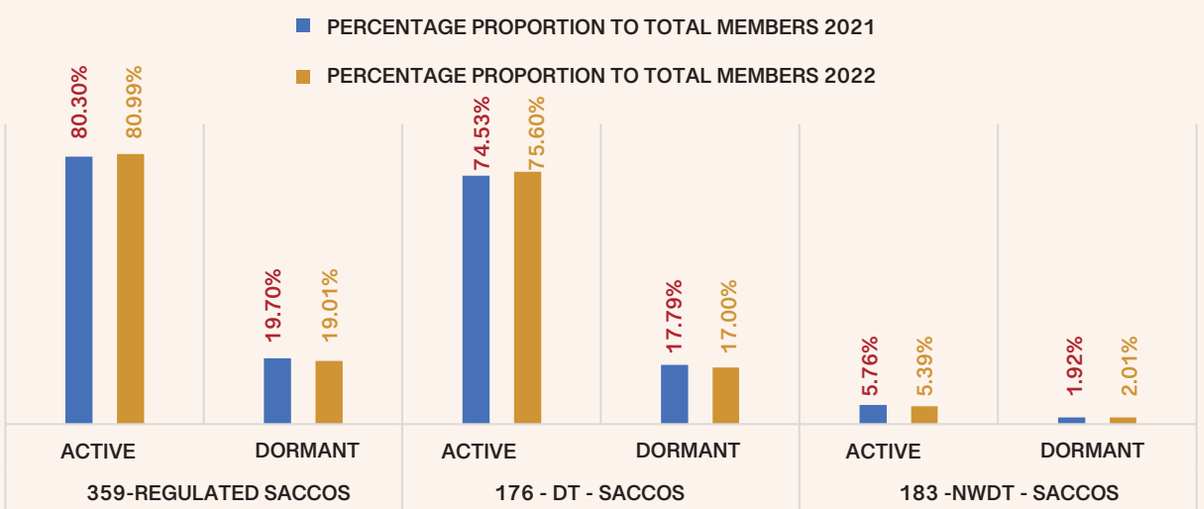

Table 9: Total membership in the Regulated SACCOs Industry (2020 – 2022)

REGULATED SACCO SEGMENT	TOTAL NO. OF SACCOs REPORTING	CLUSTER OF MEMBERS	2020	Y-TO-Y CHANGE (2020/21)	2021	2022	Y-TO-Y CHANGE (2021/22)
DT-SACCOs	176	Active	4,097,917	9.12%	4,471,756	4,853,926	8.55%
		Dormant	1,372,575	-22.26%	1,067,033	1,091,295	2.27%
		Subtotal	**5,470,492**	**1.25%**	**5,538,789**	**5,945,221**	**7.34%**
NWDT-SACCOs	183	Active	277,409	24.67%	345,855	346,000	0.04%
		Dormant	75,272	52.69%	114,930	129,270	12.48%
		Subtotal	**352,681**	**30.65%**	**460,785**	**475,270**	**3.14%**
TOTAL	**359**		**5,823,173**	**3.03%**	**5,999,574**	**6,420,491**	**7.02%**

Source: SASRA Database

Figure 6 provides the proportion of membership in the Regulated SACCOs who were active during the year ended December 2022 compared to the previous years and shows that the active membership among the Regulated SACCOs have stood at over 80% during the two (2) year period of 2021 and 2022. On the other hand, the number of dormant members among the Regulated SACCOs declined from 19.70% in 2021 to 19.01% in 2022 implying increased business activity in Regulated SACCOs in 2022. Although the dormant members as a proportion to total membership among the DT-SACCOs segment declined from 17.79% in 2021 to 17.00% in 2022, this was slightly overshadowed by the increase in dormant members of NWDT-SACCOs from 1.92% of the entire membership in 2021 to 2.01% of the entire membership of the Regulated SACCOs in 2022. The analysis thus shows that the NWDT-SACCOs had a comparatively tough time in ensuring the economic productivity of their membership than their counterparts in the DT-SACCOs segment.

Figure 6: Percentage of active membership among Regulated SACCOs (2021 t0 2022)

Source: SASRA Database

4.5. The Distribution of the Membership by Field of Membership Clusters

Cooperatives worldwide are usually founded along unique common bond linkages which normally becomes their specified field of membership, popularly known as common bond. SACCOs in Kenya were thus formed along such specific field of membership, from where they drew most of their membership, even though a majority of Regulated SACCOs particularly the DT-SACCOs have since opened their field of membership to all citizens. The four (4) main clusters of fields of membership along which SACCOs in Kenya have been founded are summarised in Table 10.

Table 10: Summary of Field of Membership (common bond) clusters of SACCOs in Kenya

	Main Cluster	Key Characteristic	Sub-Cluster		Main Field of Membership
1.	**Government Based SACCOs**	The original membership drawn from Government ministries and departments, State Corporations, Public Universities etc. Some have however opened their field of membership.	(a)	Teachers – Basic & Tertiary Education	The teaching profession
			(b)	State Corporations	Employees of state corporations and agencies
			(c)	Universities	Employees of public universities
			(d)	County Government	Employees of County Governments & County institutions
			(e)	General Services & Administration	Employees of the government from Ministries and state departments
2.	**Agriculture Based SACCOs**	These SACCOs were founded upon the foundations of certain agricultural activities of the would-be members.	(a)	Crop Production	Farmers focussed on crop production.
			(b)	Dairy Production	Farmers focussed on dairy production and farming
3.	**Private Sector Based SACCOs**	The original memberships were principally drawn from privately owned companies, institutions, or entities. The common bond would then be that the members are employed by one private entity or group of similar private entities			
4.	**Community Based SACCOs**	The original memberships were defined based on some social association or membership of the potential members within the community such as churches, non-governmental organizations, and similar community initiative groupings			

Source: SASRA Database

These fields of membership remain critical supervisory monitoring tool in assessing the risks associated with a specific membership cluster, as well as measuring the performance of the Regulated SACCOs in each cluster. Table 11 provides the summary of the distribution of the membership of the Regulated SACCOs among the four (4) fields of membership clusters.

The distribution shows that the 49-Agriculture-Based SACCOs, all of which are DT-SACCOs had the highest number of members at 2.74 Million members accounting for a proportion of 42.60% of the entire membership of Regulated SACCOs. This is an increase from the 2.59 million members in 2021 within the cluster but, represented a drop in their proportionate market share of membership from 43.19% reported in the same year. The high concentration of members of Regulated SACCOs among the Agri-Based SACCOs is a testament to the fact that a large percentile of members of Regulated SACCOs is largely dependent on agricultural production and its value chains.

Table 11: Distribution of total membership among the Field of Membership clusters of SACCOs in Kenya

Field of Membership of SACCOs	Sector/ Industry	DT-SACCOs				NWDT-SACCOs				Total No. of SACCOs		Total Membership in Millions)		% to Total Membership (Market share of Total Membership)

Source: SASRA Database

In total, the Regulated SACCO industry reported a total of 117-Government-Based SACCOs drawn from employees of County Governments and Assemblies; State Corporations (Parastatals); Teachers; Universities; and mainstream national government ministries and state departments, and therefore formed the highest proportion of Regulated SACCOs in Kenya. Their membership was reported at 2.27 Million members accounting for 35.35% of the total membership among the Regulated SACCOs in 2022, which is an increase from the membership of 2.01 Million members recorded in the previous year as summarised in Figure 7.

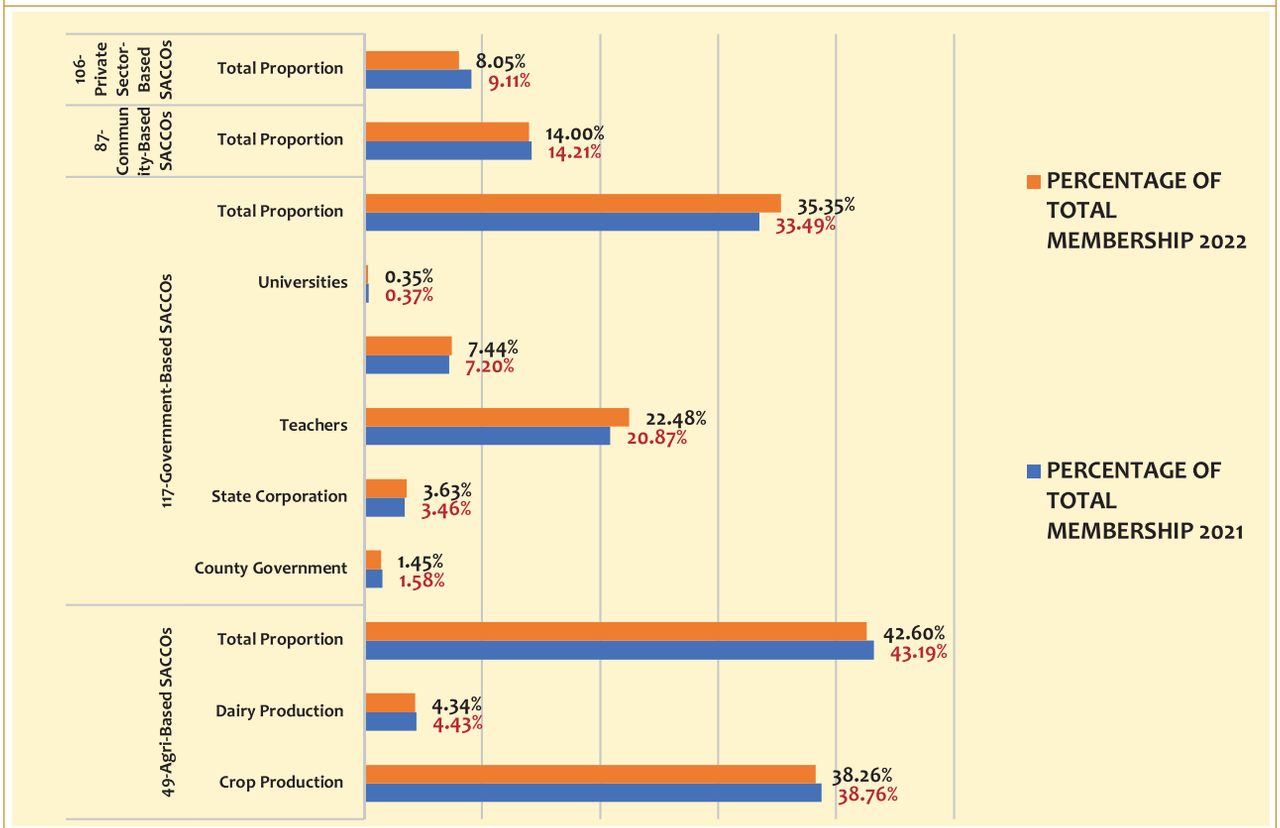

The increase in membership among the 117-Government-Based SACCOs is largely due to the opening of their fields of membership (common bond) thereby allowing membership by non-government employees, especially among the Teachers-Based SACCOs segment, in addition to increased employment opportunities within the public sector, thereby affording this category of SACCOs to recruit new members.

The Teachers-Based SACCOs remain the most dominant segment of the Government-Based SACCOs with a proportion of 22.84% of the entire membership during the year ended December 2022, which is an increase in proportional representation of 20.87% of the total membership recorded in 2021. This is largely informed by the fact that all Teachers-Based SACCOs have since opened their fields of membership to other clusters of common bond linkages, thereby allowing them to tap into other categories of membership.

The Government General Services SACCOs consisting of mainstream ministries and state departments also recorded an increase in their membership market share from 7.20% in 2021 to 7.44% in 2022. The County-Government Based SACCOs and the Universities-Based SACCOs however lost their respective market share of membership which declined from 1.58% in 2021 to 1.45% in 2022; and from 0.37% in 2021 to 0.35% in 2022 respectively.

As discussed in section 7.3 of this Report, the loss of market share of the County-Government Based SACCOs and the Universities-Based SACCOs is directly linked to the perception associated with the non-remittances of deductions which is quite high among this cluster of SACCOs and thus directly affecting their performance.

Figure 7: Percentage Distribution of Membership of Regulated SACCOs among the Fields of Membership.

Source: SASRA Database

The 106-Private Sector-Based SACCOs and the 87-Community-Based SACCOs accounted for the least number of memberships among the Regulated SACCOs with 0.52 Million members representing 8.05% and 0.90 Million members representing 14.21% of the total membership respectively in 2022. The total number of memberships of Private Sector-Based SACCOs shrunk from a total of 0.55 Million members recorded in 2021 and explained by the fact that one of the Private Sector Based NWDT-SACCO Society failed to meet its financial and statutory obligations and was thus de-authorized in 2022. This equally led to a decrease in their respective market share of membership from 9.11% recorded in 2021 to 8.05% in 2022. On the other hand, although the Community-Based SACCOs registered a marginal gain of membership from 0.85 Million members in 2021 which represented 14.21% of the entire membership, their respective market share of membership in 2022 shrunk to 14.00%. The

decline in market share was informed by not only the de-authorization of one of the Community-Based NWDT-SACCO Society in 2022, but also the fact that the rate of growth of membership of SACCOs in this category was much lower than the others.

5.0. FINANCIAL PERFORMANCE OF REGULATED SACCOs

5.1. OVERVIEW OF GROWTH AND PERFORMANCE

5.1.1 Introduction

The key parameters for monitoring growth and performance of Regulated SACCOs are the movement and changes in their total assets, gross loans, and deposits (savings) portfolios. Assets are a critical component of growth and performance measurements of financial institutions, since they form the revenue generating portfolio and thus assuring sustainability. The bulk of the assets of credit financial institutions is always composed of loans and advances, while a large proportion of the assets portfolio of deposit taking credit financial institutions such as SACCOs is normally funded by deposits (savings), and thus the importance of loans and deposits as growth and performance metrics.

Table 12 provides a summary of the growth and performance of the 359-Regulated SACCOs during the period ended December 2022 and shows that the total assets grew by 10.31% in 2022 to reach Kshs 890.30 Billion from Kshs 807.30 Billion reported in 2021. The highest proportion of the asset portfolio was reported among the DT-SACCOs segment as Kshs 763.50 Billion representing an increase of 10.48% in 2022 compared to an increase of 9.29% reported among the NWDT-SACCOs during the same period, which stood at Kshs 126.80 Billion compared to Kshs 116.02 Billion in the previous period. Consequently, it is evident that the total assets of the DT-SACCOs segment grew at a faster rate than the total assets of the NWDT-SACCOs. On average however, the total assets of the two (2) segments of Regulated SACCOs registered a higher growth rate in 2022 compared to 2021.

Table 12: Comparative performance and growth in the Regulated SACCOs subsector (2020 – 2022)

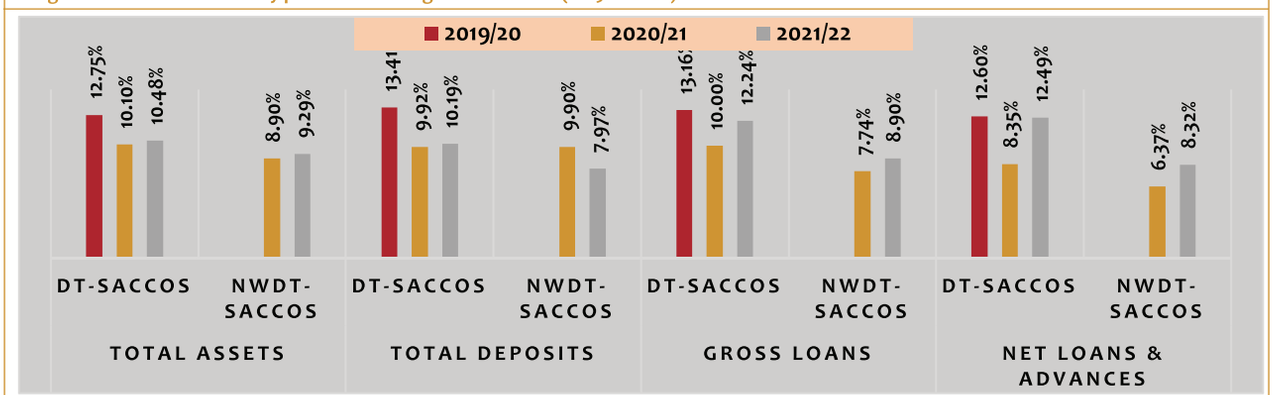

FINANCIALS	CLUSTER	2020	Y-to-Y change (2020/21)	2021	2022	Y-to-Y change (2021/22)
		KSHS. BILLIONS		KSHS. BILLIONS	KSHS. BILLIONS	
TOTAL ASSETS	DT-SACCOs	627.68	10.10%	691.09	763.50	10.48%
	NWDT-SACCOs	106.54	8.90%	116.02	126.80	9.29%
	TOTALS	**734.22**	**9.93%**	**807.11**	**890.30**	**10.31%**
TOTAL DEPOSITS	DT-SACCOs	431.46	9.92%	474.25	522.59	10.19%
	NWDT-SACCOs	83.00	9.20%	90.64	97.86	7.97%
	TOTALS	**514.46**	**9.80%**	**564.89**	**620.45**	**9.84%**
GROSS LOANS	DT-SACCOs	474.77	10.00%	522.25	586.16	12.24%
	NWDT-SACCOs	80.28	7.74%	86.50	94.19	8.90%
	TOTALS	**555.05**	**9.67%**	**608.75**	**680.35**	**11.76%**
ALLOWANCE FOR LOAN LOSS	DT-SACCOs	24.19	40.77%	34.05	36.95	8.53%
	NWDT-SACCOs	0.86	133.80%	2.02	2.68	32.93%
	TOTALS	**25.05**	**43.98%**	**36.07**	**39.64**	**9.89%**
NET LOANS & ADVANCES	DT-SACCOs	450.58	8.35%	488.20	549.20	12.49%
	NWDT-SACCOs	79.42	6.37%	84.48	91.51	8.32%
	TOTALS	**530.00**	**8.05%**	**572.68**	**640.72**	**11.88%**

Source: SASRA Database

On the other hand, the total deposits (savings) among the 359-Regulated SACCOs grew to Kshs 620.45 Billion in 2022 from Kshs 564.89 Billion recorded in 2021, representing a marginal increase of 0.04% from 9.84% compared to an increase of 9.80% recorded in 2021. The total deposits reported is composed of Kshs 522.59 Billion recorded by the DT-SACCOs segment which is an increase of 10.19% recorded in 2021 at Kshs 474.25 Billion. Although there was an increase in absolute terms of

the total deposits of NWDT-SACCOs segment from Kshs 90.64 Billion in 2021 to Kshs 97.86 Billion in 2022, there was a decline in the growth rate over the same period from 9.20% recorded in 2021 to 7.97% recorded in 2022 as summarised in Figure 8. The segmental decrease in the rate of growth of total deposits of NWDT-SACCOs in 2022, contributed to the overall sluggish growth rate of the total deposits of all the Regulated SACCOs from 9.80% in 2021 to 9.84% in 2022, a mere increase of 0.04%. The decreased rate of growth in deposits mobilised by NWDT-SACCOs during the period is evidence of reduced disposable incomes among persons patronising the NWDT-SACCOs, thus reduced savings.

Figure 8: Growth Rates in key paraments of Regulated SACCOs (2019 to 2022)

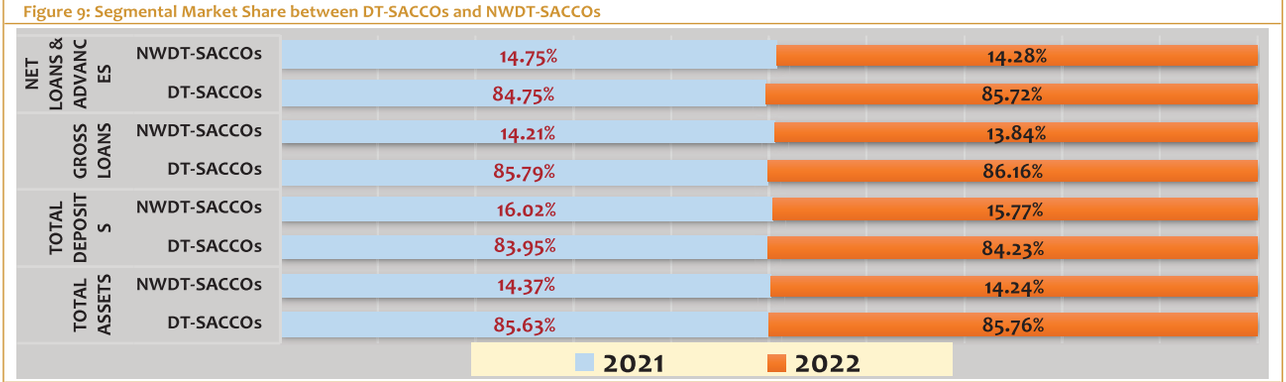

Source: SASRA Database *The NWDT-SACCOs were not regulated prior to 2020 and thus the percentage increase for the period not available

The gross loans which is another important metrics for measuring the growth and performance of Regulated SACCOs grew by 11.76% in 2022 to reach Kshs 680.35 Billion from Kshs 608.75 Billion recorded in 2021. The DT-SACCOs segment registered the highest growth rate at 12.24% in 2022 compared to a growth rate of 10.00% in 2021; while the NWDT-SACCOs segment registered a gross loans' growth rate of 8.90% in 2022 which was a marginal increase from a growth rate of 7.74% recorded in 2021. However, this growth rate is faster than growth rate in deposits registered by NWDT-SACCOs, thus a challenge to NWDT-SACCOs to put effort in improving on their savings mobilization to be able to meet the loaning needs and avoid future challenge should the trend continue.

5 .1.2. Comparative Market Share of DT-SACCOS and NWDT-SACCOS Segments.

Figure 9 provides the market share distribution of the Regulated SACCOs total assets, gross loans, total deposits, as well as net loans and advances. Just like with membership, the DT-SACCOs segment remains the most dominant segment of Regulated SACCOs in all spheres of performance and growth. The assets' portfolio of DT-SACCOs accounted for 85.76% of the Regulated SACCO industry's total assets in 2022 which is a marginal increase from a proportionate portfolio of 85.63% recorded in the previous year. The NWDT-SACCOs assets' portfolio accounted for 14.24% which was however a decline from a proportionate assets' portfolio of 14.37% registered in 2021.

Figure 9: Segmental Market Share between DT-SACCOs and NWDT-SACCOs

Source: SASRA Database

Similar gains in market share proportions were recorded among the DT-SACCOs segment's deposits and gross loans portfolios which increased from 83.95% in 2021 to 84.23% in 2022 and from 85.79% in 2022 to 86.16% in 2022 respectively. Consequently, similar declines in the market shares of NWDT-SACCOs was equally witnessed in their deposits and gross loan portfolios which shrunk from 16.02% in 2021 to 15.77% in 2022; and from 14.21% in 2021 to 13.84% in 2022 respectively.

The twin factors for the increase in the market shares of DT-SACCOs and decrease in the market share for the NWDT-SACCOs are that two (2) NWDT-SACCOs had their authorization certification revoked thus leading to a decline in the number of NWDT-SACCOs; and secondly that the growth rates among the DT-SACCOs segment in all the three parameters of growth was higher than the growth rates of the NWDT-SACCOs as discussed in section 5.1.1 above. If the trend continues, and with the few large-tiered NWDT-SACCOs increasingly expressing the intention to convert to deposit-taking SACCO business, then the market share of NWDT-SACCOs will continue to shrink.

5.2 REGULATED SACCOs BY TOTAL ASSETS

5.2.1 Introduction

As shown in Table 12, the total assets of the Regulated SACCOs for the period ended December 2022 stood at Kshs 890.30 Billion made up of Kshs 763.50 Billion from the DT-SACCOs' segment and Kshs 126.80 Billion from the NWDT-SACCOs' segment. In order to assess, classify, monitor and respond appropriately to the risks attendant to them, the Regulated SACCOs have been segmented into three (3) broad categories based on the size of their asset portfolio. This segmentation categorizes Regulated SACCOs as –

a) Large-Tiered SACCOs as those Regulated SACCOs whose total assets are in excess of Kshs 5 Billion;

b) Mid-Tiered SACCOs as those Regulated SACCOs whose total assets are between Kshs 1 Billion and Kshs 5 Billion; and

c) Small-Tiered SACCOs as those Regulated SACCOs whose total assets are below the Kshs 1 Billion threshold.

Table 13 provides a summary of the distribution of the Regulated SACCOs premised on the foregoing categorisation and shows that the number of Large-Tiered SACCOs with assets above Kshs 5 Billion increased to 47-Regulated SACCOs in 2022 from 42-Regulated SACCOs recorded in 2021. The increase was occasioned by 3-DT-SACCOs and 2-NWDT-SACCOs whose assets crossed the Kshs 5 Billion mark in 2022 namely Fortune SACCO Society Ltd with head offices in Kirinyaga County; Yetu SACCO Society Ltd with head offices in Meru County; Maisha Bora SACCO Society Ltd with head offices in Nairobi County; United Women Regulated NWDT-SACCO Society Ltd and Balozi Regulated NWDT-SACCO Society Ltd both with their head offices situated in Nairobi County.

Table 13: Distribution of Regulated SACCOs according to their assets' portfolio (2020 – 2022)

Category Of Regulated SACCOs By Total Assets	Segment Of Regulated SACCOs	No. of Regulated SACCOs			Total Assets (in Kshs Billions)			Percentage proportion to Total Assets		
		2020	2021	2022	2020	2021	2022	2020	2021	2022
Total Assets above Kshs. 5 Billion	DT-SACCOs	34	39	42	452.13	522.57	592.14	61.58%	64.75%	66.51%
	NWDT-SACCOs	2	3	5	12.76	19.11	31.49	1.74%	2.37%	3.54%
	TOTALS	**36**	**42**	**47**	**464.89**	**541.68**	**623.63**	**63.32%**	**67.11%**	**70.05%**
Total Assets between Kshs. 1 Billion and Kshs. 5 Billion	DT-SACCOs	57	55	56	142.86	135.21	139.49	19.46%	16.75%	15.67%
	NWDT-SACCOs	24	25	24	47.79	50.20	46.11	6.51%	6.22%	5.18%
	TOTALS	**81**	**80**	**80**	**190.641**	**185.41**	**185.59**	**25.96%**	**22.97%**	**20.85%**
Total Assets below Kshs. 1 Billion	DT-SACCOs	84	82	78	32.70	33.32	31.88	4.45%	4.13%	3.58%
	NWDT-SACCOs	160	157	154	46.00	46.70	49.20	6.26%	5.79%	5.53%
	TOTALS	**244**	**239**	**232**	**78.6958**	**80.02**	**81.082**	**10.72%**	**9.91%**	**9.11%**
	GRAND TOTALS	**361**	**361**	**359**	**734.23**	**807.11**	**890.30**			

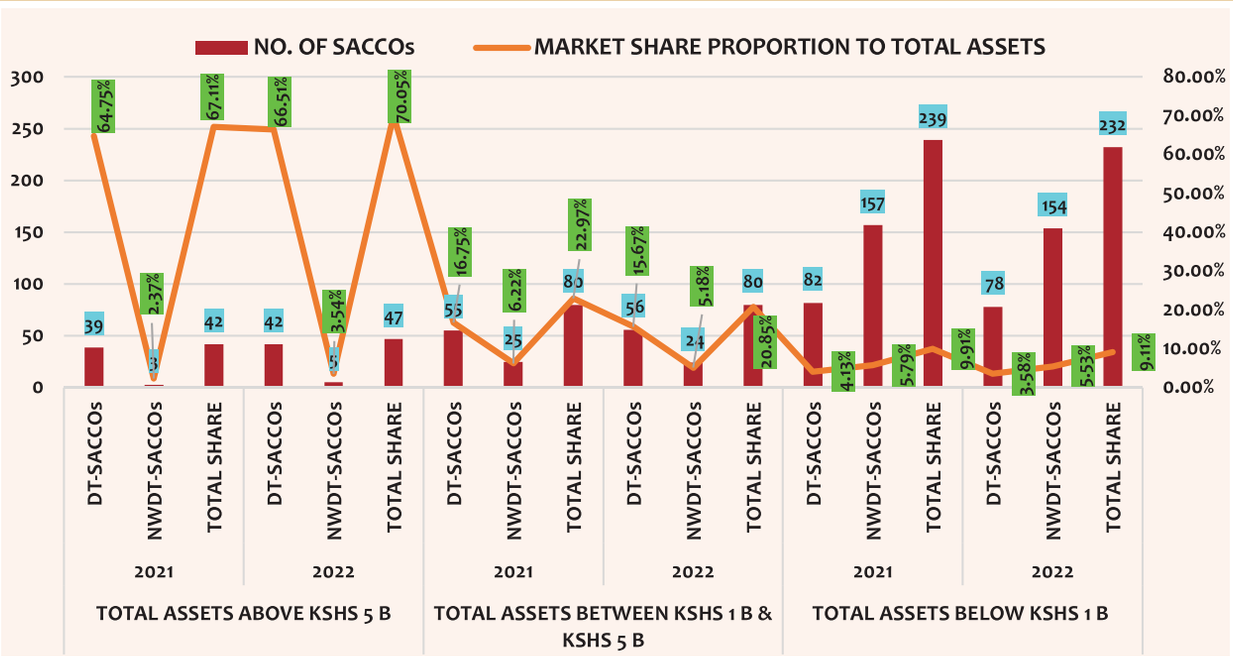

Source: SASRA Database

The 47-Large-tiered SACCOs continued to dominate the total assets' market share in which they controlled 70.05% of the entire total assets' portfolio amounting to Kshs 623 Billion. This represented an increase in their respective market share from 67.11% recorded by the 42-Large Tiered SACCOs in 2021, with the increase being informed directly by the increase in the number of SACCOs within the category from 42-SACCOs in 2021 to 47-SACCOs in 2022. The 42-Large-Tiered DT-SACCOs alone accounted for 66.51% of the total assets within the Regulated SACCO industry thereby cementing the fact that even among the DT-SACCOs, the concentration of the total assets is just within a few of the 176-DT-SACCOs. The 5-Large-Tiered NWDT-SACCOs on the other hand had a proportional total assets' portfolio of only 3.54% as specifically summarized in Figure 10.

The number of Mid-Tiered SACCOs remained the

same in 2022 as they were in 2021, even though 5-Regulated SACCOs previously in this category moved to the large-tiered threshold. And since no new SACCO was either licensed or authorized during the period, the static number of Mid-Tiered SACCOs at 80-SACCOs in 2022 means that five (5) SACCOs previously under the Small-Tiered Category grew their total assets' portfolio to cross the Kshs 1 Billion threshold. These include four (4) DT-SACCOs namely Airports SACCO Society Ltd with head office in Nairobi County; Tabasamu SACCO Society Ltd with head offices in Kwale County; Suluhu SACCO Society Ltd with head offices in Kitui County; and Times – U SACCO Society Ltd with head offices in Meru County; and one (1) NWDT-SACCO Society Ltd namely PCEA Regulated NWDT-SACCO Society Ltd with head offices in Nairobi County. The 80-Mid-Tiered SACCOs had a total assets market share of 20.85%, with 56-DT-SACCOs under the category controlling 15.67% of the total assets and 24-NWDT-SACCOs under the category controlling 5.18% of the total assets market share.

Figure 10: Market share of Regulated SACCOs segmented by total assets (2021 – 2022)

Source: SASRA Database

The Small-Tiered SACCOs with total assets of below Kshs 1 Billion constituted the majority of all Regulated SACCOs numbering 232-SACCOs for the period ended December 2022, which is a drop from 239-SACCOs which fell under the Small-Tiered SACCOs category in 2021. These small-sized SACCOs accounted for 64.62% of all the Regulated SACCOs but accounted for only 9.11% of the total assets' portfolio. There were 78-DT-SACCOs and 154-NWDT-SACCOs in the Small-Tiered SACCOs category which controlled 3.58% and 5.53% of the total assets' portfolio respectively.

5.2.2. Total Assets of Regulated SACCOS by Common Bond

Table 14 provides the distribution of the total assets of all the Regulated SACCOs based on the common bond clustering of each Regulated SACCO. It shows that the 49-Agriculture-Based SACCOs controlled a proportion of 11.12% of the total assets in 2022, which is an increase in the proportion of total assets of 10.96% reported in 2021. The 117-Government-Based SACCOs had the highest proportion of total assets at 65.49% in 2022 but which was a drop from a proportion of 65.66% reported in 2021. Among the Government-Based SACCOs, the Teachers-Based SACCOs continued to have the highest proportion of total assets at 30.12% in 2022 which is the same as the previous year. The General Services and Administration segment of Government-Based SACCOs on the other hand had a total assets' proportion of 22.68% in 2022, while the State Corporations reported a market share of 8.28%.

Table 14: Distribution of the Total Assets within the Fields of Membership Clusters								
FIELD OF MEMBERSHIP CLUSTER	SACCO SECTOR/ INDUSTRY	REGULATED SACCO SEGMENT	No. of SACCOs		Total Assets (Kshs Billion)		% to Total Assets

5.2.3. DT-SACCOs by Total Assets

As shown in Table 12 the total assets of the 176-DT-SACCOs during the period ended December 2022 amounted to Kshs 763.50 Billion compared to a sum of Kshs 691.09 Billion reported in 2021. Table 15 therefore provides the distribution of this total assets' portfolio among the 176-DT-SACCOs, based on the respective asset size categorization and shows that the 42-Large-tiered DT-SACCOs controlled the highest proportion at 77.56% with a sum of Kshs 592.14 Billion in 2022 compared to the 39-Large-Tiered DT-SACCOs during the year 2021 which had a market share of 75.61%. The large-tiered DT-SACCOs thus increased in both the absolute number and by their market share proportion.

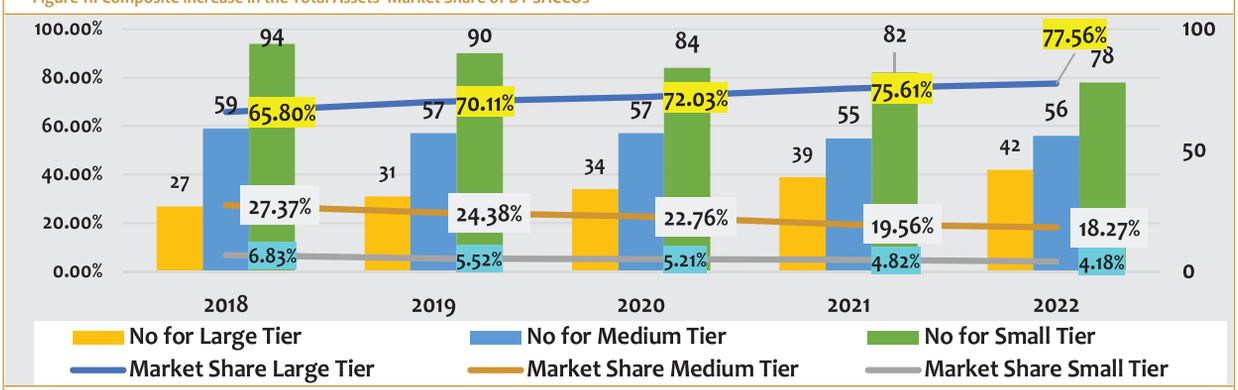

In contrast however, the 56-Mid-Tiered DT-SACCOs controlled 18.27% amounting to Kshs 139.49 Billion in 2022 which is a drop from a market share proportion of 19.56% reported by the 55-Mid-Tiered DT-SACCOs in 2021 due to the graduation of some into the Large-Tier category. On the other hand, the 78-Small-Tiered DT-SACCOs registered the least market proportion of the total assets of DT-SACCOs which stood at 4.18% in 2022 also a decline from the 4.82% market proportion which the 82-Small-tiered DT-SACCOs had in 2021. The overall analysis shows that although the Small-Tiered DT-SACCOs have largely remained the highest in number, their respective market share of total assets continues to shrink at a faster rate than the other categories of DT-SACCOs.

