The SACCO Supervision Annual Report is a statutory publication of the Sacco Societies Regulatory Authority (SASRA). It documents the performance, activities, and operations of SACCO Societies in Kenya in compliance with the requirements of Section 22 of the Sacco Societies Act (Cap 490B) as read together with Regulation 92 of the Sacco Societies (Non-Deposit Taking Business) Regulations 2020.

All Rights Reserved

Disclaimer

This Report, is however, not an investment prospectus or legal opinion or advisory. Members of the public are advised to always undertake utmost due diligence and care before undertaking any financial transactions with any individual SACCO Society and/or other entity in respect of which this Report relates.

OUR VISION

A Financially Inclusive, Member Centric and Stable SACCO Industry

OUR LEGAL MANDATE			OUR LEGAL MANDATE
	License SACCO Societies to carry out Deposit-Taking Business in Kenya	The Authority licenses qualifying SACCOs to undertake deposit-taking business pursuant to Section 23 of the SACCO Societies Act, as read with the SACCO Societies (Deposit Taking Business) Regulations, 2010 made thereunder.	
	Regulate and Supervise SACCO Societies in Kenya	The Authority regulates and supervises the activities of qualifying SACCOs in accordance with Section 5 of the SACCO Societies Act and the Regulations made thereunder, including the Specified Non-Deposit taking SACCO business as prescribed under Section 3 of the SACCO Societies Act and read with the SACCO Societies (Non-Deposit Taking Business) Regulations, 2020.	
	Hold, manage and apply the General Fund of the Authority in accordance with the Act	The General Fund is the statutory fund created under Section 16 of the SACCO Societies Act and is managed by the Authority in accordance with Section 5(c) of the SACCO Societies Act	
	Do all such other things as may be lawfully directed by the Cabinet Secretary	The Cabinet Secretary has powers under Section 5(e) of the SACCO Societies Act and other written legislation to issue directions to the Authority to do any lawful thing with respect to supervision and regulation of SACCOs in Kenya	
	Perform such other functions as are conferred on it by the Act or by any other written law	The Authority performs any other functions that have been assigned to it under the Act or any other written law as provided in Section 5(f) of the SACCO Societies Act.	

OUR MISSION	To regulate, supervise and develop the SACCO industry through promotion of prudent practices to protect member's interests, enhance access to financial services and foster financial stability	OUR MISSION

OUR CORE VALUES				OUR CORE VALUES
	I	Integrity	We act with honesty and promote a culture of trust in the conduct of our business	
	I	Innovation	We foster learning and creatively adapt to the operating environment	
	M	Mutual Respect	We value and respect the diversity of our Board, employees, customers, and partners, and strive to create an inclusive environment	
	P	Professionalism	We strive to abide by the professional codes of ethics in our business including but not limited to those applicable to public service officers and respective professional bodies.	
	A	Accountability	We render a prompt account of our decisions, actions, and results to our stakeholders	
	C	Collaboration	We establish and nurture mutually beneficial partnerships with all our stakeholders	
	T	Transparency	We endeavour to be open and transparent in the conduct of our business and execution of our mandate

MESSAGE FROM THE BOARD

CPA (Hon.) Jack Ranguma

Chairman,
Board of Directors

The critical role of cooperatives in spurring development in the domestic economies can no longer be overemphasized. The resolution by the United Nations General Assembly during its 47th session held in November 2023 declaring the year 2025 as the second *International Year of Cooperatives* is indeed a clear testament of the recognition of cooperative enterprises as viable and sustainable vehicles for poverty eradication and wealth creation. Domestically, the SACCO industry forms the substratum of the cooperative sector, harbouring the largest proportion of the sector's assets which amounted to Kshs 971.96 billion representing 6.43% of the national nominal GDP. Consequently, the SACCO industry's growth, performance, stability, and sustainability will always remain at the core of the government's agenda as evidenced in the *Bottom-Up Economic Transformation Agenda (BeTA)* which recognises cooperatives as key enablers in the realization of its core pillars.

UN recognises the role of Cooperatives in attaining SDGs and declares the Year 2025 to be the second International Year of Cooperatives

Total assets grew by 9.17% to Kshs 971.96 billion in 2023 from Kshs 8930.30 billion in 2022.

Regulated SACCOs' total assets to national GDP is at 6.43%
.

To this extent the Authority is pleased to report that the Regulated SACCO industry continues to play an active role in the realization of the *BeTA* economic blueprint, the Kenya Vision 2023 Fourth Medium Term (2023-2027) Plan, as well as the UN Sustainable Development Goals, 2030 through the provision of affordable credit to household economies; mobilization of saving deposits for national development; financial inclusion to a majority of the domestic populations; sustainable employment opportunities to Kenyans among others. During the year 2023, Regulated SACCOs gross loans grew by 11.50% to reach Kshs 758.57 billion from Kshs 680.35 billion in 2022, depicting increased demand for their credit services. These loans were mainly funded by savings and deposits mobilised from the membership which increased by 9.95% to reach Kshs 682.19 billion in 2023, thereby cementing the place of Regulated SACCOs as critical mobilizers of domestic savings.

Total deposits grew by 9.95% to Kshs 682.19 billion

Gross loans grew by 11.50% to Kshs 758.57 billion

Despite the reduction of the number of Regulated SACCOs to 357-Regulated SACCOs in 2023 compared to 359-Regulated SACCOs in 2022, the total membership of Regulated SACCOs increased by 6.57% to reach 6.84 million members in 2023 from a membership base of 6.42 million in 2022. This shows an ever-increasing patronage of the financial services and products of Regulated SACCOs driven by increased confidence and trust by members of the public, and which is an important measure of deepening of the financial inclusion agenda. Additionally, the Regulated SACCOs employed a total of 11,883 persons in 2023, the bulk of whom are on permanent and pensionable or long contractual terms and thus their contribution towards sustainable employment opportunities in Kenya. It is however projected that in the long term, the number of employees within the Regulated SACCO system are likely to remain static or increase at a decreasing rate, as a consequence of the increased usage of electronically and digitally enabled channels of financial services delivery to cut down operational expenses.

Total Membership grew by 6.57% to 6.84 million members in 2022 from 6.42 million members in 2022.

Total Employees increased to 11,883 employees in 2023 from 11,188 employees in 2022.

Despite recording respectable growth rates over the reporting period, the Authority continues to be concerned and consciously aware of the increased concentration of the SACCO industry's assets and deposits among just a few of the Regulated SACCOs. This is evidenced by the fact that 73.34% of the total assets of the SACCO industry is controlled by 53-Regulated SACCOs, with the remaining 304-Regulated SACCOs sharing the balance of just 26.66% of the total assets. On the deposits side, 65.27% of the total deposits is controlled by just 39-Regulated SACCOs leaving the balance of 34.73% of the total deposits to be shared by the remaining 318-Regulated SACCOs. In this regard, the Authority has deployed and will continue to deploy appropriate supervisory tools to deal with the concentration risks presented by the foregoing scenario.

There is high concentration of assets and deposits among very few Regulated SACCOs.

53-Regulated SACCOs controls 73.34% of the total assets while 39-Regulated SACCOs controls 65.27% of the total deposits in the SACCO industry.

On the other hand, however, the high concentration of assets and deposit liabilities in just of the Regulated SACCOs implies that the remaining Regulated SACCOs, the majority of which have assets below Kshs 1 billion may be too small to compete in the highly competitive domestic deposit taking and credit business space. It therefore goes without saying that their individual viability and sustainability, including ability to meet the regulatory compliance and members' financial needs will continue to be challenged. It is for this reason that the Authority is calling upon individual SACCOs to start exploring amalgamation and mergers as strategic business decisions, in order to reap the benefits associated with economies of scale and improve their competitiveness in the marketplace. The establishment and operationalization of shared services platforms under the cooperation among cooperatives principle is also a business and policy panacea which the very many small-sized SACCOs must start considering or deploying if they are to remain competitive in the long term.

Regulated SACCOs especially the small-sized SACCOs should consider amalgamations and mergers as a strategic business solution in order to remain competitive.

Shared services initiatives and platform is also a policy solution which small-sized SACCOs ought to explore.

With the financial stability and soundness of the Regulated SACCO industry largely on course under the existing prudential standards, the Authority's regulatory and supervisory strategies is now being extended towards the roll out and implementation of appropriate tools to monitor, respond to and report on the ever-emerging risks associated with financial services provision. In this league of emergent risks are threats associated with cyber-attacks and breaches arising from increased adoption and usage of ICT and MIS by Regulated SACCOs to deliver financial services and products. Noting that 99% of the cyber-attacks and breaches on Regulated SACCOs' systems have been occasioned through third-party systems vendors and integrators, the Authority developed and issued a *Circular on the Minimum Requirements for Engagement with Third-Party System Integrators and Vendors (Ref. SASRA/GG/1/2023 dated 6th June 2023)*. The circular prescribes the minimum considerations which Regulated SACCOs must take into account when engaging the services of third-party system integrators and vendors for purposes of their mobile money services. The object of the circular is to reduce incidences of third-party related cyber violation and threats on the financial services offered by Regulated SACCOs, especially the DT-SACCOs.

Authority issued a Circular on the Minimum Requirements for Engagement with Third-Party System Integrators and Vendors to mitigate against third-party integrators and vendor cyber risks.

In order strengthen the governance frameworks of Regulated SACCOs and deepen public confidence and trust in them, the Authority developed and issued the *Guidance Note on Corporate Governance for Regulated SACCO Societies in Kenya (Ref. No. SASRA/GG/2/2023 dated June 2023).* The Guidance Note documents and prescribes the international best practices in corporate governance of Regulated SACCOs, taking into account their unique cooperative business model and structure. Additionally, the Authority issued the *Guidelines on Complaints' Management by SACCO Societies (Ref. SASRA/MC/1/2023 dated 15th June 2023)* whose objective is to set out a succinct framework for receipt, processing, resolution and reporting of members' complaints arising from business transactions with respective SACCOs. Members of Regulated SACCOs are thus encouraged to take advantage of these regulatory instruments (available for download from the Authority's website at www.sasra.go.ke) to hold the appointed and elected leaders accountable in the management of the affairs of their respective Regulated SACCOs.

The Authority issued the Guidance Note on Corporate Governance for Regulated SACCO Societies in Kenya

The Authority issued Guidelines on Complaints' Management by SACCO Societies

The Authority is also cognizant of the emergent legal and regulatory frameworks with direct impact on the compliance, performance, and growth of Regulated SACCOs, with cyber security supervision; anti-money laundering as well as data protection and privacy initiatives taking centre stage. In this regard and to empower Regulated SACCOs to comply with such emergent legal and regulatory frameworks, the Authority shall continue to undertake targeted capacity building and sensitization of key officers of Regulated SACCOs. During the year 2023, the Authority partnered with other relevant government agencies such as the Financial Reporting Centre (FRC), the Office of Data Protection Commissioner (ODPC), the Ethics & Anti-Corruption Commission (EACC), the Communications Authority of Kenya (CA) among others to deliver tailor made capacity building and sensitization programmes on such emergent legal and regulatory frameworks including anti-money laundering, cyber-security, anti-corruption and anti-bribery measures, data protection among others.

The Authority to continue collaborating with other government agencies to deliver tailor-made capacity building and sensitization programmes on emergent issues.

There is however no doubt that the ongoing domestic anti-money laundering initiatives has introduced Regulated SACCOs into unchartered waters of compulsory compliance which were hitherto unknown. Probably previously considered as not posing anti-money laundering risks, the findings of domestic national risk assessment (NRA) on Anti-Money Laundering Risks in the country, together with the recently concluded Mutual Evaluation Report (MER) has put on new pressures on Regulated SACCOs to fully comply with the anti-money legislations in accordance with POCAMLA as reporting institutions. It is thus encouraging that a majority of the Regulated SACCOs are already registered with the FRC as reporting institutions, while the remaining ones are at different stages of registration with the expectation that the process will be finalised in 2024. There is however no doubt that compliance with Anti-Money Laundering legislations will increase the regulatory burden associated with the requirements, and in this respect the Authority will continue to partner with the FRC in deploying a risk-based approach to assist Regulated SACCOs comply with these emergent legislative frameworks.

Regulated SACCOs as reporting institutions are complying with the Anti-Money Laundering legislations.

The Authority also forecasts that the Regulated SACCO industry will in the short to medium term continue to be negatively affected by other prevailing micro- and macro-economic factors both at the institutional, industry and national levels. At the national macro-economic levels, the effects of the upward changes in the interest rates during the first half of 2023 as well as the depreciation of the domestic currency over the same period will be felt by Regulated SACCOs in 2024. In particular, Regulated SACCOs with external borrowing will see higher expenses associated with such borrowings and which by design of the cooperative business model, they may not pass over to their members. Regulated SACCOs with foreign currency denominated debts will also be affected by any fluctuations of the local currency, as they will have to little room to pass the effects of such fluctuations to their membership who will have borrowed in local currency. In this regard, Regulated SACCOs are entreated to avoid externally borrowed funds as a means of funding their loans and credit advances, unless the risks associated foreign-currency denominated borrowing are fully addressed, but instead put more emphasis on internally mobilised funds in the form of members' savings and deposits.

Regulated SACCOs should refrain from external borrowing to fund their loans to reduce the vagaries associated with interest and foreign exchange fluctuations.

The non-remitted funds menace will also continue to negatively impact the section of Regulated SACCOs which rely on various employer institutions to deduct and remit members deposits and loan repayments. Despite concerted efforts by the Authority and the Commissioner for Cooperative Development to address the menace using the existing legal and administrative instruments, the total amount of non-remitted funds owed to Regulated SACCOs in 2023 remained at a high of Kshs 2.59 billion compared to Kshs 2.67 billion in 2022; with a total of 82-Regulated SACCOs and 57,721 members affected. This situation is exacerbated by the fact that the largest proportion of the non-remitted funds amounting to Kshs 1.68 billion (83% of the total non-remitted funds) was in respect of loan repayment deductions, with the implication that the loans issued to the members in that regard stood defaulted.

82-Regulated SACCOs owed Kshs 2.59 billion as non-remitted funds affecting 57,721 members in 2023.

Largest proportion of the non-remitted funds amounting to Kshs 1.68 billion was in respect of loan repayment deductions.

It is observable from the market analysis that government and government related agencies continue to be the greatest defaulters in remitting funds owed to Regulated SACCOs on the pretext of inadequate fundings or budgetary allocations. For example, the public universities and tertiary colleges owed a total of Kshs 958.07 million (37% of the total non-remitted funds); the County Governments (and Assemblies) owed a total sum of Kshs 865.12 million (33.41% of the total non-remitted funds); while the state corporations owed a total of Kshs 162.89 million (3.08% of the total non-remitted funds). This has made the recovery of these non-remitted funds quite difficult based on the prevailing legal and regulatory instruments and consequently the Authority calls for a policy shift so that these funds may be deducted at source by the National Treasury from the exchequer grants appropriated by Parliament in favour of the defaulting government institutions, and directly remitted to the affected Regulated SACCOs. This remains the most viable policy solution to this menace, given that employer institutions from the private sector had a relatively low proportion of non-remitted funds.

Government and government agencies owed the largest proportion of non-remitted funds.

Public Universities owed Kshs 958.07 million (37%); County Governments owed Kshs 865.12 million (33.41%; and State Corporations owed Kshs 162.89 million (3.04%)

The Authority forecasts a continued growth in the key parameters of performance of Regulated SACCOs in 2024, which will largely be driven by a strong prudential regulatory foundation, continued demand for SACCOs' credit financial services, and increased member patronage. Stiff competition from other financial service providers as well as other economic shocks may however slow down the rate of deposit mobilizations, which may drive them to resort to external debts in the medium to short term to fund their assets, thus undermining their performance.

Regulated SACCO industry projected to continue growing due to strong prudential foundation, increased member patronage as well as continued demand of SACCOs' financial services and products

In conclusion and in accordance with its Strategic Plan 2023-2027 aligned to the Kenya Vision 2030, MTP IV (2023-2027), the Authority commits to further entrench financial stability of the Regulated SACCO industry and financial soundness of individual Regulated SACCOs in order to ensure that they continue to meet their obligations and effectively contribute towards the attainment of the *Bottom-up Economic Transformation Agenda (BETA)* ideals of the wealth creation and retention especially for the population at the bottom of the economic pyramid.

CPA (Hon.) Jack Ranguma
Chairman, Board of Directors

FOREWORD NOTE BY CHIEF EXECUTIVE OFFICER

CPA (Mr.) Peter Njuguna, EBS

Chief Executive Officer

Legal Basis

The ***SACCO Supervision Annual Report*** is a statutory publication of the Authority prepared and published on an annual basis in fulfilment and compliance with the requirements of *Section 22(2) of the Sacco Societies Act cap 490B* which provides inter alia that "*the Authority shall prepare and submit to the Cabinet Secretary, a report on the operations and performance of SACCO Societies to which the Act applies within four (4) months after the close of the government's financial year*". On the other hand, Reg. 92 of the Regulations 2020 provides inter alia that "*the Authority shall pursuant to section 22 of the Act prepare and submit to the Cabinet Secretary a report on the operations and performance of the specified non-deposit taking Sacco businesses during that year.*" Consequently, ***the SACCO Supervision Annual Report, 2023*** documents the licensing and Authorization status, operations, activities and performance of the Regulated SACCOs (DT-SACCOs and NWDT-SACCOs) in Kenya, in respect of which the Act applied for during the financial year ending 31st December 2023.