Table 15: Distribution of total assets of DT-SACCOs within the three (3) Tier Categories									
CATEGORY OF DT-SACCOS BY TOTAL ASSETS SIZE	NUMBER OF DT-SACCOs			TOTAL ASSETS (KSH. BILLIONS)			PROPORTION TO TOTAL ASSETS		
	2020	2021	2022	2020	2021	2022	2020	2021	2022
Total Assets above Kshs. 5 Billion	34	39	42	452.13	522.57	592.14	72.03%	75.61%	77.56%
Total Assets between Kshs. 1 Billion and Kshs. 5 Billion	57	55	56	142.86	135.21	139.49	22.76%	19.56%	18.27%
Total Assets below Kshs. 1 Billion	84	82	78	32.70	33.32	31.88	5.21%	4.82%	4.18%
TOTALS	175	176	176	627.69	691.10	763.50	100%	100%	100%
Source: SASRA Database									

Figure 11 shows the movement of the proportionate market share of Large-Tired-DT-SACCOs, Mid-Tiered DT-SACCOs and Small-Tiered DT-SACCOs between 2018 and 2022. The same shows that the number of Large-Tiered DT-SACCOs rose from 27-DT-SACCOs in 2018 to 42-DT-SACCOs in 2022 while their respective proportionate market share of total assets moved from 65.80% in 2018 to 77.56% in 2022. Over the same period, the Mid-Tiered DT-SACCOs have declined from 59-DT-SACCOs to 56-DT-SACCOs while their respective proportionate total assets' share has also dropped from a high of 27.37% in 2018 to a low of 18.27% in 2022.

The number of Small-Tiered DT-SACCOs have during the same period declined from 94-DT-SACCOs to 78-DT-SACCOs, while their total assets share has consistently shrunk from a high of 6.83% in 2018 to a low of 4.18% in 2022. Cognizant of the fact that assets are the revenue generating stream of DT-SACCOs, it is apparent from the foregoing that the Large-Tiered DT-SACCOs will in the medium term economically out-run the very many Small-Tiered DT-SACCOs and in the long-run, even the Mid-Tiered DT-SACCOs will not survive the phenomenon. Public and market solutions may thus be called for in order to sustain the economic viability and sustainability of these very many Small and Mid-Tiered DT-SACCOs.

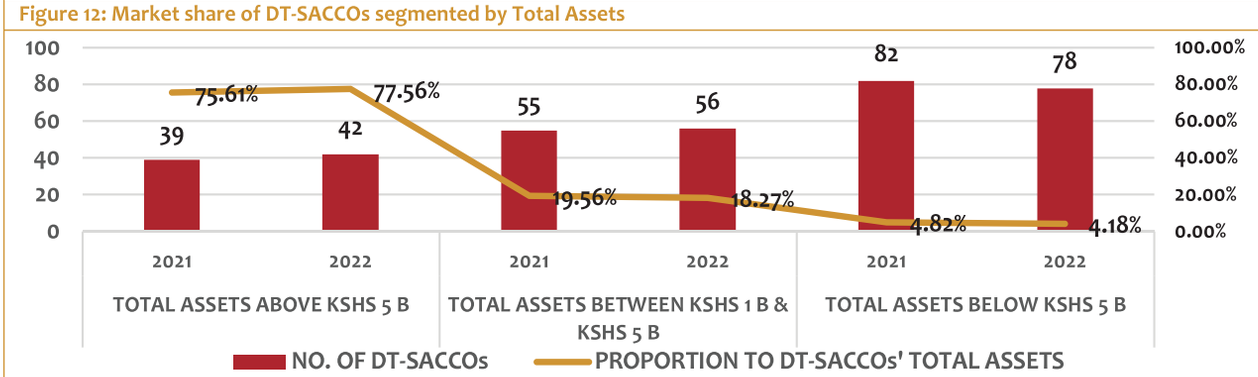

Figure 11: Composite increase in the Total Assets' Market Share of DT-SACCOs

Source: SASRA Database

As shown in Figure 12 the general market share of the DT-SACCOs based on the sizes of their assets shows that the large-tiered DT-SACCOs with assets above Kshs 5 Billion increased from 39 in 2021 to 42 in 2022 while their proportion of the segments assets increased from 76.61% in 2021 to 77.56% in 2022. The Mid-Tiered DT-SACCOs with assets of between Kshs 1 Billion and Kshs 5 Billion on the other hand increased from 55 in 2021 to 56 in 2022 with their proportionate market share of the segments total assets declining from 19.56% in 2021 to 18.27% in 2022. The proportion of the total assets of the small-tiered DT-SACCOs with assets below Kshs 1 Billion also reduced from 4.82% in 2021 to 4.18% in 2022, while the number of DT-SACCOs in this category dropped from 82-DT-SACCOs in 2021 to 78-DT-SACCOs in 2022. The market share trends of total assets of DT-SACCOs is consistent of the overall market share trends of all Regulated SACCOs discussed herein above and in which the large-tiered SACCOs are growing at faster rates than their mid-tiered and small-tiered counterparts,

Figure 12: Market share of DT-SACCOs segmented by Total Assets

5.2.4. NWDT-SACCOs by Total Assets

As shown in Table 12 the total assets of the 183-NWDT-SACCOs during the period ended December 2022 amounted to Kshs 126.80 Billion compared to a sum of Kshs 116.02 Billion reported in 2021. The distribution of this total assets' portfolio of NWDT-SACCOs segment is summarised in Table 16 and shows that the 5-Large-Tiered NWDT-SACCOs had a cumulative market share of 24.83% of the total assets within the NWDT-SACCOs segment, while the 24-Mid-Tiered NWDT-SACCOs had a market share of 36.36% during the year 2022. Other than the Large-Tiered NWDT-SACCOs whose segmental market share of total assets increased from 16.47% recorded in 2021 to 24.83% recorded in 2022; the market shares of both the Mid-Tiered and Small-Tiered NWDT-SACCOs decreased from 43.27% in 2021 to 36.36% in 2022; and from 40.81% in 2021 to 38.81% in 2022 respectively.

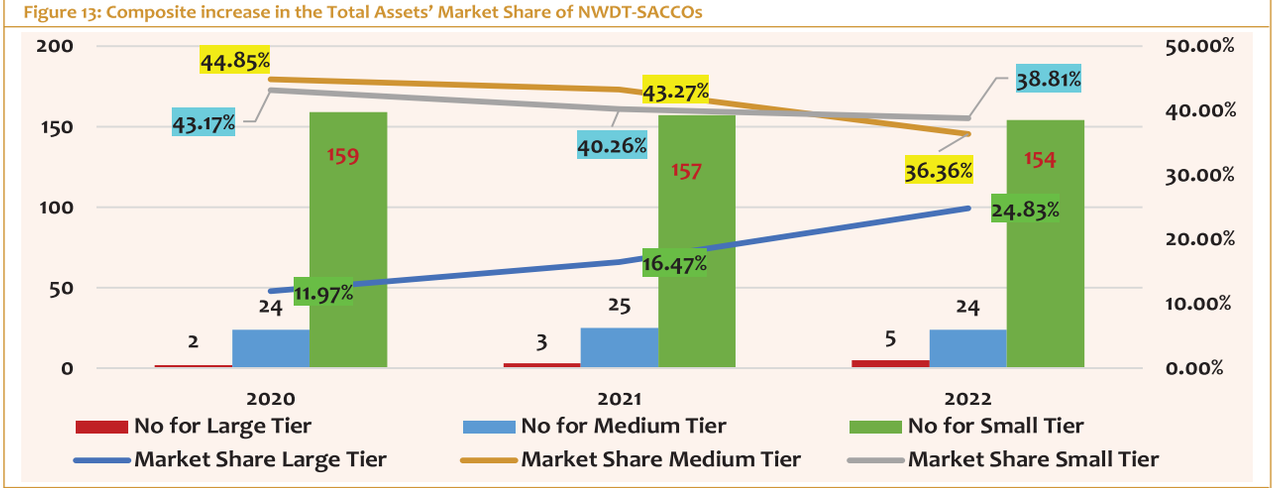

Table 16: Distribution of the Total Assets of NWDT-SACCOs within the three (3) Tier Categories.

CATEGORY OF NWDT-SACCOs BY TOTAL ASSETS SIZE	NUMBER OF NWDT-SACCOs			TOTAL ASSETS (KSH. BILLIONS)			PROPORTION TO TOTAL ASSETS		
	2020	2021	2022	2020	2021	2022	2020	2021	2022
Total Assets above Kshs. 5 Billion	2	3	5	12.76	19.11	31.49	11.97%	16.47%	24.83%
Total Assets between Kshs. 1 Billion and Kshs. 5 Billion	24	25	24	47.79	50.20	46.11	44.85%	43.27%	36.36%
Total Assets below Kshs. 1 Billion	159	157	154	46.00	46.70	49.20	43.17%	40.26%	38.81%
TOTALS	**185**	**185**	**183**	**106.54**	**116.01**	**126.80**	**100%**	**100%**	**100%**

Source: SASRA Database

Following the commencement of their regulation pursuant to the Regulations 2020 in June 2021, the number of Large-Tiered NWDT-SACCOs have risen from the initial two (2) to the current five (5) NWDT-SACCOs, while their proportionate total assets share within the segment has increased rapidly from 11.97% in 2020 to 16.47% in 2021 and 24.83% in 2022 as summarised in Figure 13. The number of Mid-Tiered NWDT-SACCOs on the other hand have been oscillating between 24 and 25 between 2020 and 2022, but their respective market share of the segments' total assets has declined from a high of 44.85% in 2020 to a low of 36.36% registered in 2022. A similar scenario is observed on the Small-Tiered NWDT-SACCOs whose numbers have dropped from 159-SACCOs in 2020 to 154-SACCOs in 2022, while their respective market share of the segment's total assets has equally dropped from 43.17% in 2020 to 38.81% in 2022.

Figure 13: Composite increase in the Total Assets' Market Share of NWDT-SACCOs

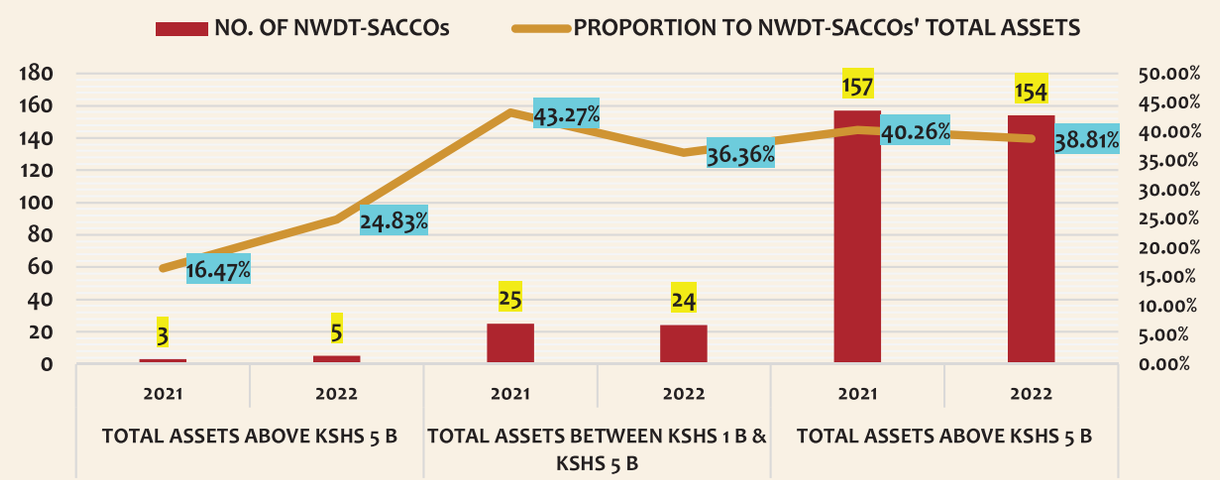

Source: SASRA Database

Figure 14 on the other hand provides the distribution of the total assets of the NWDT-SACCOs segment based on the asset sizes of the NWDT-SACCOs and shows that the large-tiered NWDT-SACCOs increased from 3-NWDT-SACCOs in 2021 to 5-NWDT-SACCOs in 2022 while their respective

total assets' market share increased substantially from 16.47% reported in 2021 to 24.83% in 2022. The Mid-Tiered NWDT-SACCOs with assets of between Kshs 1 Billion and Kshs 5 Billion on the other hand decreased from 25-NWDT-SACCOs in 2021 to 24-NWDT-SACCOs in 2022 with their proportionate market share in the segment reducing from 43.27% in 2021 to 36.36% in 2022. The small-tiered NWDT-SACCOs on their part decreased from 157-NWDT-SACCOs in 2021 to 154-NWDT-SACCOs in 2022 while their respective market share dropped from 40.26% in 2021 to 38.81% in 2022.

Although 2022 was only the second year of their regulation, it is likely that the trends witnessed among the DT- SACCOs segment where the large-tiered SACCOs have been growing their assets at a faster rate than the rest is likely to be replicated among the NWDT-SACCOs segment. The end result is that the Regulated SACCO system and industry will continue to have very many small SACCOs whose sustainability and viability may be put to test by any slight external economic shock.

Figure 14: Market share of NWDT-SACCOs segmented by Total Assets

5.3. REGULATED SACCOs BY DEPOSIT LIABILITIES

5.3.1. General Overview

Deposit liabilities in Regulated SACCOs constitute the savings of members of SACCOs. The entire legal and regulatory framework for Regulated SACCOs as enshrined in the Sacco Societies Act as read with Regulations 2010 for DT-SACCOs and the Regulations 2020 for NWDT-SACCOs are strictly tailored towards securing the safety of these deposits, as well as guaranteeing access thereto by the depositors upon demand. In addition, and just like with any other deposit-taking financial credit institution, deposit liabilities are the largest source of funding of their assets, especially the loan portfolios. In this regard, the Authority supervisory objectives, processes, activities, and frameworks have been designed towards the identification of risks which threaten the security or safety of the deposits (savings) held in the Regulated SACCOs, or which undermines accessibility of the same.

Consequently, the Authority's risk based supervisory approach categorizes the Regulated SACCOs into three (3) tiers determined by the size of the Regulated SACCO's deposit liabilities. These are the Regulated SACCOs with deposit liabilities above Kshs 5 Billion; Regulated SACCOs with deposit liabilities of between Kshs 1 Billion and Kshs 5 Billion; and Regulated SACCOs with deposit liabilities below Kshs 1 Billion. Table 17 provides a summary of the distribution of the deposit liabilities within the three (3) categories and shows that the number of SACCOs with deposit liabilities above Kshs 5 Billion increased from 28-SACCOs in 2021 to 32-SACCOs in 2022. While the NWDT-SACCOs in this category remained two (2) in 2022 as they were in 2021, the DT-SACCOs in this category increased by four (4) namely Magereza SACCO Society Ltd based in Nairobi County; Solution SACCO Society Ltd based in Meru County; Ollin SACCO Society Ltd with head office in Kirinyaga County; and Winas SACCO Society Ltd with head offices in Embu County. The total deposit liabilities market share attributable to the 32-SACCOs was 60.00% in 2022 compared to a market share of 56.32% in 2021 for the 28-SACCOs which were under this category. The increase in the market share of deposit liabilities by this category of SACCOs is largely informed by the increase in their number from 28 in 2021 to 32 in 2022.

Table 17: Distribution of Total Deposit Liabilities in Regulated SACCOs by size of Deposits (saving) held

CATEGORY OF REGULATED SACCOs BY TOTAL DEPOSIT SIZE	SEGMENT OF THE REGULATED SACCOs	NUMBER OF SACCOS			TOTAL DEPOSITS (BILLIONS)			PROPORTION TO TOTAL DEPOSITS		
		2020	2021	2022	2020	2021	2022	2020	2021	2022

	GRAND TOTALS	**361**	**361**	**359**	**514.46**	**564.88**	**620.45**			

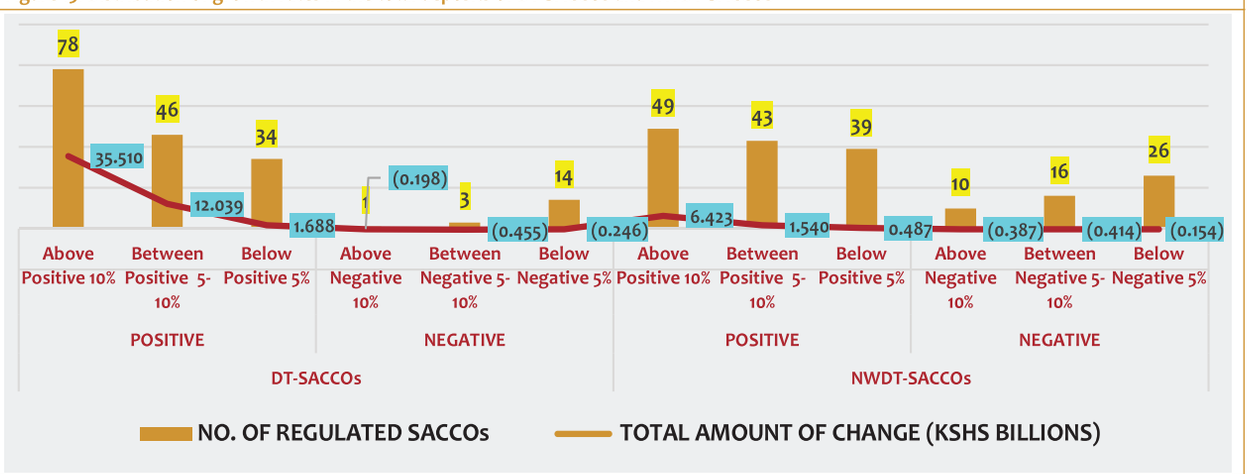

Source: SASRA Database

The number of Regulated SACCOs with deposit liabilities of between Kshs 1 Billion and Kshs 5 Billion increased from 70-SACCOs to 71-SACCOs in 2022, while their respective market share of deposit liabilities decreased from 29.86% in 2021 to 27.54% in 2022. On the other hand, the Regulated SACCOs with deposits below Kshs 1 Billion reduced from 263-SACCOs with a market share of 13.82% in 2021, to 256-SACCOs with a market share of 12.45% in 2022. It is also imperative to observe that the two (2) NWDT-SACCOs whose authorizations were revoked in 2022 (NASCA SACCO Society

Ltd and BORNEKA SACCO Society Ltd) both had deposits of less than Kshs 1 Billion, implying that one (1) NWDT-SACCOs increased its deposits to cross the Kshs 1 Billion mark in 2022 namely M/S JOGOO NWDT-SACCO Society Ltd based in Nairobi County; while four (4) DT-SACCOs were able to increase their respective deposit liabilities to cross the Kshs 1 Billion threshold. The four (4) are DEFENSE SACCO Society Ltd with head office in Nairobi County; FARIDI SACCO Society Ltd with head office in Busia County; DAIMA SACCO Society Ltd with head office in Embu County; and ELIMU SACCO Society Ltd with head office in Nairobi County.

Although the Regulated SACCOs witnessed an overall increase in their total deposits in 2022 by 9.84%, with DT-SACCOs segmental deposits increasing by 10.19% while the NWDT-SACCOs segmental deposits increased by 7.97%; a deeper analysis shows that the growth rates were not evenly distributed as summarised in Figure 15. The analysis shows that a total of 289-Regulated SACCOs reported positive growth rates in their individual deposits, while the remaining 70-Regulated SACCOs reported negative growth rates in their individual deposit liabilities. The negative growth rates in the deposit liabilities are evidenced on withdrawals by membership as well as the offsetting of deposits towards loan repayments upon defaults.

Figure 15: Distribution of growth rates in the total deposits of DT-SACCOs and NWDT-SACCOs

Source: SASRA Database

The DT-SACCOs segment had the highest number of SACCOs with positive growth rates in their individual total deposit liabilities. A total of 158-DT-SACCOs had positive growth rates in their deposit liabilities constituted of 78-DT-SACCOs with growth rates above 10% amounting to a cumulative sum of Kshs 35.51 Billion; while 46-DT-SACCOs had growth rates of between 5% and 10% amounting to a cumulative sum of Kshs 12.04 Billion; and the remaining 34-DT-SACCOs had positive growth rates of below 5% amounting to a cumulative sum of Kshs 1.69 Billion. The NWDT-SACCOs segment on the other hand had 131-NWDT-SACCOs with positive growth rates in their individual deposit liabilities made up of 49-DT-SACCOs with growth rates above positive 10% amounting to Kshs 6.43 Billion; while another 43-NWDT-SACCOs had their positive growth rates range between 5% and 10% amounting to a cumulative sum of Kshs 1.54 Billion; and the remaining 39-NWDT-SACCOs had their growth rates below positive 5% with a cumulative sum of Kshs 0.48 Billion.

The DT-SACCOs segment likewise registered the lowest number of SACCOs which had negative growth rates in their individual deposit liabilities. Only 18-DT-SACCOs registered negative growth rates in their deposits liabilities compared to 52-NWDT-SACCOs which had negative growth rates in their deposit liabilities. Whereas only one DT-SACCOs had its negative growth rate in deposit liabilities above 10%, a total of 10-NWDT-SACCOs had their negative growth rates above 10% and thus lost a significant proportion of the deposits during the year.

5.3.2 Distribution of the Deposit Liabilities by Type of Deposits

The total deposit liabilities held by the Regulated SACCOs in 2022 stood at Kshs 620.45 Billion

made up of Kshs 522.59 Billion held by DT-SACCOs segment and Kshs 97.86 Billion held by the NWDT-SACCOs segment. During the year ended December 2022, the sum of Kshs 522.59 Billion held by the DT-SACCOs as deposit liabilities is distributed as Fixed Deposits (savings) which amounted to Kshs 21.02 Billion; Withdrawable Deposits (savings) which amounted to Kshs 83.78 Billion; and Non-Withdrawable Deposits (savings) which amounted to Kshs 417.80 Billion. The sum of Kshs 97.86 Billion held by the NWDT-SACCOs on the other hand was composed of only the non-withdrawable deposits as summarised in Table 18 and Figure 16.

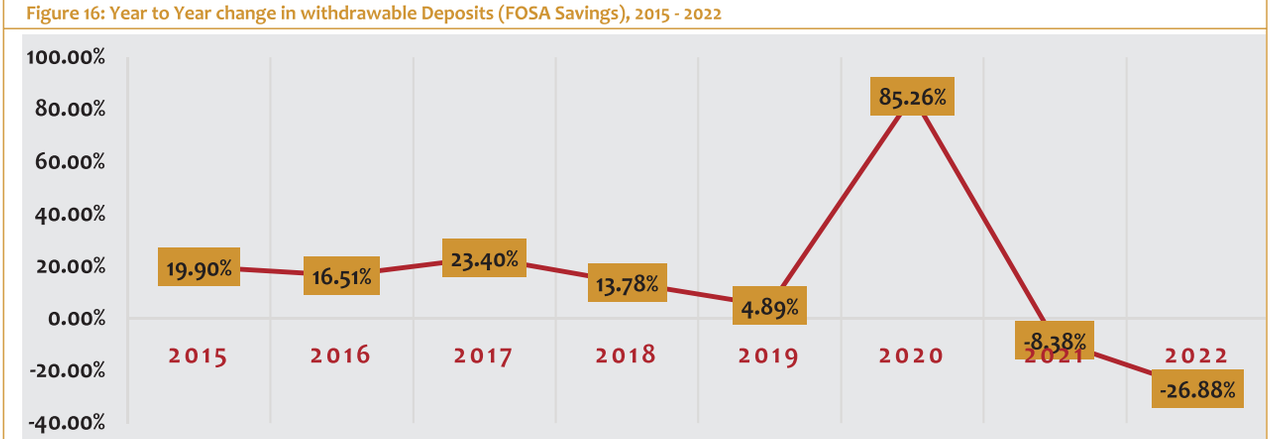

Table 18: Distribution of Deposit Liabilities by type of the Deposits (Savings)

DISTRIBUTION OF DEPOSIT LIABILITIES	SEGMENT OF THE REGULATED SACCO	TOTAL AMOUNT OF DEPOSIT LIABILITIES (KSHS)		
		2020	2021	2022
Withdraw-able Deposits (savings)	DT-SACCOs	125,048,152,403	114,588,284,257	83,775,917,356
Fixed Term Deposits	DT-SACCOs	19,142,034,688	22,332,173,531	21,019,332,049
Non-withdraw-able Deposits	DT-SACCOs	287,272,798,910	337,330,027,889	417,794,134,988
	NWDT-SACCOs	83,000,796,279	90,636,908,255	97,856,322,123
	Sub-Totals	**370,273,595,189**	**427,966,936,144**	**515,650,457,111**
Totals		**514,463,782,279**	**564,887,393,932**	**620,445,706,516**

Source: SASRA Database

The withdrawable deposits (also known as FOSA savings) which is usually held by DT-SACCOs only (because they are demand deposits), dropped from Kshs 114.59 Billion in 2021 to Kshs 83.78 Billion in 2022 representing a 26.89% decline. The huge drop in the FOSA savings can be directly attributed to the reduced savings propensity by members of DT-SACCOs, since these FOSA savings are generally voluntary and easily accessible by members on demand. The harsh macro-economic conditions prevailing during most of the year 2022 such as high inflation and exchange rates and droughts meant that a majority of members of SACCOs had their disposable incomes greatly reduced, and this resulted in low voluntary savings. As shown in the time series analysis in Figure 16 there was a spike in the FOSA savings held by DT-SACCOs during the year ended December 202o which was informed by the governmental economic incentives taken towards alleviating the economic hardships associated with the COVID-19 pandemic including tax waivers, which increased the populations savings propensities.

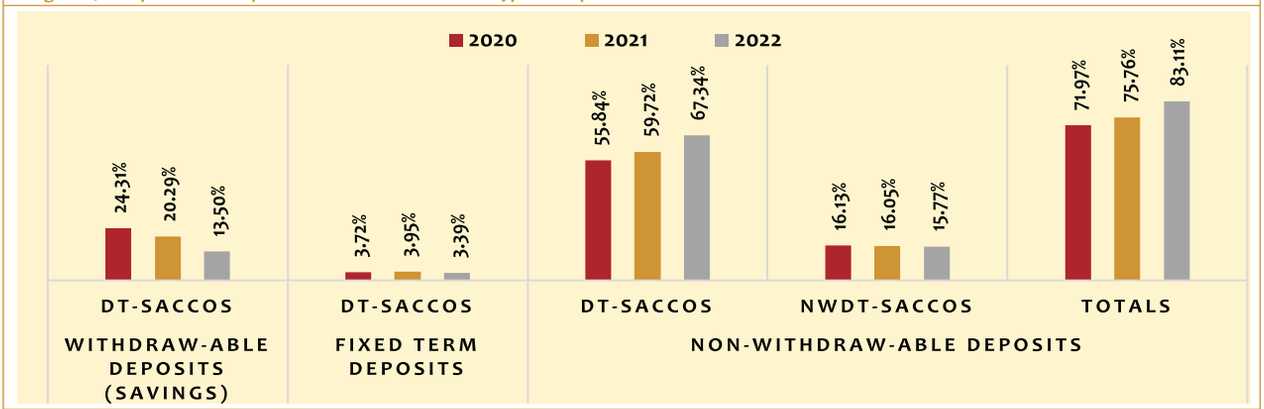

Figure 16: Year to Year change in withdrawable Deposits (FOSA Savings), 2015 - 2022

Source: SASRA Database

Figure 17 further provides a summary of the proportion of each type of deposits (savings) held by each segment of the Regulated SACCOs. The total non-withdrawable deposits held by both DT-SACCOs and NWDT-SACCOs accounted for the highest proportion of deposits liabilities at 83.11% in 2022 which is an increase from a proportion of 75.76% in 2021. The DT-SACCOs segmental deposit liabilities accounted for 67.34% in 2022 which again reflected an increase from a proportion of 59.72% reported in 2021. The NWDT-SACCOs segment however had their proportion of non-withdrawable deposits reduce from 16.05% of the total deposits' liabilities reported in 2021 to a proportion of 15.77% of the total deposit liabilities in 2022. The decrease in the total deposit-liabilities is consistent with the fact that two (2) NWDT-SACCOs had their respective authorization revoked in 2022 thus occasioning a recall of the deposits, while the segment registered a very minimal growth in terms of attracting new members.

Figure 17: Proportion of Deposit Liabilities based on the Type of Deposits

Source: SASRA Database

5.3.3. The Distribution of Deposit Liabilities of Regulated SACCOs by their Common Bond

Table 19 provides the distribution of deposit liabilities among the four (4) common bond clustering and shows that the 49-Agriculture-Based SACCOs had an improved deposits market share of 10.00% in 2022 compared to a market share of 9.83% reported in 2021. The 117-Government-Based SACCOs had the highest market share proportion of the total deposits at 65.10% in 2022 which is a marginal decline of the proportional market share of 65.18% in 2021. The 40-Teachers-Based SACCOs remained the most dominant sub-cluster with a market share of 30.15% in 2022 which is an increase from a market share of 29.98% recorded in 2021. The General Services and Administration of the Government-Based SACCOs had a cumulative market share of the total deposits at 21.73% in 2022, a marginal decline from the share of 21.88% reported in 2021.

Table 19: Distribution of Deposit Liabilities based on Field of Membership (Common Bond) Clusters

5.3.4 The Distribution of the Deposit Liabilities by the size of Deposits

Figure 18 analyses the distribution of deposit liabilities of the DT-SACCOs based on the size of the deposits held by individual DT-SACCOs as a proportion to total deposits held by all Regulated SACCOs. The number of DT-SACCOs with deposit liabilities above Kshs 5 Billion increased to 30-DT-SACCOs in 2022 compared to 26-DT-SACCOs with similar deposit liabilities in 2021. The respective market share of the deposits held by the DT-SACCOs within this category also increased significantly to 58.01% in 2022 compared to a market share of 54.35% showing that the DT-SACCOs' segments' total deposits are being consolidated in fewer and fewer SACCOs. The DT-SACCOs with deposit liabilities ranging between Kshs 1 Billion and Kshs 5 Billion on the other hand remained static at 51-DT-SACCOs in 2022 following the graduation of four (4) DT-SACCOs whose deposit liabilities crossed the Kshs 1 Billion mark in 2022. Their respective market share of DT-SACCOs' deposit liabilities however shrunk to 20.70% in 2022 compared to a market share of 27.74% in 2021.

Figure 18: Market Share of DT-SACCOs based on the size of their deposit liabilities as a proportion to total deposits of Regulated SACCOs.

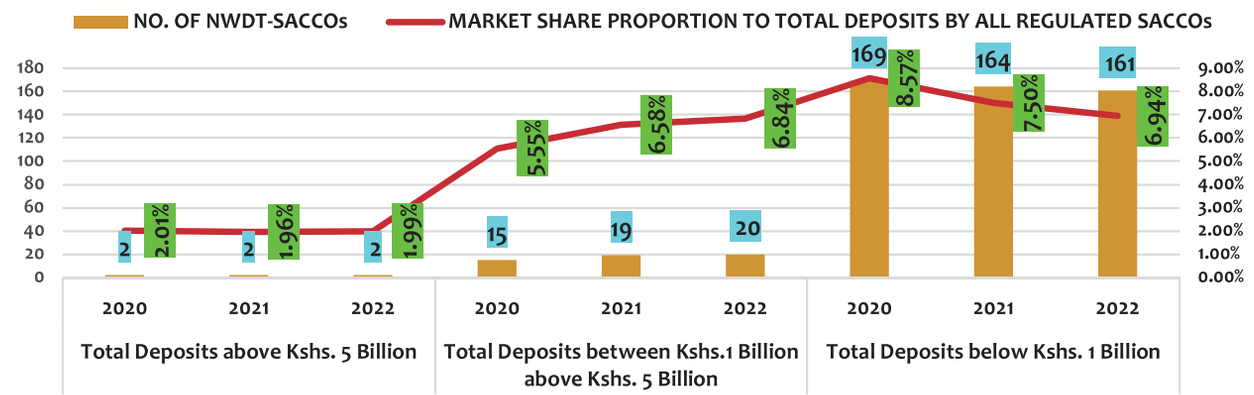

Source: SASRA Database

The NWDT-SACCOs' segment on the other hand had two SACCOs with total deposit liabilities above Kshs 5 Billion during the year 2022, as summarised in Figure 19. It shows that the market share of their

deposits to total deposits held by all the Regulated SACCOs increased marginally to 1.99% in 2022 from 1.96% in 2021. The NWDT-SACCOs with deposit liabilities between Kshs 1 Billion and Kshs 5 Billion on the other hand increased to 20-NWDT-SACCOs in 2022 from 19-NWDT-SACCOs in 2021, while the respective market share of the deposits also increased to 6.84% in 2022 compared to a market share of 6.58% in 2021.

Figure 19: Market Share of deposits of NWDT-SACCOs based on the size of their deposit liabilities as a proportion to total deposits held by Regulated SACCOs

Source: SASRA Database

The NWDT-SACCOs with deposit liabilities below Kshs 1 Billion constituted the majority of NWDT-SACCOs numbering 161-NWDT-SACCOs in 2022 compared to 164-NWDT-SACCOs in 2021, while their market share of total deposit liabilities decreased to 44.00% in 2022 compared to a market share of 46.76% in 2021 of all the deposit liabilities held by Regulated SACCOs.

5.3.5. Regulated SACCOs by Number of Deposit Accounts

The provisions of Reg. 24 of Regulations 2010 provides inter alia that a DT-SACCO "shall submit to the Authority a statement of deposit return on its non-withdrawable and withdrawable deposits in Form 3 set out in the Second Schedule at the end of every month to be received on or before the 15th day of the following month". The Statement of Deposit Return is an off-site tool utilised by the Authority to monitor, evaluate, and report on the performance and changes in the deposits (savings) mobilised and held by DT-SACCOS including the number of deposit accounts held, the amounts of deposits held in such accounts, and the range of deposits held in each of the accounts. As indicated in Section 5.1 of this report, the total amount of deposits held by DT-SACCOs for the period ended December 2022 was Kshs 522.59 Billion comprised of both non-withdrawable (BOSA) and withdrawable (FOSA) savings. These deposits were held in a total of 14.52 Million deposit accounts held in the 176-DT-SACCOs during the period ended December 2022 as summarised in Table 20.

Cognizant of the fact that there were reported a total of 5.96 Million members among the DT-SACCOs segment as discussed in Section 4.4 of this report, it is evident that on average each member of a DT-SACCO was operating more than two (2) accounts in their respective DT-SACCOs, which is consistent with the DT-SACCOs operating business model consisting of BOSA and FOSA savings accounts.

Table 20: Distribution of deposits liabilities by the number of deposit accounts held by DT-SACCOs.

Source: SASRA Database

The analysis in Table 20 as read with Table 21 further shows that a total of 13.16 Million deposit accounts constituting 90.66% of all the deposit accounts of DT-SACCOs, held deposits amounting to less than Kshs 50,000 each in 2022; but with cumulative total deposits amounting to Kshs 31.41 Billion which is equivalent to 6.01% of the total deposits held by the DT-SACCOs. The number of deposit accounts of DT-SACCOs holding between Kshs 50,000 and Kshs 100,000 on the other hand increased to 349,000 deposit accounts in 2022 representing 4.84% of all the deposits accounts but holding a cumulative sum of Kshs 25.30 Billion representing 2.40% of the total deposits held by DT-SACCOs in 2022. Based on the prescribed insurable maximum deposit limit of Kshs 100,00, it is evident that a deposit insurance scheme for the DT-SACCOs' segment as provided in the Sacco Societies Act and the Regulations 2010 made thereunder has the potential of covering 93.06% of all the deposit accounts but only 10.84% of the entire deposits held by DT-SACCOs.

It is also important to observe that there is a significant concentration of the number of deposits accounts with less than Kshs 50,000 among the 42-Large-Tiered DT-SACCOs and 56-Mid-Tiered DT-SACCOs by asset sizes. The 42-Large-Tiered DT-SACCOs reported 5.36 Million deposit accounts within the deposit range which is equivalent to 40.74% of the total deposit accounts in the range; and while the 56-Mid-Tiered DT-SACCOs reported 5.90 Million deposit accounts which is equivalent to 44.94% of the total deposit accounts within the deposit range. Additionally, the bulk of the deposits within this deposit range was equally held by the 42-Large-Tiered DT-SACCOs and the 56-Mid-Tiered DT-SACCOs with 53.53% and 15.19% of the total deposits of Kshs 31.41 Billion within the range.

Although the DT-SACCOs segment consisted of 78-Small-Tiered DT-SACCOs by asset size and thus by far the majority, the number of deposit accounts with less than Kshs 50,000 stood at 1.89 Million deposit accounts in 2022 and constituted just 14.32% of the deposit accounts within this deposit range. The total amount of deposits held by the 78-Small-Tiered DT-SACCOs was also least at 15.19% of the total deposit liabilities of 31.41 Billion within the range.

Source: SASRA Database

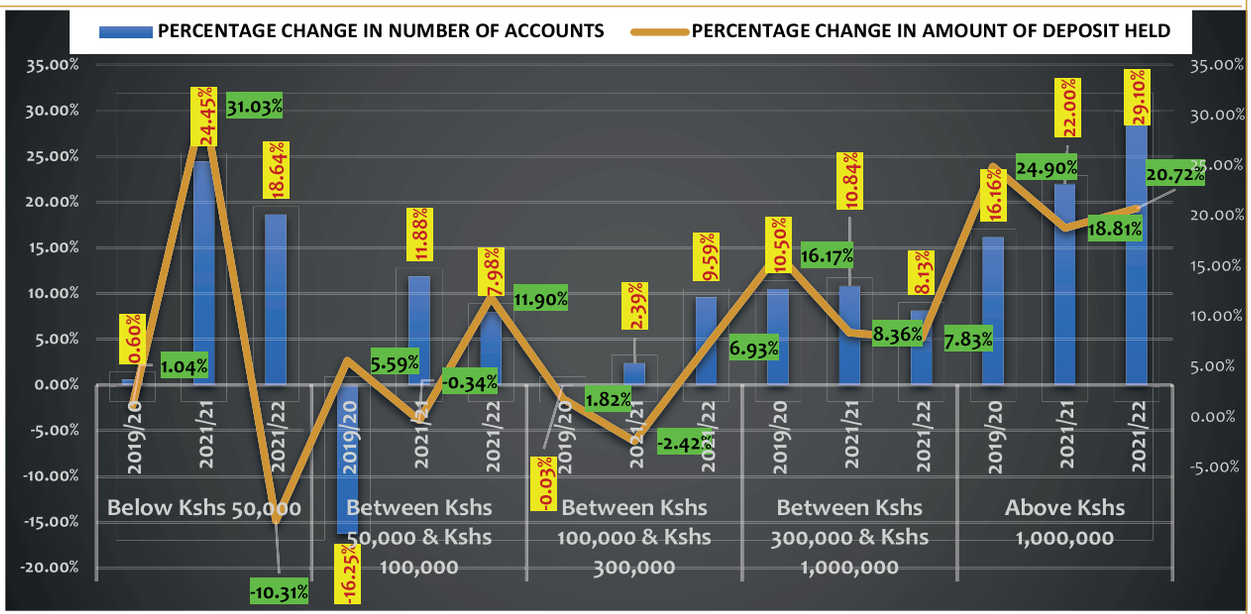

On the other end of the spectrum of deposit accounts, the analysis shows that the DT-SACCOs held 92,000 deposit accounts with sums above the Kshs 1 Million threshold, which accounted for 0.63% of all the deposit accounts, but which cumulatively held a sum of 163.29 Billion representing 31.25% of the total deposits held by DT-SACCOs. This represented an increase of 29.10% of the number of deposit accounts holding deposits of more than Kshs 1 Million which was reported at 71,000 deposits accounts in 2021, with total amount of deposits held therein amounting to Kshs 135.26 Billion. The total amount of deposits held in this cluster of deposit accounts thus increased by 20.72% as more particularly summarised in Figure 20.

This analysis is thus a testament to the fact that the number of deposit accounts holding more than Kshs 1 Million grew at a faster rate of 29.10% in 2022 than all other categories of deposit accounts as more succinctly summarised in Figure 20 while the growth rate in the amount of deposits held in the deposit accounts with more than Kshs 1 Million recorded the highest increase by 20.72% in 2022.

Just like with all the categories of deposit ranges, the 42-Large-Tiered DT-SACCOs had the highest proportion of the number of deposit accounts with more than Kshs 1 Million which was reported at 74.44% of all the deposit accounts within the range in 2022; while the 56-Mid-Tiered DT-SACCOs accounted for a proportion of 12.18% of the deposits accounts within the range. The 42-Large-Tiered DT-SACCOs also held the highest proportion of the deposits within this range with 83.25% of the total deposits of Kshs 163.29 Billion within the range held by these Large-Tiered DT-SACCOs.

The 56-Mid-Tiered DT-SACCOs on the other hand, held 13.01% of the deposits within the range, with the 78-Small-Tiered DT-SACCOs holding only 3.74% of the deposits of 163.29 Billion within this range of deposits. The analysis shows that the Large-Tiered DT-SACCOs are attracting and/or more likely to attract and retain large amounts of deposits liabilities from their membership, than either the Mid-Tiered or the Small-Tiered DT-SACCOs; and is equally consistent with the high growth rates in deposit liabilities of the Large-Tiered DT-SACCOs as has been witnessed over the years.

5.4 REGULATED SACCOs SECTORAL LENDING

5.4.1. Overview of the economic sectors

The sectoral lending report is a critical economic analysis and credit performance tool for credit institutions such as Regulated SACCOs. It reports the amount of credit which Regulated SACCOs have issued to the various sectors of the economy during a specific period, but also analysis of the amounts of credit outstanding for each economic sector during a specific period. At the macro-economic level, the Regulated SACCOs sectoral lending reports on eight (8) main economic sectors namely land and housing; agriculture; trade; education; human health; manufacturing and servicing industries; finance, investment and insurance; and consumption and social services sectors; but at the micro-economic levels, each of these macro-economic sectors and subdivided into micro-economic subsectors or industries in respect of which the credit advanced by Regulated SACCOs are earmarked to finance. Figure 21 provides a summary of the proportionate sectoral lending of Regulated SACCOs in 2022 in comparison to 2021.

Figure 21: Proportionate Sectoral Lending of Regulated SACCOs by Economic Sectors.

Source: SASRA Database

5.4.2 Analysis of the distribution of credit facilities by the economic sectors

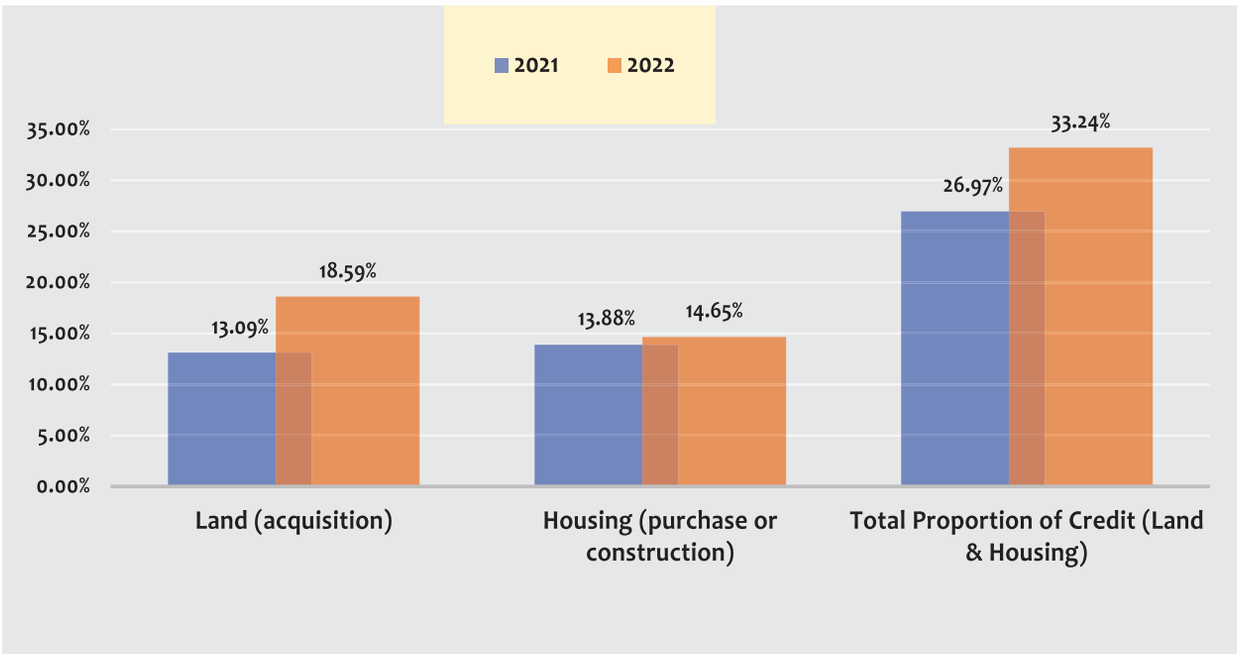

The land and housing sectors continued to receive the highest proportion of credit facilities advanced by Regulated SACCOs, with 33.24% in 2022 which is an increase from 26.97% reported in 2021. The foregoing finding is consistent with the traditional SACCOs' lending model which has for years been focussed on empowering the membership towards acquisition of land on the one hand which accounted for 18.59% of the total credit advanced in 2022; and the acquisition of, and/or construction of housing mainly residential houses which accounted for 14.65% of the total credit advanced during the same period as summarised in Figure 22. In both subsector (land and housing), there was an increase in the proportionate amount of credit advanced from a similar period in 2021.

It is however important to recognise that the SACCO lending model towards the land and housing sectors is still based on their unique incremental mortgage lending model, and not the conventional mortgage normally applied by other financial credit institutions. The incremental mortgage lending model which is premised in short-term credit facilities mostly tenured between three (3) and five (5) years, has been proved successful within the Kenyan SACCO system, because it assists the SACCOs' to manage their liquidity and cash flow cycles, but also mitigates against the risks of defaults, since additional lending is only granted after successful repayment of the prior credit or a substantial portion thereof in what is popularly referred to as refinancing.

The growth in the lending towards land and housing sector was also catapulted by the membership of eleven (11) of the Regulated SACCOs in the Kenya Mortgage Refinance Company Ltd (KMRC) and which has been instrumental in providing long-term refinancing credit facilities to member SACCOs, towards on-lending to housing initiatives.

In addition, the government's agenda on affordable housing as reflected in the Bottom-Up Economic Transformation Agenda Framework (BeTA) has put more impetus on the need for Regulated SACCOs to prioritise affordable housing aligned credit products.

Figure 22: Proportionate Distribution of credit within the Land & Housing sector to total credit by Regulated SACCOs

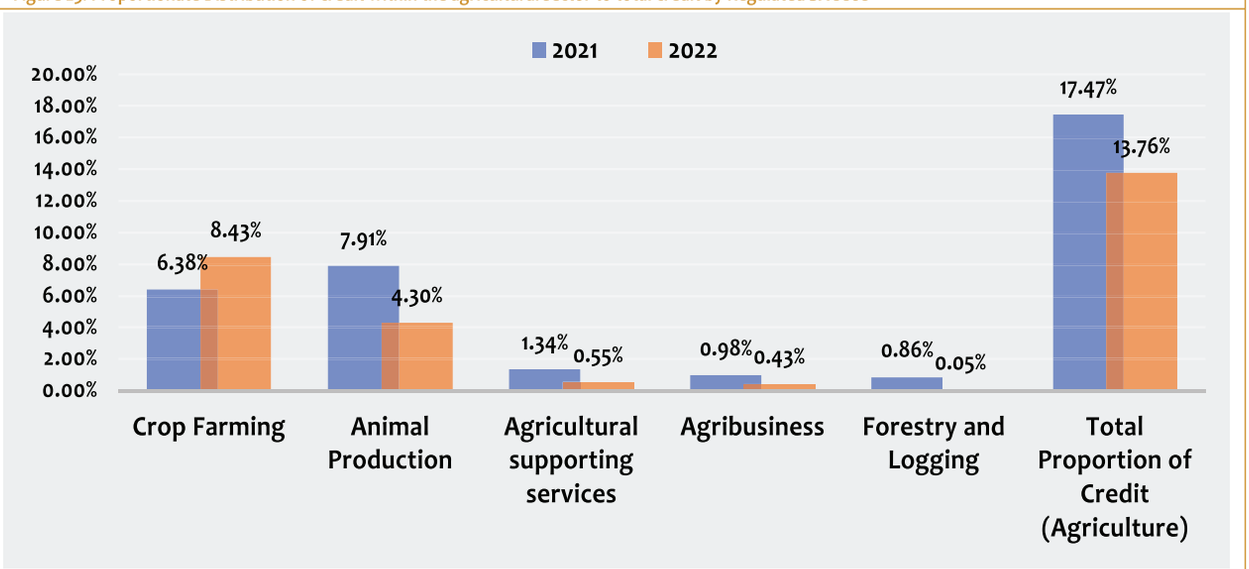

Source: SASRA Database

The education sector on the other hand also recorded an increase in the amount of credit received from Regulated SACCOs to 21.98% in 2022 compared to 20.83% of credit which went to finance education sector in 2021 and remains the second highest beneficiary of credit facilities advanced by Regulated SACCOs for the second year running. The continued increase of financing education especially payment of school fees is consistent with the socio-economic objectives of Regulated SACCOs as cooperative entities in accordance with the provisions of Section 4 of the Cooperative Societies Act, and it is projected that this trend is unlikely to change in the long-term.

The agricultural sector was hitherto a credit lending forte of Regulated SACCOs as evidenced by the fact that there are 42-Agriculture Based SACCOs within the Regulated SACCO industry. However, the agricultural sector received only 13.76% of the credit facilities advanced by Regulated SACCOs in 2022 which is a drop from a funding amounting to 17.47% advanced in 2021. The reduced lending towards the agricultural sector was generally informed by the erratic weather patterns dominated by long spells of drought, which was witnessed in 2022 and thereby calling for cautionary lending by Regulated SACCOs with a view to controlling loan defaults.

The drop in funding towards the agricultural sector by regulated SACCOs is also a testament to the fact that even the hitherto Agriculture-Based SACCOs have since diversified there lending portfolio towards other sectors in a bid to weather the uncertainties associated with the performance agricultural loan products. Figure 23 provides the comparative distribution of the credit advanced within the different industries of the agricultural sector and shows that the bulk of the credit lending in agriculture in 2022 went towards crop farming at 8.43% compared to a proportionate lending of 6.38% reported in 2021.

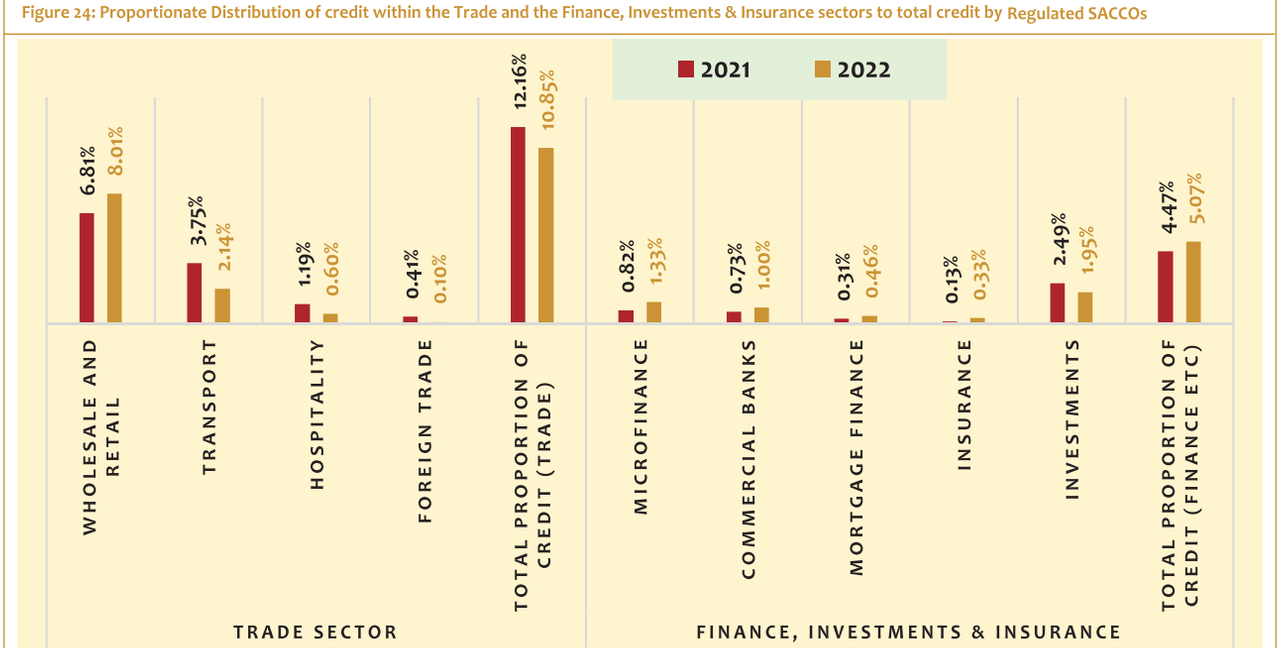

Figure 23: Proportionate Distribution of credit within the agricultural sector to total credit by Regulated SACCOs

Source: SASRA Database

The other economic sectors which benefited from credit facilities advanced by Regulated SACCOs include the trade sector (10.85% in 2022 compared to 12.16% in 2021); the finance, investment, and insurance sectors (5.07% in 2022 compared to 4.47% in 2021; the manufacturing and servicing sectors (2.18% in 2022 compared to 7.88% in 2021); and the human health sector (1.82% in 2022 compared to 1.88% in 2021) a summarised in Figure 24.

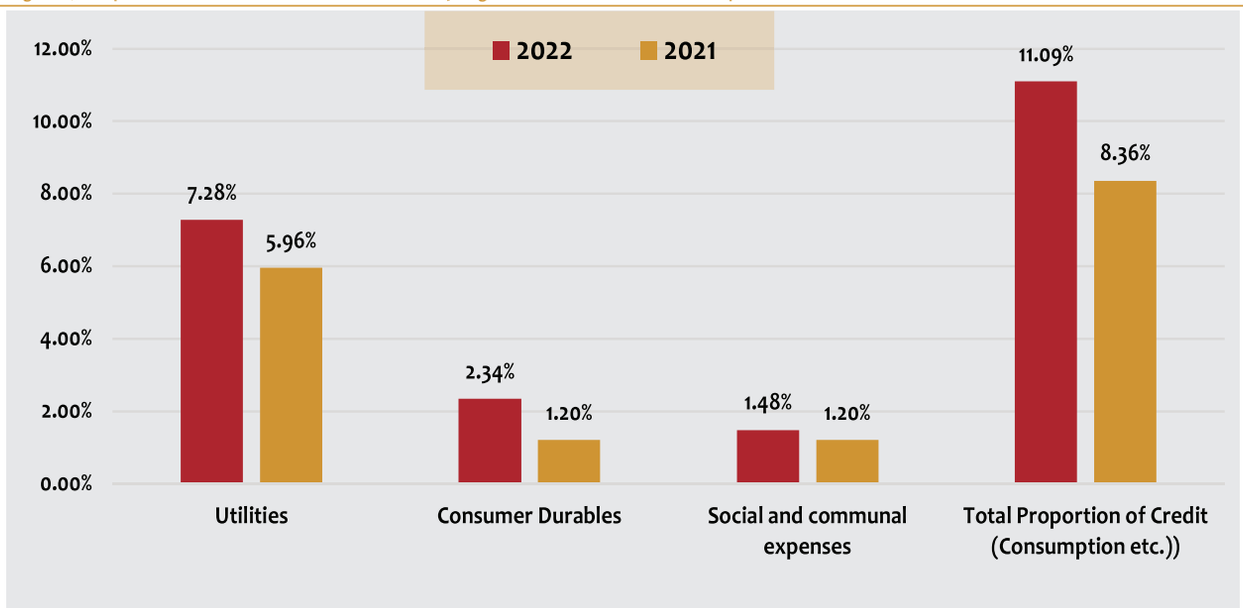

Figure 24: Proportionate Distribution of credit within the Trade and the Finance, Investments & Insurance sectors to total credit by Regulated SACCOs

Source: SASRA Database

The credit facilities advanced towards consumption and social services increased to 11.09% in 2022 compared to 8.36% of the total credit advanced in 2021. Credit facilities advanced to members of Regulated SACCOs towards the payment of utilities continue to constitute the highest proportion of all the credit towards consumption and social services and stood at 7.28% in 2022 compared to 5.96% reported in 2021 as summarised in Figure 25. This shows that many members of Regulated SACCOs often turn to their respective SACCOs for financial support during times of need, consistent with the social objectives of cooperative enterprises.

6.0 FINANCIAL STABILITY OF THE REGULATED SACCO INDUSTRY

6.1. The Introduction

The financial tools for monitoring and reporting the stability and safety of deposit-taking financial institutions such as Regulated SACCOs generally include the capital adequacy, quality of the assets, earnings, and liquidity. The Regulations 2010 prescribes some of the minimum standards to be maintained by DT-SACCOs, while the Regulations 2020 prescribed the minimum standards to be always maintained by NWDT-SACCOs. Together with other internationally recommended industry practices, the maintenance of these standards by individual SACCOs are meant to ensure that Regulated SACCOs are not only financially stable but are equally able to meet their obligations as and when they fall due, especially financial obligations owed to depositors.

6.1.1. Overview Financial Stability Indicators of DT-SACCOs

Table 22 provides an overview of the financial stability indicators for DT-SACCOs during the year ended December 2022 and shows overall improvement in each of the indicators. There was improvement in the key capital adequacy indicators, asset quality, earnings as well as liquidity of DT-SACCOs as discussed in section 6.2 of this report of the report.

6.2 The Capital Adequacy Indicators for Regulated SACCOs

6.2.1. General

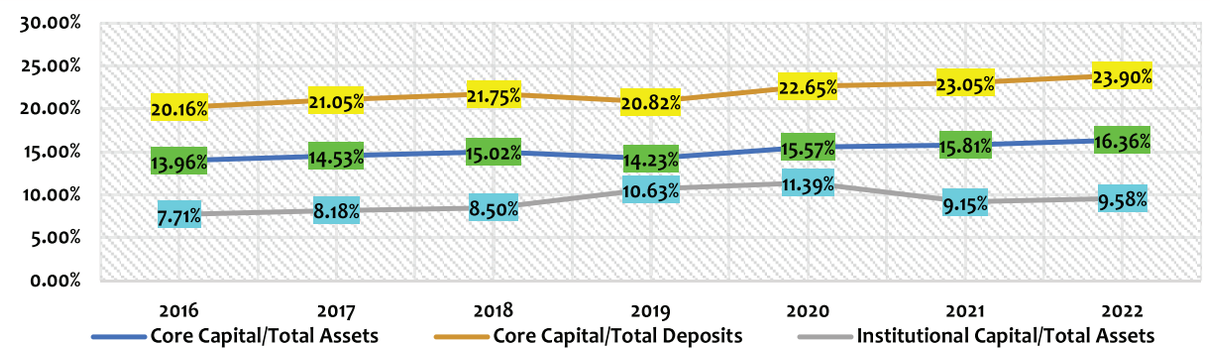

The SACCO Societies Act defines core capital as the "fully paid-up members' shares, capital issued, disclosed reserves, retained earnings, grants and donations all of which are not meant to be expended unless on liquidation of the SACCO society". The provisions of Reg. 9 of the Regulations 2010 and Regulations 11 of the Regulations 2020 prescribe the minimum core capital and capital adequacy requirements which every DT-SACCO and NWDT-SACCOs respectively must maintain at all times. These provisions also grant the Authority to prescribe higher capital requirements for each of the segments of the Regulated SACCOs where the Regulated SACCO suffers any losses resulting in capital deficiency; is significantly exposed to risk; has a high or particularly severe volume of poor-quality assets; is growing rapidly without adequate capitalisation and risk management system; may be adversely affected by the activities or conditions of its associates, subsidiaries or related parties; or has contravened the provisions of the Act, these Regulations or any guideline, condition or directive issued by the Authority.

In addition, the SACCO Societies Act provides inter alia that a DT-SACCO Society which fails to maintain at all times at least a half of the prescribed core capital and capital adequacy requirements is liable to have its deposit-taking license revoked. On the other hand, the Regulations 2020 for NWDT-SACCOs provides that where a NWDT-SACCO Society fails to maintain at least twenty-five percent of the prescribed minimum capital adequacy requirements, then its authorization shall be revoked.

6.2.2. The Capital Adequacy Indicators for DT-SACCOs

During the period ended December 2022, the cumulative core capital of the DT-SACCOs grew from Kshs 109.29 Billion in 2021 to reach Kshs 124.89 Billion in 2022 against the prescribed minimum of Kshs 10 Million. The institutional capital to total assets ratio which test the ability of DT-SACCOs to build their capital from retained earnings and surpluses increased from 9.15% recorded in 2021 to reach 9.58% in 2022 against the prescribed minimum of 8%. The foregoing shows that on overage DT-SACCOs were able to sufficiently make retentions from their surpluses for purposes of building their capital. On the other hand, the core capital to total assets ratio increased from 15.81% in 2021 to 16.36% in 2022 against the prescribed minimum ratio of 10%; while the core capital to total deposits ratio also increased from 23.05% in 2021 to 23.90% reported in 2022. Figure 27 provides a comparative trend analysis of the key capital adequacy parameters for DT-SACCOs and shows that the DT-SACCOs segment is stable and on average operates above the prescribed minimum capital adequacy requirements.

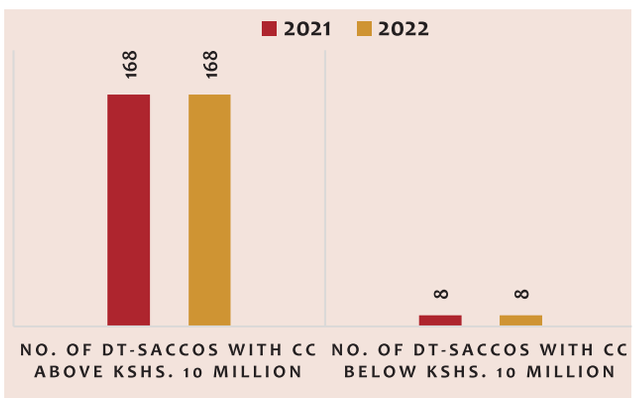

Figure 27: Trend analysis in capital adequacy ratios for DT-SACCOs (2016 – 2022)

Source: SASRA Database

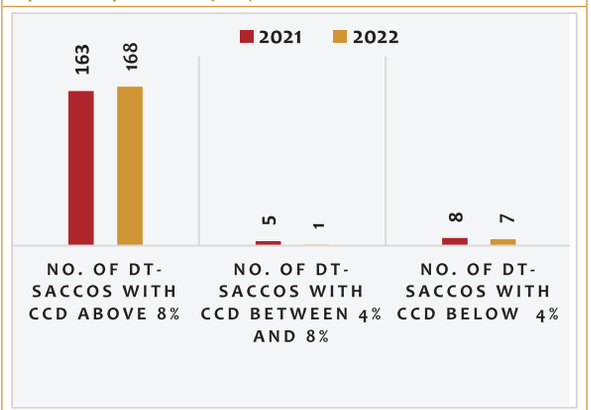

Figure 28 (a), (b), (c) and (d) provides the comparative level of compliance by DT-SACCOs with the prescribed criterion for capital adequacy. In terms of core capital, a total of 168-DT-SACCOs were able to maintain the same above the minimum of Kshs 10 Million, while 8-DT-SACCOs had their core capital below the prescribed threshold during the year ended December 2022, as it was in the year ended December 2021. The core capital to total deposits ratio which is prescribed at a minimum of 8% was complied with by 168-DT-SACCOs in 2022 which is an improvement from 163-DT-SACCOs which were compliant with the ratio in 2021. Only 1-DT-SACCO did not maintain the prescribed minimum but was still within the allowable threshold of over fifty percent of the prescribed minimum, while 7-DT-SACCOs were below the allowable threshold of fifty percent of the prescribed minimum.

Figure 28 (a): No. of DT-SACCOs compliant with Core Capital (CC)

Source: SASRA Database

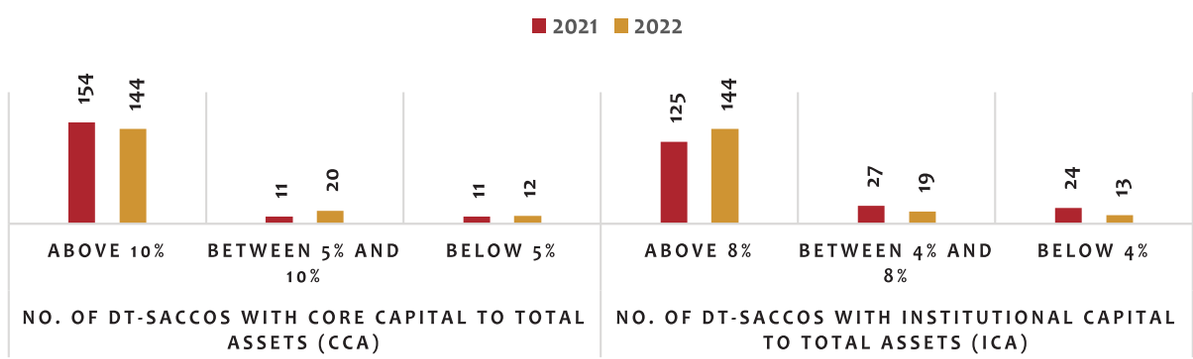

Figure 28 (b): No. of DT-SACCOs compliant with Core Capital to Deposits ratio (CCD)

Source: SASRA Database

A shown in Figure 28 (c) the core capital to total assets ratio was fully complied with by 144-DT-SACCOs in 2022 compared to 154-DT-SACCOs which were fully compliant in 2021. The drop in the number shows that these SACCOs were growing their assets at faster rates than their core capital, a situation which will require them to increase the rates at which they are retaining their surpluses. These SACCOs core capital to total assets thus fell to between 5% and 10% resulting in the increase of the number to 20-DT-SACCOs in 2022 compared to 11-DT-SACCOs which were reported to have their core capital to total assets ratio at between 5% and 10%. Some 12-DT-SACCOs were however reported to be non-compliant with the core capital ratio and are thus operating on strict conditional or restricted deposit-taking licenses. The institutional capital to total assets on the other hand was fully complied with by 144-DT-SACCOs in 2022 which is an increase from the 125-DT-SACCOs which were fully compliant with the ratio in 2021. The foregoing shows that DT-SACCOs have been able to make adequate retention from their surpluses for purposes of building their capital which enhances stability given that such capital is less expensive than the other sources of capital.

Figure 28(c): No. of DT-SACCOs compliant with Core Capital to Total Assets (CCA) and Institutional Capital to Total Assets (ICA)

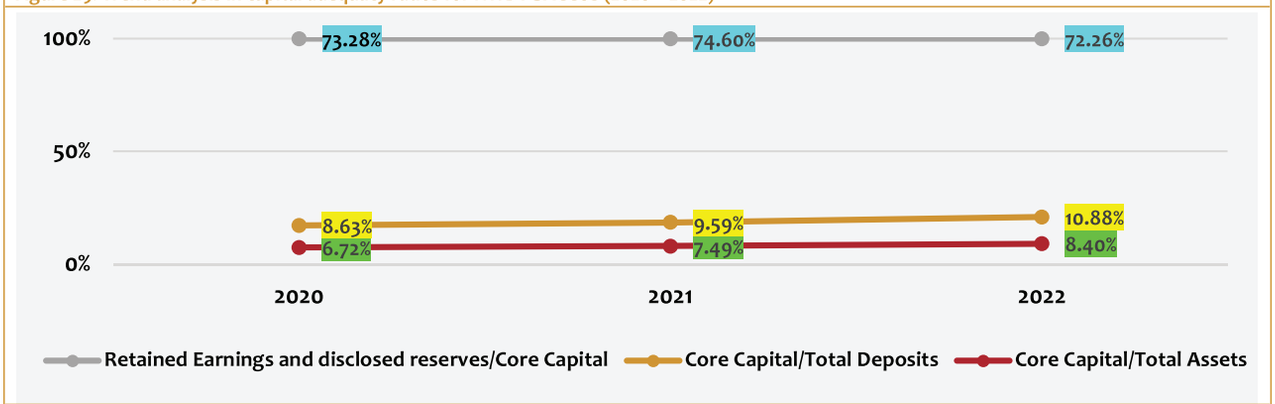

Source: SASRA Database

6.2.3. The Capital Adequacy Indicators for NWDT-SACCOs

During the period ended December 2022, the core capital of the 183 NWDT-SACCOs grew from Kshs 8.69 Billion in 2021 to Kshs 10.65 Billion with the prescribed minimum Core Capital for a Regulated NWDT SACCO being Kshs 5 Million, and thus shows increased overall stability of the NWDT-SACCOs segment. The NWDT-SACCOs segment were able to register full compliance with the core capital to total assets ratio during the second year of supervision, which saw their core capital to total assets ratio move from 7.49% in 2021 to cross the prescribed minimum of 8% to stand at 8.40% in 2022 as summarised in Figure 29. While there was a marginal drop in the ratio of retained earnings and disclosed reserves to core capital to 72.26% in 2022, compared to 74.60% in 2021, the same was still maintained well above the prescribed minimum of 50% and thus cumulatively, the NWDT-SACCOs segment remained compliant and stable.

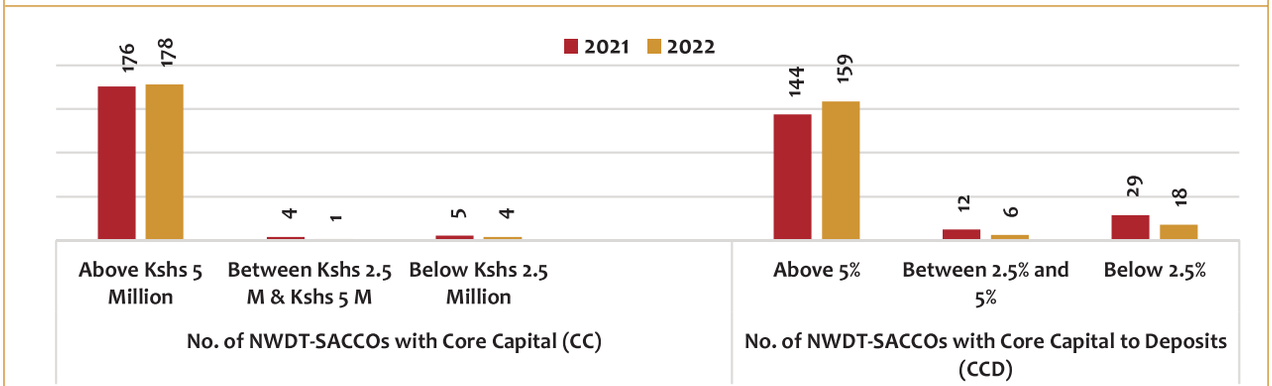

Figure 29: Trend analysis in capital adequacy ratios for NWDT-SACCOs (2020 – 2022)

Source: SASRA Database

Figure 30 provides the individual level of compliance by NWDT-SACCOs with the core capital prescribed at a minimum of not less than Kshs 5 Million and the core capital to total deposits ratio prescribed at not less than 5%. The analysis shows that a total of 178-NWDT-SACCOs were fully compliant and thus had their individual core capital maintained above the Kshs 5 Million threshold in 2022 which is an increase from the 176-NWDT-SACCOs which maintained the threshold in 2021. Only 5-NWDT-SACCOs failed to maintain their core capital above the Kshs 5 Million mark, one of which had its core capital at between Kshs 2.5 Million and Kshs 5 Million. The remaining 4-NWDT-SACCOs were thus not compliant and are operating on conditions and restrictions.

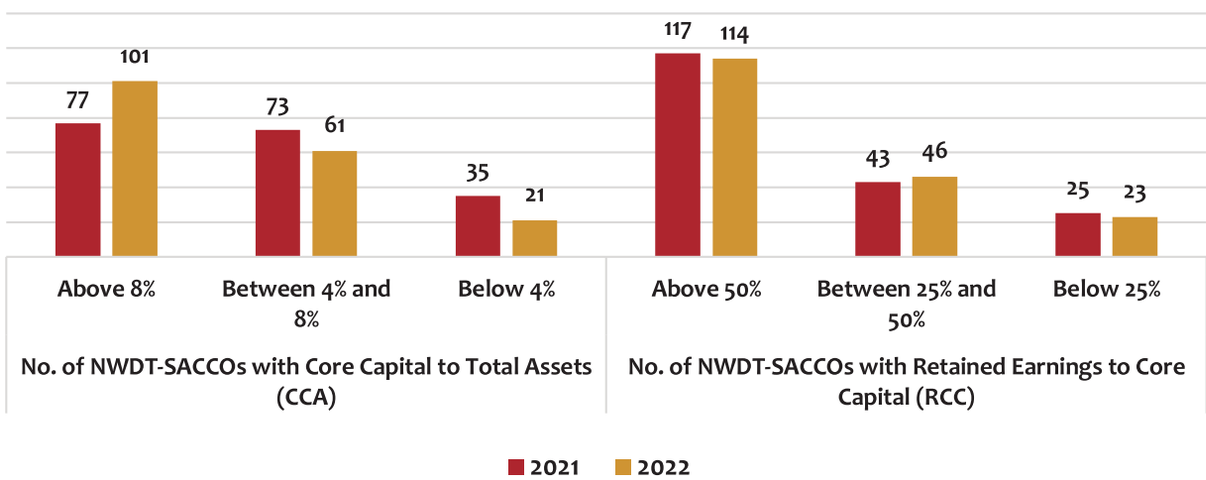

Figure 30: Level of NWDT-SACCOs Individual Compliance with Core Capita (CC) and Core Capital to Total Deposits (CCD)

Source: SASRA Database

The other capital adequacy indicators required of NWDT-SACCOs are the core capital to total assets ratio which must be maintained at not less than 8%; and the retained earnings and other disclosed reserves to core capital ratio which must be maintained at not less than 50%. Figure 31 provides the levels of compliance by individual NWDT-SACCOs with the two (2) indicators and shows that 101-NWDT-SACCOs were fully compliant with the core capital to total assets ratio in 2022 compared to 77-NWDT-SACCOs which were compliant with the same ration in 2021. A total of 61-NWDT-SACCOs had their core capital to total assets ratio at between 4% and 8%, while 21-NWDT-SACCOs remained non-compliant with a core capital to total assets ratio of below 4%. On the retained earnings and other disclosed reserves to core capital ratio, a total of 114-NWDT-SACCOs were fully compliant with their individual ratios maintained above the 50% threshold, while 46-NWDT-SACCOs had their ratios ranging between 25% and 50%. However, 23-NWDT-SACCOs had the ratio below 25% and thus continues to operate of conditional and restricted authorization.