Section 22(2) of the Sacco Societies Act and Reg. 92 of the Regulations 2020 requires the Authority to prepare and submit to the Cabinet Secretary a report on the performance and operations of Regulated SACCOs in Kenya

At the beginning of the year, there were 176-DT-SACCOs licensed by the Authority to undertake deposit-taking SACCO business. However, in the course of the year, two (2) DT-SACCOs namely *M/S Jacaranda SACCO Society Ltd* and *M/S Kenya Midlands SACCO Society Ltd* failed to maintain the minimum requirements for licensing, resulting into revocation of their deposit-taking licenses, leaving 174 DT- SACCOs with valid licenses as at 31st December, 2023. Members of the public are therefore warned against undertaking any deposit-taking business with these institutions to avoid losing their investments.

174-DT-SACCOs operational as at December 2023. 2-SACCOs had their deposit-taking Licenses revoked.

The Authority has also noted a trend in which authorized NWDT-SACCOs are progressively seeking to expand their business lines to include Deposit-taking business (FOSA) by applying for deposit taking licenses, with a total of six (6) NWDT-SACCOs having already submitted such applications. Among the six applicants, two (2) of them namely *M/S Njiwa SACCO Society Ltd* and *M/S Jogoo SACCO Society Ltd* were successful and have already been issued with deposit licenses to commence operations effective 1st January 2024, while the remaining four (4) are at different stages

Many NWDT-SACCOs with large balance sheet are expanding to FOSA businesses by applying for Deposit-Taking Licenses.

of processing. The Authority therefore envisages that a majority of the NWDT-SACCOs with large balance sheets shall in the short to medium-term seek expansion of their businesses to include FOSA thereby diminishing the number of NWDT-SACCOs in the industry, unless new ones are authorized.

With regard to authorization of SACCOs to undertake specified non-deposit taking business, there were a total of 183-NWDT-SACCOs as at 31st December 2023, which is the same as the number of NWDT-SACCOs in operation during a similar period in 2022. Out of the 183-NWDT-SACCOs, one (1) NWDT-SACCO is authorized as a digital based Regulated SACCO; three (3) other NWDT-SACCOs are authorized as diaspora based Regulated SACCOs in accordance with *Regulations 2020*; while two (2) NWDT-SACCOs have converted their business model to deposit -taking (FOSA) business as indicated herein above. In this regard, the Authority continues to warn the members of the public against undertaking SACCO business with entities purporting to be digital or diaspora SACCOs unless they are authorized by the Authority. On the same breadth, members of the public should note that any SACCO undertaking BOSA business and whose BOSA deposits amounts to Kshs.100 million and above, equally ought to be authorized and regulated by the Authority and must therefore desist from transacting SACCO business with any such SACCO unless it is authorized and regulated.

183-NWDT-SACCOs operational as at December 2023.

Members of the public should cease and desist from undertaking SACCO business with unregulated SACCOs, especially those purporting to be digital, or diaspora based.

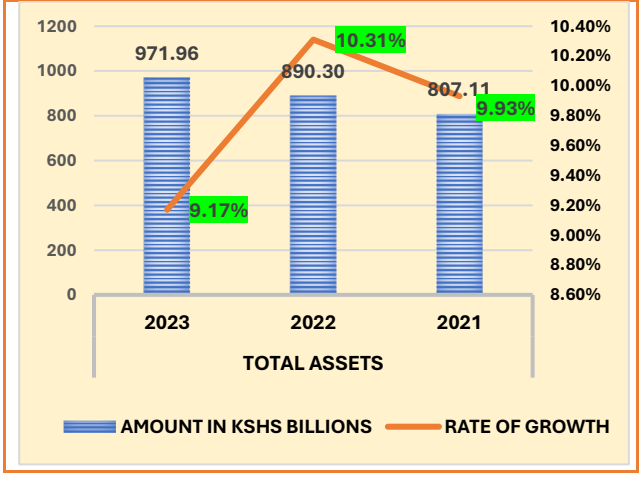

Financial performance and growth

Regulated SACCOs continued to show growth in key performance indicators of total assets, total deposits, membership, and gross loans, with the statistics showing that the total assets for Regulated SACCOs grew by 9.17%, a slight drop from the growth rate of 10.31% recorded in 2022, with the cumulative total assets increasing from Kshs 890.30 billion in 2022 to Kshs 971.96 billion in 2023. On the other hand, the cumulative total deposits for Regulated SACCOs grew by 9.95%, which is a slight increase from a growth rate of 9.84% reported in 2022, whereas the cumulative total deposits increased in absolute amounts from Kshs 620.45 billion in 2022 to Kshs 682.19 billion in 2023. It is therefore observable that Regulated SACCOs grew their deposits at a faster rate than the rate at which they grew their assets, which is a sign of elevated and continued member confidence and trust in the SACCO industry.

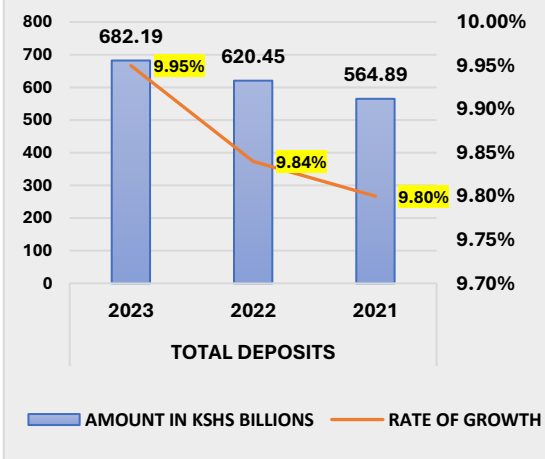

Total Assets grew by 9.17% to reach Kshs 971.96 billion in 2023 from Kshs 890.30 billion in 2022.

Total deposits grew by 9.95% to reach Kshs 682.19 billion in 2023 from Kshs 620.45 billion in 2022.

Rate of Growth of Regulated SACCOs Total Assets (2021 – 2023)

Rate of Growth of Regulated SACCOs Total deposits (2021 – 2023)

The gross loans for Regulated SACCOs grew by a rate of 11.50% in 2023 a marginal decline from 11.76% recorded in 2022, with the cumulative total gross loans increasing in absolute amounts to Kshs.758.57 billion in 2023 from Kshs.680.35 billion recorded in 2022. Despite the overall marginal decline in the growth rate for Regulated SACCOs, its notable that the NWDT-SACCO segment registered an increase in growth rate for gross loans at 12.85% in 2023 compared to 8.90% recorded in 2022, while the DT-SACCO segment recorded a decline in growth rate for gross loans from 12.24% in 2022 to 11.28% in 2023, indicating that there was an increased demand for loans in the NWDT-SACCOs segment compared to the DT-SACCOs segment.

Gross loans grew by 11.50% to reach Kshs 758.57 billion in 2023

On the membership front, the membership of Regulated SACCOs increased from 6.42 million members in 2022 to 6.84 million members in 2023, representing a growth rate of 6.57%. It is noteworthy that during the period, the number of Regulated SACCOs dropped from 359-Regulated SACCOs in 2022 to 357-Regulated SACCOs in 2023, implying that the total membership grew despite the reduction in the number of Regulated SACCOs, thus fortifying the hypothesis that membership of troubled SACCOs whose licenses often end up being revoked, are usually taken over by other Regulated SACCOs with stronger balance sheets.

Total membership grew by 6.57% to reach 6.84 million members in 2023.

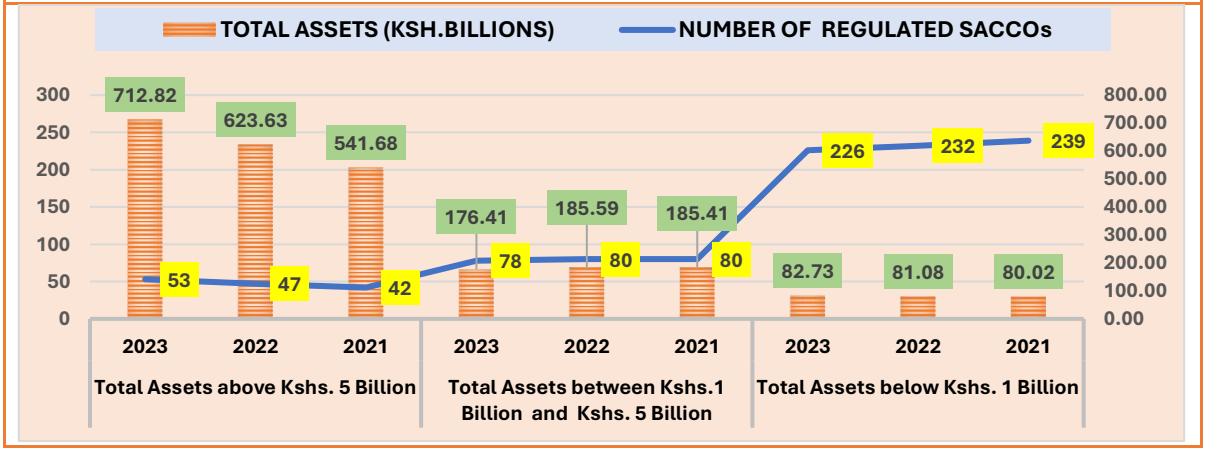

Regulated SACCOs by Asset and Deposits Size

The market share analysis of Regulated SACCOs total assets shows continued concentration of total assets and total deposits of Regulated SACCOs in just but a few of them. The large-tiered Regulated SACCOs with assets above Kshs 5 billion increased from 47-Regulated SACCOs in 2022 to 53-Regulated SACCOs in 2023, while their proportionate total assets market share increased from 70.05% in 2022 to 73.34% in 2023. This means that the remaining 304-Regulated SACCOs with assets of below Kshs 5 billion had only 26.66% of the total assets' market share, implying that on average, these SACCOs have a small asset portfolio thereby bringing into question their sustainability. Similar scenario obtains in regard to the concentration of deposit liabilities within the Regulated SACCO system, with 39-Regulated SACCOs with deposit liabilities above Kshs 5 billion controlling a market share of 65.27% of the total deposit liabilities. This leaves 318-Regulated SACCOs sharing the remaining market share proportion of just 34.73% of the industry's deposit liabilities, which is a further confirmation of the existence of very many small SACCOs.

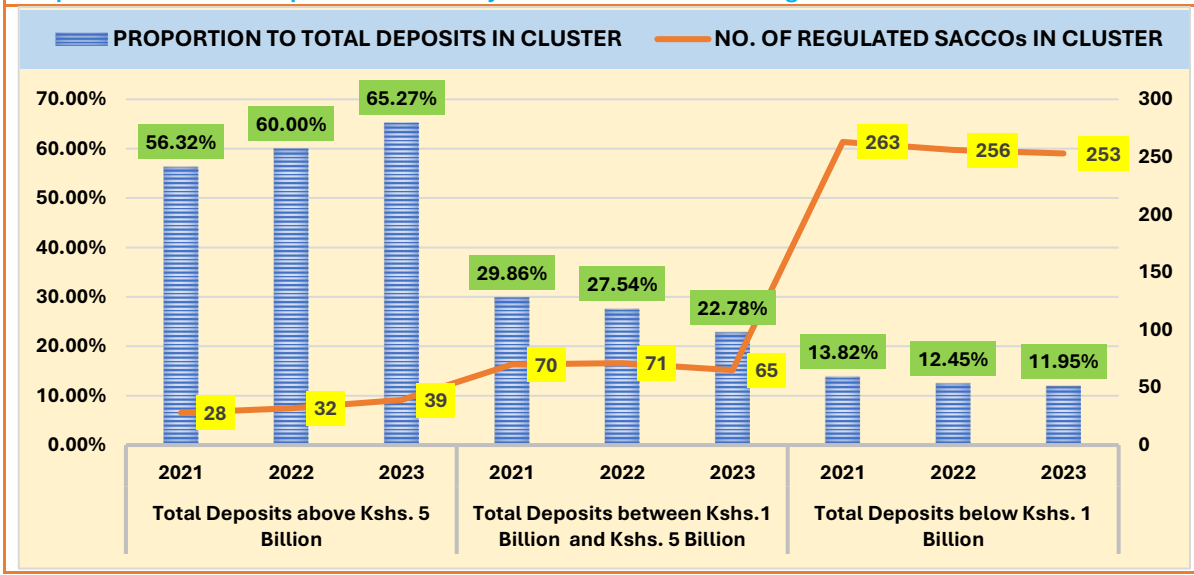

53-Regulated SACCOs with Assets above Kshs 5 billion controlled 73.34% of total assets.

39-Regulated SACCOs with deposits above Kshs 5 billion controlled 65.27% of total deposit liabilities.

Market share of Regulated SACCOs segmented by total assets clusters (2021 to 2023)

Proportion of the total deposits' liabilities by size and the number of Regulated SACCOs

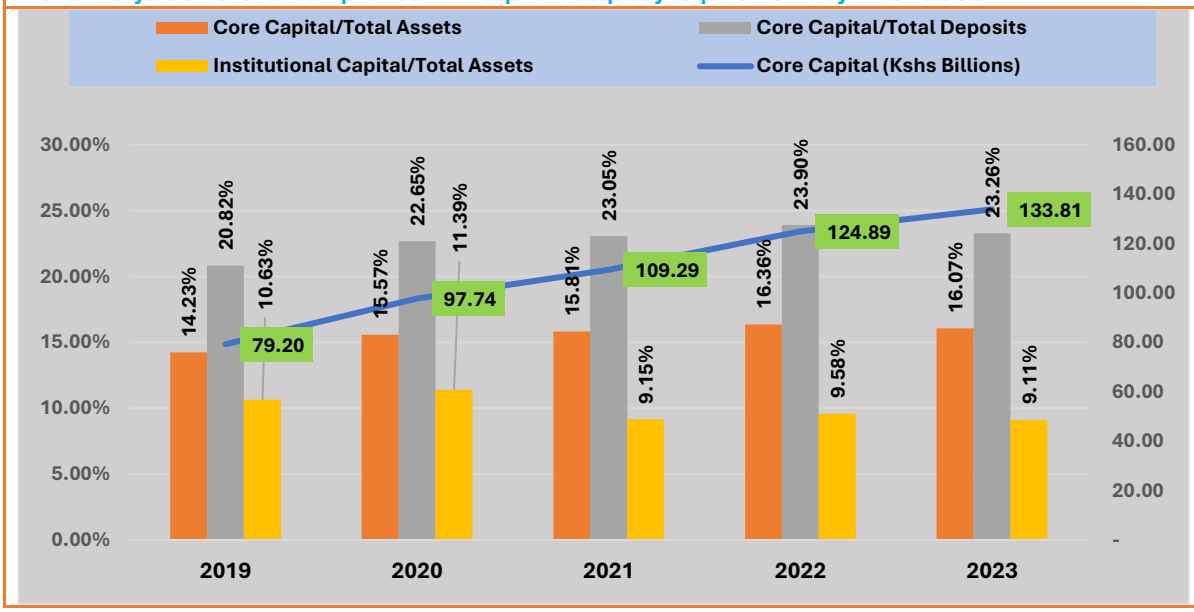

Financial Stability

The DT-SACCOs segment had their aggregate core capital increase by 7.14% to reach Kshs 133.81 billion in 2023 from Kshs 124.89 billion recorded in 2022. The NWDT-SACCOs segment on the other hand had their aggregate core capital increase by 35.77% to reach Kshs 14.46 billion in 2023 from Kshs 10.65 billion recorded in 2022. The key capital adequacy ratios for DT-SACCOs of core capital to total assets (CCA) and institutional capital to total assets (ICA) on the other hand were maintained at 16.07% and 9.11% respectively in 2023 which were equally above the regulatory minimum of 10% and 8% respectively.

Key capital adequacy indicators maintained above prescribed regulatory minimum with CCA at 16.07% and ICA at 9.11 for DT-SACCOs.

Trend Analysis of level of compliance with capital adequacy requirements by DT-SACCOs

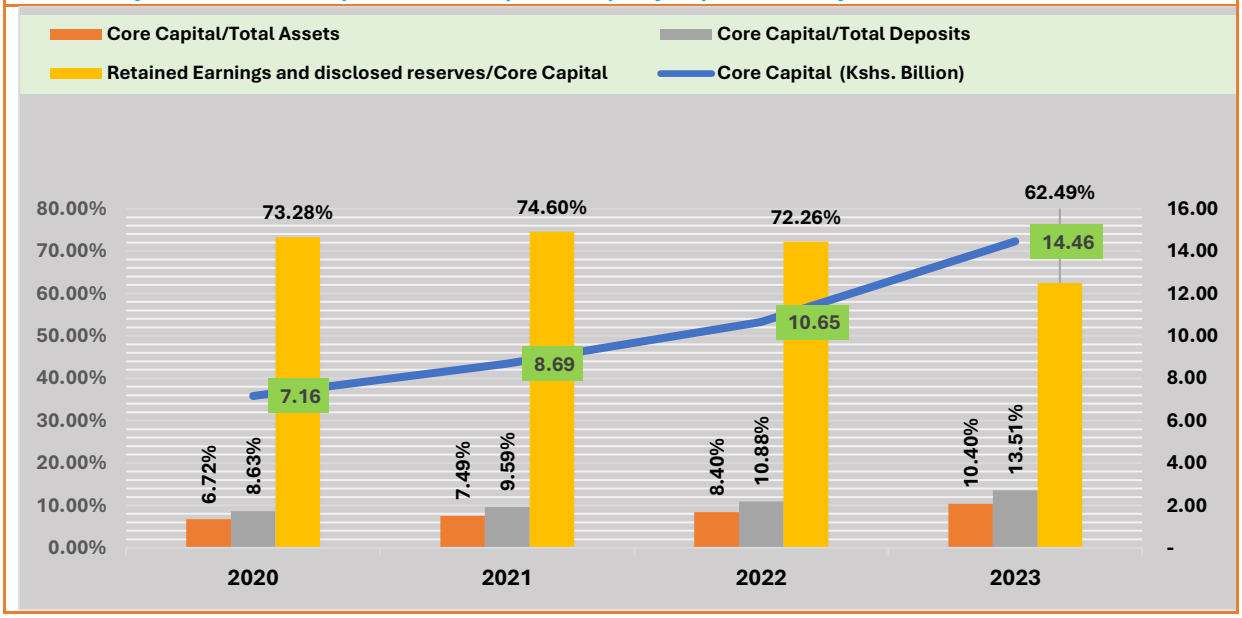

The NWDT-SACCO segment equally maintained its key capital adequacy ratios of core capital to total assets (CCA) and retained earnings to core capital (RCC) above the prescribed minimum thresholds of 8% and 50% respectively at 10.40% and 62.49% respectively. The foregoing growths in the key financial stability indices of capital and

The core capital to total assets ratio for NWDT-SACCOs maintained at 10.40% and RCC maintained at 62.49%.

capital adequacy ratios shows continued overall stability of each segment of the Regulated SACCO industry.

Trend Analysis of level of compliance with capital adequacy requirements by NWDT-SACCOs

Quality of Loan book

Loans and credit advances form the largest proportion of Regulated SACCOs assets and amounted to Kshs 758.57 billion accounting for 78.05% of the total assets in 2023. As the largest component of the asset, the quality and performance of the loan book is of paramount importance to the Authority from a supervisory point of view but also to individual SACCOs as it informs their financial sustainability. In aggregate 86.33% of the total loan portfolio of the Regulated SACCOs were performing in accordance with the contractual agreements and shows that a large proportion of loans are being repaid. However, the non-performing loans ratio comprising of loan accounts classified as substandard, doubtful and loss, marginally deteriorated to 8.45% in 2023 compared to a ratio of 8.34% in 2022.

NPL ratio dropped to 8.45% in 2023 compared 8.34% in 2022.

86.33% of total loan portfolio fully performing as per contract.

The marginal increase of the NPL ratio to 8.45% in 2023 was largely contributed to by the NPL ratio for DT-SACCOs during the period which equally increased from 8.40% in 2022 to 8.66% in 2023, while that of regulated NWDT -SACCOs improved from an average ratio of 7.99% in 2022 to 7.12% in 2023. The foregoing shows that there was an improvement in the quality of loans of NWDT-SACCOs compared to the DT-SACCO segment thereby calling upon the latter to put in place effective loan recovery mechanisms to avoid further drop in their loan quality. At the same time, it is observable from the overall analysis of the loan quality that a large proportion thereof was defaulted as a result of non-remitted funds owed by various employer institutions to Regulated SACCOs which amounted to Kshs 2.57 billion in 2023.

NWDT-SACCOs NPL ratio stood at 7.12% compared to DT-SACCOs NPL ratio at 8.66%.

Non-remitted funds remain a major contributor towards NPLs.

Liquidity Indicators

Liquidity is also a key component of stability indices for Regulated SACCOs. The statutory liquidity for DT-SACCO during the reporting period was maintained at a ratio of 64.45% against the minimum threshold of 15%, while that of NWDT-SACCOs was maintained at a ratio of 19.34% against the prescribed minimum threshold of 10%, evidencing continued ability of Regulated SACCOs to meet their short-term financial

External borrowing ratio for DT-SACCOs improved from 3.20% in 2022 to 3.02% in 2023.

obligations as they fall due. At the same time the external borrowing ratio has been on a declining trend over the last five years, showing that more and more SACCOs are funding their assets using internally generated funds and not external debts. The external borrowing ratio dropped from 3.20% in 2022 to 3.02% in 2023 for DT-SACCOs but the NWDT-SACCO segment witnessed a marginal increase from 1.48% in 2022 to 1.62% in 2023. Unfortunately, the gains made in the overall deductions in the external borrowing ratio were undermined by the increased interest expenses paid on the outstanding external debts which increased from Kshs 2.76 billion in 2022 to Kshs 3.37 billion in 2023, largely due to comparatively high commercial lending rates.

The interest paid on external borrowing increased to Kshs 3.37 billion in 2023 compared to Kshs 2.76 billion in 2022 despite aggregate drop in external debt.

Alternative Service delivery channels.

To ward-off competition from other financial players, as well as address the inadequacies associated with their inaccessibility of the National Payment System Infrastructure, Regulated SACCOs have continued to embrace the use of technology and partnerships with Fintechs as well as commercial banks, in order to enhance efficient service delivery to their members. In this regard, Regulated SACCOs have ventured in the provision of mobile money and digital credit financial services in partnership with Fintechs. They have also partnered with commercial banks in the provision of ATM credit and debit card services, Pesalink as well as cheque issuance, clearance and settlements.

Regulated SACCOs continued to deploy technology driven financial service delivery channels.

In addition to the use of technology, SACCOs are progressively adopting agency business model to transact SACCO business instead of the often-costly brick and mortar physical branches with a total of 37-DT-SACCOs having deployed a total of 4,038 agents throughout the country as at December, 2023. These SACCO agents transacted on behalf of the Regulated SACCOs a cumulative total of 7.82 million transactions with cumulative volume of Kshs 27.73 billion in 2023. The majority of the SACCO agency transactions consisted of cash deposits and withdrawals. The Authority expects the trend of deployment of SACCO agents as an alternative to the other modes of financial service delivery based on its lower capital cost outlay and maintenance. Despite the comparative gains being presented by the use of ICT and SACCO agents in financial service delivery by Regulated SACCOs, the Authority remains conscious of the cyber risks and threats associated with these virtual service delivery channels and shall therefore constantly call upon the SACCOs to put in place adequate mitigation measures, prior to, during and after the deployment of such channels.

SACCO agency business gains traction with 7.82 million transactions with a volume of Kshs. 27.73 billion.

Appreciation

On behalf of the management team, the Authority extends it appreciation to the Cabinet Secretary, Ministry of Cooperative & Micro, Small & Medium Enterprises (MSMEs) Development and the Principal Secretary for State Department for Co-operatives for the continued provision of policy guidance aimed at the realization of the Authority's legal mandate. The Authority also wishes to sincerely thank the members of the Board of Directors in setting the vision and mission for achieving the Authority's statutory mandate, as well as continued provision of resources and general oversight in the execution of the Authority's mandate.

A special recognition also goes to Management and Staff of the Authority whose support has been fundamental in realizing our set goals. The unwavering support and cooperation received during the year 2022 from the leadership of the regulated SACCOs,

as well as the entire co-operative movement also deserves a mention, even as the Authority looks forward to a fruitful year 2023.

CPA (Mr.) Peter Njuguna, EBS
Chief Executive Officer

CHAPTER ONE

GLOBAL PERSPECTIVE OF COOPERATIVES

1.0. THE COOPERATIVE MODEL

1.1. International Statement of Cooperative Identity

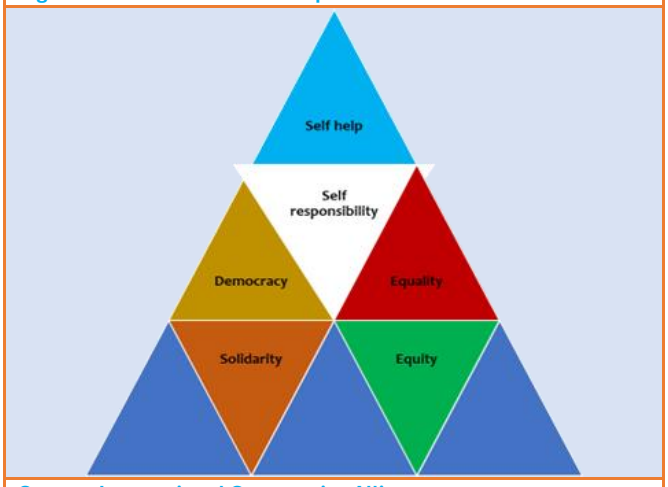

The International Cooperative Alliance (ICA) is the worldwide apex body representing cooperatives as well as providing a global voice and forum for knowledge, expertise, and co-ordinated action for and about cooperatives. The ICA was founded in 1895 and is the custodian of the statement on the cooperative identity which includes the definition of cooperatives, the cooperative ethical values, and beliefs, and the seven (7) operational cooperative principles. The statement on the cooperative identity is the common denominator for all cooperatives in all sectors and all regions, and Cooperatives in Kenya, including SACCOs.

The universal definition of a cooperative as adopted by the ICA in the Statement on the Cooperative Identity is that a cooperative is an autonomous association of persons united voluntarily to meet their common economic, social, and cultural needs and aspirations through a jointly owned and democratically controlled enterprise. Unlike other corporate legal entities or unincorporated bodies, co-operatives are not for profit but are for service; they are people-centered enterprises owned and run by, and for the benefit of the members thereof in a democratic and equal way, based on the 'one-member, one-vote rule'.

1.2. The Cooperative Values, Ethical Beliefs, and Principles

The cooperative values encapsuled in the statement of cooperative identity are self-help, self-responsibility, democracy, equality, equity, and solidarity, while the ethical beliefs are honesty, openness, social responsibility and caring for others, all of which embodies the traditional values and beliefs of the founders of cooperatives. These are summarised in Figures 1 and 2.

Figure 1: The International Cooperative Core Values

Source: International Cooperative Alliance

Figure 2: The Co-operative Ethical Beliefs

Source: International Cooperative Alliance

On the other hand, the seven (7) Cooperative Principles adopted and applied by the ICA and thus applies uniformly to all Cooperative enterprises are voluntary and open membership; democratic member control; economic participation by members; autonomy and independence; education, training, and information; co-operation among co-operatives, and concern for the community in general. The ICA has developed and issued *Guidance Notes to the Cooperative Principles* providing for their practical application in contemporary times of the 21st Century, a summary of which is provided in Table 1.

Table 1: Summary of the Cooperative Principles and their Application to Cooperative enterprises

#	PRINCIPLE	ABRIDGED GUIDANCE NOTES ON THE PRINCIPLE
1ST	VOLUNTARY AND OPEN MEMBERSHIP	Co-operatives are voluntary organisations, open to all persons able to use their services and willing to accept the responsibilities of membership, without gender, social, racial, political, or religious discrimination.
2ND	DEMOCRATIC MEMBER CONTROL	Co-operatives are democratic organisations controlled by their members, who actively participate in setting their policies and making decisions. Men and women serving as elected representatives are accountable to the membership. In primary co-operatives members have equal voting rights (one member, one vote) and co-operatives at other levels are also organised in a democratic manner.
3RD	MEMBER ECONOMIC PARTICIPATION	Members of Cooperatives contribute equitably to, and democratically control, the capital of their co-operative. At least part of that capital is usually the common property of the co-operative. Members usually receive limited compensation, if any, on capital subscribed as a condition of membership. Members allocate surpluses for any or all of the following purposes: developing their co-operative, possibly by setting up reserves, part of which at least would be indivisible; benefiting members in proportion to their transactions with the co-operative; and supporting other activities approved by the membership.
4TH	AUTONOMY AND INDEPENDENCE	Co-operatives are autonomous, self-help organisations controlled by their members. If they enter into agreements with other organisations, including governments, or raise capital from external sources, they do so on terms that ensure democratic control by their members and maintain their co-operative autonomy.
5TH	EDUCATION, TRAINING, AND INFORMATION	Co-operatives provide education and training for their members, elected representatives, managers, and employees so they can contribute effectively to the development of their co-operatives. They inform the general public - particularly young people and opinion leaders - about the nature and benefits of co-operation.
6TH	CO-OPERATION AMONG CO-OPERATIVES	Co-operatives serve their members most effectively and strengthen the co-operative movement by working together through local, national, regional, and international structures.
7TH	CONCERN FOR COMMUNITY	Co-operatives work for the sustainable development of their communities through policies approved by their members.

Source: ICA – Guidance Notes to the Cooperative Principles

In the Kenyan context, these principles have been incorporated *in section 4 of the Cooperative Societies Act* which mandatorily requires all Cooperatives to incorporate these principles in their respective By-Laws, and regulated SACCOs are not an exception to this statutory requirement. The ICA opines that the statement of cooperative identity comprising the values and ethical beliefs are immutable, but the cooperatives principles can and have been reviewed and reformulated. The

statement is also the central hallmark towards legislative and regulatory recognition of the cooperative business model's unique character. To further deepen the integration of the cooperative values, ethical beliefs and principles, the Authority has in its *Guidance Note on Corporate Governance for Regulated SACCOs (SASRA/GG/2/2023) in 2023* specifically required all Regulated SACCOs to ensure that their individual By-Laws are amended to incorporate the same, and any Regulated SACCO whose By-Laws are not in conformity shall be required to amend the same accordingly.

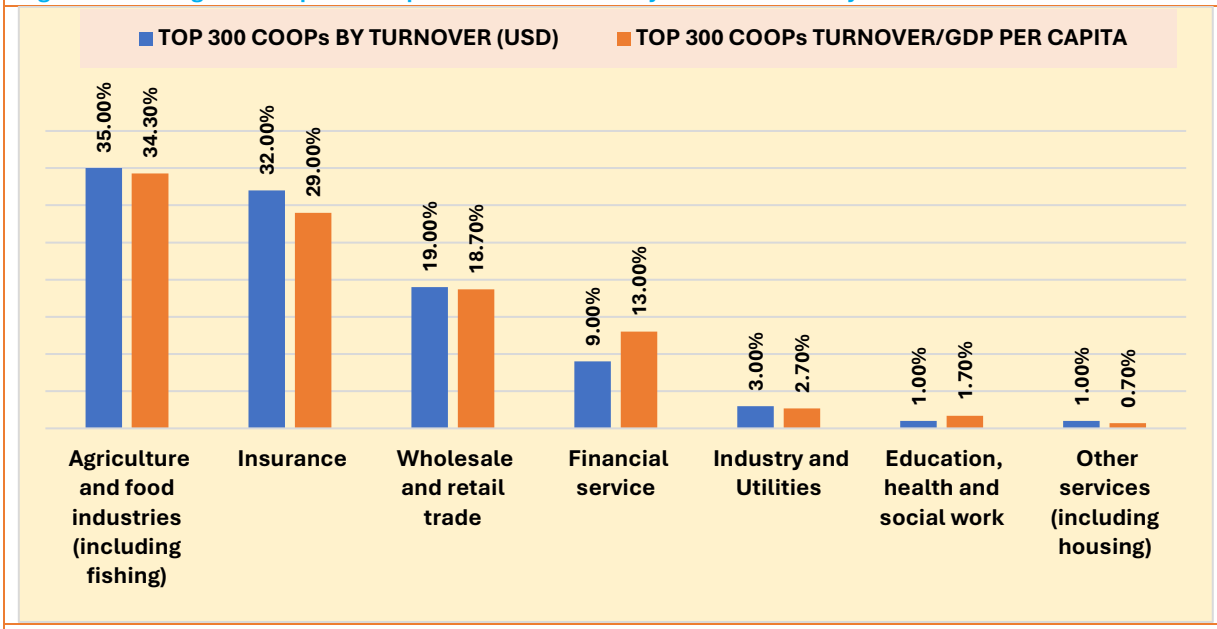

2.0. GLOBAL PERFORMANCE OF COOPERATIVES

2.1. Statistical Reports on Cooperatives

The ICA publishes the World Cooperative Monitor (WCM) to respond to the need to have robust data for the cooperative movement – data that shows not only the economic importance of the cooperative business model, but also the particular impact which cooperatives and mutuals around the world have on their members and communities. The World Cooperative Monitor (WCM) raises awareness of the economic size and sustainability of cooperatives and mutuals and gives them an opportunity to gain insights into how their sectors are performing on a global scale. The World Cooperative Monitor (WCM) is the only report of its kind collecting annual quantitative data on the global cooperative movement and has over the years provided the cooperative movement with a significant tool to evaluate its own positioning, as well as the importance of cooperatives to the general public and policy makers.

Figure 3 provides the ranking of the performance of the top 300 cooperative enterprises based on their economic activities. It shows that agriculture-based cooperatives were the largest and most dominant in terms of their proportionate turnover as well as turnover to GDP per capita which stood at 35% and 34.30% respectively. The World Cooperative Monitor (WCM) defines this cluster as composed of all cooperatives that operate along the entire agricultural value chain, starting from the cultivation of agricultural products and livestock farming to the industrial processing of agricultural products and animals; and encompasses both agricultural producers' cooperatives and consortia of cooperatives (or similar arrangements) that carry out the processing and marketing of agricultural goods for their members.