Figure 31: Level of compliance by individual NWDT-SACCOs with the core capital to total assets and the retained earnings to core capital ratios

6.3. The Assets and the Quality of Assets of Regulated SACCOs

6.3.1. An overview the total assets of regulated SACCOs

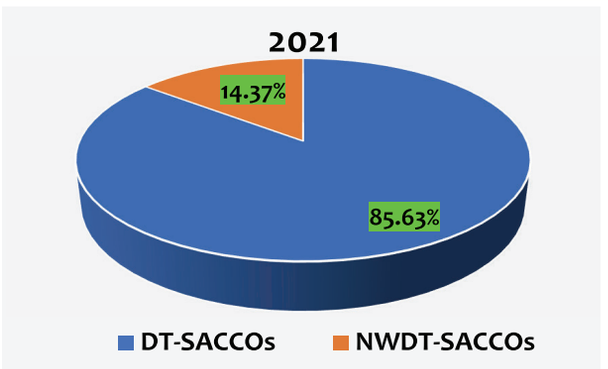

As shown in Table 12, the total assets of the Regulated SACCOs during the period ended December 2022 stood at Kshs 890.30 Billion which was made up of a sum of Kshs 763.50 Billion being total assets of the DT-SACCOs segment and Kshs 126.80 Billion being the total assets of the NWDT-SACCOs segment. The total assets of DT-SACCOs segment thus accounted for 85.76% of the total assets portfolio while the total assets of the NWDT-SACCOs segment accounted for 14.24% of the total assets of Regulated SACCOs in 2022 as summarised in Figure 32 as compared to a portfolio of 85.63% of the total assets of Regulated SACCOs which was held by the DT-SACCOs segment and 14.37% of the total assets held by NWDT-SACCOs segment in 2021 as depicted in Figure 33.

Figure 32: Proportionate Distribution of Total Assets between DT-SACCOs and NWDT-SACCOs, 2022

Source: SASRA Database

Figure 33: Proportionate Distribution of Total Assets between DT-SACCOs and NWDT-SACCOs, 2021

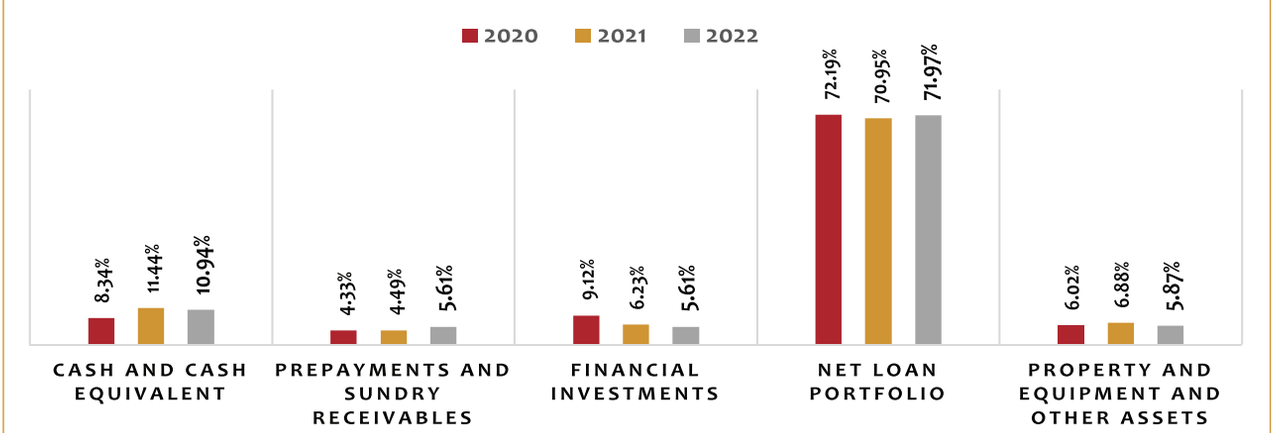

Source: SASRA Database

6.3.2 The Composition of the Total Assets

The total assets portfolio of Regulated SACCOs was composed of net loans; cash and cash equivalents; financial investments; prepayments and receivables; and property, equipment & other assets as summarised in Figure 34 providing the proportionate composition of total assets of the Regulated SACCOs. The net loans continue to constitute the highest proportion of assets, followed by cash and cash equivalents, while financial investments and prepayments and receivables constituted the least proportion of the total assets.

Figure 34: Proportionate Composition of Total Assets of the Regulated SACCOs.

Source: SASRA Database

Table 24 on the other hand provides for distribution of the total assets' portfolio of Regulated SACCOs and shows that the net loans amounted to Kshs 640.72 Billion in 2022 representing 71.97% of the total assets; which is an increase from the sum of Kshs 572.68 Billion representing 70.95% of the total assets in 2021. The increase in the proportion of net loans can be explained by a similar increase in the proportionate net loans issued by DT-SACCOs to 61.69% in 2022 from the proportionate net loans of 60.49% in 2021. The proportionate net loans issued by NWDT-SACCOs to total assets however decreased from 10.47% in 2021 to 10.28% in 2022.

The cash and cash equivalents constituted the second highest proportion of total assets in 2022 amounting to Kshs 97.36 Billion and representing 10.94%. This however represented a decline in the proportion of cash and cash equivalent to total assets in 2021 which was reported at 11.44%. The cash and cash equivalent held by NWDT-SACCOs remained near constant at 1.53% of the total assets in 2022 representing Kshs 13.61 Billion, compared to 1.54% of the total assets representing Kshs 12.41 Billion in 2021. On the other hand, the cash and cash equivalent to total assets of DT-SACCOs dropped from a proportion of 9.91% in 2021 representing Kshs 79.96 Billion to 9.41% in 2022 representing Kshs 83.75 Billion. The analysis shows that NWDT-SACCOs held their assets in cash and

cash equivalents at a higher rate than DT-SACCOs during the year ended December 2022. As shown above, DT-SACCOs seemingly held their assets in loans and credit advances, probably driven by higher demand for loans in the segment than among the NWDT-SACCOs.

Table 24: The Composition of the Total Assets Portfolio of Regulated SACCOs

		2020		2021		2022	
TYPE OF ASSET	SACCO CLUSTER	Amount in Kshs. Billions	% to Total Assets	Amount in Kshs. Billions	% to Total Assets	Amount in Kshs. Billions	% to Total Assets

6.3.3. Financial Investments in Regulated SACCOs

The total amount of financial investments of Regulated SACCOs which is made up of investment in government securities; placements made with National Cooperatives (NACOs); shares invested in NACOs; investment shares made in publicly listed companies; and investments in other securities such as money markets and units trusts, decreased from Kshs 50.30 Billion in 2021 which represented 6.23% of the total assets to Kshs 49.95 Billion in 2022 which represented 5.61% of the total assets. The drop in the proportion of financial investments to total assets is singularly explainable by significant drop in the financial investments of the DT-SACCOs' segment from Kshs 39.61 Billion in 2021 to Kshs 38.89 Billion in 2022; whereas the financial investments for NWDT-SACCOs increased marginally from Kshs 10.69 Billion in 2021 to Kshs 11.06 Billion in 2022. The divestiture by DT-SACCOs from financial investments, coupled with drop in the cash and cash equivalent and low rate of savings mobilization is evidence that DT-SACCOs, unlike their NWDT-SACCOs counterparts, were faced with high demands for loans during the year 2022 and thus opted to liquidate some of their financial investments to fund the loan demands from members.

Figure 35 provides a summary of the proportionate representation of the components of financial investments in Regulated SACCOs and shows that there has been a gradual increase in the investments in government securities which rose from a low of 4.28% of the total financial investments in 2020 to a high of 23.43% of the total financial investments in 2022. Increased investments in government securities which SACCOs have previously shied away from, is an important development in readiness for the integration of Regulated SACCOs into the national payment system as well as roll-out of a SACCOs inter-lending platform, because such investments are often utilised as security in inter-lending as well as position settlement in the payment systems.

Figure 35: Proportionate components of Financial Investments of Regulated SACCOs

Source: SASRA Database

The analysis also shows that Regulated SACCOs have been progressively reducing their placements with NACOs as a proportion of their financial investments which have fallen from a high of 50.54% in 2020 to a low of 30.00% in 2022. The divestiture from placement with NACOs is also being pushed by the continued high demand for loans from members, against low returns associated with such placements. Regulated SACCOs have however continued to patronise the membership of NACOs as evidenced by the increase in the shares in the NACOs which increased to 38.28% of the total financial investments. Investments by Regulated SACCOs in shares of listed companies as well as in other regulated securities (unit trusts) remained marginal at 5.04% and 4.26% respectively in 2022. These decreases may however be attributed to loss of market value of the shares held in public listed companies as poor performance of the regulated securities, as well as some divestiture.

6.3.4. The Loans' Portfolio of Regulated SACCOs

Table 25 provides a summary of the loan portfolio of Regulated SACCOs during year ended December 2022 and shows that the gross loans stood at Kshs 680.35 Billion, which is an increase from the sum of Kshs 608.75 Billion reported in 2021. This represented a 12.24% increase in gross loans compared to an increase of 10.00% reported in 2021. The gross loans were made up of Kshs 586.16 Billion issued by the DT-SACCOs segment and Kshs 94.19 Billion issued by the NWDT-SACCOs segment. The net loans and advances for the period ended December 2022 on the other hand stood at Kshs 640.72 Billion compared to Kshs 572.68 Billion reported in 2021. The net loans and advances were made up of the sums of Kshs 549.20 Billion issued by the DT-SACCOs segment and Kshs 91.51 Billion issued by the NWDT-SACCOs segment.

Table 25: Summary of the loan portfolio of Regulated SACCOs

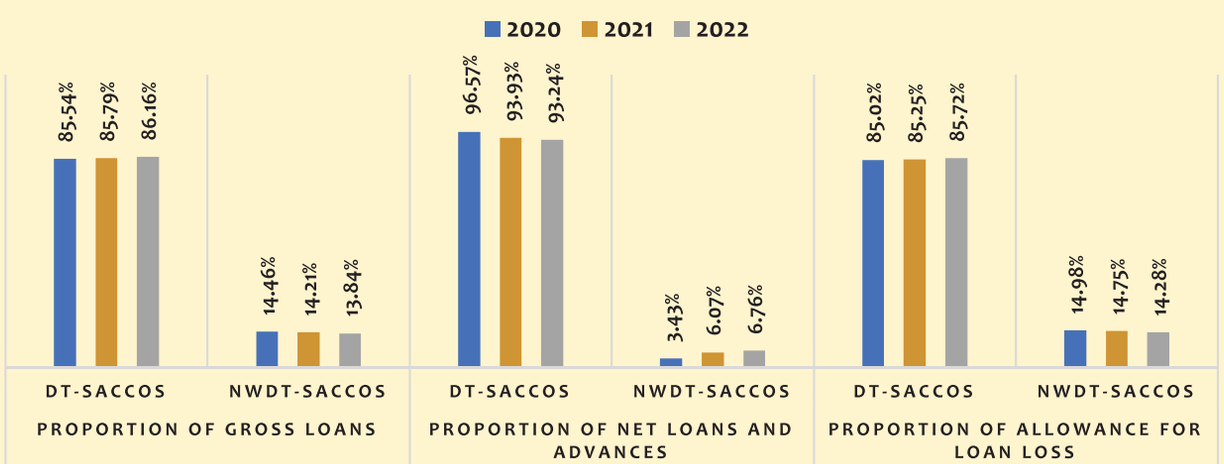

LOAN PORTFOLIO	CLUSTER OF SACCOs	2020	Y-to-Y Change (2020/21)	2021	Y-to-Y Change (2021/22)	2022
		Amount in Kshs. Billions		Amount in Kshs. Billions		Amount in Kshs. Billions
Gross Loan Portfolio	DT-SACCOs	474.77	10.00%	522.25	12.24%	586.16
	NWDT-SACCOs	80.28	7.75%	86.50	8.89%	94.19
	TOTAL	555.05	9.68%	608.75	11.76%	680.35
Allowance for Loan Loss	DT-SACCOs	24.19	40.76%	34.05	8.53%	36.95
	NWDT-SACCOs	0.86	155.81%	2.20	21.86%	2.68
	TOTAL	25.05	44.71%	36.25	9.34%	39.64

Net Loans and Advances	DT-SACCOs	450.58	8.35%	488.20	12.49%	549.20
	NWDT-SACCOs	79.42	6.37%	84.48	8.32%	91.51
	TOTAL	530.00	8.05%	572.68	11.88%	640.72

Source: SASRA Database

The allowance for loan losses representing the total provisioning required under the law from the loans under performing (1%), watch (5%), substandard (25%), doubtful (50%) and loss100%categories increased from Kshs 36.25 Billion in 2o21 to Kshs 39.64 Billion in 2022 and representing a 9.34% increase over the period compared to a year to year change of 44.71% reported in 2021. The sharp increase in the year-to-year change in 2021 was however informed by the provisioning which was made by NWDT-SACCOs during their first year of regulations, and the curve has substantially normalised in 2022. Figure 36 provides a representation of the proportion of Gross Loans; Net Loans & Advances; and Allowance for Loan Loss of Regulated SACCOs.

Figure 36: Proportion of Gross Loans; Net Loans & Advances; and Allowance for Loan Loss of Regulated SACCOs

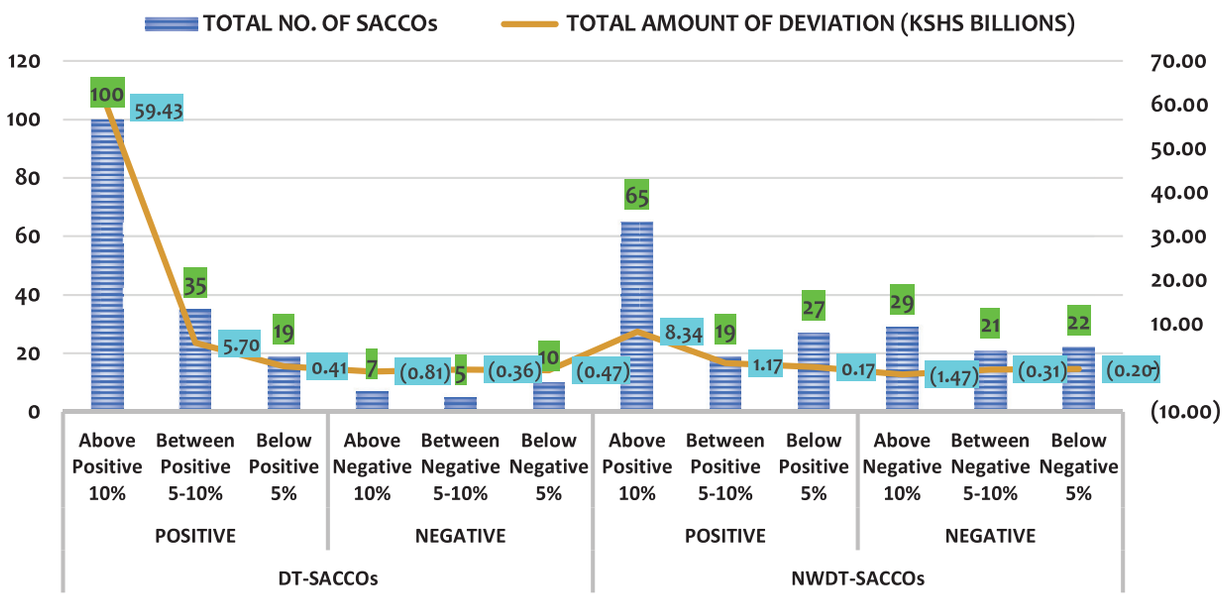

Source: SASRA Database

Although there was a cumulative growth rate in the gross loans between 2021 and 2022 for the Regulated SACCOs which was reported at 11.76%, the growth rate was not evenly distributed among the Regulated SACCOs as some of them registered negative growth rates. As shown in Figure 37, a total of 265-Regulated SACCOs made up of 154-DT-SACCOs and 111-NWDT-SACCOs registered positive growth rates in their gross loan portfolios; while the remaining 72-Regulated SACCOs made up of 22-DT-SACCOs and 72-NWDT-SACCOs registered negative growths rates in their respective gross loan portfolios. The foregoing analysis shows that whereas 87.50% of all DT-SACCOs recorded positive growth rates in their gross loans, only 60.66% of the NWDT-SACCOs recorded positive growth rates in their gross loans, thereby showing great demand for loans by the membership of DT-SACCOs as compared to the demand for loans by the membership of NWDT-SACCOs.

Among the DT-SACCOs segment, a total of 100-DT-SACCOs recorded positive growth rates in their gross loans above 10% with the cumulative deviation value of Kshs 59.43 Billion while 33-DT-SACCOs recorded positive growth rates of between 5% and 10% with a cumulative value of Kshs 5.70 Billion and the remaining 19-DT-SACCOs recorded positive growth rates of below 5% with a cumulative deviation sum of Kshs 0.41 Billion. On the other hand, 65-NWDT-SACCOs recorded positive growth rates above 10% in their respective gross loan portfolios with the cumulative deviation sum of Kshs 8.34 Billion, while 19-NWDT-SACCOs recorded positive growth rates of between 5% and 10%

with cumulative deviation sum of Kshs 1.17 Billion and the remaining 27-NWDT-SACCOs recorded positive growth rates of below 5% with a cumulative deviation sum of Kshs .17 Billion.

Figure 37: Distribution of growth rates in the total deposits of DT-SACCOs and NWDT-SACCOs

Source: SASRA Database

On the other end of the spectrum, 7-DT-SACCOs recorded negative growth rates above 10% in their individual gross loan portfolios shedding off a total sum of Kshs 0.81 Billion, while 5-DT-SACCOs recorded a negative growth rate of between 5% and 10% shedding off Kshs 0.36 Billion from their gross loan portfolio with the remaining 10-DT-SACCOs shedding off of a cumulative sum of Kshs 0.47 Billion at individual negative growth rates of below 5%. The NWDT-SACCOs' segment on their part had 29-NWDT-SACCOs with negative growth rates above 10% resulting to the shedding off of a sum a total sum of 1.47 Billion, while 21-NWDT-SACCOs which had negative growth rates of between 5% and 10% shed-off 0.31 Billion and the remaining 22-NWDT-SACCOs with negative growth rates of below 5% shed-off a total of Kshs 0.20 Billion from their individual gross loan portfolios.

6.3.5. The quality of the Loans' portfolio of Regulated SACCOs

The quality of the loans and advances component of total assets of Regulated SACCOs is monitored and measured using the Risk Classification of Assets and Provisioning return which is submitted by Regulated SACCOs on a quarterly basis. The return is supplemented by the Authority's Circular and Guidance Note dated 2nd October 2018 on the application of the IFRS- 9 to Outstanding Loans and Credit Advances by SACCOs. Table 26 provides the consolidated Risk Classification of Assets and Provisioning return for the period ended December 2022 for the Regulated SACCOs. The analysis of the return shows that the non-performing loans (NPL) ratio of the Regulated SACCOs dropped from 8.99% in 2021 to 8.34% in 2022 showing a much-improved loans' portfolio of the sector. The total amount of non-performing loans however marginally increased from Kshs 54.73 Billion in 2021 to Kshs 56.76 Billion in 2022. On the other hand, the analysis shows that the total performing loans accounted for 86.61% of the gross loans which shows that the bulk of the proportion of the Regulated SACCOs industry's loans are being repaid and/or serviced by the loanees in accordance with the contractual terms. It is also imperative to contract this with the proportion of 86.03% of the total loans which were performing according to the contractual terms in 2021.

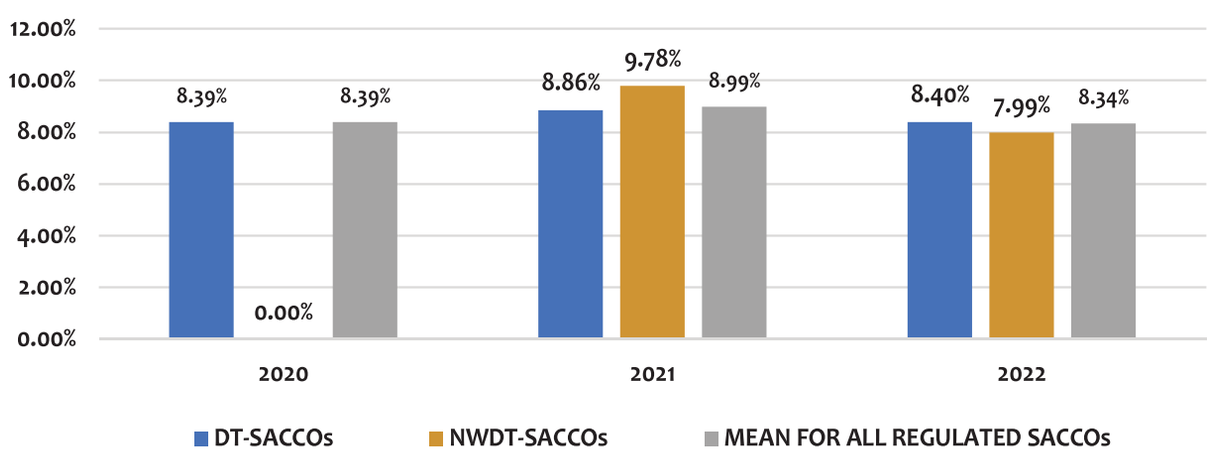

Table 26: Consolidated Risk Classification of Assets and Provisioning return

CLASSIFICATION OF LOANS	Provisioning Rate	GROSS LOANS (KSHS. BILLIONS)							% TO TOTAL GROSS LOANS		
		2020	2021			2022					
		DT-SACCOs	DT-SACCOs	NWDT-SACCOs	TOTAL	DT-SACCOs	NWDT-SACCOs	TOTAL	DT-SACCOs	NWDT-SACCOs	TOTAL

Source: SASRA Database

Figure 38 shows the trend analysis of the NPL ratio of the DT-SACCOs as compared to the NWDT-SACCOs for the period ended December 2022 and shows that the NPL ratio for the DT-SACCOs improved to 8.40% in 2022 from 8.86% recorded in 2021. The NWDT-SACCOs on the other hand registered the highest drop in their NPL ratio from a high of 9.78% in 2021 which was the first year of their prudential supervision, to a low of 7.99% in 2022, an improvement in the quality of the loan book by 1.79%, resulting in the decline of the mean NPL ratio of Regulated SACCOs to 8.34% in 2022. The foregoing shows that Regulated SACCOs, especially the NWDT-SACCOs did put a lot of efforts in ensuring that the loans issued to their membership did not go into default.

Figure 38: Trend Analysis of Comparative NPL Ratio of DT-SACCOs and NWDT-SACCOs.

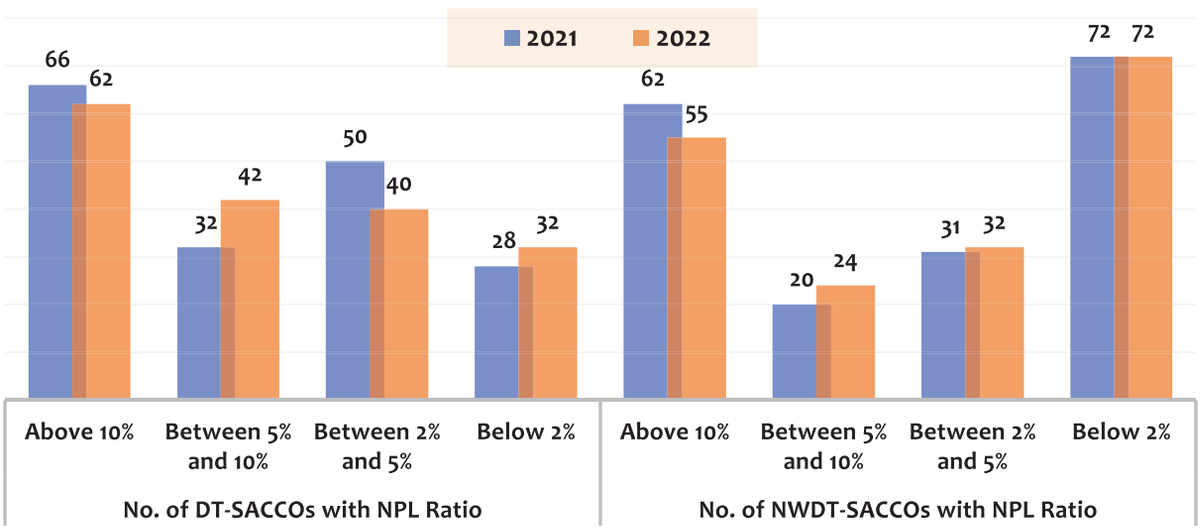

Source: SASRA Database. The NWDT-SACCOs were not under the prudential regulations as at 2020 and thus there was no statistics for them in 2020.

Figure 39 provides the levels of NPL ratios which were maintained by the individual Regulated SACCOs and shows that among the DT-SACCOs, a total of 72-DT-SACCOs had their individual NPL ratios below the 5% threshold recommended for deposit taking financial credit institutions. Out of

these, 32-DT-SACCOs had their NPL ratio below 2% implying that nearly all their loans were performing. Some 42-DT-SACCOs had their NPL ratios between 5% and 10%; while the remaining 62-DT-SACCOs had their NPL ratios above the 10% threshold and thus heavily contributing towards the DT-SACCOs' NPL ratio mean of 8.40% recorded in 2022.

The NWDT-SACCOs segment on the other hand had a total of 104-NWDT-SACCOs reporting NPL ratio of below 5%, with 72-NWDT-SACCOs of them having less than 2% in NPL ratio implying that their respective loan portfolios were generally performing. Some 24 NWDT-SACCOs had their NPL ratios between 5% and 10%while 55-NWDT-SACCOs within the segment had their NPL ratios above 10% and thus highly contributing toward the segments' mean NPL ratio of 7.99% in 2022.

Figure 39: Distribution of NPL Ratio in individual DT-SACCOs and NWDT-SACCOs

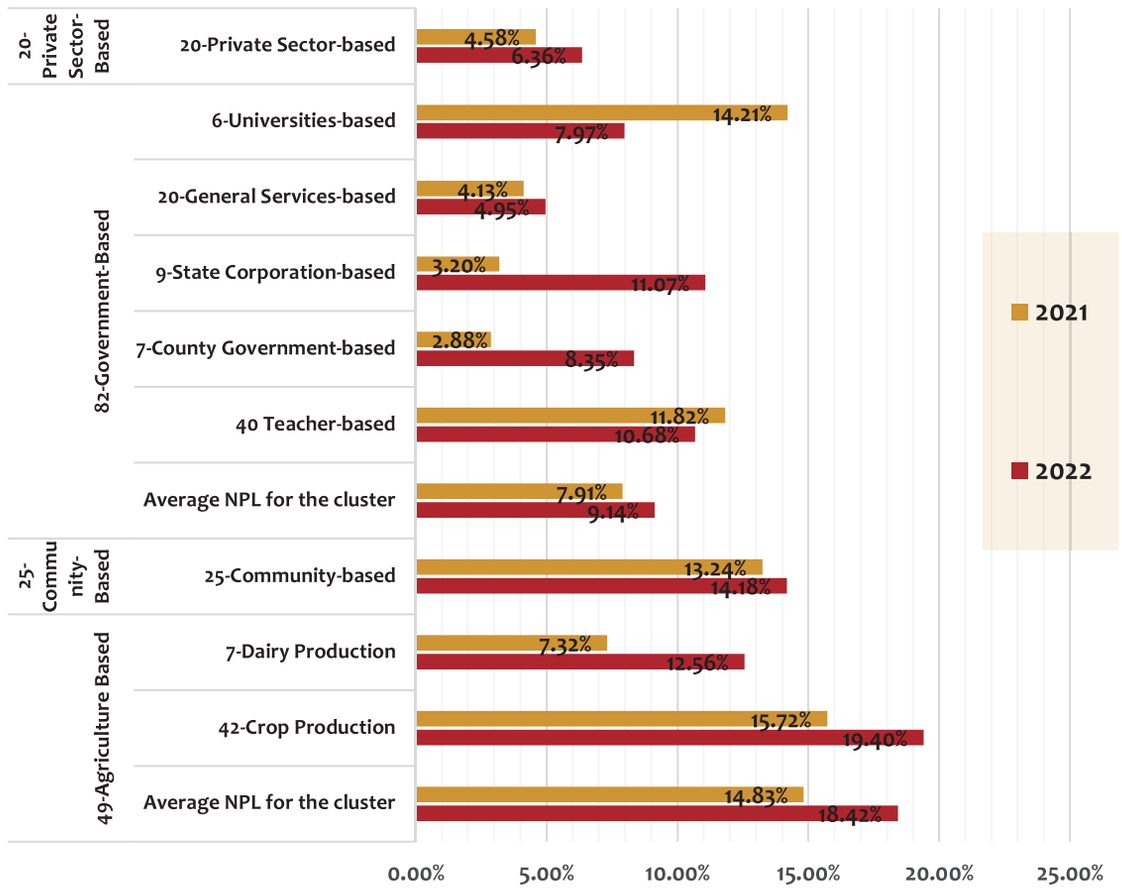

Source: SASRA Database

6.3.6. The Loan asset quality of DT-SACCOs by field of membership (common bond) cluster

Figure 40 provides the performance of the loan portfolio for DT-SACCOs based on their fields of membership clustering and depicts that on average, the 49-Agriculture-based DT-SACCOs had the highest range of NPL ratio which stood at 14.83% in 2022, but which was nevertheless a steep decline from the mean high NPL ratio of 18.42% recorded in 2021. The foregoing shows that there was improved collectability of loans issued by the Agri-Based DT-SACCOs during the year, and if the trend continues then the overall mean NPL ratio for the Regulated SACCOs continue to drop below the 8.34% registered in 2022.

It is also imperative to note that the NPL ratio within the two (2) industries served by Agri-Based DT-SACCOs namely crop production and dairy production equally registered significant drops. The 7-Dairy Production based DT-SACCOs had their NPL ratio drop from 12.56% in 2021 to 7.32% in 2022, while the 42-Crop Production based DT-SACCOs had their NPL ratio drop from 19.40% in 2021 to 15.72% in 2022. Improved earnings from crops such as tea and coffee during the year 2022 following interventions by the Government is indirectly the causal effect of the reduction in the NPL ratio for the DT-SACCOs operating within the crop production industry.

Figure 40: NPL Ratio for DT-SACCOs by Fields of Membership (Common bond) cluster

Source: SASRA Database

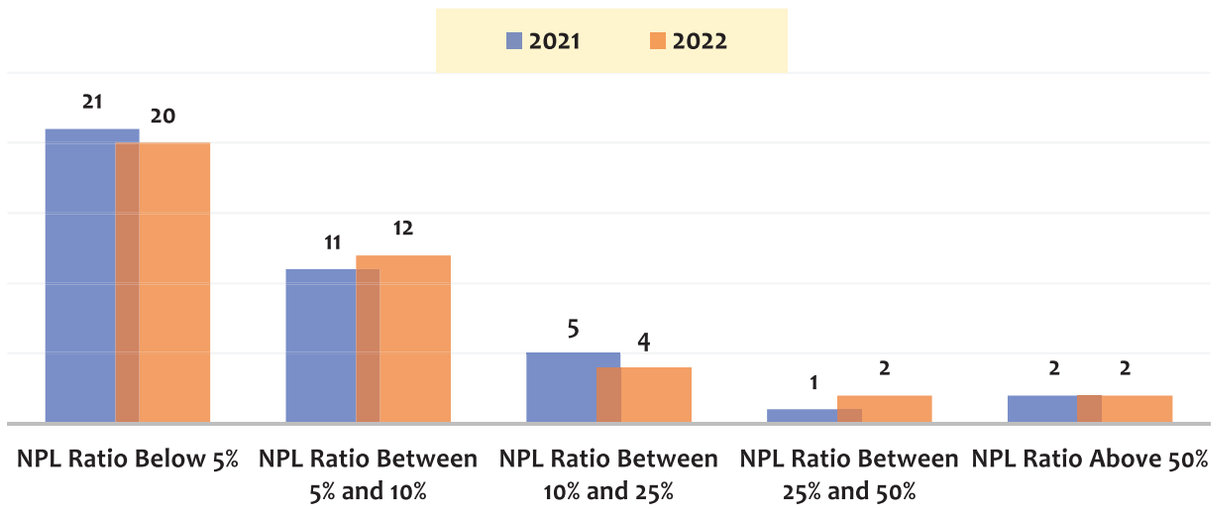

The 25-Community-based DT-SACCOs had the second highest NPL ratio at 13.24% in 2022, although the same was a marginal drop from the NPL ratio of 14.18% in 2021. Noteworthy is the fact that Community-Based and Agri-Based DT-SACCOs have a similar characteristic, being the fact that they do not rely on check-off contributions to build either their non-withdrawable deposits portfolio or to recover loans issued to their members, unlike their Government-Based and Private Sector-Based counterparts. But while the Agri-Based DT-SACCOs' loans are pegged on a specific agricultural produce which may act as collateral, the Community-Based DT-SACCOs do not have any specific collateral associated with the loan. Consequently, they are always faced with difficulties in ensuring the prompt repayment of the loans issued to their members, especially in case of defaults and would generally have higher default levels than the other field of common bond clustering.

The 82-Government-Based DT-SACCOs on the other hand had their mean NPL ratio drop to 7.91% in 2022 from a high of 9.14% in 2021, but which was mainly driven by the high NPL ratio of the DT-SACCOs serving the public universities and tertiary colleges whose NPL ratio spiked from a low of 7.97% in 2021 to a high of 14.21% in 2022. The high NPL ratio of the DT-SACCOs serving the public universities and tertiary colleges is a direct consequence of the perennial failure by the public universities and tertiary colleges to promptly remit the check-off deductions deducted from their employees' salaries and meant for the repayments of loans issued to such employees by the respective DT-SACCOs. The level of non-remittances by public universities and tertiary colleges during the year 2022 is discussed in section 7.3 of this report.

The 40-DT-SACCOs serving the teaching fraternity and whose membership are largely drawn from employees of the Teachers Service Commission equally had a marginal drop in their NPL ratio from 11.82% in 2021 to 10.68% in 2022. The mean NPL

ratio for the Teachers-based DT-SACCOs is however still too high for an industry which largely relies on check-off loan recovery mechanisms, coupled with the fact that the common employer for members of the DT-SACCOs in this cluster has never defaulted in remittances of members' deductions. An analysis of the individual Teachers-based DT-SACCOs to unpack the reasons for the high NPL ratio shows that the same may be as result of a few Teachers-Based DT-SACCOs which opened their common bonds beyond the employees of Teachers Service Commission and are having difficulties in recovery of loans from such members. The foregoing is buttressed by the analysis in Figure 41 which depicts the general movement of the NPL ratio among the 40-Teachers-Based DT-SACCOs.

Figure 41: Movement of the NPL Ratio among the 40-Teachers-Based DT-SACCOs

Source: SASRA Database

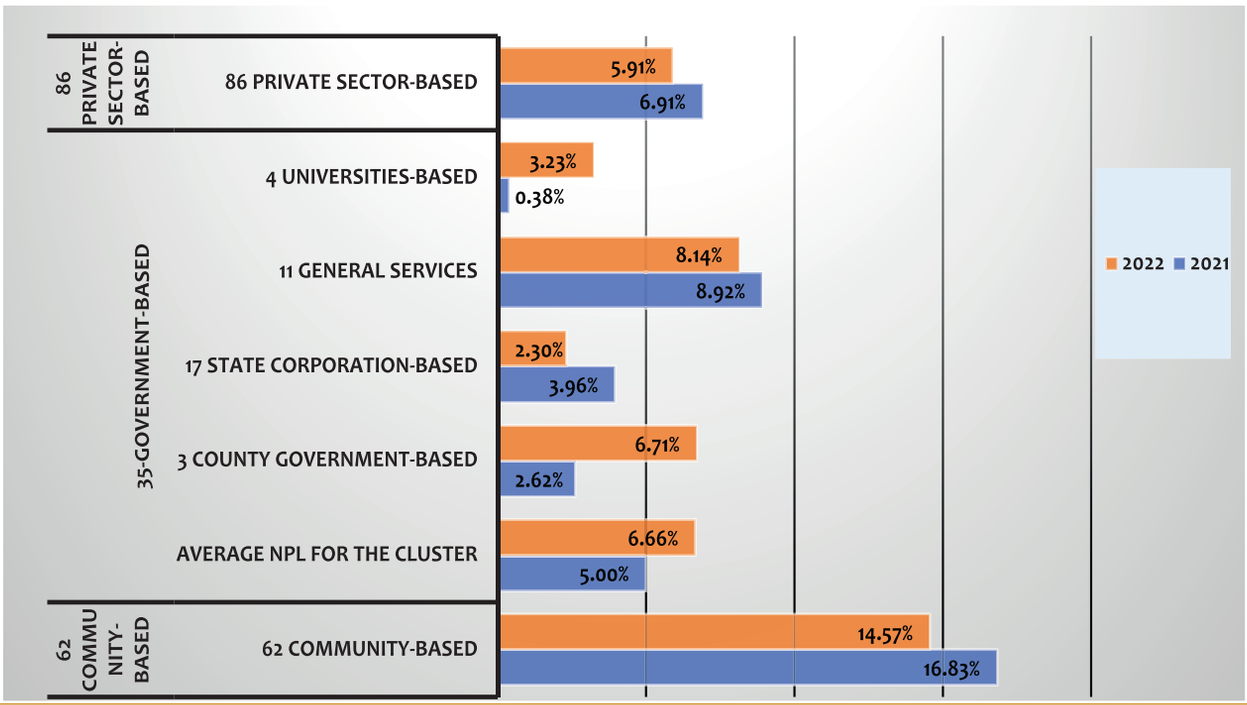

The analysis shows that 2-Teachers-Based DT-SACCOs had NPL ratio above 50% while another 2-Teachers-Based DT-SACCOs had their NPL ratio between 25% and 50% in 2022, and another 4-Teachers-Based DT-SACCOs had their NPL ratio between 10% and 25%. These 8-SACCOs are therefore singularly responsible for the high NPL ratio among the 40-Teachers-Based DT-SACCOs because the remaining 32-Teachers-Based DT-SACCOs had their NPL ratio well below 10%, with 20 of them having NPL ratio of below 5%. The Authority has therefore taken appropriate supervisory measures towards any unbridled expansion of common bonds by some of these SACCOs, unless adequate loan collection mechanisms are first put in place.

6.3.7 The Loan asset quality of NWDT-SACCOs by field of membership (common bond) cluster

The NWDT-SACCOs segment are represented in only three (3) of the common bond clusters, namely Community-Based; Government-Based and Private Sector-Based clusters. There is no NWDT-SACCO within the Agri-Based common bond clustering. Figure 42 provides the NPL ratio for NWDT-SACCOs distributed among the three (3) common bond clusters and shows that the 62-Community based NWDT-SACCOs had the highest NPL ratio at 14.63% in 2022 and is consistent with the general hardships associated with collections of loans issued by this cluster of SACCOs which do not rely on check-off systems and have a very loose common bond linkage. Their respective NPL ratio for 2022 was however a decrease from the NPL ratio of 16.83% registered in 2021, and thus evidence of efforts to ensure collectability of the loans issued to their membership.

The Private Sector-Based NWDT-SACCOs also registered a decline in the NPL ratio from 6.91% in 2021 to 5.91% in 2022 which is below the Regulated SACCOs industry mean NPL ratio of 8.34% in 2022. This shows that in the overall private sector companies have been honouring their obligations in remittances towards loan repayments. The drop is also explainable by the revocation of authorization certificate of one of the NWDT-SACCOs which hitherto fell under this cluster of common bonds.

Figure 42: NPL Ratio for NWDT-SACCOs by Fields of Membership (Common bond) cluster

Source: SASRA Database

The 35-Government-Based NWDT-SACCOs had the lowest mean NPL ratio at 6.61% in 2022, which was however an increase from the mean NPL ratio of 5.00% in 2021 but still below the overall Regulated SACCOs' industry mean NPL ratio of 8.34%. The increase in the NPL ratio of the Government-Based NWDT-SACCOs is directly attributable to similar increases in the NPL ratio of the 4-NWDT-SACCOs serving mostly employees of universities and tertiary colleges which increased from 0.38% in 2021 to a high of 3.23% in 2022 and directly linked to the non-remittances of employees' deductions by public universities and tertiary colleges over the past few years as highlighted in Section 7.3 this report. The increase in the NPL ratio of the 3-NWDT-SACCOs serving the employees of the various County Governments and Assemblies in the country is also a contributor to the spike in the overall NPL ratio under this common bond cluster. The 3-NWDT-SACCOs serving County Governments and Assemblies had their NPL ratio increase from 2.62% in 2021 to 6.71% in 2022, and just like with the universities-linked Regulated SACCOs, the main cause for the spike is the perennial failure by the County Governments and Assemblies to make prompt remittances of SACCO deductions meant for repayment of loans granted to their employees.

6.3.8 Investment Property, Equipment and Other Assets

The property, equipment and other assets is another component of total assets of Regulated SACCOs. It is made up of investment properties, prepaid lease rentals, intangible assets, property & equipment, and other assets; and they are generally considered as non-earning assets. Table 27 provides the distribution of the property, equipment, and other assets' portfolio for DT-SACCOs and shows that the largest proportion of the portfolio in 2022 was the investments in property and equipment which accounted for 47.71% representing a sum of Kshs 22.27 Billion. The investments in properties which includes lands and buildings accounted for 21.41% of the entire portfolio representing a sum of Kshs 9.99 Billion in 2022 which was a drop from the sum of Kshs 22.06 Billion reported under investment in properties in 2021. There was however a sharp increase in the "other assets" component of the portfolio from a sum of Kshs 5.03 Billion in 2021 to a sum of Kshs 10.24 Billion in 2022.

Table 27: Composition of investments in Property, Equipment & Other Assets of DT-SACCOs						
PARAMETER	2019	Amount in Kshs Billion 2020	2021	% age of Total PPE in 2021	Amount in Kshs. Billion 2022	% age of Total PPE in 2022
Investment Properties	9.47	9.89	22.06	42.89%	9.99	21.41%
Property and Equipment	18.28	19.56	20.73	40.31%	22.27	47.71%

Other Assets	15.86	7.74	5.03	9.78%	10.24	21.93%
TOTALS	**47.24**	**40.97**	**51.44**		**46.67**	
Source: SASRA Database						

Table 28 provides the distribution of the property, equipment, and other assets' portfolio for NWDT-SACCOs and shows the investment property and equipment as the highest proportion of the portfolio representing 38.08% in 2022 followed by investment properties representing 35.30%. The "other assets" component of NWDT-SACCOs accounted for 23.66% of the portfolio. NWDT-SACCOs and their DT-SACCOs counterparts are thus called upon to take proactive measures aimed at unpacking these huge "other assets" components of the portfolios in order to ward-off risks of fraudulent activities often associated with such "other assets" classifications.

Table 28: Composition of investments in Property, Equipment & Other Assets of NWDT-SACCOs

6.4. The Earnings of the Regulated SACCOs

6.4.1. General Overview

The earnings of Regulated SACCOs, is a critical tool in monitoring and reporting performance and financial stability of Regulated SACCOs, as it reports and presents their financial sustainability. It is monitored through the Statement of Comprehensive Income return which is submitted to the Authority monthly by DT-SACCOs and quarterly by the NWDT-SACCOs. Table 29 provides the aggregated statement of comprehensive income for the Regulated SACCOs and shows that during the year ended December 2022, total incomes of the Regulated SACCOs grew by 11.13% to reach Kshs 129.68 Billion from Kshs 108.59 Billion in 2021. The net financial income on the other hand grew by 12.54% to reach Kshs 65.78 Billion in 2022 from Kshs 58.45 Billion in 2021, while the net income after tax increased by 79.14% in 2022 to reach Kshs 20.21 Billion compared to Kshs 11.28 Billion reported in 2021.

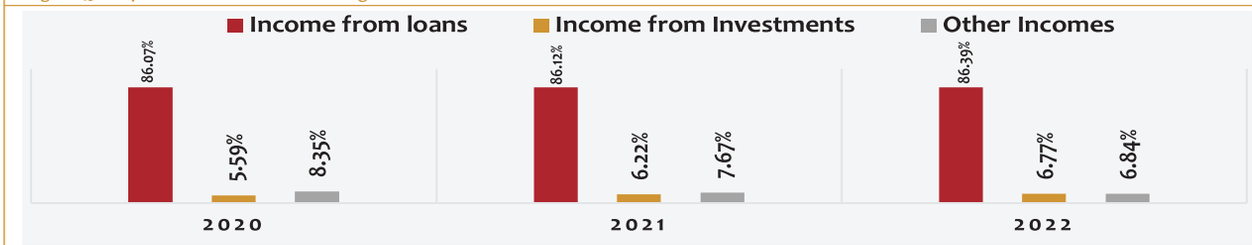

Table 29: Aggregated Statement of Comprehensive Income for the Regulated SACCOs

PERFORMANCE ITEMS	2020		2021		2022		Y-to-Y Change (2021/22)

Source: SASRA Database

The income from loans constituted the highest proportion of total income and accounted for 86.39% of the total income in 2022 amounting to Kshs 104.26 Billion thereby cementing the importance of loan portfolio of Regulated SACCOs as the key revenue generating portfolio. This was an increase from Kshs 93.52 Billion which was earned by Regulated SACCOs from their loan portfolios and which constituted 86.12% of the total income in 2021. Income from investments also witnessed a 21.02% increase in 2022 to reach a sum of Kshs 8.17 Billion compared to a sum of Kshs 6.75% Billion reported in 2021, meaning that Regulated SACCOs are progressively making appropriate financial investments with their funds. Figure 43 shows the composition of the total income in 202 and 2022 respectively.

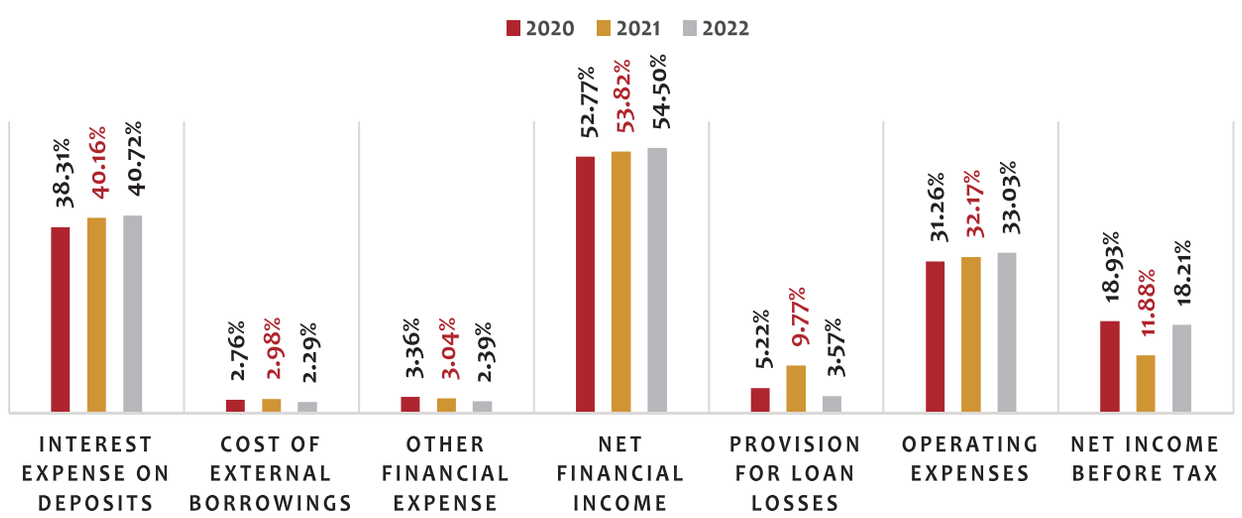

Figure 43: Proportion of Total Incomes of Regulated SACCOs

Source: SASRA Database

Figure 44 shows selected items of the income statement as a proportion of the total income for the Regulated SACCOs with interest expenses paid on deposits held by members accounting for 40.72% of the total income and representing Kshs 49.14 Billion in 2022. This was an increase from the sum of Kshs 43.61 Billion which was paid on members' deposits for the period ended December 2021 and cements the Regulated SACCOs industry as a comparatively attractive destination for savings and deposits. The cost of external borrowings as a proportion of the total income decreased in 2022 to a sum of Kshs 2.76 Billion representing 2.29% of the total income compared to a sum of Kshs 3.24 Billion representing 2.98% of the total income, incurred as cost of borrowing in 2021. This shows that Regulated SACCOs moved away from reliance on external borrowing to fund their assets but are relying more and more on internally generated resources. The operating expenses however increased from Kshs 34.94 Billion in 2021 to Kshs 39.86 Billion in 2022 therefore signifying the increased cost of doing business experienced by Regulated SACCOs during the period under review.

Figure 44: Selected items of Income Statement as a proportion to total incomes

Source: SASRA Database

6.4.2. Comparative view of Earnings of DT-SACCOs and NWDT-SACCOs

Table 30 and Table 31 provide the comparative views of the income statement of DT-SACCOs on the one hand and NWDT-SACCOs on the other hand. The comparative analysis shows that the total income of the DT-SACCOs' segment in 2022 amounted to Kshs 106.50 Billion while that of the NWDT-SACCOs was Kshs 14.18 Billion. The DT-SACCOs income to the total income of Regulated SACCOs therefore stood at 88.25% compared to that of NWDT-SACCOs which stood at 11.75% in 2022. This is consistent with the fact that the total assets of the DT-SACCOs segment accounted for 85.76% of the industry's total assets while the NWDT-SACCOs' total assets accounted for 14.24% of the industry's total assets and shows that the DT-SACCOs enjoyed better returns on their assets than the NWDT-SACCOs.

The interest income from loans for both DT-SACCOs and NWDT-SACCOs to their respective total incomes were quite comparable in 2022 at 86.44% and 86.01% respectively. Similar scenario obtained in 2021 when the interest income from loans for DT-SACCOs accounted for 85.77% while that of NWDT-SACCOs accounted for 86.92% of the total incomes. The DT-SACCOs however had a comparative advantage in other incomes, mainly drawn from transactional fees and charges because of the deposit taking business which allows them to operate savings and transactional accounts popularly known as FOSA. The other incomes for DT-SACCOs accounted for 7.58% of their total incomes representing a sum of Kshs 8.07 Billion in 2022 compared to other incomes of the NWDT-SACCOs which accounted to only 1.30% of their

total incomes representing a sum of only Kshs 0.18 Billion in 2022. It must be borne in mind nevertheless that the despite generating a handsome revenue for the DT-SACCOs segment, deposit-taking business is replete with lots of risks and is also capital intensive especially during the formal phases of commencement of the business.

Table 29: Comparative Statement of Comprehensive Income for DT-SACCOs

PERFORMANCE ITEMS OF INCOME STATEMENT	2020	2021		2022		Y-to-Y Change (2021/22)

Source: SASRA Database

The NWDT-SACCOs also reported comparatively low operating expenses and cost of borrowing to their total incomes as a comparison to DT-SACCOs. The DT-SACCOs had their operating expenses to total income at 34.53% in 2022 while the NWDT-SACCOs had the same ratio to their total income at 21.80% thereby showing that the cost of operating a specified non-deposit taking business is much lesser than the cost operating a deposit-taking business. The cost of borrowing of DT-SACCOs on the other hand stood at 2.46% of their respective total income, while that of the NWDT-SACCOs stood at 1.09%. Figure 45 provides a comparative outlook of selected items of income statements of DT-SACCOs compared to those of NWDT-SACCOs.

6.5 The Liquidity Indicators of Regulated SACCOs

6.5.1. General Overview

The liquidity indicators used to measure, assess, monitor and report on the liquidity performance of SACCOs include the statutory liquidity ratio of liquid assets to saving deposits and other short-term liabilities; and the external borrowing to total assets ratio (also known as external borrowing ratio); the liquid assets to total assets ratio; and the gross loans portfolio to total deposits ratio. The statutory liquidity ratio for DT-SACCOs is prescribed at a minimum of not less than 15%, while the statutory liquidity ratio for NWDT-SACCOs is prescribed at not less than 10%. The difference in the minimum statutory ratio took cognisant of the different demands of short-term financial obligations which are higher for DT-SACCOs because of their unique deposit taking businesses wherein deposits may be accessed instantly, than the NWDT-SACCOs wherein deposits are withdrawable only upon notice of not less than sixty (60) days.

Liquid assets for Regulated SACCOs are defined to include notes and coins; balances at institutions licensed under the Act or Banking Act after deducting balances owed to those institutions; government securities; deposits held at other Sacco societies of a maturity not exceeding ninety-one days after deducting balances owed to those Sacco societies; value of balances in electronic transfer systems; and such other liquid assets as the Authority may specify. The external borrowing for both DT-SACCOs and NWDT-SACCOs has been prescribed to a maximum of 25% of the Regulated SACCOs total assets, and which must not be exceeded. The other key liquidity indicators as summarised in Table 32 and Table 33 for DT-SACCOs and NWDT-SACCOs respectively are not prescribed in the law but are recommended as measures of prudent best practices for deposit taking financial institutions such as SACCOs.

Table 32: Comparative aggregate level of compliance with liquidity indicators by DT-SACCOs - 2021

LIQUIDITY INDICATOR	Prescribed Minimum	2020	2021	2022
Liquid Assets/Savings Deposits+STLs (Liquidity Ratio)	>=15%	48.50%	55.34%	64.72%
Liquid Assets/Total Deposits		20.99%	21.79%	19.94%
External Borrowings/Total Assets	<=25%	3.67%	3.61%	3.20%
Liquid Assets/Total Assets		14.43%	14.96%	13.64%
Gross loans /Total Assets		75.64%	75.57%	76.77%
Total Loans/Total Deposits		110.04%	110.12%	112.16%

Source: SASRA Database

Table 33: Comparative aggregate level of compliance with liquidity indicators by NWDT-SACCOs

LIQUIDITY RATIO	Prescribed Minimum	2020	2021	2022
Liquid Assets/Short-term Liabilities	>10%	18.93%	19.87%	18.92%
External Borrowing/Total Assets	<25%	2.32%	1.64%	1.48%
Liquid Assets/Total Assets		9.41%	10.70%	10.73%
Gross loans /Total Assets		75.35%	74.56%	74.29%
Liquid Assets/Total Deposits		21.29%	22.24%	21.23%
Gross loans/Deposits		96.72%	95.43%	96.26%

Source: SASRA Database

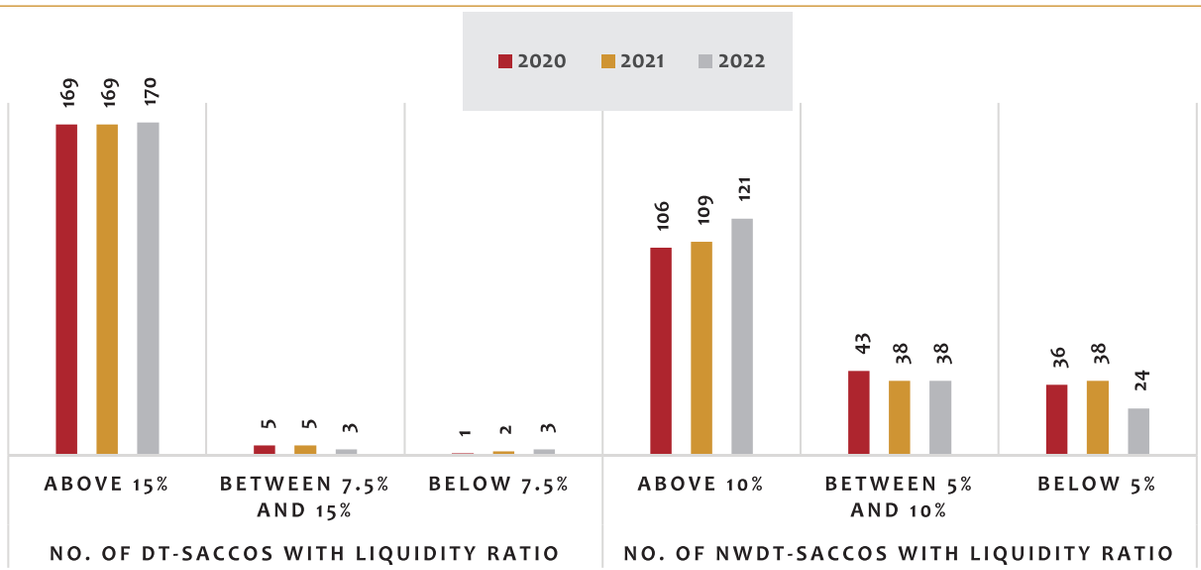

6.5.2. The Statutory liquidity ratio for Regulated SACCOs

The analysis show that both the DT-SACCOs and the NWDT-SACCOs did maintain compliance with the statutory liquidity ratio above the prescribed minimum of 15% and 10% respectively. The DT-SACCOs statutory liquidity ratio stood at 64.72% in 2022 compared to 55.34% in 2021; while the statutory liquidity ratio for the NWDT-SACCOs stood at 18.92% in 2022 compared to 19.87% in 2021. In terms of the level of compliance with the statutory liquidity ratio, a total of 170-DT-SACCOs were fully compliant with their liquidity ratio standing well above the prescribed minimum of 15% in 2022 compared to 169-DT-SACCOs which were fully compliant as depicted in Figure 46. Only 6-DT-SACCOs operated with liquidity ratios below the prescribed threshold as at December 2022, three (3) of which had their liquidity ratio ranging within the allowable deviation ratio of between 7.5% and 15%.

With regard to the NWDT-SACCOs segment, 121-NWDT-SACCOs were fully compliant with

their liquidity ratio standing at above the prescribed minimum of 10% compared to 109-NWDT-SACCOs which were fully compliant with the prescribed minimum of 10% in 2021. A total of 24-NWDT-SACCOs had their Liquidity ration below 5% in 2022, and thus in violation of the law, while 38-NWDT-SACCOs operated with liquidity ratios within the allowable range of deviation of between 5% and 10%.

Figure 46: Level of compliance with the Liquidity ratio by Individual DT-SACCOs and NWDT-SACCOs

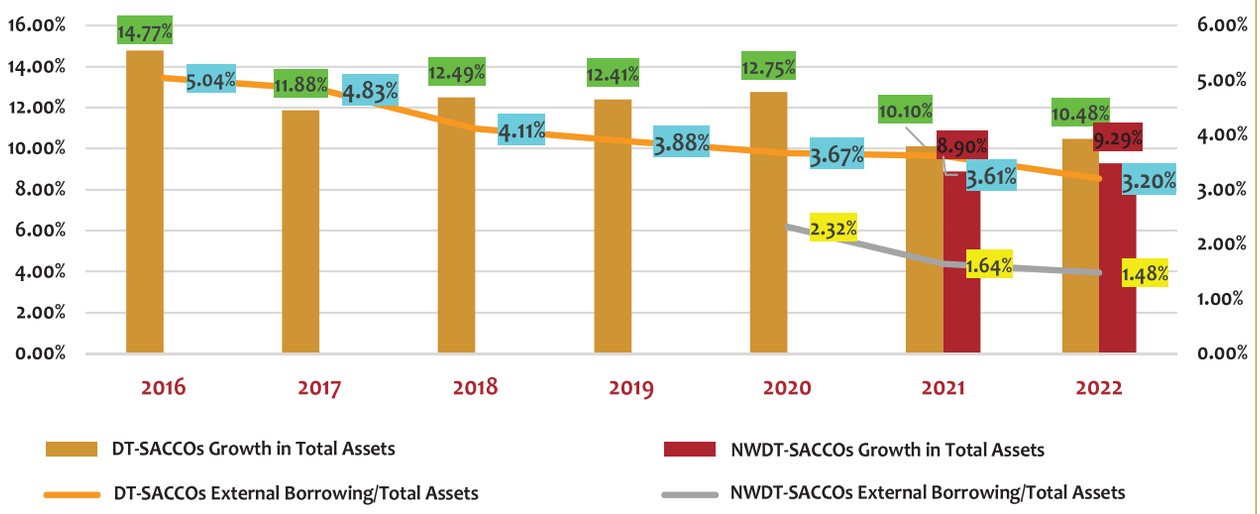

Source: SASRA Database

6.5.3. The External Borrowing Ratio for Regulated SACCOs

The external borrowing ratio measures the extent to which Regulated SACCOs are funding their assets from externally sourced funds and is computed as a ratio of the total external borrowings to the total assets. Tables 32 and Table 33 show that both DT-SACCOs and NWDT-SACCOs did maintain their external borrowing below the maximum allowable limit of 25% of their segmental total assets. The external borrowing ratio for the DT-SACCOs decreased to 3.20% in 2022 compared to 3.61% in 2021. Similarly, the NWDT-SACCOs external borrowing ratio dropped to 1.48% in 2022 from 1.64% in 2021. The foregoing shows that both the DT-SACCOs and NWDT-SACCOs are continuing to move away from the external fundings which are usually expensive as their costs changes with vagaries of changes in interest rates and monetary policy. Figure 47 provides the movement of the external borrowing ratio for DT-SACCOs and NWDT-SACCOs, against the changes in their respective growths in total assets and shows that whereas the growth in total assets have relatively remained stable, the external borrowing has been on a gradual decline over the years.

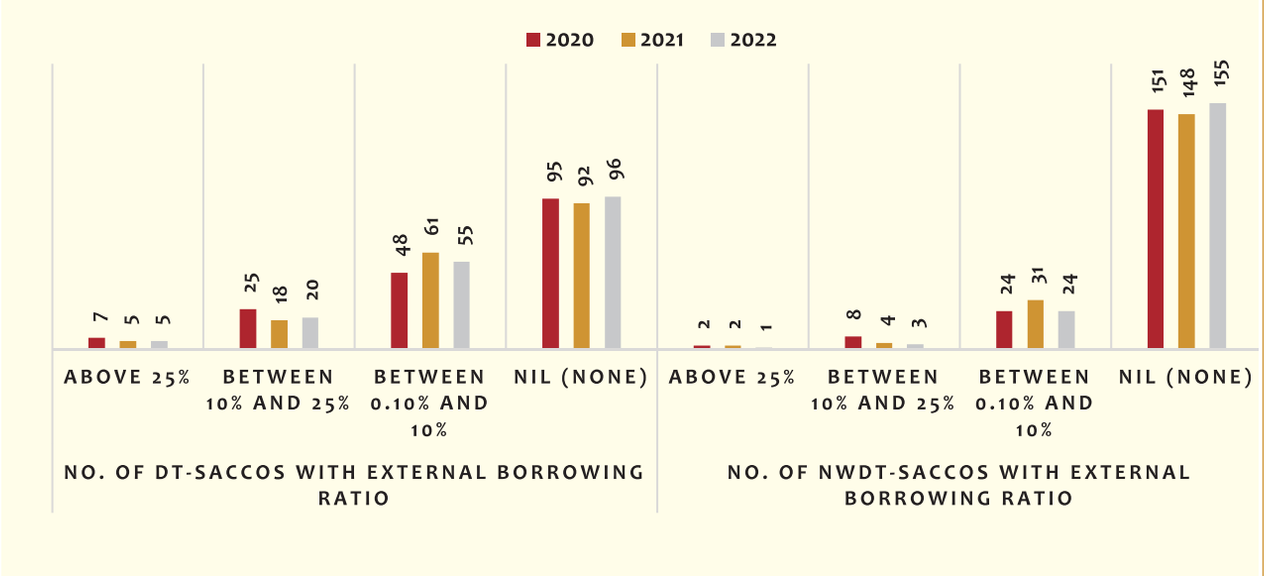

Figure 47: Comparative movement of growth in external borrowing ratio and changes in total assets for Regulated SACCOs

Source: SASRA Database

In terms of their induvial level of compliance with the external borrowing ratio Figure 48 shows that a total of 251-Regulated SACCOs comprised of 96-DT-SACCOs and 155-NWDT-SACCOs did not have any external borrowing during in 2022 compared to 240-Regulated SACCOs made up of 92-DT-SACCOs and 148-NWDT-SACCOs which did not have any external borrowing in 2021. This means that a total of 11-Regulated SACCOs retired their then existing external borrowing in 2022. The analysis further shows that only 6-Regulated SACCOs made up of 5-DT-SACCOs and 2-NWDT-SACCOs breached the prescribed maximum threshold limit by having their respective external borrowing ratio above 25% of their total assets.

7.0. OTHER ACTIVITIES AND OPERATIONS OF REGULATED SACCOs

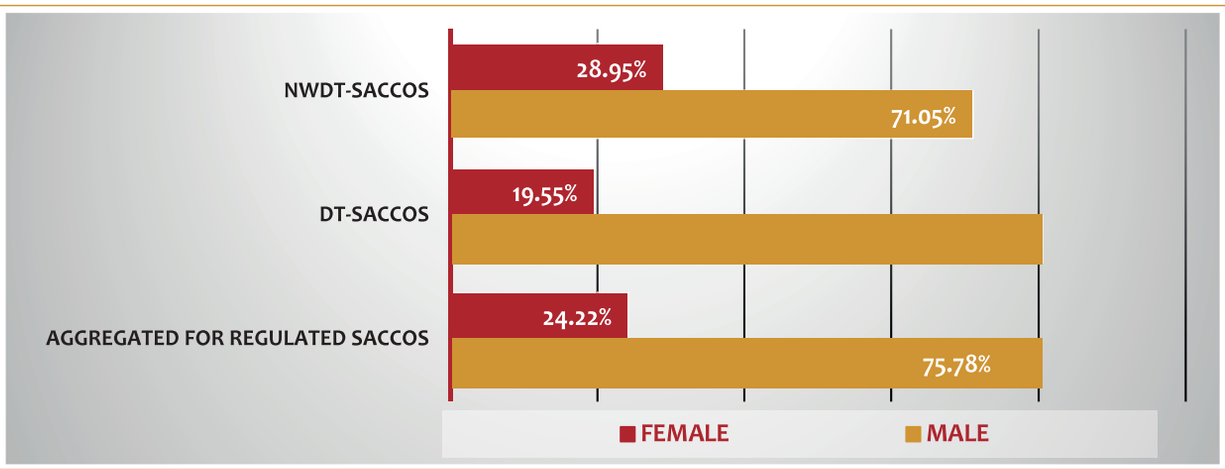

7.1. The Governance Trends

7.1.1. The Board of Directors

Regulated SACCOs are governed by non-executive Board of Directors elected by members of SACCOs during the annual general meetings. The Boards of Directors are statutorily responsible for the overall oversight of SACCOs on behalf of members including but not limited to ensuring that the SACCO maintains proper and accurate records that reflect the true and fair position of the SACCO Society's financial condition; that the SACCO Society functions effectively and that an adequate and effective internal control system is put in place; that the SACCO makes adequate provisions for known and probable losses likely to occur; that the SACCO maintains a positive image within the industry and the economy as a whole, among others. The Board of Directors are accountable to members, as well as the Authority in the performance of their duties for which they are held accountable jointly and severally.

During the period ended December 2022, the Regulated SACCOs had a total of 3080 persons serving as members of Boards of Directors of various Regulated SACCOs, with 1550 persons serving in Boards of Directors of DT-SACCOs, while the remaining 1530 persons served in the Board of Directors of NWDT-SACCOs. Figure 49 provides a summary of the percentage the gender distribution of the persons serving in the Board of Directors of SACCOs and shows that 75.78% of all members of Board of Directors of Regulated SACCOs were male while 24.22% were female.

Figure 49: Percentage Gender Distribution of members of Board of Directors of Regulated SACCOs

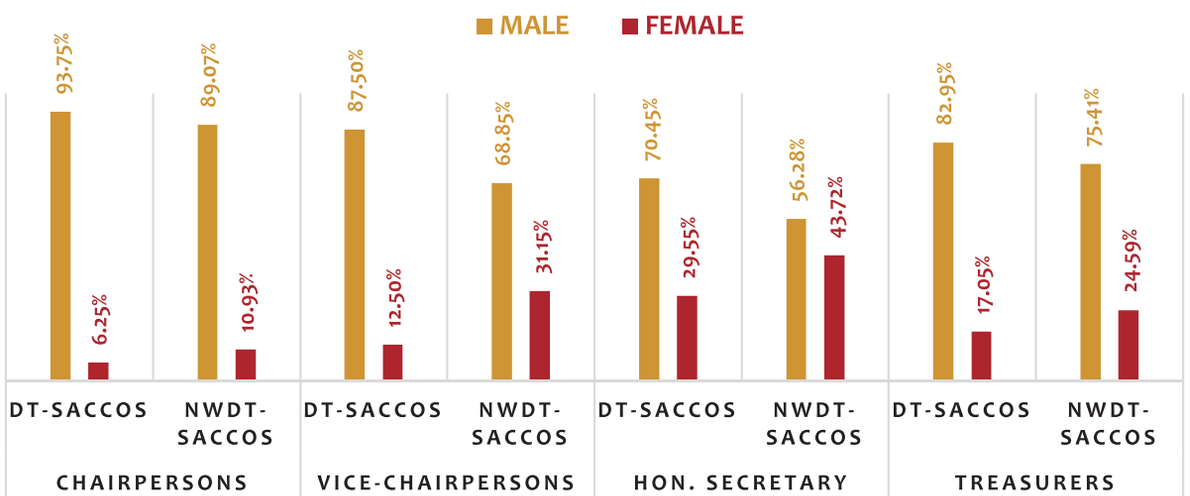

Source: SASRA Database

Among the DT-SACCOs segment, the male members of the Boards of Directors accounted for 80.45% while the female members accounted for a paltry 19.55% of the members of the Boards of Directors. The NWDT-SACCOs segment on the other hand had a relatively better proportion of female members of Boards of Directors accounting for 28.95%, but which nevertheless is still below the recommended constitutional threshold. Despite the fact that the position of being a member of Board of Directors of a SACCO is elective through a democratic one-member one vote process; it is clear that there is still a very wide disparity between the number of female serving in Boards of Regulated SACCOs as compared to their male counterparts, thus calling for affirmation action by individual SACCOs in order to improve the threshold.

To better manage the affairs of Regulated SACCOs, the respective Board of Directors are required by the provisions of the CSA and SACCOs respective By-Laws to elect from amongst themselves office bearers consisting of a Chairperson, a Vice-Chairperson, a Honorary Secretary and a Treasurer. These office bearers often constitute the core committee of the SACCO and most of the time act as signatories to the SACCOs accounts. Figure 50 provides the gender distribution of the office bearers among the Regulated SACCOs during the

reporting period and shows that in both the DT-SACCOs and the NWDT-SACCOs segments, a majority of women served as Honorary Secretaries accounting for 29.55% among the DT-SACCOs and 43.72% among the NWDT-SACCOs. The NWDT-SACCOs also recorded reasonable representations of women serving as Vice-Chairpersons which stood at 31.15% compared to the proportion of women serving as Vice – Chairpersons among the DT-SACCOs which stood at a paltry 12.50%.

Figure 50: Gender Proportion of office bearers among Regulated SACCOs in 2022

Source: SASRA Database

The number of women serving as Chairpersons of Regulated SACCOs was however lowest in both DT-SACCOs and NWDT-SACCOs segments which stood at 6.25% and 10.93% respectively, thereby calling for affirmation actions not only at the elective levels where members of Boards are elected but also at the Board constitution levels where the office bearers are constituted. It is envisaged that the implementation of the affirmative action initiatives envisaged in the National Cooperative Policy (Sessional Paper No. 4 of 2020) shall be fast-tracked in order to bridge the gender divide in the governance of Regulated SACCOs, which is in tandem with Kenya's commitments towards realization of the United Nations Sustainable Development Goals (SDGs) and the Constitution of Kenya.