Figure 3: Ranking of the Top 300 Cooperatives Worldwide by economic activity.

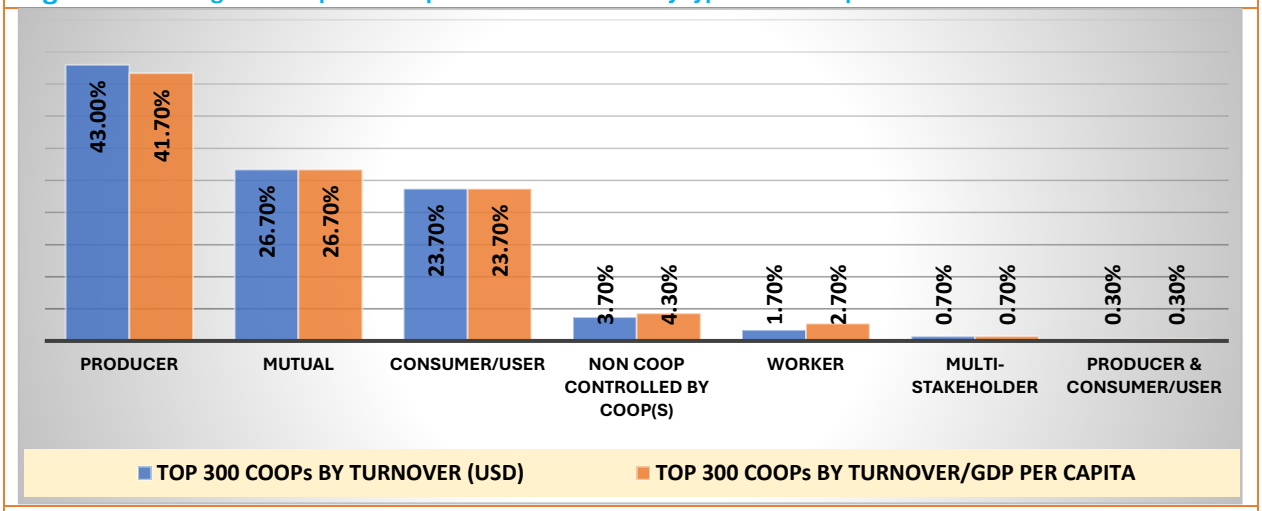

Source: World Cooperative Monitor 2023 (world ranking of Top 300 Cooperatives as at 2021)

The cooperatives within the financial services economic sector ranked a distant fourth with proportionate turnover of 9% and turnover to GDP per capita being 13%; and World Cooperative Monitor (WCM) defines the financial services cooperatives as referring to cooperative banks or credit unions or Savings & Credit Cooperatives (SACCOs) in different jurisdictions providing banking and financial intermediation services, democratically controlled by member customers

(borrowers and depositors). On the domestic front, there is no comparative data on the performance of cooperatives operating in other economic sectors, except for the financial services cooperatives which have been traditionally regarded as most dominant.

Additionally, the World Cooperative Monitor (WCM) also analyses the performance of cooperatives worldwide using a six (6) typology matrix consisting of producer cooperatives; Mutuals cooperatives; Consumer; User-Non-Cooperatives controlled by coop(s); Worker cooperatives; and multi-stakeholder cooperatives. **Figure 4** shows a summary of the performance of the Top 300 cooperatives worldwide based on their types and shows that the producer cooperatives controlled the largest proportion of the world's cooperative turnover at 43% while their turnover to GDP per capita stood at 41.70%. The producer cooperatives are composed of mainly the agricultural cooperatives as well as the retail cooperatives. It is significant that the ICA in its World Cooperative Monitor (WCM) also reports on the non-cooperatives which are controlled by cooperatives enterprises.

Figure 4: Ranking of the Top 300 Cooperatives Worldwide by type of the cooperative

Source: World Cooperative Monitor 2023 (world ranking of Top 300 Cooperatives as at 2021)

2.2. Statistical Reports on SACCOs

SACCOs are a typology of cooperatives which specializes in providing financial services and products, mainly savings and credit to their members. In some jurisdictions, particularly in the North America they are mostly known as Credit Unions while in other jurisdictions such as parts of Europe and Latin America, they are referred to as Cooperative Banks. In Kenya, they are known as SACCOs which is the acronym for Savings and Credit Cooperatives and has found statutory codification in the *SACCO Societies Act (cap 490B)*.

The World Council of Credit Unions (WOCCU) is the international association of Credit Unions (SACCOs) across the globe, and represents national and regional Credit Union associations, drawn from member countries, with Kenya represented by the Kenya Union of Savings and Credit Cooperatives (KUSCCO). WOCCU publishes the annual statistical record on the performance of Credit Unions (SACCOs), with the latest publication being the 2022 edition and ranks the Kenyan SACCO system eleventh (11th) worldwide (and first in Africa) and incorporates statistical data for all financial cooperatives in Kenya including those not regulated by the Authority as summarised in **Table 2**.

Table 2: International Country Performance of Credit Unions (SACCOs), 2022

	COUNTRY	ASSETS (BILLIONS USD)	LOANS (BILLIONS USD)	SAVINGS & SHARES (BILLIONS USD)	TOTAL MEMBERS	NO. OF CREDIT UNIONS	PENETRATION
1	United States	2,190.00	1,523.00	1,869.00	136,580,000	4,858	63 .1%
2	Canada	406.63	335.53	325.42	10,889,721	420	42 .8%

*The statistical information for Kenya is all financial cooperatives in Kenya, including those not regulated by the Authority.

**According to the Economic Survey Report 2024 based on data from State Department of Cooperatives, there were 13,511 SACCOs as at December 2023.

Table 3 on the other hand provides the statistical report on the performance of SACCOs (Credit Unions) in Africa in which Kenya's SACCO industry remains the largest by asset size, and together with the SACCO industries in Ethiopia, Ghana, Cameroon, and Tanzania constituted the top five (5) largest SACCO industries in the African continent.

Table 3: Africa Countries' Performance of Credit Unions (SACCOs), 2022

RANKING	COUNTRY	ASSETS (BILLIONS USD)	LOANS ((BILLIONS USD)	SAVINGS & SHARES (BILLIONS USD)	MEMBERS	CREDIT UNIONS	PENETRATION
1	Kenya*	21.83	9.92	16.36	10,766,141	8,744**	33 .6%

*The statistical information for Kenya is all financial cooperatives in Kenya, including those not regulated by the Authority.

**According to the Economic Survey Report 2024 based on data from State Department of Cooperatives, there were 13,511 SACCOs as at December 2023.

3.0. THE NATIONAL COOPERATIVE ARCHITECTURE

3.1. The Organization of Cooperatives in Kenya

The Cooperative sector in Kenya has over the years and traditionally been organised into three (3) major categories namely vertical structuring; nature of intermediation or services or business undertaken; and the legal and regulatory framework applicable to the Cooperative enterprise. The major categories of cooperative enterprises on their part leads to the micro-typology of the cooperatives under each of the major categories. The classification of cooperative enterprises is critical in providing a basis for identification of the risks attendant to each of the categories or class, and the formulation of appropriate policy and legal policy interventions relevant to the risk.

3.1.1. Vertical Organization of Cooperatives

The vertical organization of cooperatives is comprised of primary, secondary, tertiary and apex cooperatives premised on the membership at each vertex. At the primary cooperative vertex, the membership is composed on individual members and the cooperative serve the individual members at their personal levels as summarised in Figure 5.

Figure 5: Summary of the Vertical Classification of Cooperatives in Kenya

CLASSIFICATION OF COOPERATIVE	KEY CHARACTERISTICS OF THE CLASSIFICATION
THE APEX COOPERATIVE	It is the national co-operative formed at the national level by the Co-operative movement to promote co-operative development and represent the interests of co-operative societies locally and internationally. Currently, the Apex Co-operative Society in Kenya is the Co-operative Alliance of Kenya (CAK)
TERTIARY COOPERATIVES	The membership may comprise both primary and secondary Co-operatives, and not individual persons. They serve those affiliate members and not individual persons.
SECONDARY COOPERATIVES	The membership is restricted to two or more primary Co-operatives. They are supposed to strictly serve their affiliate primary Co-operatives only and should not serve individual person membership. They are also called Co-operative Unions and defined in Section 2 and 5 of the CSA.
PRIMARY COOPERATIVES	Their membership is restricted to individual persons, and they serve the individual members. They are defined in Section 2 and 5 of the CSA. Both DT-SACCOs and Non-WDT-SACCOs are primary cooperatives. Section 16 of the CSA however allows corporate and unincorporated entities to join membership of Primary Cooperatives, subject to resolution of the general meeting.

At the secondary cooperative vertex, the membership is composed of the primary cooperative members as corporate and institutional members, and the secondary cooperative serves the corporate and institutional members, and not the individuals in such a manner that there is no competition between the two levels of vertex. At the tertiary cooperative vertex, the membership is composed of secondary cooperatives and primary cooperatives, and the tertiary cooperative only serves their secondary and primary cooperatives members. At the national level is the apex cooperative, which represents the entire national cooperative movement, promotes, and champions its interests at the national, regional, and international levels. The apex cooperative in Kenya is the Cooperative Alliance of Kenya (CAK) and which represents the Kenya cooperative movement at the International Cooperative Alliance (ICA).

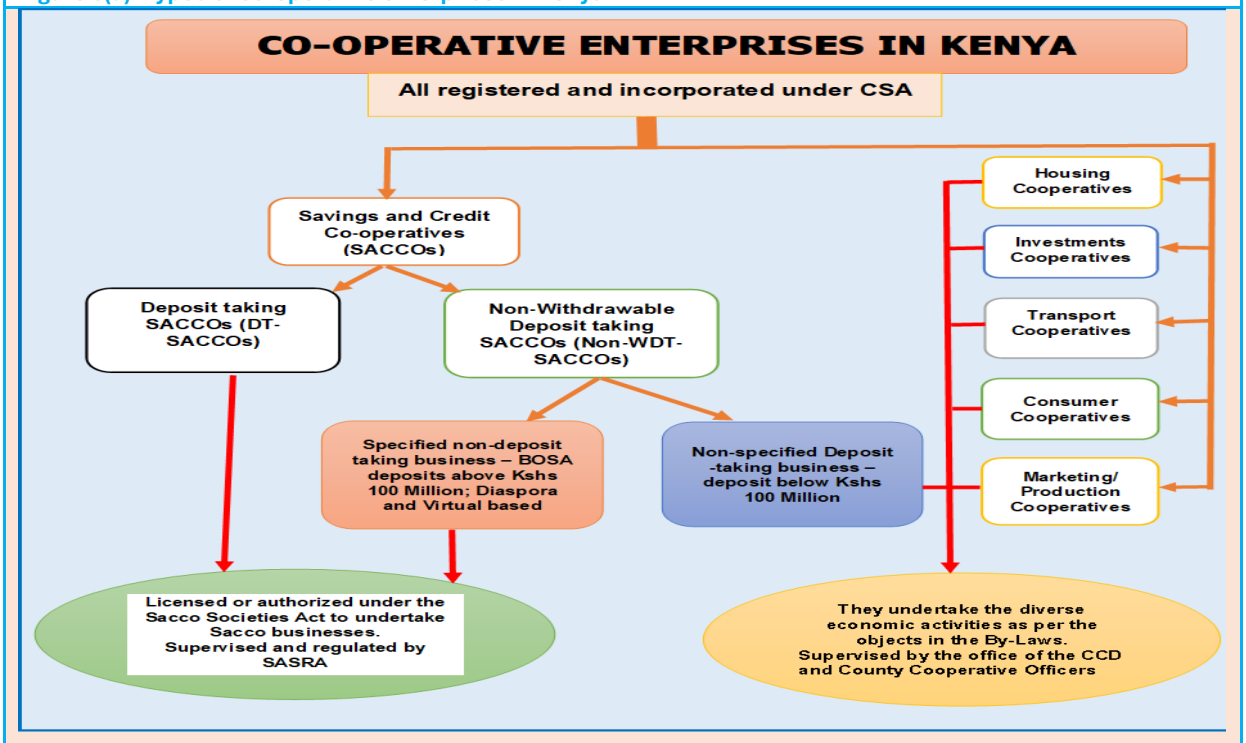

The vertical organization of cooperatives in Kenya is given statutory recognition under the *Cooperative Societies Act*. The ICA has in its Guidance Notes to the Cooperative Principles implored co-operatives

to co-operate with each other in competitive markets through forming co-operative groups, secondary co-operatives, and federations to realise the co-operative advantage and create commonwealth for mutual benefit. It is however important to point out that the reforms being undertaken in the Cooperative Sector through the *National Cooperative Policy, 2019 (Sessional Paper No. 4 of 2020)* will likely disrupt the vertical organization of cooperatives in Kenya as it proposes a four (4) tier vertex consisting of the primary cooperatives, the secondary cooperatives, federation cooperatives, and the apex cooperative. The Policy further proposes clear functions, duties and responsibilities of each vertex level of cooperative, which in practice will ensure that there is no mission drift for each level as will be evidenced in the legislative instruments which shall be enacted to implement the Policy.

3.1.2. Typology of Primary Cooperatives in Kenya

The *National Cooperative Policy, 2019 (Sessional Paper No. 4 of 2020)* identifies and clusters cooperatives either as financial or non-financial. Financial cooperatives are those which receive funds or deposits from their membership and intermediate such funds or deposits on behalf of the members either as credit or investment. They include the SACCOs, Investment Cooperatives and Housing Cooperatives. The non-financial cooperatives on the other hand do not engage in any form of financial intermediation on behalf of the members but may receive funds from the members in the form of equity or donations. In this category, are the Transport Cooperatives (sometimes referred to as Matatu or PSV SACCOs); Consumer Cooperatives; and Marketing or Production Cooperatives. **Figure 6(a)** provides a snapshot view of the typology of Cooperatives in Kenya together with the attendant legal and regulatory framework.

Figure 6(a): Types of co-operative enterprises in Kenya

Source: SASRA Database

In terms of their regulation and supervision, the Authority regulates the DT-SACCOs and the specified NWDT-SACCOs with deposits above Kshs 100 million, together with the diaspora and virtual based NWDT-SACCOs. The prevailing legal and regulatory framework for their regulation and

supervision is *the Sacco Societies Act* and the *Regulations 2010* for DT-SACCOs and the *Regulations 2020* for the NWDT-SACCOs. Additionally, the provisions of *Proceeds of Crime and Anti-Money Laundering Act (POCAMLA)* and Regulations 2023 made thereunder equally apply to the Regulated SACCOs as reporting institutions.

The remaining typology of cooperatives consisting of the housing cooperatives, the investment cooperatives, the transport cooperatives, the producer or marketing cooperatives, and the non-regulated NWDT-SACCOs (whose deposits are below Kshs 100 million) are overseen by the office of the Commissioner for Cooperatives Development and the County Governments pursuant to the provisions of the Cooperative Societies Act or other County specific cooperative legislation. It is important to emphasize that cooperative legislation and regulations is a devolved function pursuant to the *Fourth Schedule of the Constitution of Kenya*, and except as provided in the national legislations (*Sacco Societies Act and Cooperative Societies Act*), the County governments remain responsible for cooperatives within their county jurisdictions.

3.2. Organization of the Authority's Supervisory Structure

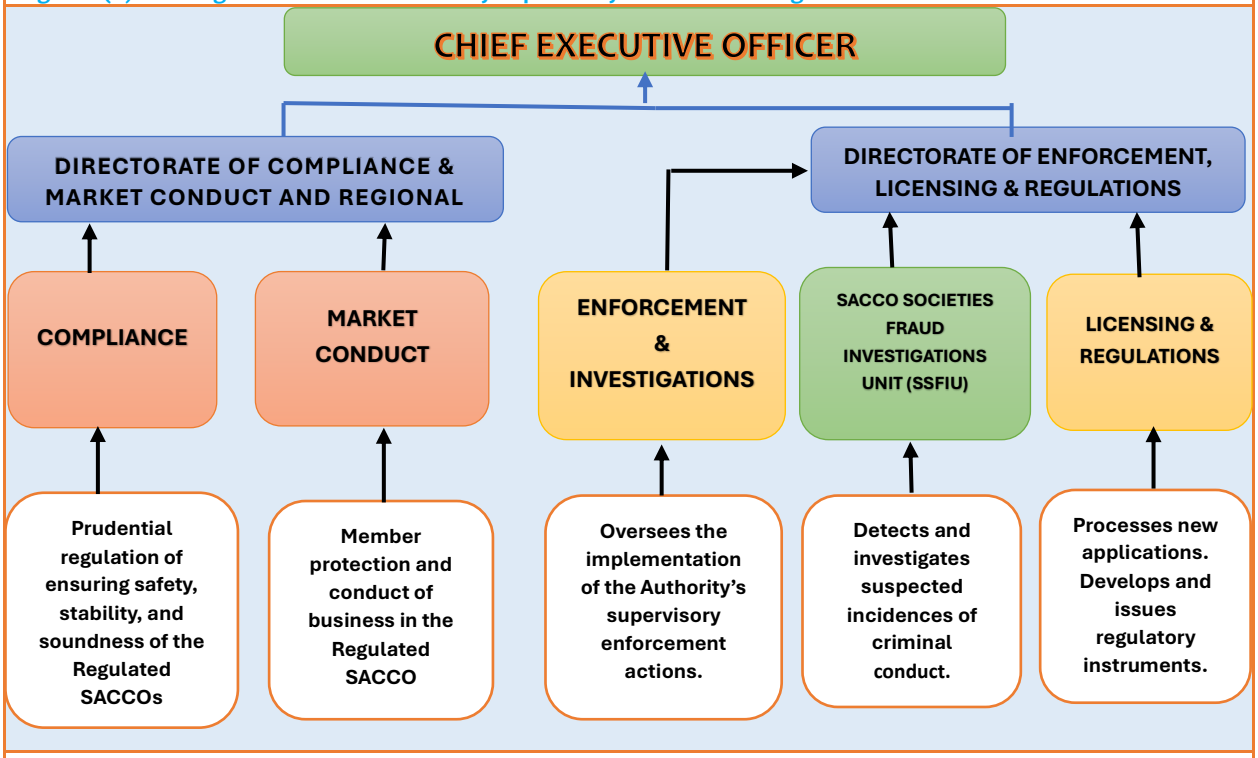

The Authority is established pursuant to the provisions of the *Sacco Societies Act* with the objects of licensing SACCOs to undertake deposit-taking SACCO business, as well as the regulation and supervision of SACCOs in Kenya. The Authority therefore implements the legal framework for supervision and regulation of Regulated SACCOs through the Act as read with *Regulations 2010* for DT-SACCOs and *Regulations 2020* for NWDT-SACCOs. Additionally, the Authority is required to perform any other functions as prescribed in any other written law, and to this extent, the Authority implements the provisions of the *Proceeds of Crime and Anti-Money Laundering Act (POCAMLA)* and the *Regulations* made thereunder in so far as they relate to Regulated SACCOs which has classified the Authority as a 'Supervisory Body' under the *First Schedule*.