7.1.2. The Supervisory Committee

The Supervisory Committee is another unique but important governance organ within SACCOs as Cooperatives in general. Elected by the annual general meetings of the membership, the Supervisory Committee consists of not less than three (3) persons who provide general oversight over the Board of Directors activities on behalf of the members; and submits an annual report to the members during the general meetings. In particular, Rule 28(1) of the Cooperative Societies Rules, 2004 states that "every [Cooperative] shall have a supervisory committee consisting of three members each elected at a general meeting for a period of three years and one member of the supervisory committee shall retire annually". The said Rules further provides that the duties of the Supervisory Committee include –

a) verification of all transactions of the [Cooperative].

b) writing periodic reports of its findings to be tabled at Management Committee (Board of Directors] meetings.

c) submission of its reports to the Commissioner for [Cooperatives Development].

d) presenting its reports to the general meeting.

For the NWDT-SACCOs, the Supervisory Committee have an additional responsibility in accordance with Reg 58 of the Regulations 2020 which states that the "Supervisory Committee provided for under the Cooperative Societies Act, 1997 shall, in addition to the duties assigned to it under the Cooperative Societies Rules 2004 (L.N. 123/2004) perform the following functions" –

a) review internal controls including the scope of the internal audit program, the internal audit findings, and recommend action to be

taken by management.

b) review internal audit reports and their overall effectiveness, the scope and depth of audit coverage, reports on internal control and any recommendations and confirm that appropriate action has been taken.

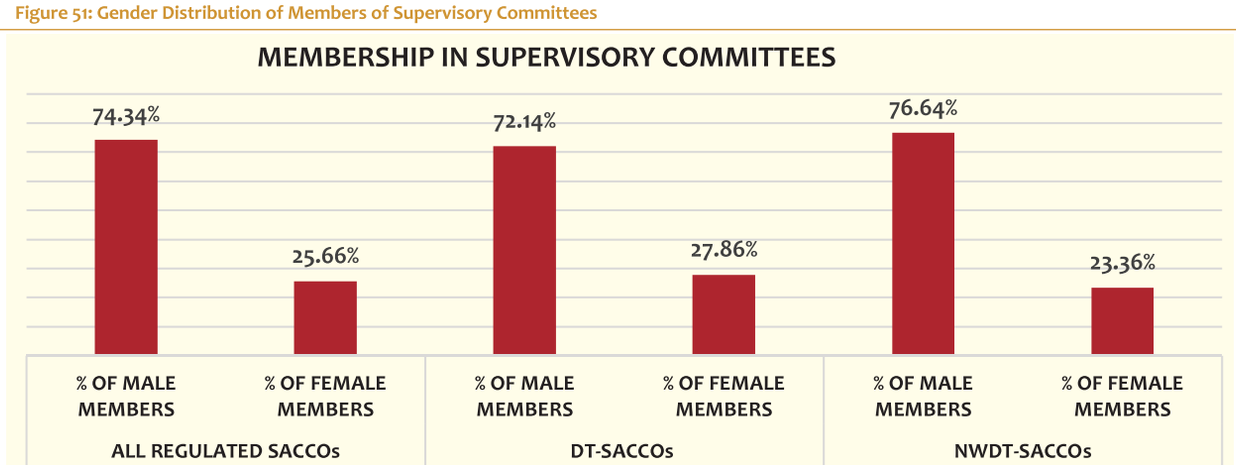

c) ensure that accounting records and financial reports are promptly prepared to accurately reflect operations and results.

d) review management reports and reports from the internal and external auditors concerning deviations and weaknesses in accounting and operational controls.

e) monitor the ethical conduct of the SACCO society and consider the development of ethical standards and requirements, including –
   i) effectiveness of procedures for handling and reporting complaints.
   ii) reviewing any related party transactions that may arise within the SACCO Society.
   iii) verifying that relevant plans, policies, and control procedures are established and properly administered.
   iv) investigating members complaints and making recommendations for redress.
   v) considering any matter of significance raised by members during the annual general meeting or the Authority.

During the year ended December 2022, there were a total of 1060 persons who were serving in the Supervisory Committee of the Regulated SACCOs in various capacities either as Chairperson of the Committee or Secretary or Member of the Committee, out of whom 788 were male constituting 74.34% and 272 were female constituting 25.66% of all Supervisory Committee members as summarised in Figure 51. The DT-SACCOs' reported 542 persons within their Supervisory Committees out of whom 391 were male constituting 72.14% while 151 were female constituting 27.86% of the Supervisory Committee members in DT-SACCOs. The NWDT-SACCOs on the hand recorded 518 persons within their Supervisory Committees out of whom 397 were male constituting 76.64% and 121 were female constituting only 23.36% of all the Supervisory Committee members in NWDT-SACCOs.

Figure 51: Gender Distribution of Members of Supervisory Committees

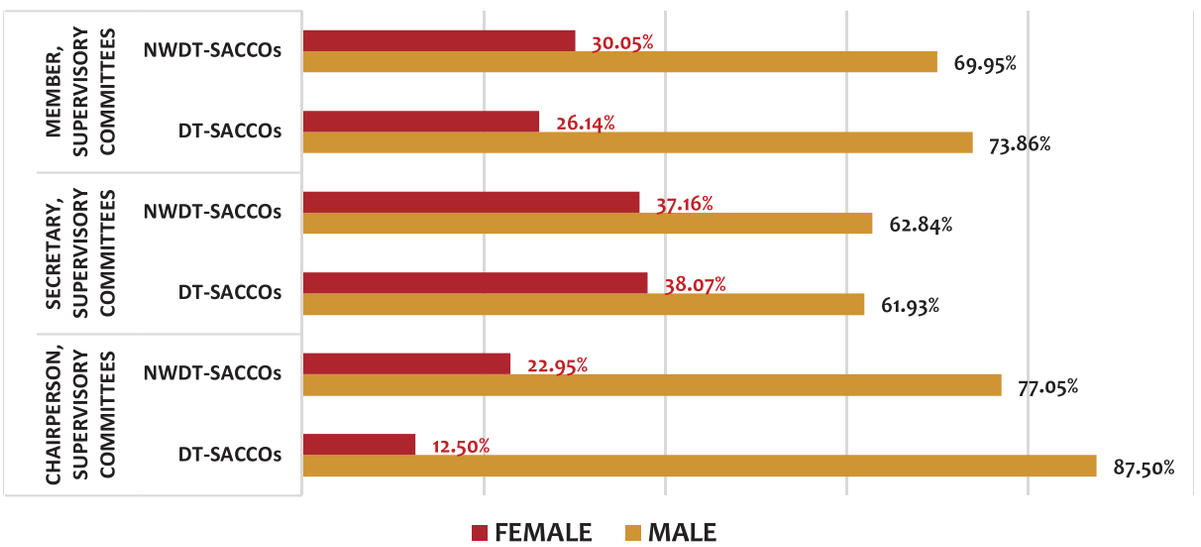

Source: SASRA Database

Once elected at the general meeting of the members, the Supervisory Committee of every SACCO is required to elect from among its members office bearers namely a Chairperson and a Secretary with the remaining person being a member. Figure 52 provides the gender distribution of the office bearers in the Supervisory Committees of Regulated SACCOs and shows that only, the office of Secretary of the Supervisory Committees had female members in excess of the one-third gender rule, whereby the NWDT-SACCOs reported 37.16% of women Secretaries to the Supervisory Committees and 62.84% of male Secretaries to the Supervisory Committees; while the DT-SACCOs reported 38.07% of female Secretaries to the Supervisory Committees and 61.93% male Secretaries to the Supervisory Committees.

The office of Chairpersons was mostly dominated by the male members. The DT-SACCOs reported 87.50% of all their Chairpersons of the Supervisory Committees being men, while the women Chairpersons constituted a paltry 12.50% of the Chairpersons. The NWDT-SACCOs on the other hand reported a total of 77.05% of all the Chairpersons of the Supervisory Committees being men, while the women chairpersons constituted a paltry 22.95% of the Chairpersons. The foregoing analysis shows that just like with the Board of Directors as an organ of governance, the Regulated SACCOs are still far from attaining gender parity in the composition of their Supervisory Committees and thus the clarion call for affirmative actions to bridge the gender parity gap.

Figure 52: Gender Proportion of Office Bearers in Supervisory Committees of Regulated SACCOs, 2022

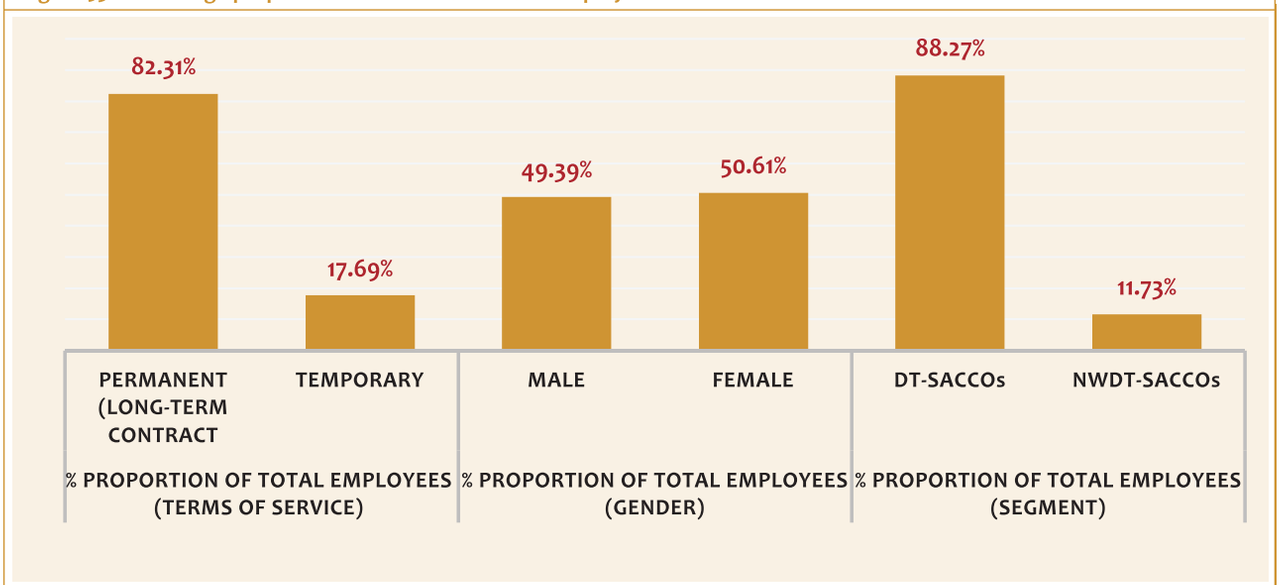

Source: SASRA Database

7.2. The Employment Trends

7.2.1. General Overview

Regulated SACCOs continue to provide employment opportunities to thousands of Kenyans as part and parcel of their role towards the realization of the United Nations Sustainable Development Goals. During the period ended December 2022, there were a total of 11,188 employees serving in various positions among the 359-Regulated SACCOs. Out of these, 9,209 employees were serving on permanent and pensionable terms or long-term employment contracts (of three (3) or more years) and constituting 82.31% of all the employees. The remaining 1,979 employees within the Regulated SACCOs, constituting 17.69% of all the employees served on temporary or short-term contractual basis as summarised in Figure 53.

Figure 53: Percentage proportional distribution of total employees

Source: SASRA Database

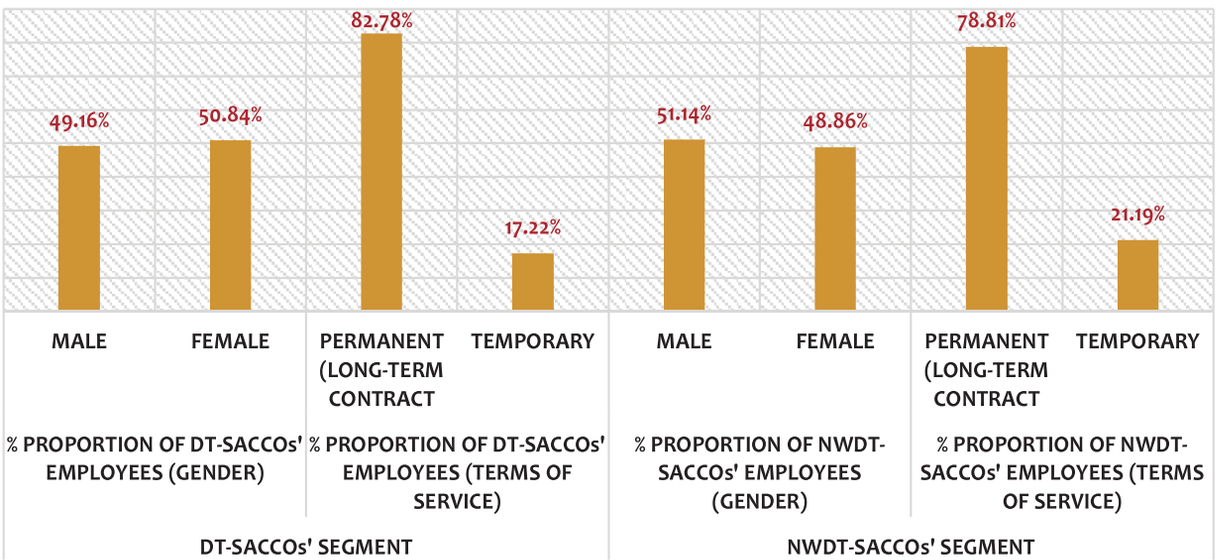

On the gender front, a majority of employees among the Regulated SACCOs were female, which accounted for 50.61% of the total employees while the male employees accounted for 49.39%. The distribution of the employees between the two segments of Regulated SACCOs on the other hand showed that the 176-DT-SACCOs had the highest number of employees which stood at 9,876, accounting for 88.27% of all employees within the Regulated SACCOs industry. This a demonstration of the dominance of the DT-SACCOs segment, when compared to the NWDT-SACCOs segment which reported only 1,312 employees during the period, accounting for a paltry 11.73% of all the employees within the Regulated SACCO system. This dominance of DT-SACCOs is replicated in all the key performance parameters of Regulated SACCOs such as total assets, total deposits and even total membership as discussed elsewhere in this report.

At the segmental level, out of the 9,876 employees serving in the DT-SACCOs segment, 49.16% were male while 50.84% were female and thus the majority as summarised in Figure 54. But with regard to the 1,312 employees serving within the NWDT-SACCOs segment, the reverse was the case with male employee accounting for 51.14% while the female employees accounted for 48.86% of the total employees within the segment. The foregoing statistical analysis demonstrates that there is reasonable gender parity in the employment opportunities offered by Regulated SACCOs both at the aggregated level, and also within the individual segments constituting Regulated SACCOs in Kenya.

Based on their respective terms of employment with the SACCOs, 82.78% of the DT-SACCOs employees served on permanent or long-term contracts exceeding three (3) years, while the remaining 17.22% served on temporary or short-

term contracts. The NWDT-SACCOs segment on the other hand had 78.81% of their employment establishment serving on permanent or long-term contract with the remaining 21.19% serving on temporary or short-term contracts.

Figure 54: Percentage proportion of employees of DT-SACCOs and NWDT-SACCOs based on gender and terms of employment service

Source: SASRA Database

7.2.2. The Chief Executive Officers

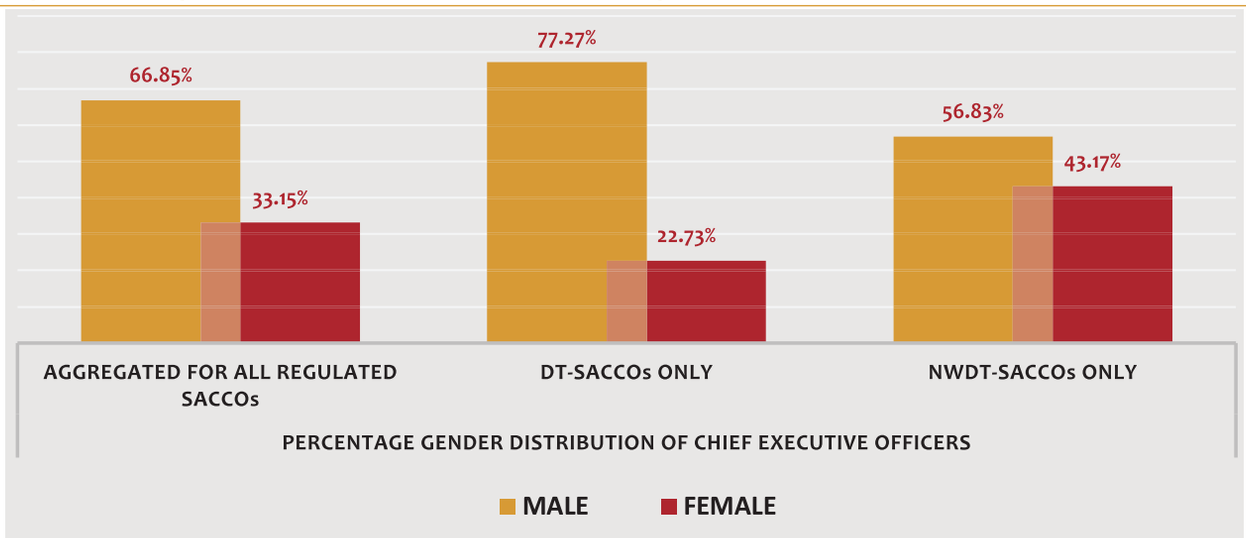

The Act and the Regulations made thereunder requires every regulated SACCO to have a Chief Executive Officer responsible for the day-to-day management of the SACCO. The Chief Executive Officer of a Regulated SACCO is appointed by the Board of Directors (subject to regulatory approval by the Authority and notification of the appointment within fifteen (15) days of the appointment. The Chief Executive Officer is responsible to the Board of Directors in accordance with the Regulations 2010 for DT-SACCOs and Regulations 2020 for NWDT-SACCOs, for overseeing -

a) the implementation and adherence to the prescribed policies, procedures, and standards.
b) the systems established to facilitate efficient operations and communication are functional.
c) the planning process developed to facilitate achievement of targets and objectives.
d) all staff matters, particularly human resource development and training.
e) adherence to the established Code of Conduct; and
f) the compliance with the Sacco Societies Act, the Regulations made thereunder, the SACCOs' By-Laws, and any other applicable laws.

In addition, the Sacco Societies Act and the Regulations made thereunder requires Chief Executive Officers of Regulated SACCOs to ensure that the Board of Directors are frequently and adequately appraised of the operations of the SACCO through presentation of relevant Board papers which shall cover, among other areas periodic financial statements, showing current compared with past period actual performance, the budget compared with the actual expenditure, and with explanations for any variances; the capital structure and adequacy; the delinquent loan list, with particular reference to the growth in loans, loan losses, recoveries and provisioning; the statement of comprehensive income (monthly, quarterly and annual) comparison with budgeted against actual; the sources and distribution on profile of savings and deposits; all insider dealings in particular the non-performing insider loans if any; any reports on violation of the Act, the Regulations made thereunder, and any other applicable law, and remedial actions taken to comply; the large risk exposures; the investment portfolio; and any regulatory reports, and internal reports.

During the period ended December 2022, there were 359 -Regulated SACCOs across the country with each having duly designated persons to serve as Chief Executive Officer. A majority of Chief Executive Officers were male accounting for 66.85% of the total Chief Executive Officers while the female Chief Executive Officers accounted for 33.15% as summarised in Figure 55.

Figure 55: Percentage Gender Distribution of Chief Executive Officers of Regulated SACCOs, 2022

Source: SASRA Database

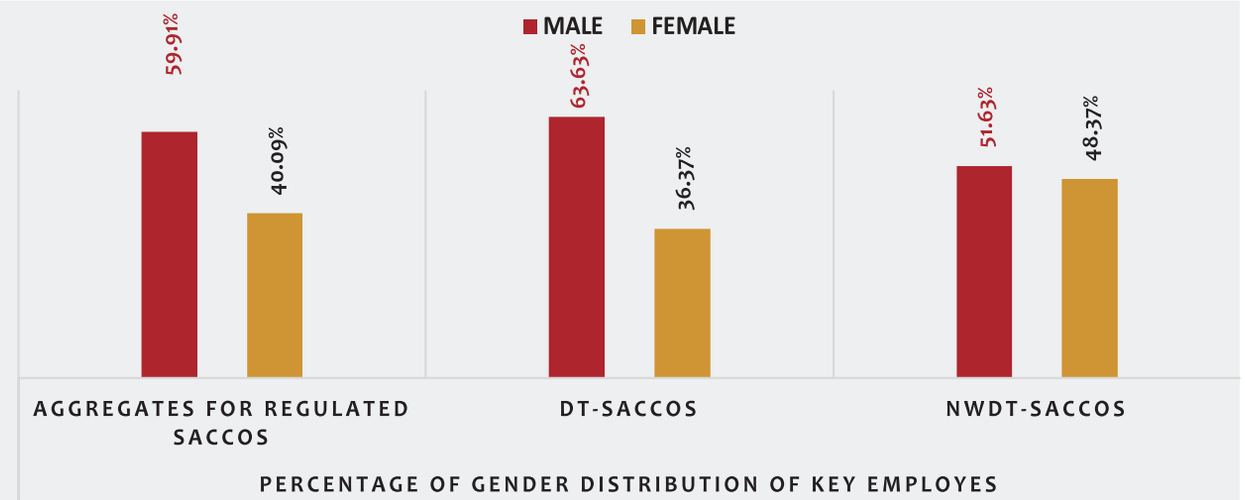

The majority of DT-SACCOs had male Chief Executive Officers during the period accounting for 77.27% of the total Chief Executive Officers within the DT-SACCOs segment, while the female Chief Executive Officers accounted for a paltry 22.73% which is well below the constitutional threshold of one gender not accounting for more than one-third of all employees. The NWDT-SACCOs segment on the other hand had 56.83% of their Chief Executive Officers being male, while the female Chief Executive Officers accounted for 43.17%.

7.2.3. Other Key Employees of Regulated SACCOs

Key employees within the Regulated SACCOs system consists of the Chief Executive Officers and other heads of functional departments including but not limited to heads of the internal audit, credit, ICT, finance, human resource functions among others. This category of employees is responsible to their respective SACCOs for their functional areas but are also accountable to the Authority in the manner in which the SACCO is managed on a day-to-day basis. This category of employees including the Chief Executive Officers are as such certified and approved by the Authority as fit and proper persons to serve as officers of SACCOs in accordance with the requirements of the Act and the Regulations made thereunder.

The gender distribution of the key employees of Regulated SACCOs, shows that the male employees constituted 59.91% of all the key employees in the Regulated SACCO industry, while the female employees accounted for 40.09%. Among the DT-SACCOs segment, the majority of the key employees are male accounting for 63.63% of all the key employees within the segment while the female key employees accounted for 36.37%. Among the NWDT-SACCOs segment, there was recorded a near gender parity among the key employees where the male employees accounted for 51.63% while the female employees accounted for 48.37% as summarised in Figure 56.

Figure 56: Percentage of Gender Distribution of Key Employees and Staff among the Regulated SACCOs

Source: SASRA Database

7.3 The Non-Remittances of deductions of Regulated SACCOs

7.3.1. General Overview

A large number of Regulated SACCOs which draw their membership from various employer-firms and organizations continue to operate largely on the strength of remittances from such employer-firms and organizations. These remittances are largely premised on the provisions of Section 35(1) of the Cooperative Societies Act which allows employees to instruct their employers to periodically deduct from the employees' emoluments such sums as the employee may determine, and to remit such deductions to the employees' designated SACCO or Cooperative Society. There are two traditional forms of remittances from employer-firms and organizations. Firstly, are the remittances designated as non-withdrawable deposits (BOSA) deductions and are paid into the non-withdrawable deposits account held by the employee in the SACCO. These deposits are mainly utilised as collateral for borrowings by the employee from the SACCO but are refundable to the employee by the SACCO upon exit. Secondly, are the remittances designated for periodic repayment of loans and credit facilities issued to the employee by the SACCO.

7.3.2. Total Unremitted Funds owed to Regulated SACCOs

Analysis of the performance of the Regulated SACCOs during the year ended December 2022 showed that several employer-firms and organizations made deductions from the employees' emoluments in accordance with instructions issued by the employees under Section 35 of the Cooperative Societies Act but failed to remit the same to the SACCOs duly designated in that regard by the employees. The total amount of non-remitted funds owed to the Regulated SACCOs as of September 2022 stood at Kshs 2.696 billion, directly attributed to a total of 66,452 members drawn from 80-Regulated SACCOs made up of 57-DT-SACCOs and 23-NWDT-SACCOs.

The amount owed as non-remitted dues to the SACCOs in 2022 however significantly dropped from the previous years in which a sum of Kshs 3.40 billion and Kshs 5.04 billion were reported in 2021 and 2020 respectively. The drop in the amount of money owed to Regulated SACCOs is a testament that the implementation the Authority's General Advisory Note on Non-Remitted Deductions Due to SACCOs from Various Employer-Institutions – Circular No. SASRA/800/2/2019 dated 11th June 2019 is bearing fruits towards the elimination of the non-remittance issue among the Regulated SACCOs. Table 34 shows a summary of the distribution of the total non-remitted funds owed to the Regulated SACCOs.

Table 34: Summary of the Particulars of Non-Remitted Funds owed to SACCOs (2021 – 2022)

Category Regulated SACCOs	Year	No. of SACCOs affected	No. of Members affected	Non-Remitted Funds on account of Loan Repayments (Kshs)	Non-Remitted Funds on account of Backoffice (BOSA) deductions (Kshs)	Total amount of Non-Remitted Funds (Kshs)
DT-SACCOs	2022	57	57,766	1,752,458,915.25	607,016,353.69	2,359,475,268.94
NWDT-SACCOs		23	8,5686	264,274,610.45	73,141,653.34	337,416,263.79
TOTAL		**80**	**66,452**	**2,016,733,525.70**	**680,158,007.03**	**2,696,891,532.73**
DT-SACCOs	2021	-	-	1,842,262,482.00	1,172,450,710.00	3,014,713,192.00
NWDT-SACCOs		-	-	313,312,448.00	74,904,884.00	388,217,332.00
TOTAL		**-**	**-**	**2,155,574,929.00**	**1,247,355,594.00**	**3,402,930,524.00**

Source: SASRA Database

The analysis shows that the bulk of the non-remitted funds as of September 2022 were largely on account of loan repayments which amounted to Kshs 2.02 Billion which is equivalent of 74.78% of the total non-remitted refunds. The direct impact of these non-remittances is that the total loans' portfolio among the Regulated SACCOs was defaulted in an almost equivalent amount, besides occasioning liquidity crunch and pressures on the SACCOs to meet their financial obligations. The non-remittances also had

a direct impact on the Regulated SACCOs reported interest income which is usually suspended once the loans become delinquent. DT-SACCOs were the most affected segment of Regulated SACCOs with the non-remittances, with 57-DT-SACCOs reporting being owed deducted but not remitted funds by various employer-institutions on account of loan repayments, with the aggregated loan repayments owed amounting to slightly over Kshs 1.75 Billion. DT-SACCOs must thus fast-track the implementation of the Authority's General Advisory Note on Non-Remitted Deductions Due to SACCOs from Various Employer-Institutions – Circular No. SASRA/800/2/2019 dated 11th June 2019, which was premised on the opportunities offered to DT-SACCOs to utilize the opportunities offered by the members' FOSA savings account as the mandatory payment channel for processing of their members' emoluments or income, rather than rely on the various employer-institutions for direct deductions.

7.3.3. Distribution of the non-remitted Funds by Employer-Institutions

Table 35 and Figure 57 provides the general distribution of the non-remitted funds owed to the Regulated SACCOs for the period ended September 2022 and shows that the County Governments and Assemblies owed the highest amounts to Regulated SACCOs which stood at Kshs 1.35 Billion and accounted for 49.97% of the total non-remittances and affecting a total of 43,139 members of Regulated SACCOs, who are principally employees of the County Governments and Assemblies. Similar to the overall distribution of the non-remitted funds, the highest proportion of the funds owed by County Governments and Assemblies were due towards loan repayments, implicitly denoting poor quality of the loan portfolios of the Regulated SACCOs drawing membership from County Governments and Assemblies.

Table 35: Summary of the Particulars of Non-Remitted Funds owed to Regulated SACCOs by Employer - Institutions

	NAME OF EMPLOYER - INSTITUTIONS	CATEGORY OF REGULATED SACCOS	NO. OF MEMBERS OF SACCOs AFFECTED	NON-REMITTED LOAN REPAYMENTS (KSHS)	NON-REMITTED BOSA DEDUCTIONS (KSHS)	TOTAL NON-REMITTED FUNDS OWED TO SACCOs
1	COUNTY GOVERNMENTS & ASSEMBLIES	DT-SACCOS	43,068	976,847,775.72	360,225,889.98	1,337,073,665.70

The public Universities and Tertiary Colleges had the second highest amount owed to Regulated SACCOs on account of non-remitted deductions which stood at Kshs 620.52 Million accounting for 23.01% of all the non-remitted deductions. The Private Sector Companies and the State Corporations (parastatals) owed the Regulated SACCOs 428.95 Million and Kshs 143.09 Million representing 15.91% and 5.31% of the total non-remitted deductions respectively.

The Public-owned companies, which includes public sector water companies owed Regulated SACCOs a total of Kshs 64.18 Million representing 2.38% of the total non-remitted deductions. But it is critical to point out that some of the public sector water companies are directly associated with and/or related to County Governments and Assembles in terms of their constitution, governance, and management.

7.4. THE ALTERNATIVE FINANCIAL DELIVERY CHANNELS AND PARTNERSHIPS

7.4.1. General overview

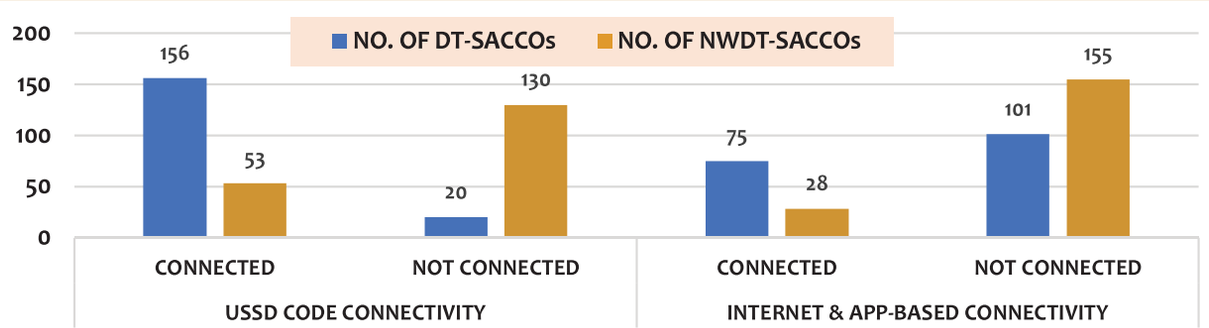

SACCOs have no direct access to the national payment infrastructure, which is a key cog in efficient mobilization of deposits, as well as settlement of nearly all electronic transactional payments. Consequently, and in order to increase their operational efficiency; reach their membership with ease and convenience, as well as ward-off stiff competition, the Regulated SACCOs have been forced to enter into partnerships and agreements with commercial banks, payment service providers and other third-party fintechs, so as to access the national payment and settlement infrastructures.

The key partnerships over the years have been with regard to connectivity to ATM platforms, cheque clearance and settlement, mobile money services, and lately connectivity partnerships to the PesaLink platform. These have been necessitated by the ever-growing demands by members of Regulated SACCOs to be facilitated to make real-time electronic transfer of funds from their respective SACCO savings' account to any other account in a commercial banking institution and vice versa. SACCO agency services are another alternative financial services delivery channels which Regulated SACCOs, especially the DT-SACCOs have embraced over the years. Other popular financial delivery channels and partnerships within the Regulated SACCOs space include the digital credit and loans services and credit information sharing.

7.4.2 Mobile Money connectivity of Regulated SACCOs

The analysis shows that 156-DT-SACCOs have already deployed the usage of mobile money using the traditional USSD code mobile phone services which is available in both the feature phones and smart phones, while 75-DT-SACCOs have deployed mobile money services using both the USSD Code and the internet and App-based money services for their membership. Among the NWDT-SACCOs whose mobile money services is restricted to the push-options, a total of 53-NWDT-SACCOs had deployed the mobile money using the traditional USSD code, while 28-NWDT-SACCOs had deployed both the USSD Code and the internet and App-based money services for their membership as summarised in Figure 58. The high level of USSD Code connectivity remains a critical milestone in creating accessibility of Regulated SACCOs' financial services by their members in those parts of the country with low or no internet connectivity penetration.

Figure 58: No. of Regulated SACCOs with Mobile Money Services for their members

Source: SASRA Database

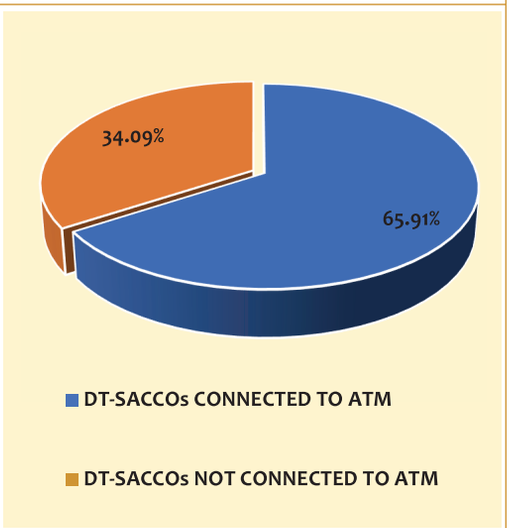

7.4.3. The ATM Connectivity of DT-SACCOs

ATM connectivity is a function of demand deposit-taking financial institutions and thus restricted to DT-SACCOs only. It has over the years become a very popular alternative financial delivery channels for DT-SACCOs in an effort to deepen access to their membership, as well as move away from the often expensive and capital-intensive brick and mortar physical branches. During the reporting period, 65.91% of all the DT-SACCOs reported connectivity to one ATM platform or another with the remaining 34.09% not being connected to any third-party ATM platform as summarised in Figure 59(a) and Figure 59(b).

The majority of ATM connectivity remains with the Cooperative Bank of Kenya's SACCO link ATM brand which reported 97.41% of all the ATM connectivity with 111-DT-SACCOs using their platform. M/S

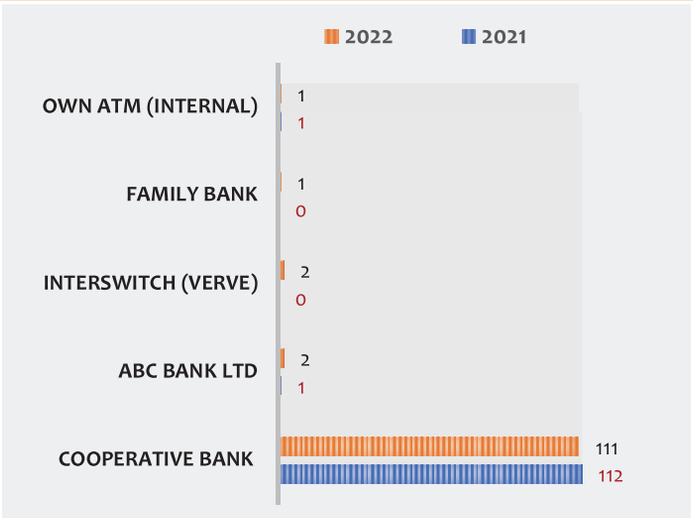

Interswitch through its verve brands and the ABC Bank Ltd each had two (2) DT-SACCOs utilising their ATM platforms, while the Family Bank Ltd had one (1) DT-SACCO utilising its ATM platform. One (1) DT-SACCO reported operating its own internal ATM, but such internally owned-ATMs offered by SACCOs are limited to internal transactions only as they are not connected to local or global payment networks, and thus the DT-SACCOs with own ATMs have also partnered with other third parties for the same services.

Figure 59(a): Level of ATM Connectivity, 2022

Source: SASRA Database

Figure 59(b): No. of DT-SACCOs connected to ATM channels (2021-22)

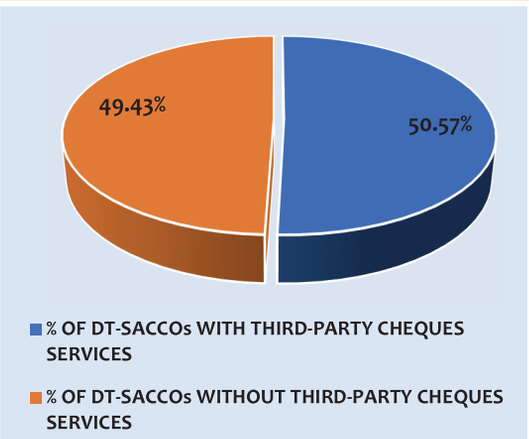

Source: SASRA Database

7 .4.4. Cheque partnerships

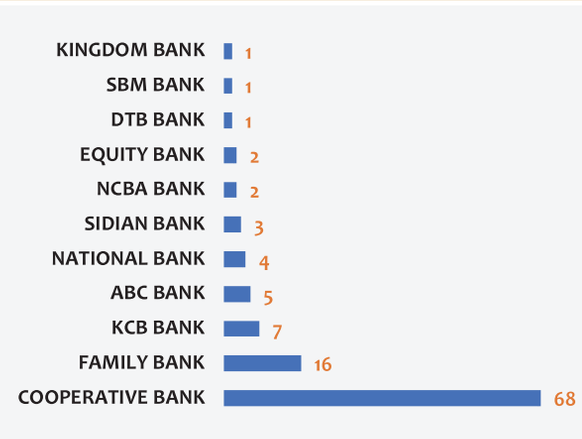

Although the advent of mobile money and other forms or real-time electronic payments has largely reduced the frequency of the usage of cheques to make payments, the importance and significance of cheques as a bill of exchange, especially among the older generation of the population has not diminished. The usage of Cheques as a bill of exchange is also a function of deposit taking financial institutions and thus among the Regulated SACCOs, its usage by members is limited to DT-SACCOs only. In terms of the level of prevalence of the usage of cheques by DT-SACCOs, a total of 50.57% of all the DT-SACCOs had partnered with one or two commercial banking institutions for the purposes of issuance, clearance and settlement of cheques for and on behalf of their membership, while 49.43% of all DT-SACCOs did not have cheque services for their membership and clientele as summarized in Figure 60. Most of the cheque issuance, clearance and settlement services are offered by the Cooperative Bank of Kenya which was serving a total of 68-DT-SACCOs, followed by Family Bank Ltd which was serving a total of 16-DT-SACCOs. The KCB Bank Ltd and ABC Bank Ltd served a total of 7-DT-SACCOs and 5-DT-SACCOs respectively, while The Kingdom Bank Ltd, the SBM Ltd and the DTB Bank Ltd each served one (1) DT-SACCO respectively as shown in Figure 61.

Figure 60: Level of Cheque issuance, settlement & clearance partnerships of DT-SACCOs, 2022

Source: SASRA Database

Figure 61: Distribution of Cheque settlement channels for DT-SACCOs

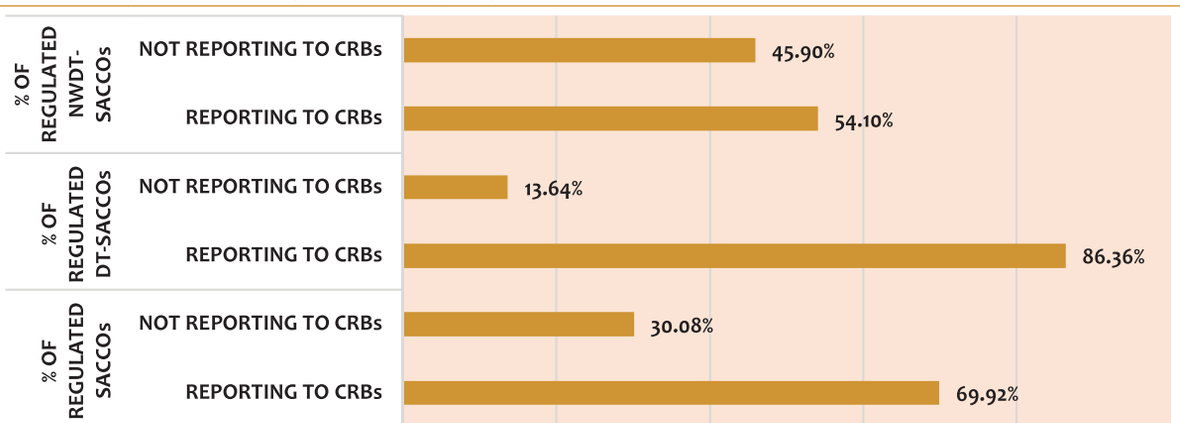

Source: SASRA Database

7.4.5. Credit Information Sharing

The Credit Reference Bureau (CRB) Regulations 2020 which is administered by the Central Bank of Kenya provides for the manner in which credit information is shared amongst and between different financial institutions in Kenya. The said Credit Reference Bureau (CRB) Regulations 2020 recognises SACCOs licensed under the Sacco Societies Act as direct subscribers to licensed CRBs and consequently DT-SACCOs are required to share both the positive and negative credit information to the licensed CRBs. The NWDT-SACCOs on the other hand are not licensed under the Sacco Societies Act but are authorised thereunder and as such have the discretion of partnering with the licensed CRBs for purposes of submission of credit information.

During the period ended December 2022, there were 251-Regulated SACCOs submitting credit information to the three (3) licensed CRBs in the Country, made up of 152-DT-SACCOs and 99-NWDT-SACCOs. Figure 62 provides a summary of the percentage distribution of the Regulated SACCOs reporting to CRBs and shows that whereas a majority of the DT-SACCOs have already embraced the Credit Information Sharing initiative with 86.36% of them reporting, the NWDT-SACCOs are yet to do so, with only 54.10% of them reporting.

Figure 62: Percentage Distribution of Regulated SACCOs reporting to CRBs, 2022

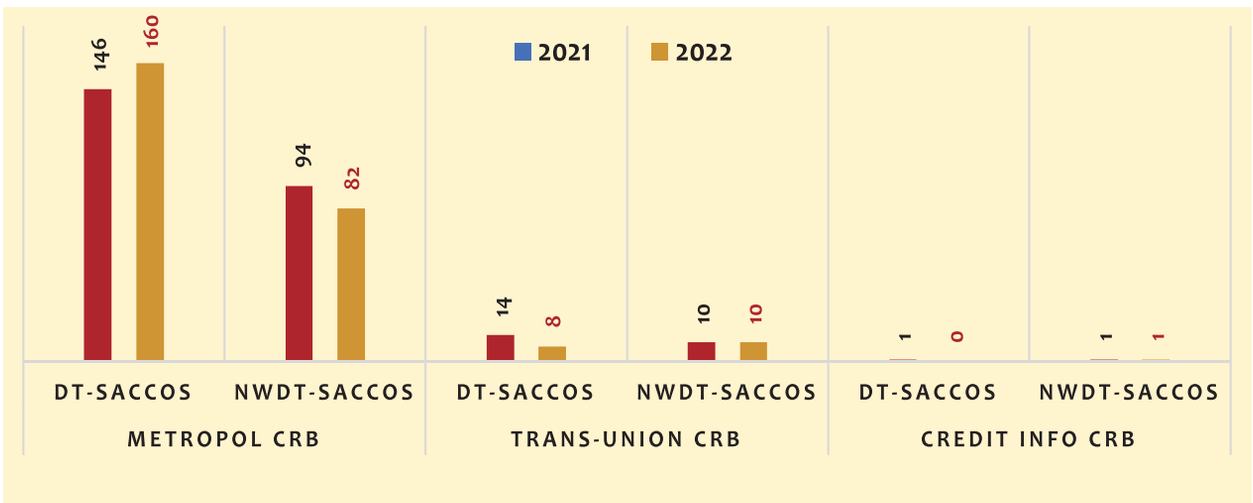

Source: SASRA Database

Most of the Regulated SACCOs were submitting their credit information reports to M/S Metropol CRBs, with 240-Regulated SACCOs comprising 146-DT-SACCOs and 24-NWDT-SACCOs reporting to the said CRBs. It was however observable that two (2) of the Regulated SACCOs (one (1) DT-SACCO and one (1) NWDT-SACCO) reported their credit information to all the three (3) licensed CRBs namely the Metropol CRB; the Trans-Union CRB; and the Credit Info CRB, while six (6) of the Regulated

SACCOs reported to two (2) of the CRBs namely the Metropol CRB and the Trans-Union CRB. Interestingly, all Regulated SACCOs which reported their members credit information to Credit Info CRB also reported to either Metropol CRB and/or Trans-Union CRB. Figure 63 provides the distribution of Regulated SACCOs reporting to each of the licensed CRBs.

Figure 63: The distribution of Regulated SACCOs reporting to each of the licensed CRBs, 2022

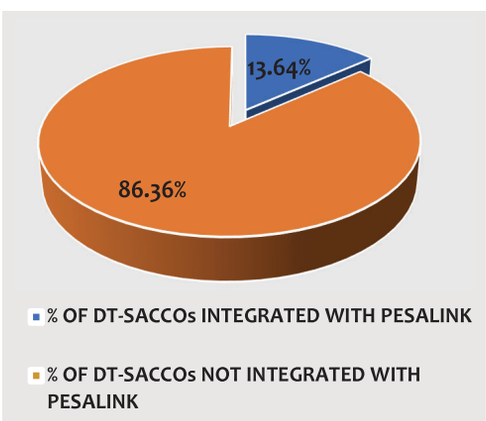

Source: SASRA Database

7.4.6. The PesaLink Connectivity

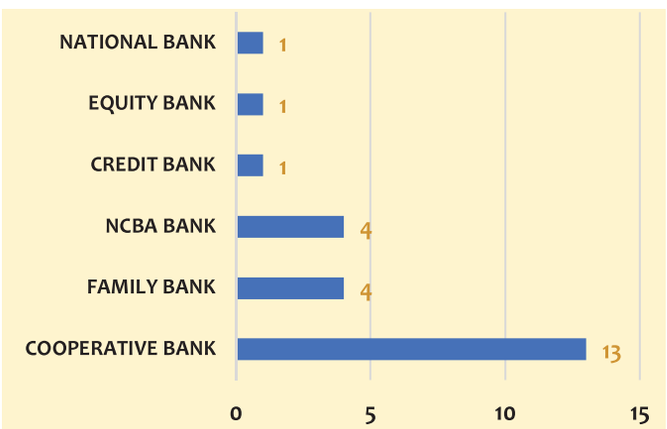

In order to facilitate real-time transfer of funds by members from their respective DT-SACCO's savings account to another account held in a commercial bank and vice versa, a total of 24-DT-SACCOs accounting for 13.64% of all the DT-SACCOs had already joined the PesaLink services as summarized in Figure 64. The settlement and clearance of these transactions are undertaken by various commercial banks because DT-SACCOs cannot access the national payment system directly. Figure 65 provides a summary of the commercial banks which have entered into settlement agreements with DT-SACCOs for purposes of transactions undertaken by their members on the PesaLink platform. Based on the customer transactional ease and convenience offered by the PesaLink payment platform, especially on the large value transfers, it is expected that several DT-SACCOs shall in the short-term to medium term be seeking regulatory approvals to integrate with the PesaLink platform for purposes of what can be called Bank Account to SACCO Account; and SACCO Account to Bank Account payments and/or transfers.

Figure 64: Level of Integration of DT-SACCOs with PesaLink Platform, 2022

Source: SASRA Database

Figure 65: No. of DT-SACCOs integrated with PesaLink Platforms, 2022

Source: SASRA Database

7.4.7. The SACCO Agencies

The use of SACCO agency is another alternative financial services delivery channel which has gained traction among the DT-SACCOs in the recent past as an alternative to the establishment of the traditional brick and mortar branches which requires huge capital outlay as well as recurrent maintenance costs. For the period ended December 2022, there were a total of 3430-SACCO agents serving 36-DT-SACCOs out of the total of 176-DT-SACCOs in the sector. The key transactional services offered by SACCO agents were reported as cash withdrawals, cash deposits for loan repayments, share and deposits contributions, and utility payments; and balance and mini-statement inquiries. Table 36 provides the detailed number of transactions and volumes undertaken by SACCO agents during the year 2022.

Table 36: Number of Transactions and volumes of transactions under by SACCO agents, 2022

	Indicator	No. Of Transactions	% Of No. Of Transactions	Vol. Of Transactions (KSHS)	% Of Vol. Of Transactions	Average Per Transaction (KSHS)
1	Cash Deposit	1,174,547	62.44%	14,546,448,651	54.90%	12,385
2	Cash Withdrawal	531,001	28.23%	11,851,508,750	44.73%	22,319
3	Cash Disbursement of Loans	729	0.04%	4,893,476	0.02%	6,713
4	Cash Repayment of Loans	8,140	0.43%	47,187,045	0.18%	5,797
5	Payment of Bills/School Fees	70,244	3.73%	16,567,806	0.06%	236
6	Transfer of Funds	696	0.04%	29,521,235	0.11%	42,416
7	Account Balance Enquiry	92,514	4.92%	1,999,362	0.01%	22
8	Mini-Statement requests	3,170	0.17%	23,517	0.00%	7
9	Loan Forms Collection	23	0.00%	6,000	0.00%	261
10	New Accounts Opened	48	0.00%	2,500	0.00%	52
	Total	**1,881,112**		**26,498,158,341**		

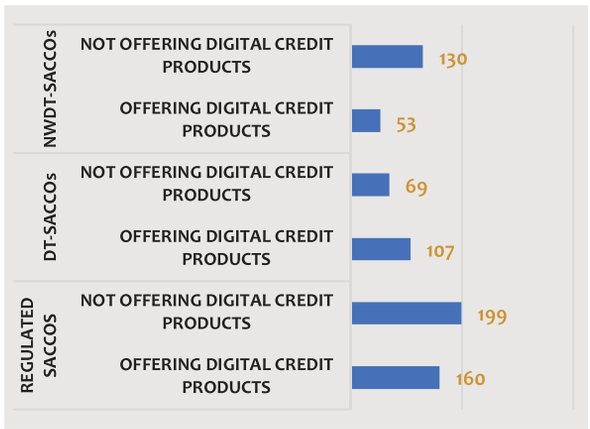

Source: SASRA Database

The analysis shows that most of the transactions by number and volume undertaken by SACCO agents related to cash deposits, which accounted for over 62.44% of the total number of the transactions undertaken, and 55.90% of the total volumes of the transactions undertaken. The total number of cash withdrawals on the other hand accounted for 28.23% of all the transactions undertaken, while their respective transactional volumes was 44.73% of the total transactional volumes undertaken by the SACCO agents.

7.4.8. The Digital Credit and Loan Products Provision by Regulated SACCOs

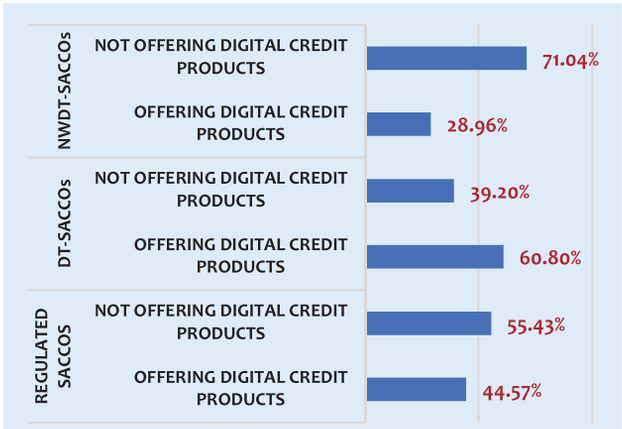

As a means of maintaining their core bases of clientele and membership, as well as ward-off competition from other digital credit providers, Regulated SACCOs have progressively adopted and launched digital credit products tailor made and delivered to their clients using digital devices as shown in Figure 66 and Figure 67. Unlike mobile money services which are available only to DT-SACCOs which mobilises demand deposits directly linked to member transactional accounts under the pull-button option, digital credit and loan products can be deployed by all the Regulated SACCOs (DT-SACCOs and NWDT-SACCOs) with the mobile phones being a delivery channel under the push-button option. A total of 44.57% of all Regulated SACCOs reported offering one form or another of digital credit and loan offering, with a majority being the DT-SACCOs in which 60.80% thereof had already deployed a digital credit and loan facility for their members while only 28.96% of NWDT-SACCOs had deployed digital credit and loan facilities.

Figure 66: No. of Regulated SACCOs offering Digital Credit Products

Source: SASRA Database

Figure 67: Proportion of Regulated SACCOs offering Digital Credit Products

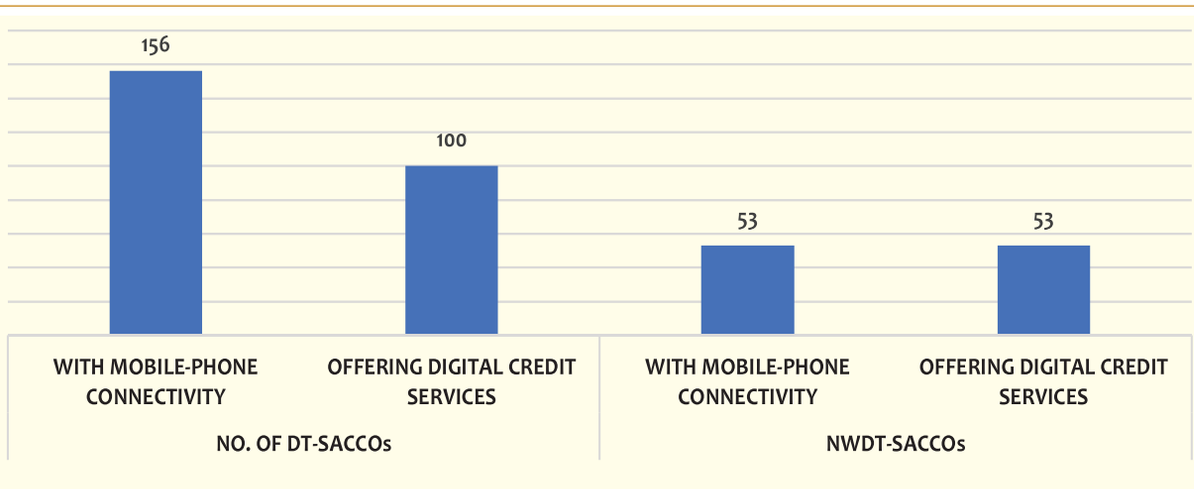

Source: SASRA Database

The most popular digital credit and loan services' delivery channel employed by Regulated SACCOs are the mobile phones through the usage of USSD Codes which is compatible with both feature and smart phones, thereby ensuring clientele's reach even in areas with little or no internet coverage which is an important contributor to financial inclusion. Other Regulated SACCOs have deployed the usage of Mobile Apps or Internet-based platforms from where application for credit and loans are lodged by their membership and processed but with the options of disbursement of the credit or loan once approved. The disbursement is pushed to the members' mobile phone number or any other account as the member may decide in the platform. It is important to highlight the fact that one (1) of the NWDT-SACCOs namely the M/S Digital Media Regulated NWDT-SACCOs is fully digital.

Although the digital credits products and mobile money connectivity is available to both DT-SACCOs and the NWDT-SACCOs (push-option only), the analysis currently shows that out of the 156-DT-SACCOs which have mobile phone connectivity services, only 100-DT-SACCOs have rolled out digital credit and loan products. This means that several DT-SACCOs do not necessary use their mobile phone connectivity capability as a platform for application, processing, approval or disbursement of credit or loan products but rather as a tool for members to access other financial services. On the other hand, all the 53-NWDT-SACCOs which have the mobile phone connectivity under the push-option only, had also rolled out digital credit and loan

Figure 68: Mobile phone Financial services Connectivity and Digital credit services among the Regulated SACCOs

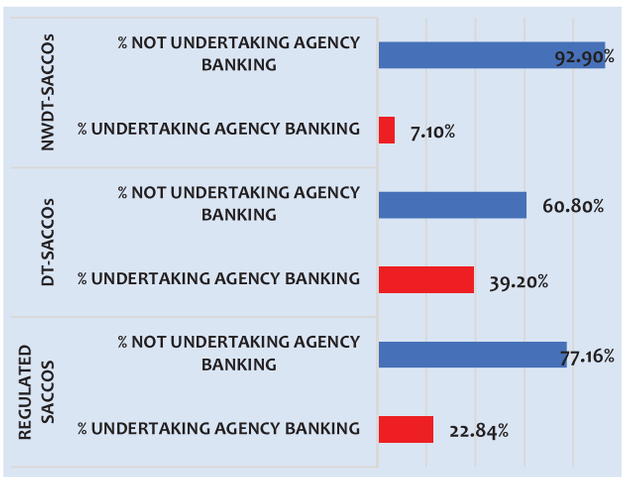

Source: SASRA Database

products for their members.

7.4.9. The Agency Banking operations

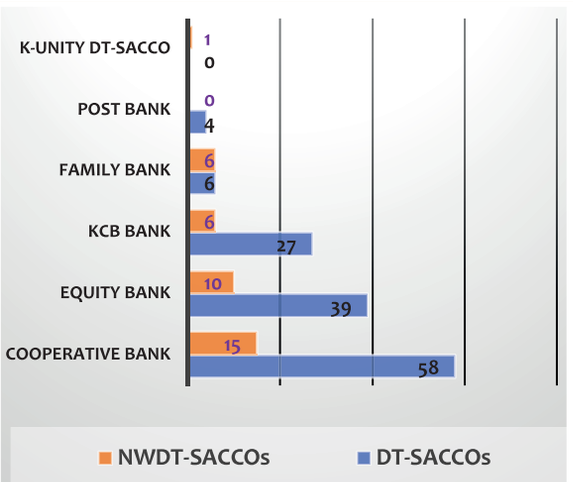

Provision of agency banking services for and on behalf of other financial institutions especially commercial banks and DT-SACCOs remains one of the activities in respect of which Regulated SACCOs undertake as a means of providing a one-stop shop financial services in a bid to retain membership, in addition to tapping the revenue streams in form of the commissions earned from transactions undertaken on behalf of such banking institutions. As summarised in Figure 69, 39.20% of all the DT-SACCOs and a paltry 7.1% of all the NWDT SACCOs were undertaking the agency banking activities representing 22.84% of the Regulated SACCOs. Most of the agency banking business were being conducted on behalf of Cooperative Bank which had 58-DT-SACCOs and 15-NWDT-SACCOs conducting the business on its behalf, followed by Equity Bank which had 39-DT-SACCOs and 10-NWDT-SACCOs conducting the business on its behalf as summarised in Figure 70. One instance was however reported whereby a NWDT-SACCO was acting as agency banking business on behalf of a DT-SACCO.

8.0. INSPECTIONS, SURVEILLANCE AND OTHER REGULATORY INITIATIVES

8.1. An Overview

Inspections and surveillance remain one of the most important supervisory tools for monitoring the performance and compliance of Regulated SACCOs. Inspections and surveillance of SACCOs as a supervisory and regulatory tool can be both on-site and off-site. On-site inspections and surveillance entail physical visits of the Regulated SACCOs to assess their performance and compliance; while off-site surveillance entails the adoption of analysis of periodic, non-periodic and other covert intelligence information to monitor the activities and operations of the Regulated SACCOs. Under the Risk-Based Supervisory Policy deployed by the Authority, on-site inspections and surveillance are triggered by the risk ratings arrived at from the off-site analysis.

8.2. Off-site Inspections

The Authority continues to deploy various tools and instruments for purposes of off-site monitoring of the performance, activities, and operations of Regulated SACCOs. These include the prescribed periodic as well as non-periodic statutory reports and returns which the Regulated SACCOs are required to submit to the Authority. The main periodic statutory reports submitted by DT-SACCOs include the capital adequacy, the liquidity and the statement of deposit return forms which are submitted on a monthly basis; the risk classification of assets and provisioning, investments, sectoral lending, and SACCO agency returns which are submitted quarterly; the statements of financial position and comprehensive income which are submitted monthly and annually; and other disclosures return which is submitted annually.

Other non-periodic returns and reports which DT-SACCOs are required to submit include the insider lending, the fit & proper test forms for members of the Board of Directors and supervisory committees as well as senior management, the appointments or removal or resignations of Chief Executive Officers, the appointment of external auditors, and any other information as the Authority may demand from the Regulated SACCOs. The periodic and non-periodic returns required of NWDT-SACCOs are the same as those of DT-SACCOs, except that the NWDT-SACCOs frequency of submission of all the returns is quarterly, with the exception of the insider lending report, which is required to be furnished to the Authority on a monthly basis. A comprehensive detail of the returns required of the DT-SACCOs and NWDT-SACCOs is contained in the Table 37.

Table 37: List of Statutory Returns and Reports used for off-site surveillance

	DESCRIPTION OF THE RETURNS	FREQUENCY OF SUBMISSION		OBJECTIVE/PURPOSE
	PERIODIC REPORTS AND RETURNS			
		DT-SACCOs	NWDT-SACCOs	
1.	Capital Adequacy Return	Monthly	Quarterly	Monitors if the Regulated SACCO maintains at minimum the prescribed minimum capital and associated ratios
2.	Liquidity Statement	Monthly	Quarterly	Monitors if the Regulated SACCO is able to meet its short-term obligations, particularly to depositors
3.	Statement of Deposit Return	Monthly	Quarterly	Monitors the deposits and the spread of deposits within the Regulated SACCO
4.	Risk Classification of Assets & Provisioning	Quarterly	Quarterly	Assess the overall performance of the loan portfolio of a Regulated SACCO, and flag off the non-performing loans for immediate action
5.	Investment Return	Quarterly	Quarterly	Monitors the levels of investments by Regulated SACCOs in other institutions and also the fixed assets.
6.	Statement of Financial Position	Monthly & Annually	Quarterly & Annually	Monitors the financial position of Regulated SACCOs in terms of assets held against capital and liabilities.
7.	Statement of Comprehensive Income	Monthly & Annually	Quarterly & Annually	Monitors the performance in terms of incomes generated against expenses incurred to earn them.

Table 37: List of Statutory Returns and Reports used for off-site surveillance

	DESCRIPTION OF THE RETURNS	FREQUENCY OF SUBMISSION		OBJECTIVE/PURPOSE
8.	Other Disclosures	Annually	Annually	Monitors the capital strength, liquidity, insider lending, non-performing loans, investments and off-balance sheet items.
11.	Sectoral Lending Report	Quarterly	Quarterly	Provides data on the economic sectors financed by the loans and other credit facilities issued by Regulated SACCOs
12.	SACCO Agency Return	Quarterly	Quarterly	Provides the number the volume of transactions undertaken by agents of Regulated SACCO Societies.
		NON - PERIODIC REPORTS AND RETURNS		
13.	Insider Lending Reports	Within 14 days after approval or ratification of the loan	Monthly (on 15th of the subsequent month)	Reduce the risks associated with insider dealing, conflicts of interest in insider lending, and abuse of insider information
14.	Fit & Proper Test Form	Immediately upon appointment of officer		Tool for assessment of the suitability of Directors and other senior officers serving or seeking to serve in Regulated SACCOs
15.	Appointment, resignation or removal of Chief Executive Officer	Within 15 days of the appointment, resignation or removal.		Enables the Authority to determine reasons for removal/resignation, and verify suitability of the new officer, and update the database
16.	Appointment of external auditors	Within 30 days of the appointment by the AGM		Enables the Authority to verify that the auditor is approved, and that the Regulated SACCOs accounts shall be audited within time.
17.	Information requested by Authority	As advised by the Authority		Any other information that the Authority may need in the course of its supervision mandate

Source: SASRA Database

8.3. On-site Inspections

8.3.1. Introduction

On-site inspections are generally premised on the provisions of Section 49 of the Sacco Societies Act which provides inter alia that the "Authority may, at any time and from time to time, and shall, if so, directed by the Cabinet Secretary, cause an inspection to be made by any person authorized by the Authority in writing of any SACCO and of its books, accounts and records". In undertaking on-site inspections, the general objective is to determine if there is –

a) any breach or contravention of any of provisions of the Sacco Societies Act or any regulations made thereunder.

b) any irregularity in the manner of conduct of the inspected Regulated SACCOs.

c) any mismanagement of a Regulated SACCO; and

d) any other matter relating to a Regulated SACCOs not consistent with sound and prudent business practice.

There are three (3) main types of onsite inspections required of the Authority pursuant to the Regulations 2010 and Regulations 2020 namely –

a) On-site Inspections for licensing or authorization of new Regulated SACCOs as provided in Reg. 4(4) of the Regulations 2010 for licensing of DT-SACCOs and Reg. 5(4) of the Regulations 2020 for authorization of the NWDT-SACCOs.

b) On-site inspections for continuous monitoring of performance and compliance as provided under Reg. 66 of the Regulations 2020 for DT-SACCOs and Reg. 79 of the Regulations 2020 for NWDT-SACCOs,

c) On-site inspections for purposes of licensing of new branches of DT-SACCOs as provided in Reg. 16(3) of the Regulations 2010 which provides inter alia that the 'Authority shall undertake the inspection of the branch premises and examine compliance with the standards and the operational readiness of the DT-SACCO for commencing operations.'

8.3.2. On-Site Inspections for monitoring compliance

These on-site inspections were undertaken pursuant to Reg. 66 of the Regulations 2020 for DT-SACCOs and Reg. 79 of the Regulations 2020 for NWDT-SACCOs. These two (2) provisions of the law require an on-site inspection of either DT-SACCOs or NWDT-SACCOs to determine –

a) Level of compliance with capital adequacy requirements.
b) Composition of assets, liabilities, and equity accounts.
c) Quality of earning assets.
d) Risks management framework; and
e) Any other matter which in the opinion of the Authority is relevant to the performance of its mandate under the Sacco Societies Act, the Regulations made thereunder and any other applicable law.

During the year ended December 2022, the Authority conducted a total of 37-On-site inspections of the Regulated SACCOs in the country distributed different Counties as summarised in Table 38. In 2021, the Authority conducted more on-site inspections due to the fact that new applications for authorization of SACCOs to undertake specified non-deposit taking business were undertaken for each applicant SACCO Society before authorization. The on-site inspections conducted are generally consistent with the Authority's Risk Based Supervision Framework.

Table 38: No. of On-site Inspection for monitoring compliance undertaken in Regulated SACCOs, 2022

Source: SASRA Database

Each on-site inspection exercise yielded inspection reports which were duly presented to the Board of Directors of the respective Regulated SACCOs in accordance with provisions of Section 49(7) of the Sacco Societies Act which provides inter alia that "a report of the findings of an inspection under subsection (1) shall, in addition to any action that may be taken under the Co-operative Societies Act be presented by the Authority to the Board of Directors of the Regulated SACCO." In addition, copies of the inspection reports are shared with the County Cooperative Office in respect of whose jurisdiction the Regulated SACCO's head office is situated for notification and any other additional action as may be appropriate.

8.3.3. On-Site Inspections for Licensing of branches of DT-SACCOs.

In addition, the Authority conducted various on-site inspections for purposes of considering applications for licensing of branches of DT-SACCOs pursuant to Reg. 16(3) of the Regulations 2010 as summarised in Table 39. As indicated above, the purpose of the on-site inspection of a branch is to examine the branch's compliance with the standards and the operational readiness of the branch for commencing operations.

Source: SASRA Database

Unlike the DT-SACCOs' branches which must be physically inspected by the Authority prior to licensing under the Regulations 2010, there is no similar requirement for physical inspection of branches of NWDT-SACCOs. The procedure for NWDT-SACCOs opening of branches, marketing offices, satellite offices or outlets simply entails the -

a) Notification of the Authority in writing of such intention to open at least ninety days before opening the new place of business.
b) obtain a written approval from the Authority before opening the new place of business.
c) pay to the Authority the prescribed fee; and
d) prominently display the authorisation to operate the new place of business at the new place of business.

However, the Authority may only issue an authorisation to a NWDT-SACCO to operate the place of business if it is satisfied that the NWDT-SACCO has complied with the provisions of the Sacco Societies Act and the Regulations, 2020 particularly with regard to compliance with the prescribed minimum prudential standards. In default of such satisfaction, the intention to operate a new place of business shall be rejected.

8.4. Criminal Investigations by the SSFIU

The SACCO Societies Fraud Investigations Unit (SSFIU) was established in 2020 with the mandate of detection, prevention, and apprehension of offenders perpetrating fraud within the Regulated SACCO industry as well as the investigation and recommendation for prosecution where applicable incidences of fraud within the SACCO industry. The SSFIU is currently staffed by five (5) officers seconded to the Authority by the Directorate of Criminal Investigations (DCI). Table 40 shows the status of the cases which were reported to the SSFIU through the Authority in 2022; while Table 41 shows the summary of the status of the cases which were reported and pending before the SSFIU prior to 2022.

Table 40: Status of cases reported to the SSFIU in 2022

		Description of the Reported allegations	Actual amount lost by the SACCOs or public (Kshs)	Amount exposed to loss (Kshs)	Status of the investigations or inquiry by the SSFIU
1.	7th February, 2022	Allegations of Fraudulent acquisition of loans and credit facilities from SACCO using deceased members' accounts and credentials	Kshs 24,784.00	Kshs 486,879.00	Inquiry File submitted to the Director of Public Prosecutions for advice
2.	16th February 2022	Allegations of Fraudulent usage of SACCOs funds by certain officials to purchase land	-	Kshs 55.00 Million	Inquiry File submitted to the Director of Public Prosecutions for advice
3.	7th June 2022	Allegations of illegal withdrawal of funds from certain members' savings accounts using unregistered mobile phone numbers and then transferred to M-PESA accounts	Kshs 29.40 Million	-	Pending under investigations
4.	2nd July 2022	Allegations of embezzlement of SACCOs funds by channelling the same to a subsidiary between 2015 and 2020	-	Kshs 55.20 Million	Pending under investigations
5.	5th September 2022	Allegations that former officials awarded themselves loans without following the credit policies.	-	Kshs 4.20 Million	File closed with recommendations for civil recovery and administrative supervisory actions
6.	3rd October 2022	Allegations of internal staff linking a members' Savings accounts to unauthorised mobile number and withdrawing the funds therefrom	Kshs 1.60 Million	-	Suspect arraigned in court and convicted
7.	11th October 2022	An unknown person acting on behalf of a SACCO fraudulently opened an account at a branch of a commercial bank in the name of the complainant, then borrowed money from the SACCOs which was deposited into that account.	Kshs 1.17 Million	-	Pending under investigations

Source: SASRA Database

The trend analysis of the cases reported in 2022 as well as those reported in 2022 shows that the main perpetrators of the fraudulent activities are internal SACCO officials. There was only one incidence of a cyber-attack and breach related fraud reported in the year 2022 but which was also perpetrated in

collusion with inside staff. The internal technical staff working within SACCOs' ICT and credit departments have been noted to be the greatest collaborators in perpetuation of fraudulent activities, and thus SACCOs are called upon the constantly review the adequacy of the internal controls in their ICT and credit functions.

Table 41: Status of cases pending before the SSFIU prior to December 2021

		Description of the Reported allegations	Actual amount lost by the SACCOs or public (Kshs)	Amount exposed to loss (Kshs)	Status of the investigations or inquiry by the SSFIU
1.	10th January 2021	Allegations that a certain unlicensed entity operating as a SACCOs collected funds from members of the public with promises of returns among others, and later closed with the members funds	Kshs 63.00 Million	Unknown	Pending before the courts for hearing
2.	15th February 2021	Allegations of a person impersonating SASRA officers to obtain money from several SACCOs pretending the same is facilitation fees for a luncheon	Kshs 74,000.00	Unknown	Pending arrest and prosecution
3.	7th April 2021	Allegations of a SACCO officer diverting SACCO funds meant for M-PESA Floats as well as commissions paid for undertaking M-PESA business.	Kshs 642,000.00	-	Pending before the courts for hearing
4.	2nd December 2021	It was reported by four (4) SACCOs that during a single weekend, several fraudulent transactions were withdrawn from the SACCOs' float and pay bills; and thereafter transferred to other M-PESA accounts and withdrawn	Kshs 22.20 Million	-	Pending under investigations

8.5. Capacity Building initiatives for Regulated SACCOs

In furtherance of its mandate of facilitating knowledge development and information sharing within the SACCO subsector, the Authority conducted several capacity building and training workshops aimed at empowering SACCO officers and technical staff drawn from different Counties, with knowledge and information on international best practices in SACCO's management, supervision, and regulations. Table 42 provides a summary of the capacity building initiatives undertaken by the Authority in the year 2022.