The POCAMLA further provides in *Section 36A* thereof that each supervisory body (such as the Authority) shall be responsible for supervising and enforcing compliance with the Act, or any instruction, direction, guideline or rule made pursuant to or in terms of the Act by all Regulated SACCOs (reporting institutions) regulated or supervised by it and to whom the provision of POCAMLA Act apply, and that the obligation shall form part of the legislative mandate of the Authority (as a supervisory body) and constitutes its core supervisory functions. To achieve its regulatory and supervisory objects, the Authority is organised in two main technical services directorates namely the Directorate of Compliance, Market Conduct and Regional Coordination and the Directorate of Enforcement, Licensing and Regulations as depicted in **Figure 6(b)**.

The Directorate of Compliance, Market Conduct and Regional Coordination is made up of the Compliance, Market Conduct and Regional Co-ordination Departmental functions. While the Compliance function oversees the prudential regulation of ensuring safety, stability, and soundness of the Regulated SACCOs, while the Market Conduct function handles issues relating to member protection and conduct of business in the Regulated SACCO industry.

The Directorate of Enforcement, Licensing and Regulations is made up of the Enforcement (incorporating investigations) functions and the licensing and regulations functions. The Enforcement function oversees the implementation of the Authority's supervisory enforcement actions provided under *section 51 of the Act* and the Regulations made thereunder; and is reinforced by the SACCO Societies Fraud Investigations Unit (SSFIU) which detects and investigates suspected incidences of criminal conduct within the Regulated SACCO industry, and where appropriate make recommendations for prosecution. The licensing function receives and processes new applications for deposit-taking licenses and new applications for authorization to undertake specified non-deposit taking businesses; while the regulation function develops and issues supervisory and regulatory instruments including but not limited to regulatory policies, guidance notes and circulars.

4.0. REGULATED SACCOs AND THE NATIONAL FINANCIAL SERVICES SECTOR

4.1. Overview of the National Financial Services Sector

The financial sector in Kenya consists of the financial service providers on the one hand and the public agencies responsible for policy, supervision, and regulation of the financial services and providers on the other hand. The financial services' providers can be generally classified as follows –

a) The deposit taking financial institutions which take demand deposits and intermediates the deposits as credit. In this category are the Regulated SACCOs (DT-SACCOs and NWDT-SACCOs), the commercial banks, the microfinance banks and mortgage finance companies.

b) The non-deposit taking financial institutions which do not take demand deposits but provide other financial services to the public such as investment, insurance, advisory or credit. In this category are the insurance companies, pension schemes, securities market players, Development financial institutions, Digital Credit Providers, Mortgage Refinance Companies among others.

c) The financial markets infrastructure providers which consist of institutions which provide market infrastructure to other financial services providers to facilitate clearance, settlement, custodial services among others.

d) The informal financial service providers, which consists of registered institutions (incorporated or unincorporated) which offer financial services to a select limited section of the public population but are not required by any law to observe any set of prudential standards. In this category are the rotational savings associations, groups and collectives, other financial cooperatives notably housing and investment cooperatives, the non-Regulated SACCOs among others.

On the other hand, the public agencies responsible for policy, regulation, and supervision of the financial sector in Kenya consists of the government ministries mainly the National Treasury which is responsible for overseeing all financial sector policies. The Authority on its part is responsible for the supervision and regulation of the Regulated SACCOs composed on both the DT-SACCOs and the NWDT-SACCOs with the key legal frameworks being the *Sacco Societies Act* as read with the *Regulations 2010* for DT-SACCOs and *Regulations 2020* for NWDT-SACCOs. The legal frameworks are also supplemented by the provisions of the Cooperative Societies Act, whose application to Regulated SACCOs is extended by dint of *section 67 of the Sacco Societies Act*.

Other public agencies include the Central Bank of Kenya (CBK) which is responsible for the supervision and regulation of the banking sector and related entities like the payment system providers, Digital Credit Providers, mortgage finance and re-finance companies among others; while the Capital Markets Authority (CMA) responsible for the securities markets; the Retirements Benefits Authority (RBA) responsible for the pensions industry; and the Insurance Regulatory Authority (IRA) responsible for the insurance sector.

4.2. Regulated SACCOs in the context of the National Financial Sector

Table 4 provides the comparative performance of Regulated SACCOs in terms of their assets, gross loans, net loans, non-performing loans (NPL) ratio, number of institutions and number of branches per institution, with the commercial banking system which undertakes almost similar business. The commercial banks still have the largest proportion of the deposit taking financial sectors' total assets, loans, and deposits. The Regulated SACCOs however had the lowest NPL ratio signifying better

loan quality at 8.66% for DT-SACCOs and 7.12% for NWDT-SACCOs in 2023 compared the commercial banks NPL ratio of 14.80%.

Table 4: Comparative Performance of Regulated SACCOs with the banking sector.

PARAMETERS	YEAR	Total Assets (Kshs Billion)	Gross Loans & Advance (Kshs Billion)	Net Loans & Advances (Kshs. Billions)	NPL Ratio (%)	Customer Deposits (Kshs. Billion)	No. of Institutions	No. of Branches

Source: SASRA Database.

*The data in respect of commercial and microfinance banks were obtained from CBK.

**These total assets are inclusive of the assets of (Non-Bank Financial Institutions) as designated by CBK.

Table 5 and **Figure 7** provides a summary of the Regulated SACCOs industry's total assets to the national nominal Gross Domestic Product (GDP) in comparison to other comparable financial sectors. The analysis shows that the Regulated SACCOs' total assets to the GDP was about 6.43% in 2023 which is a slight drop from a proportion of 6.66% in 2022. This decline is attributed to the fact that the national nominal GDP grew at a faster rate of 12% in 2023, compared to the rate of growth of Regulated SACCOs' total assets at 9.17% in 2023 as discussed in Chapter 2 of this report. The DT-SACCOs segment's total assets to the national nominal GDP was 5.51% in 2023 compared to 5.71% in 2022 while the NWDT-SACCOs segmental assets to the national nominal GDP was 0.92% in 2023 compared to 0.95% in 2022.

4.3. Regulated SACCOs and Interest Rates

In the tradition of cooperative business model, whenever surplus is declared from their business activities, the same is normally distributed among the membership with the members' deposits and the share capital being used as the proxy for pro-rating the distribution of the surplus payments. Whereas the members' deposits earn interest, the members' shares earn dividends.

Figure 8 provides the details of the rates at which Regulated SACCOs paid interest on the members' deposits and dividends on their members' share capital in comparison to the interest rates paid by commercial banks on savings by depositors The rates paid by Regulated SACCOs both as interest on deposits and as dividend on the members' share capital in 2023 stood above those paid by commercial banks on their customers savings thereby underscoring the continued competitive advantage of Regulated SACCOs, whereby deposits are utilized as collateral for credit but are also earning a return to the members. The Regulated SACCOs paid their interest rates on the members' deposits at an average of 7.45%% in 2023 which is an increase from an average rate of 6.92% paid in 2022, while the average rate of dividend paid in 2023 was 10.92% which is an increase from an average rate of 10.47% paid in 2022; all of which stood above the rates paid by commercial banks on customers' savings at an average of 3.84% in 2023.

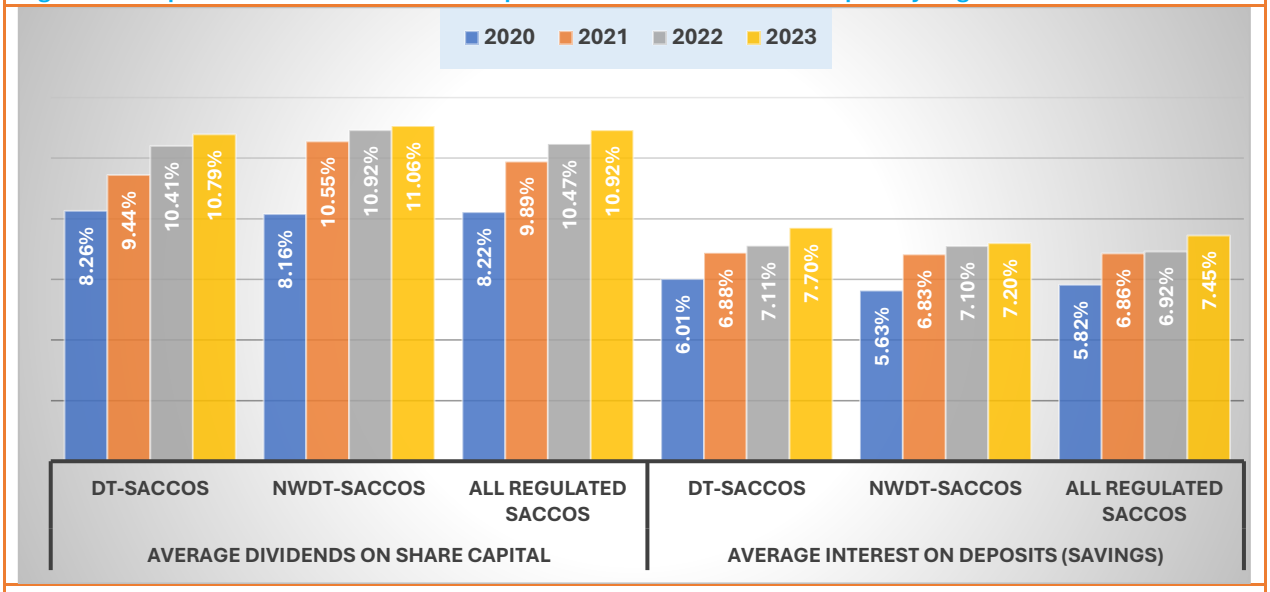

Figure 8: Comparative Interest Rates between Regulated SACCOs and the Commercial bank rates, 2023

Source: SASRA Database. The data for commercial and micro-finance banks obtained from CBK while data for Regulated SACCOs obtained from SASRA database.

At the segmental levels **Figure 9** provides the average rates of interest paid by DT-SACCOs on the one hand and the NWDT-SACCOs on the other hand. In respect of the dividends on members share capital the DT-SACCOs paid a rate of 10.79% in 2023 compared to a rate of 10.41% paid in 2022; while the NWDT-SACCOs paid a rate of 11.06% in 2023 compared to a rate of 10.92% paid in 2022. In respect of the interests on deposits, the DT-SACCOs paid a rate of 7.70% in 2023 compared to a rate of 7.11% paid in 2022; while the NWDT-SACCOs paid a rate of 7.20% in 2023 compared to a rate of 7.10% paid in 2022.

CHAPTER TWO

THE PERFORMANCE AND OPERATIONS OF REGULATED SACCOs IN KENYA

5.0. LICENSING AND AUTHORIZATION

5.1. General Overview

One of the core mandates of the Authority prescribed in *section 5 of the Act* is to license SACCOs in Kenya to undertake the regulated SACCO businesses in accordance with the Act and the Regulations made thereunder, which is their entry point to regulation and supervision. The regulated SACCO business as prescribed under the Act consist of deposit taking SACCO business and the specified non-deposit taking SACCO business.

The deposit-taking SACCO business is supervised pursuant to the Act as read with the *Regulations 2010* which requires SACCOs to have and maintain on annual basis a valid deposit taking license. Once issued, an annual deposit taking license of a SACCO expires on 31st December on the year of issuance and must be subsequently renewed, with SACCOs duly licensed to undertake deposit taking business being referred to as the Deposit-Taking SACCOs (DT-SACCOs). An application for renewal of a deposit-taking license must however be submitted to the Authority within three (3) months prior to the expiry as prescribed in *Reg. 5 of the Regulations 2010*. In this respect, it is important to note that *section 23(1) of the Act* provides that any person who conducts or carries out deposit taking SACCO business without a valid license from the Authority commits an offence.

The specified non-deposit taking SACCO business on the other hand is supervised pursuant to the Act as read with the *Regulations 2020* which requires SACCOs to have and maintain a valid annual authorization certificate, which expires on 31st December of the year of issuance and must be renewed upon expiry. An application for renewal of authorization must however be submitted to the Authority within 60 days prior to the expiry date as provided in *Reg. 9 of the Regulations 2020*, with SACCOs authorized to undertake the specified non-deposit taking business being referred to as the Non-Withdrawable Deposit Taking SACCOs (NWDT-SACCOs). The specified non-deposit taking SACCO business is defined in *Reg. 4 of the Regulations 2020* as read with *section 3(2) of the Act* to include -

a) non-deposit taking business in which the total non-withdrawable deposit from members is equal to or exceeds the sum of one hundred million shillings;
b) non-deposit taking business in which the SACCO mobilises membership and subscription to its share capital through digital or other electronic payment platforms; or
c) non-deposit taking business in which the SACCO mobilises membership and subscription to its share capital from persons who are ordinarily resident outside the country.

5.2. Licensing and Authorization Status

There were 176-DT-SACCOs licensed by the Authority at the beginning of the year 2023. However, two (2) DT-SACCOs failed to maintain their deposit taking licenses resulting into the revocation and non-renewal of the same, thus leaving 174-DT-SACCOs in operation as at the close of the year 2023. However, the Authority also received and successfully granted deposit-taking license to two (2) SACCOs namely *M/S NJIWA SACCO Society Ltd* and *M/S JOGOO SACCO Society Ltd* (which were previously authorized to undertake specified non-deposit taking business as NWDT-

SACCOs) with effect from 1st January 2024. The full list of the DT-SACCOs whose licenses were successfully renewed was published by the Authority in the *Kenya Gazette Notice No. 747 of 2024* dated 29th January 2024, as well as the local daily newspapers, and may be downloaded from the Authority's website at www.sasra.go.ke.

The SACCOs whose deposit taking licenses were not renewed and thus stood revoked in the course of the year 2023 were *M/S Jacaranda SACCO Society Ltd* and *M/S Kenya Midlands SACCO Society Ltd* whose details are summarised in **Table 6**. The list of the SACCOs whose licenses were not renewed and thus revoked were also published in *Kenya Gazette Notice No. 747 of 2024* dated 29th January 2024 in accordance with the requirements of the law. Members of the public are thus warned to desist from undertaking any of the regulated SACCO businesses with any of the SACCOs whose licenses were revoked.

Table 6: List of SACCOs whose licenses were withdrawn, not renewed and/or revoked in 2023.

	Name	Postal address	Last disclosed Physical Location	County Location of Head office	Reasons for revocation & non-renewal of license
1	Jacaranda SACCO Society Ltd	P.O Box 1767-00232, Ruiru	L.R No. 242, Finance House, Ruiru-Kiambu Road, Ruiru.	Kiambu County	1. Did not apply for renewal of the license. 2. Ceased to undertake any business. 3. Inability to meet the prescribed prudential ratios.
2	Kenya Midlands SACCO Society Ltd	P.O Box 287 – 20400, Bomet	Kenya Midland Sacco Building, Kapsimotwo, Road, Silibwet	Bomet County	1. Did not apply for renewal of the license. 2. Inability to meet the prescribed prudential ratios. 3. Inability to meet financial obligations especially those owed to the members

Source: SASRA Database

On the other hand, there were 183-NWDT-SACCOs at the beginning of the year 2023. However, two (2) of the NWDT-SACCOs namely *M/S Njiwa SACCO Society Ltd* and *M/S Jogoo SACCO Society Ltd* successfully applied to the Authority to change their business model to deposit-taking SACCOs business. This left 181-NWDT-SACCOs in operation in the Country and whose authorizations were successfully renewed by the Authority for continued operation effective January 2024. In compliance with the law, the list of NWDT-SACCOs with valid authorizations to operate in the country was also published in the *Kenya Gazette Notice No. 747 of 2024* dated 29th January 2024, as well as the local daily newspapers, and may be downloaded from the Authority's website at www.sasra.go.ke. In accordance with Reg. 4 of the Regulations 2020 one (1) NWDT-SACCO namely *M/S Digital Media Regulated NWDT-SACCO Society Ltd* is authorised as a digital SACCO Society; while three (3) NWDT-SACCO namely *M/S Stoke – UK Diaspora Regulated NWDT-SACCO Society Ltd*; *M/S Kenya – USA Diaspora Regulated NWDT-SACCO Society Ltd*; and *M/S Grand Granite Diaspora Regulated NWDT-SACCO Society Ltd* are authorized as diaspora based SACCOs.

5.3. Status of Pending Applications for Licensing and Authorizations

Table 7 provides the status of pending applications by various SACCOs seeking to undertake deposit-taking business (FOSA) in Kenya and which are at different stages of consideration. It is noteworthy that all the applications are by NWDT-SACCOs already authorized to undertake specified non-deposit taking SACCO business, but which are seeking expansion of their SACCO business model to include deposit taking (FOSA) business. The Authority expects the continuation of the trend whereby large-tier NWDT-SACCOs will be seeking to expand their business models by acquiring deposit taking licenses (FOSA) in order to offer more financial services and products to their members. It

is equally going to be unlikely for SACCOs to directly apply for and obtain deposit taking business license, without first obtaining the authorization to undertake specified non-deposit taking business certification.

Table 7: List of NWDT-SACCOs applying to expand to DT-SACCO business

	NAME OF SACCO APPLICANT NWDT-SACCO	DATE OF APPLICATION	TOWN LOCATED	COUNTY LOCATED
1	UNITED WINNERS REGULATED NWDT-SACCO SOCIETY LTD	17th April 2023	Umoja Area, Nairobi	Nairobi City

3	MHASIBU REGULATED NWDT-SACCO SOCIETY LTD	27th June 2023	Nairobi CBD	Nairobi
	Source: SASRA Database			

Table 8 provides the status of pending applications by various SACCOs seeking to undertake specified non-deposit-taking business in Kenya and which are at different stages of consideration. It is noteworthy that the said applications are pending due to inactivity or slow response to the recommendations issued by the Authority to the applicants. In the meantime, it is important that the members of the public be forewarned against undertaking any specified non-deposit taking SACCO business with the said applicants unless or until they are duly authorised by the Authority and their names published in the Kenya Gazette as prescribed in law.

Table 8: Status of pending applications for authorization to undertake specified non-deposit-taking SACCO business

	NAME OF SACCO	DATE OF APPLICATION	TOWN LOCATED	COUNTY LOCATED
1	GSK SACCO SOCIETY LTD	4th March, 2022	Industrial Area, Nairobi	Nairobi City

6.0. MEMBERSHIP STATUS OF REGULATED SACCOs

6.1. General Overview

As stated hereinabove, SACCOs are member based financial institutions and the regulated SACCO businesses transacted by SACCOs is strictly with members. Consequently, members of SACCOs form the substratum of their customer base thus the member-owned, member-managed, and member-customer trichotomy. Table 9 provides a summary of the total members, and thus customers of Regulated SACCOs during the year 2023 in comparison to the previous years. The analysis shows that despite the number of regulated SACCOs dropping from 359-Regulated SACCOs in 2022 to 357-Regulated SACCOs in 2023, the total membership among the Regulated SACCOs still increased by 6.57% to reach 6.84 million members in 2023 from 6.42 million members reported in 2022. The increase in membership in the SACCOs is likely to be informed by increased public confidence and trust in the SACCO industry largely driven by the strengthening of the regulatory and supervisory regime, as well as a shifting of demand for financial services and products to SACCOs.

Table 9: Summary of total membership of Regulated SACCOs (2020 – 2023)

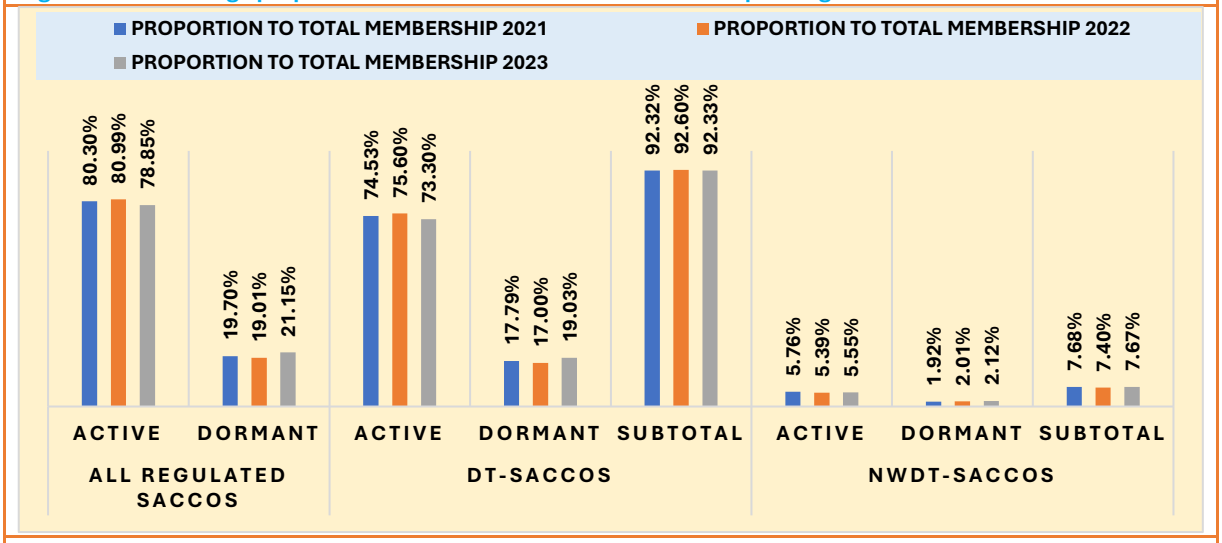

SACCO CLUSTER	TOTAL NO. OF SACCOs REPORTING			MEMBER STATUS	TOTAL MEMBERSHIP				
	2021	2022	2023		2020	2021	2022	Y-TO-Y CHANGE (2022/23)	2023

Source: SASRA Database

The DT-SACCOs remained the most dominant segment of regulated SACCOs with a total membership of 6.32 million representing 92.33% of the total membership among the 357-Regulated SACCOs, while the NWDT-SACCOs' segment controlled the remaining 7.67% of the total membership. It is however significant to note that the NWDT-SACCOs registered the highest growth rate at 10.42% during the year 2023 compared to a growth rate of 6.26% registered by the DT-SACCOs segment. The overall active membership among the Regulated SACCOs also increased from 5.20 million members in 2022 to 5.40 million members in 2023 representing 78.85% of the entire membership as summarised in Figure 10.

The dormant membership (composed of members who had not transacted with their individual SACCOs for at least six (6) months for DT-SACCOs and at least 12 months for NWDT-SACCOs prior to the end of the financial year 2023) among the Regulated SACCOs stood at 1.45 million members in 2023 representing 21.15% of the entire membership, compared to 1.22 million members in 2022 which represented 19.01% of the entire membership. The foregoing shows that the rate at which the Regulated SACCOs are either recruiting new members or re-activating dormant members remained slower than the rate at which the existing members are becoming dormant. Regulated SACCOs thus need to take measures in order to re-activate their dormant members, even as they recruit new members, such as the development and implementation of appropriate savings and credit products for their membership.

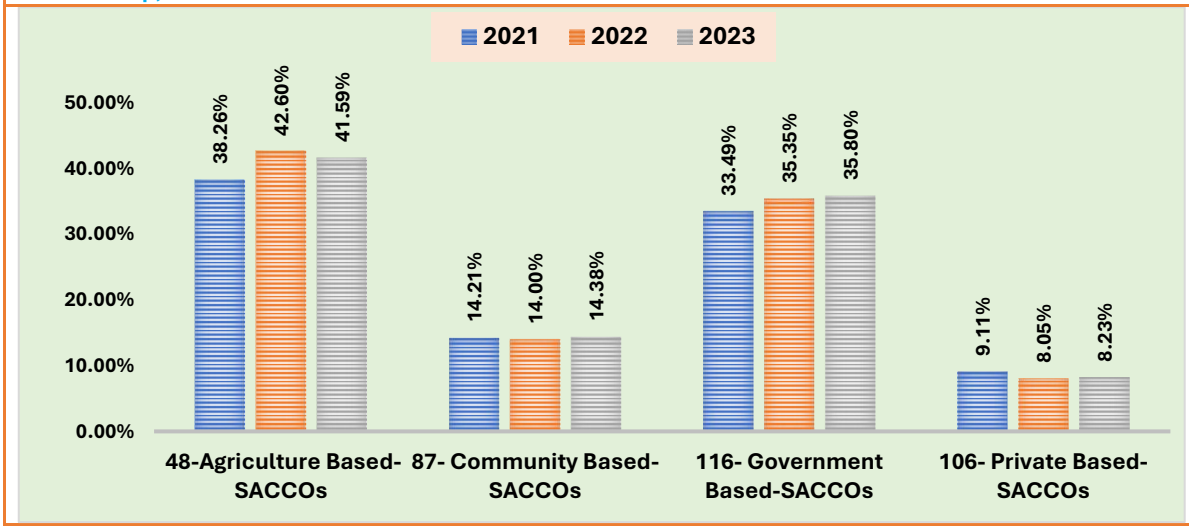

Figure 10: Percentage proportion of active and dormant membership of Regulated SACCOs.

Source: SASRA Database

Figure 11 provides a percentage proportion of the members of Regulated SACCOs as distributed within the four (4) common bond clusters and shows that all the fields of membership clusters recorded increases in their membership except the agriculture-based clusters which reported a marginal decline in membership in 2023. The 48-Agriculture based Regulated SACCOs had a proportion of 41.59% of all members, a slight drop from a proportion of 42.60% in 2022, probably informed by the one agriculture-based SACCO Society (*Kenya Midlands SACCO Society Ltd*) whose license was revoked in 2023. The Government based SACCOs had the second highest proportion of members at 35.80% of all the members which is a slight increase from a proportion of 35.35% recorded in 2022, notwithstanding that the Government–based SACCOs also lost one SACCO (*Jacaranda SACCO Society Ltd*) due to the revocation of its license in 2023. This shows that the existing Government-based SACCOs grew their membership in excess of those lost after the revocation of the license of *M/S Jacaranda SACCO Society Ltd*.

Figure 11: Percentage Proportion of Members of Regulated SACCOs distributed within the Field of Membership, 2023

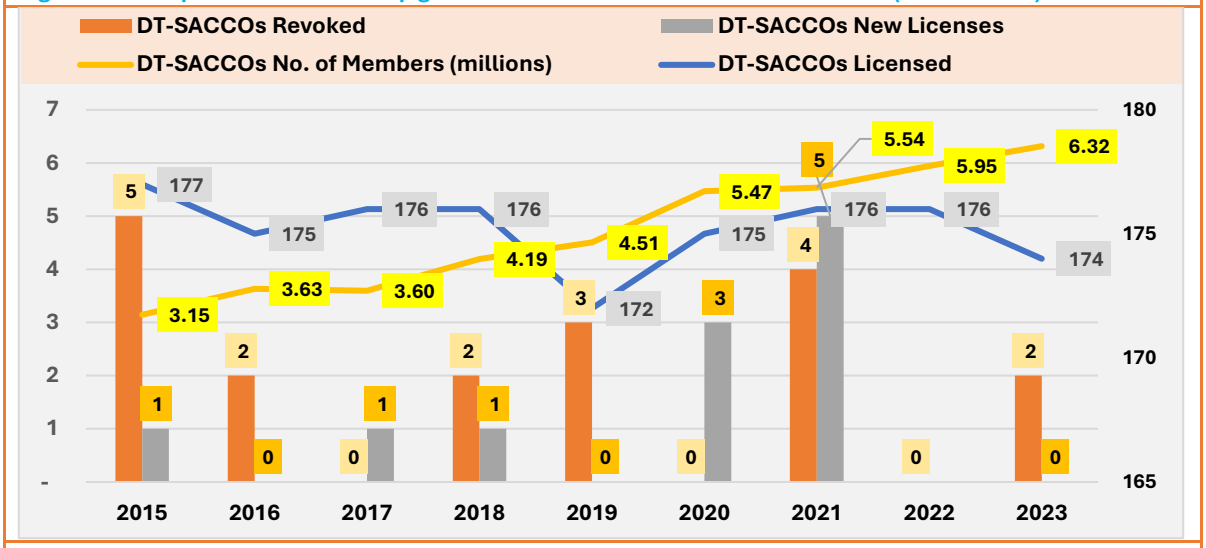

Source: SASRA Database

6.2. Comparative Membership Growth vs Number of Regulated SACCOs

Although the formal prudential regulation and supervision of Regulated SACCOs commenced in June 2010 with the DT-SACCOs segment, the first four (4) years to June 2014 was largely transitional based on the fact that many DT-SACCOs were already in operation in one way or the other, and thus required time to fully transit into the new prudential regulation and supervisory framework. Consequently, the Authority has been monitoring the trends in the number of compliant and thus licensed DT-SACCOs on the one hand, and the non-compliant SACCOs whose licenses were revoked, against the growth in membership of the DT-SACCOs.

Figure 12 provides a comparative outlook of the growth in membership of the DT-SACCOs over the last ten (10) years against the number of DT-SACCOs with valid licenses. The comparative outlook shows that despite the reduction in the number of licensed DT-SACCOs through revocation of their licenses, the number of members in DT-SACCOs has continued to grow. Indeed, whereas the Authority has revoked a total of 16 licenses of various SACCOs between 2015 and 2023 with the number of licensed DT-SACCOs oscillating between a high of 177-DT-SACCOs in 2015 to a low of 172-DT-SACCOs in 2019 and closing with 174 DT-SACCOs in 2023, the number of members within these DT-SACCOs has more than doubled from 3.16 million members in 2015 to a high of 6.32 million members in December 2023. The foregoing shows that the revocation of licenses of DT-SACCOs which failed to meet the prescribed minimum requirements as well as members obligations does not necessarily disenfranchise the members thereof, and neither does it undermine the growth in membership of the SACCOs. It also forms the basis of the hypothesis that the membership of troubled SACCOs whose licenses often end up being revoked, are usually taken over by other SACCOs with stronger balance sheets.

Figure 12: Comparative membership growth and number of licensed DT-SACCOs (2015 to 2023)

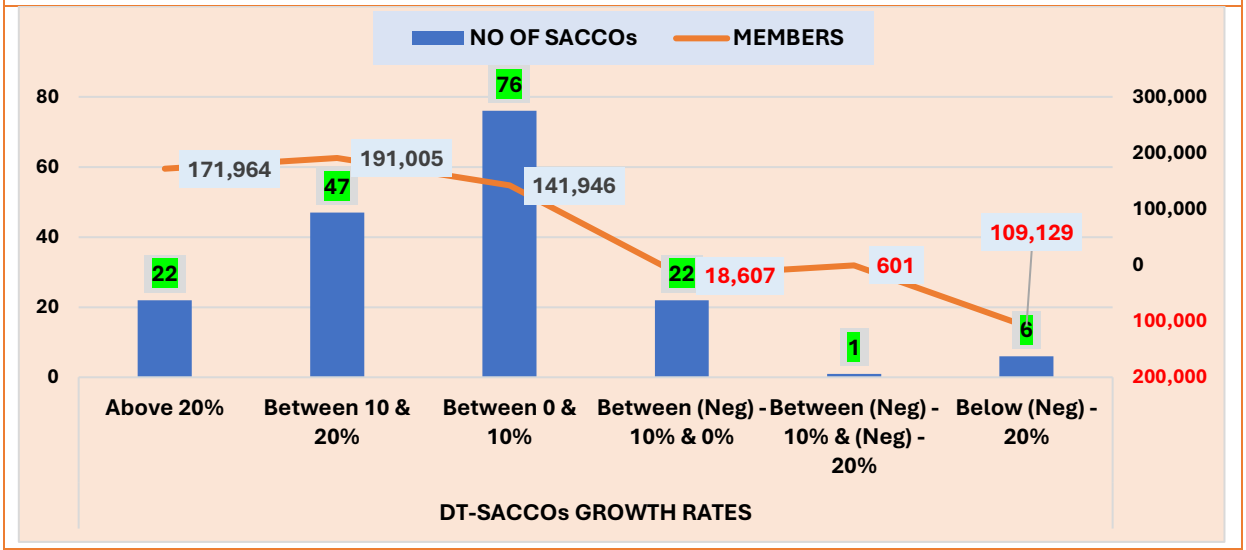

Source: SASRA Database

A similar trend is building up with regard to NWDT-SACCOs, even though they have been under prudential supervision for just about three (3) years, with a total of two (2) authorizations having already been revoked thereby reducing the total authorized NWDT-SACCOs from 185 in 2021 to 183 in 2023, yet their membership has during the same period risen from 0.35 million members in 2021 to 0.52 million members as at December 2023. It is however significant to point out that the NWDT-SACCOs segment is likely to be affected in the numbers of authorized SACCOs, membership as well as other financial performance indicators in the medium to long term, as many of the authorized NWDT-SACCOs convert to deposit-taking businesses.