Table 42: Summary of Capacity Building and Training Initiative in 2022

8.6. Regulatory Stakeholder Engagement Initiatives

The Authority continued to undertake regulatory stakeholder initiatives aimed at developing appropriate regulatory instruments to guide Regulated SACCOs in key aspects of regulatory compliance requirements as well as emergent issues. Such stakeholder initiatives are fully in tandem with the constitutional requirements which dictates that public consultations and stakeholder engagements ought to be undertaken, as well as the provisions of the Statutory Instruments Act, 2013. During the year ended December 2022, the Authority conducted the regulatory stakeholders' engagement initiatives as enumerated in Table 43.

Table 43: Summary of Stakeholders' Regulatory Policy Initiatives

	SUBJECT MATTER OF REGULATORY STAKEHOLDERS' INITIATIVE	TARGET AUDIENCE	DATE	LOCATION AND VENUE	NUMBER OF PARTICIPANTS

8.7. Complaints Resolution and management

The Authority's supervisory approach to Regulated SACCOs embodies prudential regulation and market conduct regulation. Prudential regulation focuses on the solvency, safety and soundness of Regulated SACCOs and addresses the levels of compliance with such prescribed standards as capital adequacy, liquidity, assets and assets quality, earnings, and investments among others. These are reported in Chapter II of this report. The market conduct-of-business regulation on the other hand focuses on how Regulated SACCOs conduct business with their members, who are essentially their customers. One of the emergent issues in the market conduct regulation of financial services provision and delivery is the consumer protection and fair treatment of customers (members) which includes resolution of complaints of members of various Regulated SACCOs.

In this respect the Authority places a lot of supervisory emphasis on a prompt, efficient and friendly resolution of complaints and general inquiries raised by members of Regulated SACCOs and the public in general, particularly in respect of their financial services and operational activities. Consequently, Regulated SACCOs are required to institutionalise members' complaints handling procedures including dedicated officers to handle members' complaints, maintenance of complaints registers, as well as complaints' resolution mechanisms through alternative dispute mechanisms, referrals, and periodic reports of complaints and manner of the complaint's resolution to the Authority. Table 44 provides a summary of the complaints received and resolved by the Authority relating to DT-SACCOs and NWDT-SACCOs between 2020 and 2022.

Table 44: Complaints received and processed relating to Regulated SACCOs (2020 – 2022)

	TOTAL COM-PLAINTS	166	30	196		170	47	217		253	23	276	

Source: SASRA Database

The Authority received and processed a total of 276 complaints in 2022 which is an increase from the 217 complaints received and processed in 2021. The DT-SACCOs registered the majority of complaints at 253 complaints arising from their operations and activities, while the NWDT-SACCOs registered just 23 complaints during the period. The most predominant nature of complaints remains the claims for refunds of savings and deposits or share transfers and accounted for 53.99% of the total complaints in 2022, which is a slight decrease from 55.76% proportion of complaints which constituted the claims for refunds of savings and deposits or share transfers in 2021. Whereas the Regulations 2010 for DT-SACCOs and the Regulations 2020 for NWDT-SACCOs requires Regulated SACCOs to refund members' deposits (savings) within sixty (60) days from the date of notice of withdrawal from membership thereof, it is apparent that some Regulated SACCOs are still not complying with these legal requirements and thereby bringing lots of inconvenience and hardships to their members.

Although these complaints may have been resolved in one way or another, it is important to reiterate that the main reason for delayed settlement of claims for refund of savings and deposits of members within the prescribed time, is the perennial liquidity challenges faced by some financially distressed Regulated SACCOs. In this regard, the Authority continues to call upon the Regulated SACCOs to put in place adequate liquidity management plans that cater for the unexpected applications by members for refund of their savings and deposits to avoid the backlashes and supervisory enforcement actions associated with the failure to make timely refunds of savings and deposits, and which may also result into panic withdrawals and liquidity run by other members.

Other notable types of complaints in order of reported prevalence included loans and loan issuance (17.75%); payments of deceased funds to beneficiaries (4.35%); guarantors and guarantee of loans (3.26%); CRB listing issues (3.26%); suspected instances of fraudulent activities (2.90%); and misuse of security or collateral by the Regulated SACCOs (2.17%).

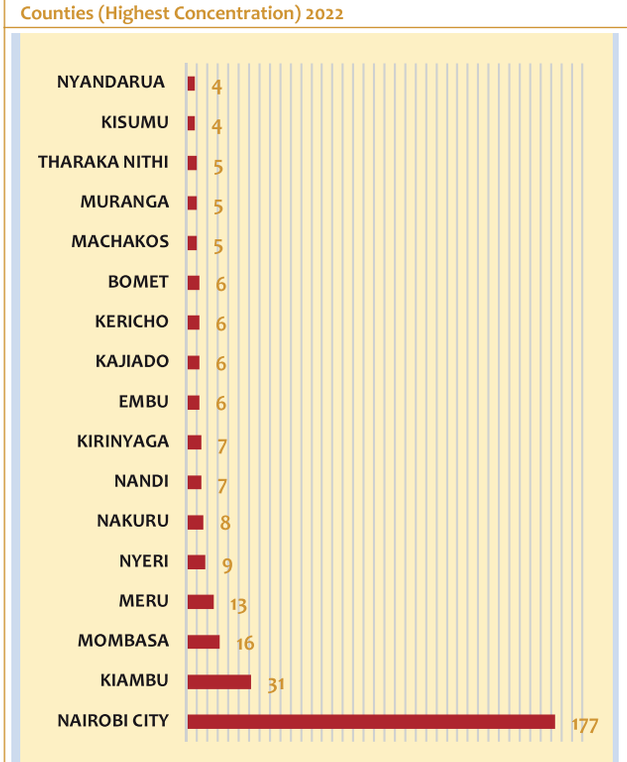

9 .0. THE COUNTY DISTRIBUTION OF REGULATED SACCOs

9.1. The Head Office Locations of Regulated SACCOs by Counties

Like every other Cooperative enterprise, all Regulated SACCOs are required to designate in their By-laws the physical location and address of their head offices at the point of registration. Upon application for licensing and/or authorization under the Sacco Societies Act, the Authority inspects the suitability or otherwise of such head offices before licensing in case of DT-SACCOs and/or authorization in case of NWDT-SACCOs. Once the head office is licensed and/or authorized, the same may not be relocated or closed permanently, except with a prior written approval of the Authority as provided in the Regulations 2010 for DT-SACCOs and the Regulations 2020 for NWDT-SACCOs.

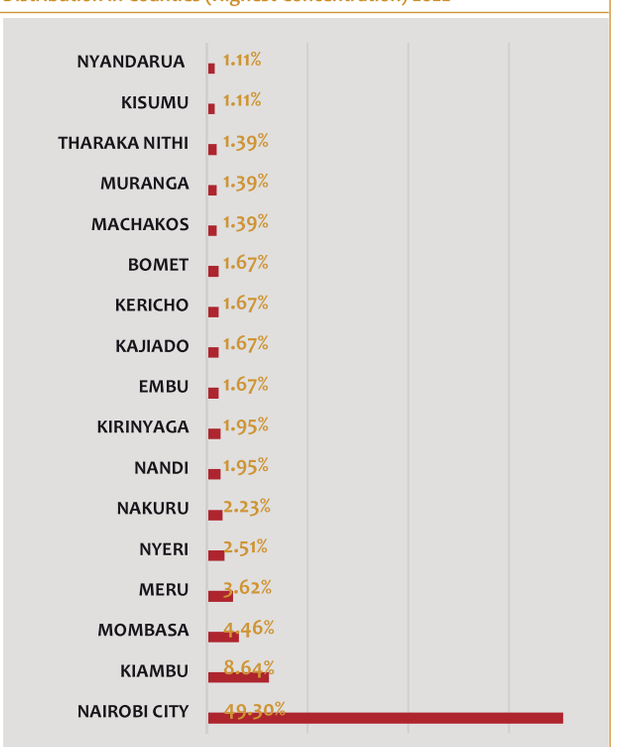

The head office locations of Regulated SACCOs in the country are distributed among 40 Counties, with the DT-SACCOs' head offices being in all the 40 Counties while the presence of head offices of NWDT-SACCOs are distributed among only 17 Counties. This implies that there are seven (7) Counties which do not host a head office of any of the Regulated SACCOs. These are the Counties of Makueni, Turkana, Tana River, Garissa, Wajir, Mandera, and Isiolo, even though the Counties of Turkana, Makueni, Tana River and Isiolo are served by branch networks of other Regulated SACCOs. Figure 71 and Figure 72 provides the distribution of the head office locations of Regulated SACCOs among the 40 Counties, with Nairobi City County reporting the highest number of Regulated SACCOs' head offices with 177-Regulated SACCOs which accounted for 49.30% of the head offices of all Regulated SACCOs. This is followed by the Counties of Kiambu, Mombasa, Meru and Nyeri with 31, 16, 13, and 9-Regulated SACCOs' head offices and accounting for 8.64%, 4.46%, 3.62% and 2.51% respectively. The Counties of Embu, Kajiado, Kericho and Bomet, each had a total of six (6) head offices of Regulated SACCOs representing 1.67% each, while the Counties of Machakos, Muranga and Tharaka Nithi each had a total of five (5) head offices of Regulated SACCOs representing 1.39% each.

9.2. The Branch Networks Distribution of Regulated SACCOs in the Counties

SACCOs are essentially financial service providers with their forte being mobilization of savings and advancement of credit to their members. Cognizant of the mobility of the members, as well as the expansion of their fields of membership (common bond) coverage to all parts of the country, many Regulated SACCOs especially the DT-SACCOs have opened branches in different parts of the country with a view to bringing their financial services closer to their members. Indeed, the Regulations 2010 for DT-SACCOs and Regulations 2020 for NWDT-SACCOs allows Regulated SACCOs to open and operate branches, as well as other places of business subject to prior approval of the Authority. A total of 109-Regulated SACCOs representing 30.36% of all the Regulated SACCOs had established and operationalised branch networks in different parts of the Country. These consisted of 104-DT-SACCOs representing 59.09% of all the DT-SACCOs, and 5-NWDT-SACCOs representing 2.73% of all the NWDT-SACCOs as summarised in Figures 75.

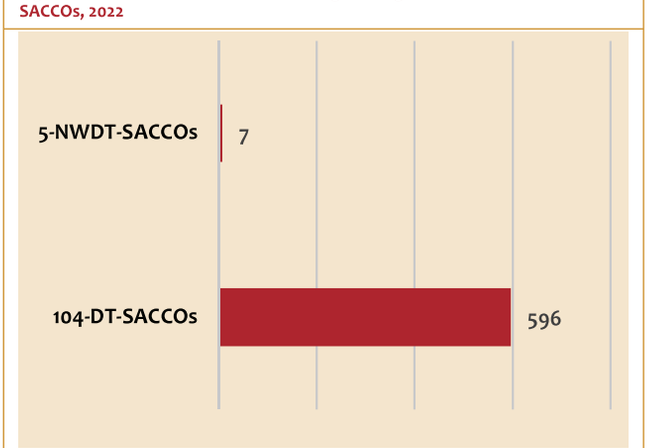

Figure 75: Number and proportion of Regulated SACCOs with Established Branches Networks

Source: SASRA Database

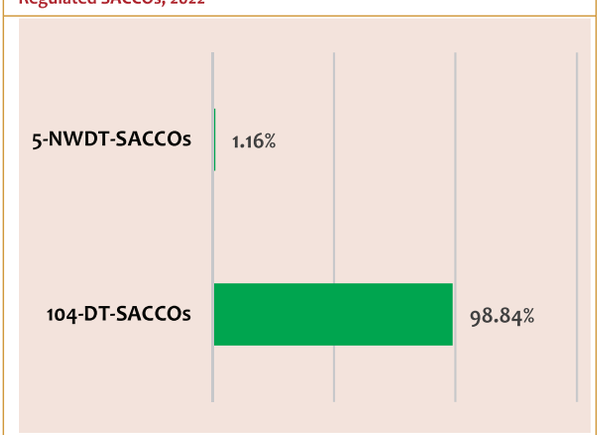

The 112-Regulated SACCOs (consisting of 104-DT-SACCOs and 5-NWDT-SACCOs) which had established operational branch networks had an aggregate total of 603 branch networks located in different counties in the country, as well as towns, markets and/or trading centres in such counties. The 104-DT-SACCOs accounted for the highest number of branches as 596 branch networks constituting 98.84% of all the branches, while the 5-NWDT-SACCOs had just a paltry seven (7) branches networks representing 1.16% of all the branches as summarised in Figure 76 and Figure 76. The high number of branch networks of DT-SACCOs is consistent with their demand deposit taking business model, which entails high intensity and frequency of members' transactional services such as teller operations; in comparison to the NWDT-SACCOs whose non-withdrawable deposits business model does not entail intensive member transactional services.

Figure 76: No. of Branch Networks among the Regulated SACCOs, 2022

Source: SASRA Database

Figure 77: Proportion of Branch Networks among the Regulated SACCOs, 2022

Source: SASRA Database

Table 45 provides the distribution of the branch networks of Regulated SACCOs among the various counties and shows that the Counties of Kiambu and Meru had the highest concentration of branch networks of Regulated SACCOs at 48-branches each accounting for 7.96% of all the branches. Although the Nairobi City County has the highest concentration of SACCOs with 177-Regulated SACCOs' presence, the total branch networks established therein were 46 and accounted for 7.63% of all the Regulated SACCOs' branches in the country.

Table 45: Distribution of Branch Network of SACCOs among the counties

	NAME OF THE COUNTY	NO. OF REGULATED SACCOs HQS	NO. OF DT-SACCOs BRANCHES	NO. OF NWDT-SACCOs BRANCHES	TOTAL NO. OF BRANCHES	PROPORTION TO ALL BRANCHES

CHAPTER III

DEVELOPMENTS IN THE SACCO INDUSTRY

10.0. POLICY DEVELOPMENTS

10.1. Establishment of the Ministry for Cooperatives and MSMEs' Development

The government through the Executive Order No. 1 of 2022 dated 12th October 2022, as amended by Executive Order No.1 of 2023 dated 6th January 2023, established the Ministry for Cooperative & Micro, Small & Medium Enterprises (MSMEs) Development which is composed of the State Department for Cooperatives and State Department for MSMEs' Development. The State Department for Cooperatives is responsible for overall Co-operative policy formulation and legislation, oversight, and promotion of cooperative Sector.

The Authority operates as an agency within the State Department of Cooperatives with the sole responsibility of regulating and supervising SACCOs as guided by the Sacco Societies Act and the regulations made thereunder. The Authority also implements other legal and legislative frameworks applicable to Regulated SACCOs including but not limited to the Proceeds of Crime and Ant-Money Laundering Act. Previously the State Department for Cooperatives, fell within the Ministry of Agriculture, Livestock, Fisheries and Cooperative Development.

10.2 The Kenya Vision 2030 Fourth Medium Term Plan, 2023 - 2027 (MTP IV)

The Fourth Medium Term Plan (MTP-IV 2023-2027) of Kenya Vision 2030 succeeds the Third MTP 2018-2022 which came to an end in December 2022. The MTP-IV 2023-2027 seeks to implement the fourth and second-last phase of Kenya Vision 2030 and sets the momentum for transition to the next long term development agenda for the Country beyond 2030. It is guided by the lessons learnt in implementation of previous MTPs (MTP-I, MTP-II and MTP-III); the Constitution of Kenya 2010 and incorporates the governments' key priorities outlined in the government's Bottom-Up Economic Transformation Agenda (The Draft Fourth Medium Term Plan (MTP-IV 2023-2027) of Kenya Vision 2030 succeeds the Third MTP 2018-2022 which came to an end in December 2022.

The Draft MTP-IV 2023-2027 seeks to implement the fourth and second-last phase of Kenya Vision 2030 and sets the momentum for transition to the next long term development agenda for the Country beyond 2030. It is guided by Kenya Vision 2030; the lessons learnt in implementation of previous MTPs (MTP-I, MTP-II and MTP-III); the Constitution of Kenya 2010 and incorporates the governments' key priorities outlined in the government's Bottom-Up Economic Transformation Agenda (BeTA).

Just like with the previous Medium-Term Plans of the Kenya Vision 2030, the role and responsibility of the SACCO industry and the Authority, is principally holed within the Financial Services Sector Plan of the Economic Pillar of the Kenya Vision 2030. The MTP-IV thus continues with the recognition of the SACCO industry as a key component of the country's national financial sector, and vehicles for economic transformation by enhancing financial inclusion of a large population of the country, through mobilization of deposits and advancement of credit facilities to many households. The role of the SACCO industry and the Authority in the implementation of MTP-IV as reflected in the Financial Services Sector Plan 2023-2027 includes -

a) The review and implementation the Risk Based Supervisory Frameworks for SACCOs.

b) The operationalization of the SACCO Shared Services and Central Liquidity Facility to enhance efficiency in savings mobilizations and credit to members; as well as the Deposit Guarantee Fund to deepen public confidence and trust in investing in the SACCO industry.

c) The review of the surcharge legal framework to include asset recovery for the SACCOs to enable identification, traceability, investigation, seizure, recovery, and

reunification of the embezzled funds back to the affected SACCOs; as well as develop a robust market conduct framework for the SACCO industry for the protection of members of SACCOs in their transactions, members' financial education and literacy.

d) The development and implementation of a prudential regulatory framework for Housing and Investments Cooperatives subject to publication of the relevant regulatory framework; and the integration of SACCO's into the national credit information sharing; the consolidation of the SACCO industry; and the development and implementation of the criteria for determining suitability of SACCO officers.

e) The Establishment a SACCO stabilization facility to restore and facilitate maintenance of SACCO's prudential requirements.

f) The establishment of a cyber forensic triage laboratory in the SACCO industry to effectively respond to the SACCO industry cyber-crime incidences; and a framework for the SACCO industry regulatory sandbox to support industry innovations.

g) Develop a governance and procurement framework for the SACCO subsector.

The commitments to the SACCO industry and the Authority are assigned under the Finance and Production Economy value chain clusters. The other value chain clusters in the MTP-IV include Infrastructure; Land & Natural 0Resource; Social Services; and Governance and Public Administration.

10.3. The Authority's Strategic Plan (2023 – 2027)

The period ended December 2022 also saw the lapse of the Authority's Strategic Plan (2018 – 2022) and the launch of the current Strategic Plan (2023 – 2027). The Plan is anchored on the Kenya Vision 2030 MTP IV's Financial Services Sector Plan, as well as the national government's core pillars of economic transformation as espoused in the Bottom-Up Economic Transformation Agenda (BeTA) which focusses agriculture; MSMEs development; affordable housing; digital and creative economy; health; and environment and climate change.

The Authority's Strategic Plan (2023 – 2027) is premised on three key result and thematic areas with each area driven by specific objectives and strategies as summarised in Table 46.

Table 46: Summary of the Key Result Areas of the Authority's Strategic Plan 2023 - 2027

#	KEY RESULT AREA	STRATEGIC OBJECTIVES	STRATEGIES
1.	**Financial Stability, inclusion and Member protection**	To ensure all regulated SACCOs are fully compliant with the prescribed laws and standards	Enhance monitoring of compliance with the prescribed laws and standards
			Enforce compliance with the prescribed laws and standards
		To regulate and enforce good governance practices in SACCOs	Ensure compliance with governance practices
		To promote inclusion and safeguard member interests	Enhance Consumer Protection
			Enhance public education and awareness
2.	**Promotion and development of the SACCO Industry**	To strengthen research, policy and legal framework	Promote evidence-based decision making
			Facilitate growth of the SACCO industry.
			Enhance the Authority's enforcement and asset recovery framework.
			Address existing gaps in the legal frameworks
			Promote adoption of technology and mainstream green finance in the SACCO industry
			Mainstream SACCO agenda in the East Africa Community (EAC) financial integration framework
		To deepen strategic partnerships and collaborations	Enhance International, regional and national strategic engagements

Table 46: Summary of the Key Result Areas of the Authority's Strategic Plan 2023 - 2027

#	KEY RESULT AREA	STRATEGIC OBJECTIVES	STRATEGIES
3.	**Organizational Capability**	To attract, develop and retain competent staff	Sustain optimal and competent human capital
			Strengthen performance management system
			Enhance Staff Welfare and work environment
		To increase Authority's revenue and prudently manage our resources	Mobilize adequate financial resources
			Prudent management of available resources
			Enforce financial reporting, monitoring and evaluation
		To strengthen internal systems and processes for efficient service delivery	Strengthen Quality Management systems
			Improve information security management and leverage on ICT
			Sustain and improve customer satisfaction
		To strengthen good corporate governance practices	Sustain and improve Board effectiveness
			Ensure compliance with PSASB/IPPF for internal auditors
			Sustain and improve communication and stakeholder relations
			Enhance Enterprise Risk Management (ERM)
			Protect Authority's Interest

10.4. The Establishment and operationalization of the Hustler's Fund (The Financial Inclusion Fund)

The Financial Inclusion Fund (Hustler Fund) was established by the government under the Public Finance Management (Financial Inclusion Fund) Regulations, 2022 in 2022. This digital financial inclusion initiative is designed to provide financial empowerment and security to the people at the bottom of the pyramid. This is envisaged to be achieved through provision of affordable credit, saving schemes, insurance and pension, products. The personal finance product was rolled out on 31st December 2022. It is anticipated that the other products targeting MSMEs, and business start-ups will be developed and rolled through the financial intermediaries. Regulated SACCOs as financial intermediaries are expected to play a key role in this realization as this will enhance their savings mobilization efforts and financial inclusion. In preparation to exploit this market, Regulated SACCOs are expected to develop or redesign their credit products to keep up with the dynamic needs of the markets.

11.0. LEGAL DEVELOPMENTS

11.1. Compliance with Data Privacy and Protection Frameworks

The year 2022 saw the commencement of the implementation of the Data Protection Act 2019 with effect from July 2022. This follows the coming into force of the three (3) key regulations which operationalized the said Data Protection Act, 2019 namely the (a) The Data Protection (General) Regulations, 2021 vide Legal Notice No. 263 of 2021; (b) The Data Protection (Complaints Handling and Enforcement Procedures) Regulations, 2021 vide Legal Notice No. 264 of 2021; and (c) The Data Protection (Registration of Data Controllers and Data Processors) Regulations, 2021 vide Legal Notice No. 265 of 2021.

The Data Protection Act, 2019 is an Act of Parliament to among other things make provision for "the regulation of the processing of personal data; to provide for the rights of data subjects and obligations of data controllers and processors." It also gives effect to and is made to fulfil the requirements of Article 31(c) and (d) of the Constitution of Kenya, 2010 which provides inter alia that "every person has the right to privacy, which includes the right not to have – (c) information relating to family and private affairs unnecessarily required or revealed; or (d) the privacy of their communications infringed.

The Data Protection Act defines a data controller as "a natural or legal person, public authority, agency or other body which, alone or jointly with others, determines the purpose and means of processing of personal data", and a data processor as "a natural or legal person, public authority, agency or other body which processes personal data on behalf of the data controller", while a data subject is defined as "an identified or identifiable natural person who is the subject of personal data". The foregoing definitions shows that Regulated SACCOs are either data controllers or data processors, while members of Regulated SACCOs are themselves data subject. Consequently, Regulated SACCOs are required to comply with the provisions of the Data Protection Act and the Regulations made thereunder with effect from July 2022 and any Regulated SACCO which does not comply may be liable to such sanctions as may be imposed by the Data Commissioner, starting with the registration as provided in the Data Protection (Registration of Data Controllers and Data Processors) Regulations, 2021. Table 47 provides a summary of the salient issues which Regulated SACCOs ought to take into account in their journey for compliance with the Data Protection Act and Regulations made thereunder.

Table 47: Selected summary of salient issues under Data Protection Act Regime

	KEY ISSUES	DESCRIPTION
1.	**Registration as Data processors and Data handlers**	Regulated SACCOs are required to register with the Office of Data Protection as guided by the Act and Regulations made thereunder. Portal https://dataportal.odpc.go.ke
2.	**Data Protection Policy**	Develop, publish and regularly update their data protection policy reflecting their personal data handling practices and data protection principles outlined in the Act. The policy should be approved and communicated to the relevant stakeholders
3.	**Data Protection Officer (DPO)**	Regulated SACCOs are required to appoint or outsource the services of an independent and qualified DPO whose primary role is to ensure that the organization complies with the Act. The contact details of the DPO will be communicated to the Data Commissioner
4.	**Data Protection Impact Assessment**	Assess the risks to the security of personal data and put in place measures to counter the identified risks. Elements of cyber security and business continuity come in place as measures related to access control, security data in rest and motion, and disaster recovery plans in place.
5.	**Breach Reporting**	Regulated SACCOs should notify the Data Commissioner of any an unauthorized access of personal data that might pose a 'real risk of harm' to the data subject within 72 hours of becoming aware or otherwise as provided in the Act. The data controller must then communicate the occurrence of such breach to the affected data subject in writing within a reasonably practicable period.

Source: Extract of the Data Protection Act and Regulations made thereunder

11.2 Licensing and supervision of Digital Credit Providers in Kenya

In 2021, Parliament enacted the Central Bank of Kenya (Amendment) Act No. 16 of 2021 which provides a comprehensive legal and regulatory framework for Digital Credit Providers in Kenya. This framework has the effect of bringing all the Digital Credit Providers under the supervisory oversight of the CBK and defines a Digital Credit Providers as "a person licensed by the CBK to carry out digital credit business", while "digital credit business" is defined to mean "the business of providing credit facilities or loan services through a digital channel". A "digital channel" on the other hand is defined to mean "the internet mobile devices, computer devices, applications and any other digital systems as may be prescribed by the CBK". To operationalise the Central Bank of Kenya (Amendment) Act No. 16 of 2021, the CBK enacted the Central Bank of Kenya (Digital Credit Providers) Regulations, 2022 which was published in the Kenya Gazette on 18th March 2022 vide the Legal Notice No. 46 of 2022, and thus any person who provides credit facilities or loan services using the internet mobile devices, computer devices, applications must be licensed by the CBK.

Regulated SACCOs have over the years been undertaking "digital credit business" and are thus exempted from the provisions of the aforesaid legislation by dint of Section 4A (da) of the Central Bank of Kenya Act as amended is instructive because it empowers CBK to license and supervise digital credit providers "not regulated under any other written law." Since Regulated SACCOs are already regulated under the provisions of the Sacco Societies Act, they are exempted from being additionally regulated by the CBK. This is reiterated in Reg. 2 of the Central Bank of Kenya (Digital Credit Providers) Regulations, 2022 which provides inter alia that the said Regulations "shall not apply to... (c) a SACCO Society licensed under the Sacco Societies Act, 2008 ... (f) an entity whose digital credit business is regulated under any other written law."

A majority of the Regulated SACCOs are already in the digital credit provision space through mobile money platforms, online and internet platforms, ATMs, and SACCO agencies as more particularly enunciated in Chapter 2 of this Report. However, the formalization of supervision and regulation of other Digital Credit Providers by the CBK presents another layer of competition for Regulated SACCOs in the already competitive digital credit provision, particularly among the tech-savvy younger generation of the population. Although previously seen as unregulated, the formalization of the supervision and regulation of digital credit providers is going to endear them more to the public as credible credit service providers than they were viewed before.

12.0. FUTURE OUTLOOK FOR THE REGULATED SACCOs

12.1. Overview

Regulated SACCOs like all other economic entities operate within the wider macro-economic environment, and thus their performance, financial soundness and sustainability are directly informed and/or are affected by prevailing macro-economic factors both at the domestic and international levels. It thus critical for Regulated SACCOs to always scan their prevailing operational environment at a macro-level so as to incorporate the inherent risks and opportunities in their business plans.

12.2. Macroeconomic factors

The year under review was characterised by high inflation driven by increased food and fuel prices, the long drought, and the impacts of 2022 general elections. This dampened the recovery from the impact of the pandemic as it affected the cost of living for households throughout the country. Most households were unable to access essential staple food items. In response to the inflationary pressures, the Central Bank of Kenya (CBK) raised the policy rate thrice since May 2022 by a cumulative 175 basis points to reach 8.75%.

Noting that Regulated SACCOs are interlinked and connected to the mainstream financial systems and support a significant number of households as evidenced by the membership of over 6.4 million, the prevailing macroeconomic challenges affected the overall performance of the industry though marginally due to the resilient nature of the industry. While the Regulated SACCOs capital adequacy and liquidity ratios largely remained stable, the ratio of non-performing loans ratio declined marginally to 8.44% in 2022 from 8.99% in 2021. The sector registered a positive growth rate albeit marginally on the key parameters of Total assets, total deposits and gross loans with a growth rate of 10.31%,9.84%,11.76% respectively.

On the other hand, there was a notable decline in the proportion of saved disposable income which is commonly referred as withdrawable savings (FOSA savings) indicating that SACCO members were withdrawing their savings. This can be attributed to the high costs of living which resulted to members withdrawing the savings for consumption purposes. Agriculture and community based SACCOs continued to report highest levels of non-performing loans compared to the other sectors indicating the impacts of the prolonged drought and the slow resumption of business activities as they do not rely on check offs due to suppressed disposable income levels.

12.3. Sustainable finance

In the realization that climate change has affected the economy in the last few years, specifically the erratic weather patterns and prolonged drought, the industry has a significant role to play in ensuring appropriate mitigation measures in line with the government priorities on climate change and sustainable development goals. Subsequently, the industry is expected to direct financial flows towards economic activities that contribute to a low-carbon, resilient, and socially responsible economy. The SACCOs need to take into consideration the impact of their financial products and services to the environment and society in which they operate. The Authority is now challenged to guide the industry by developing frameworks, standards, and metrics for measuring and reporting on the sustainability performance of financial investments and institutions.

12.4. Digitization of SACCO's Financial services

Kenya has always been referred as Silicon Savannah in African continent. Adoption and extensive use of fintech for financial transactions in the economy is robust fuelled by the among other players successes of the mobile money. It has been observed in the period that 209 Regulated SACCOs adopted the use of the USSD code while 109 Regulated SACCOs have adopted internet based financial services as alternative delivery channels. Further some SACCOs leveraging on technology are revaluating their expansion strategies through agents. During the period under review 36 SACCOs adopted this strategy transacting over Kshs. 26 Billion through the agencies. It's expected that this trend is likely to accelerate in the near future driven by the incentive for ease of access, efficiency and cost reduction.

APPENDIX I: THE SUPERVISORY OPERATING CIRCULARS, GUIDELINES AND GUIDANCE NOTES

SUPERVISORY OPERATING CIRCULARS AND GUIDELINES			
	NAME OF CIRCULAR/ GUIDELINE	**REFERENCE AND ISSUE DATE**	**PURPOSE AND OBJECTIVES**
1	Guidelines on Management Information Systems (MIS) for Deposit-Taking Sacco Societies	SASRA/GG/2/2013 July, 2013	Guide DT-SACCOs on implementation of MIS
2	General Procedures for opening and closing of Branches and other places of business	SASRA/GG/1/2013 May, 2013	Provide a procedure for compliance with Section 32 of the SSA with concerning the opening, closure and relocations of DT-SACCOs branches and other places of business.
3	Circular on submission and approval of audited financial statements	SASRA/GG/1/2015 January, 2015	Provide the procedure and timelines for submission and approval of DT-SACCOs' audited financial statements.
4	Circular on Approval of Agency Banking by DT-SACCOs	SASRA/Circular No. 14/2011 May, 2011	Provide the procedure for application and approval of agency banking by DT-SACCOs under Reg. 17 of the Regulations 2010
5	Circular of Application of Cooperative Societies Act to DT-SACCOs.	SASRA/Circular No. 16/2011 June, 2011	Expound on the application of the Co-operative Societies Act to DT-SACCOs pursuant to Section 67 of the SSA
6	Directives on the raising of capital through offers of sale of shares through media and other public advertisement	SASRA/5/V.1 (83) September 2012	Ensure that DT-SACCOs complies with the regulatory frameworks on raising capital from the public
7	Circular on the role of Directors of DT-SACCOs	MCDM/2/32/VOL.1/157 April 2011	Expound on the oversight role and responsibility of Directors of DT-SACCOs to limit conflict of responsibility with management.
8	Circular on procurement of goods and services by DT-SACCOs	SASRA/Circular No. 11/2011 April, 2011	Reinforces the duty of DT-SACCOs to comply with Public Procurement and Disposals Act, 2005 and Regulations made thereunder while undertaking all procurements.
9	Guidelines on Good Governance Practices for Deposit-Taking Sacco Societies	SASRA/RG/01 June 2015	Aimed at ensuring that the members of Sacco Societies, the Board of Directors, individual directors, management and other stakeholders clearly understand their various roles, duties and obligations within the confines of the law and good practices.
10	Guideline on Risk Management Practices for Deposit-Taking Sacco Societies	SASRA/RG/03 June 2015	Provides the Board of Directors and Senior Management Staff of the Sacco societies with minimum standards in terms of policies, procedures and structures for effective risk management practices in the Sacco societies.
11	Circular on imposition of levies and financial penalties prescribed in the law	SASRA/GG/2/2015 July, 2015	Provides details of the circumstances under which the Authority may impose a levy or financial penalty for any violations or breaches in accordance with Section 51(p) of the Sacco Societies Act.

SUPERVISORY OPERATING CIRCULARS AND GUIDELINES

	NAME OF CIRCULAR/ GUIDELINE	REFERENCE AND ISSUE DATE	PURPOSE AND OBJECTIVES
12	Circular authorizing the limited use by DT-SACCOs of the Authority's name and acronyms	SASRA/GG/1/2016 January, 2016	To differentiate DT-SACCOs from other Sacco Societies, the Authority allowed DT-SACCOs to use the words "Regulated and/or Licensed by SASRA" in their advertisements, correspondences, brochures, and other marketing materials.
13	Circular on the application of ISA No. 701 (Communicating Key Audit Matters in the Auditor's Report) to DT-SACCOs.	SASRA/700/721/ VOL. 1 (1310 21st November 2016	The circular extends the application of ISA No. 701 to DT-SACCOs. Henceforth, external Auditors of DT-SACCOs must communicate all Key Audit Matters (KAM) in their opinions on Financial Statements.
14	Circular and Guidance Note on the Application of the International Financial Reporting Standard (IFRS) 9 to Outstanding Loans and Credit Advances Issued by Deposit-Taking Sacco Societies in Kenya	SASRA/700/721/VOL. I (134) 2nd October 2018	General guidance to DT-SACCOs on the application of IFRS - 9 to outstanding loan portfolios with effect from Financial Statements for the period commencing in January, 2018
15	Circular and Guidance Note on the Withdrawal of the Old Generation Kshs 1000 currency note and introduction of new currency notes	SASRA/800/ GG/1/2019 7th June 2019	Advisory and sensitization note to SACCOs to comply with the CBK's directive on withdrawal of the old generation Kshs 1,000 note by 1st October 2019; the introduction of new generation currency notes as per the Kenya Gazette Notice No. 4849 dated 31st May 2019; and the need to fully comply with the AML/CTF requirements during the exercise.
16	General Advisory Note on Non-Remitted deduction due to SACCOs from various employer-institutions	SASRA/800/2/2019 11th June 2019	An advisory to SACCOs on measures to take and/or put in place to reduce and/or mitigate against the perennial risks of default by various employer-institutions to promptly remit deductions due to SACCOs.
17	Circular on the Sectoral Lending Reporting Framework for SACCO Societies in Kenya	SASRA/GG/2/2019 10th December 2019	Guidance to SACCOs on the quarterly reporting of the economic sectors in respect of which the loans and credit facilities issued by the SACCOs are aimed at financing. The Circular lists the sectoral areas in respect of which the loans and credit advances by SACCOs shall be reported, including the respective codes and sub-codes for each sector and subsector.
18	Guidance Note on the Revised Procedures for Application for renewal of deposit taking licenses for DT-SACCOs and Data Collection Template	SASRA/GG/1/2022 31st August 2022	Provides guidance to DT-SACCOs on the manner of application for renewal of their respective deposit taking licenses, as well as the minimum data and data sets required for consideration of application for renewal of deposit taking licenses.
19	Guidance Note on Registration & Approval of External Auditors for Regulated SACCOs; and Procedures for Appointment of External Auditors	SASRA/GG/2/2022 23rd September 2022	Guidance to SACCOs and their external auditors on a uniform and standard framework and criteria for the approval and registration of external auditors for Regulated SACCOs, as well as preparation and publication of the list of approved and registered auditors.
20	Guidance Note on the Revised Procedures for Application for renewal of authorization for NWDT-SACCOs and Data Collection Template	SASRA/GG/3/2022 12th October 2022	Provides guidance to NWDT-SACCOs on the manner of application for renewal of their respective authorization certificates, as well as the minimum data and data sets required for consideration of application for renewal of authorization certificates.

APPENDIX II: SUMMARY OF THE PERFORMANCE OF DT-SACCOs