6.3. Comparative Growth Rates of Membership

Figure 13 and Figure 14 provide a comparative view of growth rates in the membership of DT-SACCOs and NWDT-SACCOs in 2023 respectively and shows that 38-Regulated SACCOs composed of 22-DT-SACCOs and 16-NWDT-SACCOs grew by over 20% during the period with cumulative membership increase of 171,964 member and 26,212 members respectively. The highest membership growth was however witnessed among 75-Regulated SACCOs which grew by a range of between 10% and 20% composed of 47-DT-SACCOs and 28-NWDT-SACCOs, and which recorded a cumulative membership growth of 191,005 members and 11,877 members respectively. However, the majority of Regulated SACCOs totalling to 178 grew their membership by a range of between 0% and 10%.

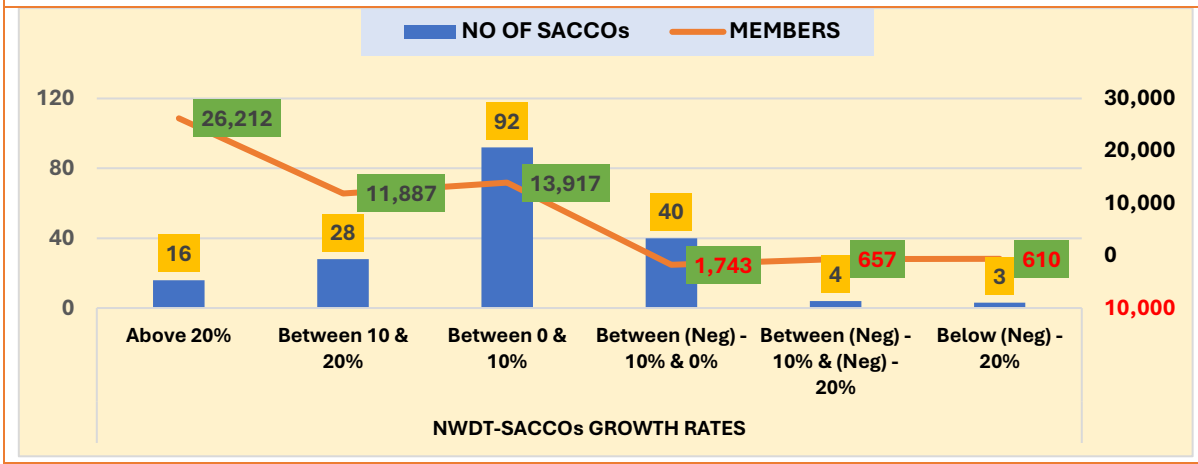

Figure 13: Growth Rates in membership of DT-SACCOs in 2023

Source: SASRA Database

There were equally a significant number of Regulated SACCOs which registered negative growth rate in their membership, implying that their existing members withdraw and voluntarily exited the membership in accordance with the cooperative principle of open and voluntary membership. In this category, there were a total of 76-Regulated SACCOs composed of 29-DT-SACCOs and 47-NWDT-SACCOs and which cumulatively shed-off a total of 131,347 members, with the DT-SACCOs shedding off 128,337 members while the NWDT-SACCOs shed-off 3,010 members during the period. A majority of the Regulated SACCOs which registered negative growth rates are those which are operating on conditional licenses and/or authorizations. Its noteworthy that on average, the 29-DT-SACCOs which recorded negative growth shed off more members at an average of 4,425 members per SACCO, while the 47- NWDT-SACCOs in the same category shed off members at an average of 64 member per SACCO. Consequently, the Board and Management of these Regulated SACCOs ought to put in place adequate measures to stem the haemorrhage of members in order to avoid the imminent collapse and eventual revocation of their licenses or authorizations. Such measures may include voluntary amalgamation and consolidation with other Regulated SACCOs with stronger balance sheets.

Figure 14: Growth Rates in membership of NWDT-SACCOs in 2023

Source: SASRA Database

6.4. The Field of Membership Clustering

SACCOs like all other cooperatives are normally formed or founded along unique common bond linkages associated with the primary or principal economic activities of the founding members. Such common bond often become the field of membership from which the SACCO draws its membership, even though a majority of Regulated SACCOs in Kenya have since opened such field of membership to include any eligible adult. Nevertheless, the field of membership remains a critical reference point for Regulated SACCOs since a substantial proportion of their membership are still drawn from the very original common bond.

Additionally, the development of financial products and services for membership is also usually informed by the key economic activities associated with the field of membership. On the regulatory and supervisory front, the field of membership continues to play a key role in the assessment of the sectoral risks associated with a specific sector or subsector as well as designing appropriate regulatory interventions. Table 10 provides the four (4) main fields of membership in respect of which Regulated SACCOs are classified for regulatory and supervisory purposes.

Table 10: Summary of Field of Membership (common bond) clusters of Regulated SACCOs in Kenya

	Main Cluster	Key Characteristic	Sub-Cluster		Main Field of Membership
1.	**Government Based SACCOs**	The original membership is drawn from Government ministries and departments, State Corporations, Public Universities etc. Some have however opened their field of membership.	(a)	Teachers – Basic & Tertiary Education	The teaching profession
			(b)	State Corporations	Employees of state corporations (parastatals) and semi-autonomous government agencies.
			(c)	Universities	Employees of public universities.
			(d)	County Government	Employees of County Governments & County institutions.
			(e)	General Services & Administration	Employees of the government from Ministries and state departments
2.	**Agriculture Based SACCOs**	These SACCOs were founded upon the foundations of certain agricultural activities of the would-be members.	(a)	Crop Production	Farmers focussed on crop production.
			(b)	Dairy Production	Farmers focussed on dairy production and farming.
3.	**Private Sector Based SACCOs**	The original memberships were principally drawn from privately owned companies, institutions, or entities. The common bond would then be that the members are			

Table 10: Summary of Field of Membership (common bond) clusters of Regulated SACCOs in Kenya					
	Main Cluster	**Key Characteristic**	**Sub-Cluster**		**Main Field of Membership**
		employed by one private entity or group of similar private entities.			
4.	**Community Based SACCOs**	The original memberships were defined based on some social association of the potential members within the community such as churches, non-governmental organizations, businesses, and similar community initiative groupings.			
Source: SASRA Database					

Table 11 provides the distribution of the membership among the Regulated SACCOs within the four (4) clusters of fields of memberships. The distribution shows that each of the clusters of field membership registered an increase in membership. The 48-agriculture – based SACCOs had the highest number of members within their ranks at 2.85 million members representing 42% of the total membership, which is an increase from 2.74 million members reported in 2022. This was so, despite the fact that *M/S Kenya Midlands SACCO Society Ltd* whose license was revoked was an agriculture - based SACCO, and thus implying that the new members recruited by this cluster were much more than those lost through the revocation and voluntary exit.

On the other hand, the 116-Government – based SACCOs had the second highest membership within their ranks at 2.45 million members in 2023 representing 36% of the total membership compared to 2.27 million members reported in 2022 and which represented 35% of the total membership. They also had the highest increase of membership in absolute terms recording an increase of 180,109 members, largely driven by stability in government employment service, and the fact that this cluster constitutes the majority of Regulated SACCOs, despite the fact that *M/S Jacaranda SACCO Society Ltd* whose deposit taking license was revoked in 2023 fell under the cluster. The 87-Community – based SACCOs had their membership increase marginally from about 898,868 members in 2022 to 983,816 members in 2023, while the 106-Private sector – based SACCOs had an increase in members from 516,894 in 2022 to 563,376 members in 2023.

Table 11: Distribution of membership within the clusters of fields of membership

Source: SASRA Database

It is also significant to observe that among the 116 – Government – based SACCOs, the Teachers-based segment consisting of 40-SACCOs remains the most dominant with 1.54 million members representing 22% of the total membership in the SACCO industry in 2023. Although the Teachers' – based SACCOs originally drew their membership from the employees of Teachers Service Commission, it is apparent from the sheer number of members within this segment that the Teachers' – based SACCOs have since opened their common bonds and field of membership to the extent that a majority of their membership are no longer necessarily employees of the Teachers' Service Commission. Consequently, their risk assessment goes beyond the traditional employer based SACCOs and is now largely the same as risks associated with the Community – based SACCOs. This is a contrast to a majority of the Private sector – based SACCOs, especially the NWDT-SACCOs segment whose membership are still largely limited to the employer institutions in respect of which they draw membership.

7.0. FINANCIAL PERFORMANCE OF THE REGULATED SACCOs

7.1. The Growth and Performance

7.1.1. Introduction

The growth in total assets, deposits and loans are key monitoring tools in the performance and compliance of Regulated SACCOs, just like in any other deposit taking credit financial institution. Assets are the revenue generating portfolio of Regulated SACCOs and thus their growth, performance, and quality is always keenly monitored at the institutional level as well as at the regulatory compliance level. The bulk of the assets' portfolio of SACCOs is normally expected to be in the loans and other credit advances, and thus the performance of loans is at the very core of the stability and sustainability of a Regulated SACCO. Deposits within the Regulated SACCOs regime form the bulk of the source of funding of the loan assets, but are also members' individual savings, and thus the safety and accessibility of the same is at the core of the regulatory and supervisory regime of Regulated SACCOs under the Act and the Regulations made thereunder.

Table 12 provides the snapshot of the overall growth trends in Regulated SACCOs total assets, deposits, and loans in 2023 in comparison to the previous years and shows that each of the growth and performance parameters registered significant growth. This was so despite the fact that two (2) of the Regulated SACCOs namely *M/S Jacaranda SACCO Society Ltd* and *M/S Kenya Midlands SACCO Society Ltd* had their respective licenses withdrawn and thus their erstwhile parameters excluded from the trend analysis.

Table 12: Comparative growth trend in key performance parameters of Regulated SACCOs (2020 – 2023)

FINANCIALS	CLUSTER	KSHS BILLIONS				YEAR TO YEAR CHANGES	
		2020	2021	2022	2023	2021/22	2022/23

Source: SASRA Database

The trend analysis shows that the Regulated SACCOs cumulative asset portfolio increased to Kshs 971.96 billion in 2023 from Kshs 890.30 billion recorded in 2022. The rate of growth of the total assets on the other hand dropped to 9.17% in 2023 compared to a rate of growth of 10.31% reported in 2022, thus implying that the Regulated SACCOs total assets grew at a slower rate in 2023 than in 2022 as summarised in **Figure 15**. The DT-SACCOs segment had the highest proportion of the total

assets portfolio at Kshs 832.89 billion as at December 2023 which represented a growth rate of 9.09% from a total asset portfolio of Kshs 763.50 billion in 2022.

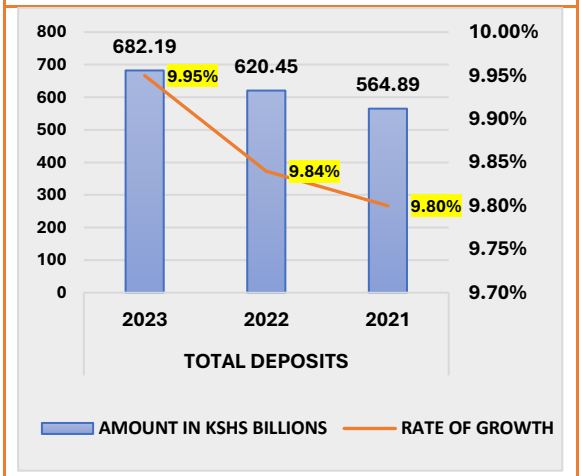

The cumulative total deposits of the Regulated SACCOs composed of the non-withdrawable (BOSA) and the withdrawable deposits (FOSA) on the other hand increased to Kshs 682.19 billion in 2023 from Kshs 620.45 billion in 2022. The rate of growth of the deposits in 2023 was 9.95% which was slightly higher that the rate of growth of 9.84% reported in 2022 and 9.80% in 2021 as summarised in **Figure16**. The DT-SACCOs segment had the highest proportion of the total deposits at Kshs 575.19 billion in 2023 representing a rate of growth in total deposits of 10.07% from Kshs 522.59 billion in 2022. The total deposits held by NWDT-SACCOs segment grew at a rate of 9.34% to reach Kshs 107.00 billion in 2023 from Kshs 97.86 billion in 2022.

Figure 15: Rate of Growth of Regulated SACCOs Total Assets (2021 – 2023)

Source: SASRA Database

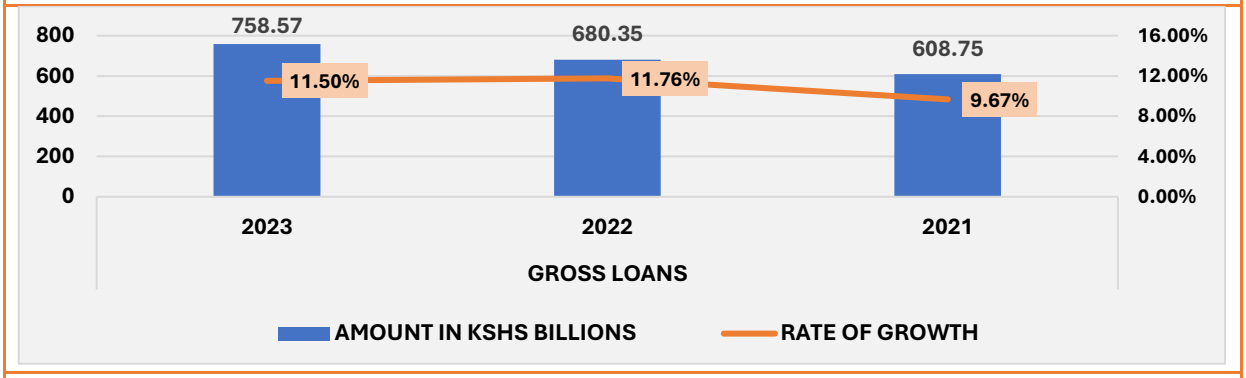

Figure 16: Rate of Growth of Regulated SACCOs Total deposits (2021 – 2023)

Source: SASRA Database

The gross loans within the Regulated SACCO industry grew at a rate of 11.50% in 2023 to reach Kshs 758.57 billion from Kshs 680.35 billion in the previous year. The rate of growth in the gross loans in 2023 represented a marginal decline from a rate of growth of 11.76% in 2022, but higher than the rate of growth in total deposits which increased marginally from 9.84% in 2022 to 9.95% in 2023 as summarised in **Figures 16 and 17**. The foregoing shows that the rate of demand for loans and other credit advances within the Regulated SACCO industry continues to remain higher than the rate at which the Regulated SACCOs are mobilizing deposits to fund the said loans.

Figure 17: Rate of Growth of Regulated SACCOs Gross Loans (2021 – 2023)

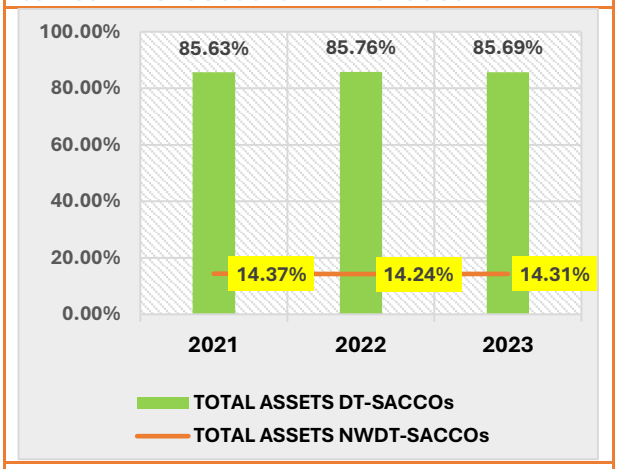

Source: SASRA Database

7.1.2. Comparative Performance and Growth Trends

Comparatively, the DT-SACCOs segment continued to have the largest market share proportion of the total assets, deposits, gross loans and net loans and advances as shown in **Figures 18, 19, 20 and 21** respectively. The DT-SACCOs accounted for 85.69% of the total assets of Regulated SACCOs, with NWDT-SACCOs accounting for 14.31% of the total assets. The market share of the NWDT-SACCOs in 2023 was however a marginal increase from the market share of 14.24% recorded in 2022 (**Figure 18**) and consistent with their higher rate of growth of 9.67% in 2023 compared to the DT-SACCOs segmental rate of growth in total assets of 9.09%.

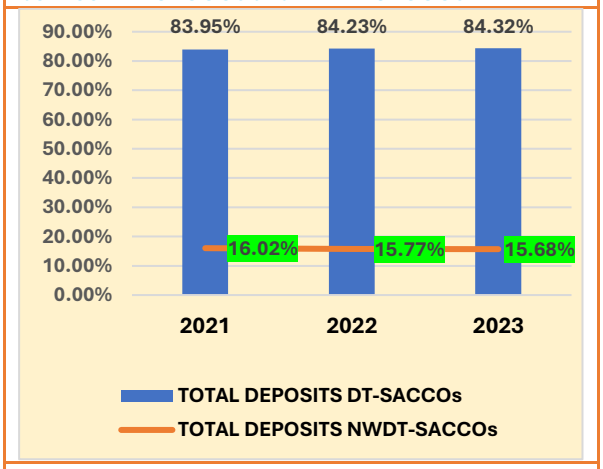

The DT-SACCOs segmental proportion of the total deposits was 84.32% while that of the NWDT-SACCOs segment was 15.68% (**Figure 19**), which again was consistent with the higher rate of growth in total deposits of DT-SACCOs at 10.07% in 2023 compared to a rate of growth of NWDT-SACCOs of 9.34% during the same period. Its noteworthy that the market share in total deposits for DT-SACCOs has consistently increased the last three years while that of NWDT-SACCOs has declined over the same period and the trend is expected to continue as more NWDT-SACCOs convert their business model to include deposit taking business (FOSA).

Figure 18: Segmental Total Assets Market Share between DT-SACCOs and NWDT-SACCOs

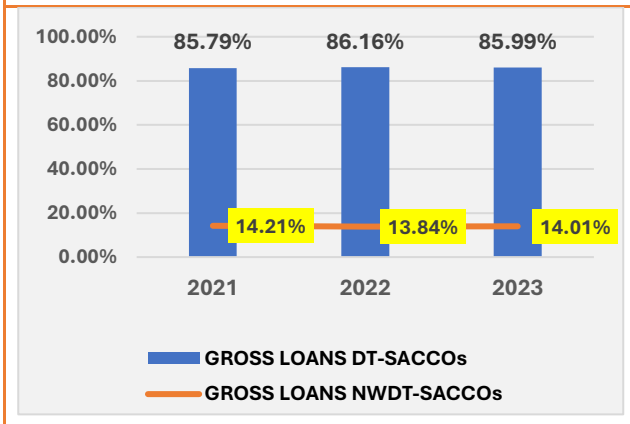

Source: SASRA Database

Figure 19: Segmental Total deposits Market Share between DT-SACCOs and NWDT-SACCOs

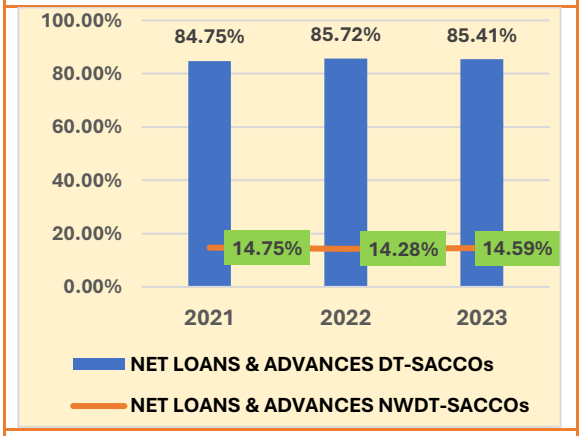

Source: SASRA Database

Figure 20: Segmental Gross Loans Market Share between DT-SACCOs and NWDT-SACCOs

Source: SASRA Database

Figure 21: Segmental Net Loans Market Share between DT-SACCOs and NWDT-SACCOs

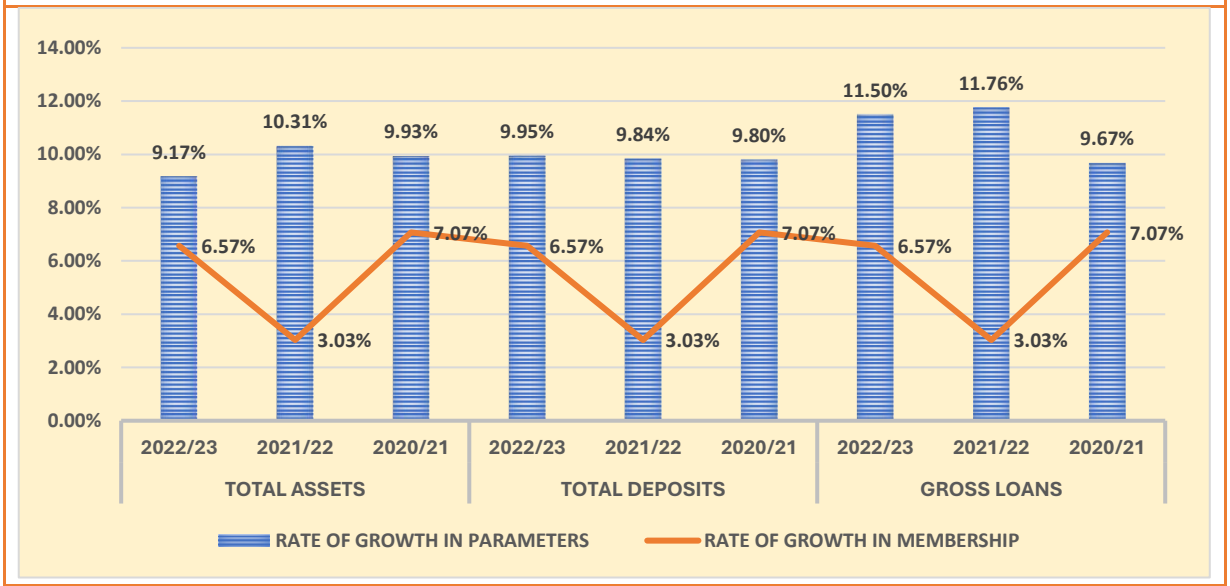

Source: SASRA Database

The DT-SACCOs gross loans on the other hand accounted for 85.99% of the gross loans' portfolio of Regulated SACCOs in 2023, which was a marginal decrease from 86.16% of the market share

reported in 2022 (Figure 20). The decrease shows that the NWDT-SACCOs' segment gained a slight ground in their market share of the gross loans which increased to 14.01% in 2023 compared to 13.84% reported in 2022 and consistent with their higher rate of growth in this parameter of 12.85% in 2023 compared to DT-SACCOs rate of growth of 11.28% in 2022.

Figure 22 on the other hand provides a snapshot of the rate of growth in total assets, deposits and loans of the Regulated SACCOs in comparison to the rate of growth in membership during the three-Year period to 2023. The comparative analysis shows very little proportionate correlation between the rate of growth in membership on the one hand and the rate of growth in assets, deposits or loans of the Regulated SACCOs, thereby implying that Regulated SACCOs will continue to grow in their key performance parameters irrespective of the rates of growth in membership.

Figure 22: Comparative rates of growth in membership of Regulated SACCOs against the key performance parameters (assets, deposits, and loans).

Source: SASRA Database

7.2. Regulated SACCOs by Total Assets

7.2.1. General overview

Regulated SACCOs are in accordance with the Authority's risk based supervisory policy framework clustered into three (3) main tiers based on their respective total assets in order to assess, classify, monitor and respond appropriately to the risks attendant to them. The three (3) clusters are the -

a) Large-Tiered SACCOs – these are those Regulated SACCOs whose total assets are in excess of Kshs 5 billion.
b) Mid-Tiered SACCOs – these are those Regulated SACCOs whose total assets range between Kshs 1 billion and Kshs 5 billion; and
c) Small-Tiered SACCOs – these are those Regulated SACCOs whose total assets are below the Kshs 1 billion threshold.

Table 13 provides the distribution of the Regulated SACCOs within the three (3) clusters and shows that the number of the large-tiered SACCOs increased to 53-Regulated SACCOs in 2023 with cumulative assets of 712.82 billion compared to the 47-Regulated SACCOs within this cluster with cumulative total assets of Kshs 623.63 billion reported in 2022. Their market share also increased to 73.34% of the total assets for the period ended December 2023, up from a market share of 70.05% reported in 2022. At the segmental level, there were five (5) DT-SACCOs which crossed the Kshs 5 billion threshold to join the large-tiered cluster namely *M/S Tembo SACCO Society Ltd; M/S Defence SACCO Society Ltd; M/S Chai SACCO Society Ltd; M/S GDC SACCO Society Ltd* and *M/S Tai SACCO Society Ltd*; while only one (1) NWDT-SACCO namely *M/S Cooperative Bank NWDT-SACCO Society Ltd* also crossed the Kshs 5 billion threshold in 2023.

Table 13: Distribution of Regulated SACCOs by their Total Assets (2021 – 2023)

CLUSTER OF REGULATED SACCOs BY TOTAL ASSETS	SEGMENT OF REGULATED SACCOS	NUMBER OF REGULATED SACCOs			TOTAL ASSETS (IN KSHS BILLIONS)			PROPORTION TO TOTAL ASSETS		
		2021	2022	2023	2021	2022	2023	2021	2022	2023
Total Assets above Kshs. 5 Billion.	DT-SACCOs	39	42	47	522.57	592.14	672.57	64.75%	66.51%	69.20%

Source: SASRA Database

The sharp increase in the number of large-tiered Regulated SACCOs in 2023 concurrently implied a reduction in the number of the mid-tiered and small-tiered Regulated SACCOs together with their respective proportionate market share in total assets. In this regard as summarised in **Figure 23**, the number of mid-tiered Regulated SACCOs decreased to 78-SACCOs and their market share shrunk to 18.15% of the total assets in 2023 compared to the 80-SACCOs which fell within this cluster in 2022 and which had a market share of 20.85%.

The small-tiered Regulated SACCOs on the other hand dropped to 226-SACCOs in 2023 with a market share of 8.51%; compared to 232-SACCOs in 2022 with a market share of 9.11% of the total

assets. The significant drop in the number of small-tiered SACCOs in 2023 is attributable to the two (2) SACCOs whose licenses were revoked in 2023 (*M/S Jacaranda SACCO Society Ltd* and *M/S Kenya Midland SACCO Society Ltd*), as well as four (4) other previously small-tiered SACCOs whose assets crossed the Kshs 1 billion threshold to join the mid-tiered category of Regulated SACCOs. It is equally significant to note that whereas the number of the small -tiered SACCOs reduced by 6-SACCOs, and their proportionate market share of total assets also dropped from 9.11% in 2022 to 8.51% in 2023; the total amount of their respective total assets in absolute terms increased from Kshs 81.08 billion in 2022 to Kshs 82.73 billion in 2023. The four (4) small-tiered SACCOs whose total assets crossed the Kshs 1 billion threshold in 2023 were *M/S Jamii Yetu DT-SACCO Society Ltd; M/S 2NK DT-SACCO Society Ltd; M/S K-Pillar DT-SACCO Society Ltd; and M/S Shelloyees Regulated NWDT-SACCO Society Ltd*.

Figure 23: Market share of Regulated SACCOs segmented by total assets clusters (2021 to 2023)

Source: SASRA Database

7.2.2. Regulated SACCOs' Total Assets by Field of Membership.

As already mentioned herein above, Regulated SACCOs are clustered into four (4) fields of membership (common bond) from which they originally drew the bulk of their membership namely the agriculture – based; the government – based; the community-based; and the private sector based Regulated SACCOs. **Table 14** provides the distribution of the Regulated SACCOs' total assets among the four (4) clusters of fields of membership.

The 116-Government – based Regulated SACCOs still controlled the bulk of the total assets amounting to Kshs 630.18 billion representing 64.84% of the total assets in the SACCO industry. This market share was however a decrease in their total assets market share of 65.66% amounting to Kshs 583.02 billion which was recorded in 2022 and probably resulted from the reduction in their number following the withdrawal of the deposit taking license of *M/S Jacaranda SACCO Society Ltd* previously in this category. The analysis however confirms the critical importance of the Government – based Regulated SACCOs since they constitute just 32.49% of all the Regulated SACCOs but their total assets accounted for 64.84% of the total assets in the industry, thereby making them the most dominant and necessitating appropriate allocation of supervisory resources in accordance with the Authority's risk based supervisory policy framework.

Table 14: Distribution of the Total Assets within the Fields of Membership Clusters

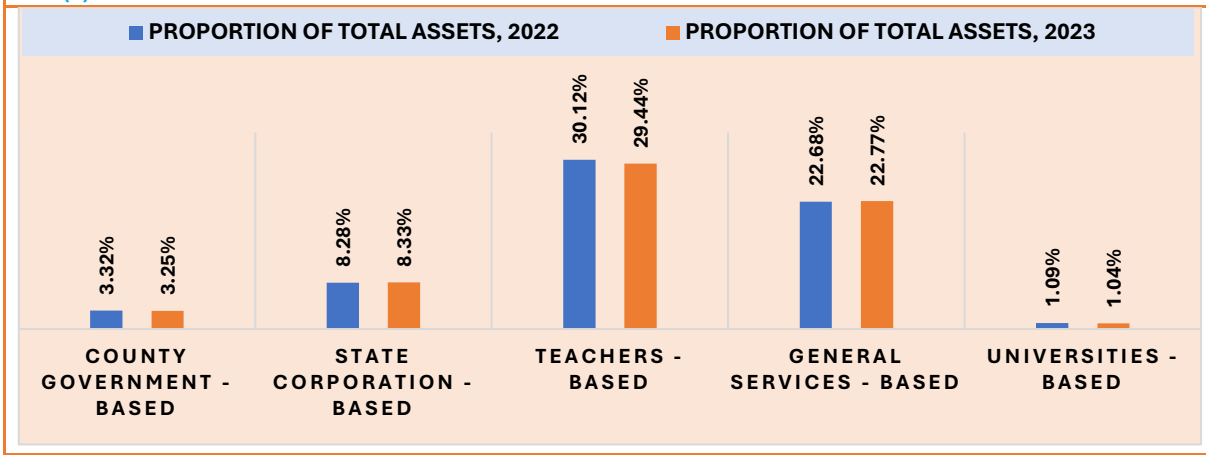

FIELD OF MEMBERSHIP CLUSTER	SACCO SECTOR/ INDUSTRY	REGULATED SACCO SEGMENT	NO. OF SACCOs		TOTAL ASSETS (Kshs Billions)		% TO TOTAL ASSETS	
			2022	2023	2022	2023	2022	2023

Source: SASRA Database

It is equally significant to observe that among the *116-Government – based* Regulated SACCOs, the *40-Teachers' – based SACCOs* had the highest proportion of the total assets within their field of membership at 29.44% of the entire Regulated SACCOs total assets in 2023, a slight drop from the proportion of 30.12% in 2022. The *31-General Services – based SACCOs* had the second highest proportion of the total assets of Regulated SACCOs at 22.77% in 2023 which is a marginal increase when compared to a proportion of 22.68% in 2022. The *25-State Corporation based Regulated SACCOs* on the other hand had a proportion of 8.33% of the total assets of the Regulated SACCO industry in 2023, which was also a marginal increase from a proportion of 8.28% in 2022, despite the fact that *M/S Jacaranda SACCO Society Ltd* whose license was withdrawn in 2023 fell under the State Corporations – based Regulated SACCOs.

Figure 24 depicts the distribution of the proportion of assets of the 116-Government -based SACCOs among the five (5) sub-clusters of General Services; County Government; State Corporation; Universities; and Teachers' – based SACCOs; and shows that the County Government based and the Universities – based SACCOs continued to account for the lowest proportion of the Regulated SACCO industry total assets among the Government – based SACCOs. The 106-private sector based Regulated SACCOs had the second highest market share of the total assets within the Regulated SACCOs' industry at 11.82% amounting to Kshs 114.86 billion in 2023 which was a slight improvement from the market share proportion of 11.54% representing Kshs 103.96 billion in 2022.

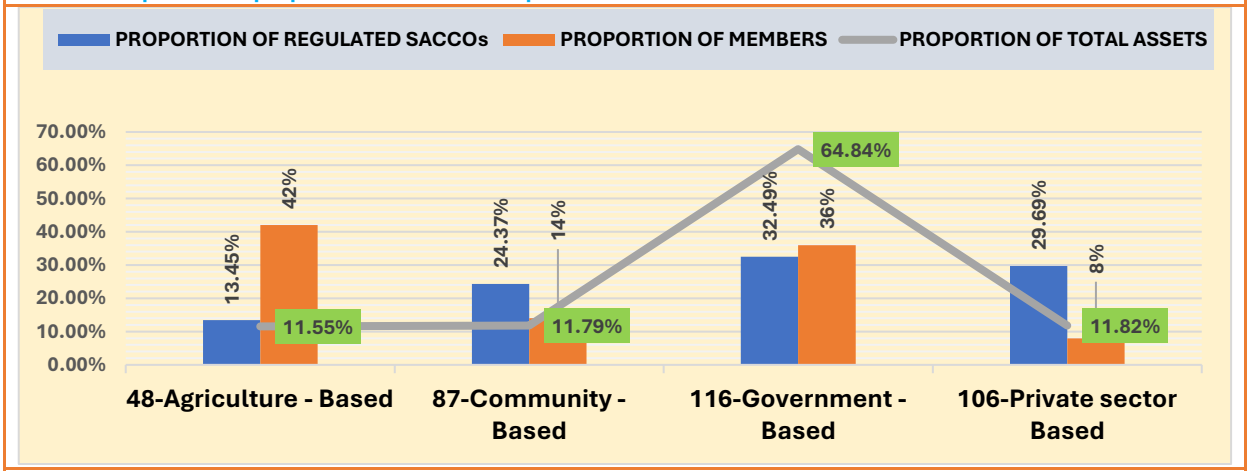

Figure 24: The proportionate distribution of total assets of Government – based Regulated SACCOs among the five (5) sub-clusters.

Source: SASRA Database

Despite harbouring the highest number of memberships at 42% of all Regulated SACCO members, the proportional total assets market share of the 48-Agriculture – based SACCOs remained the lowest for the second year running at just about 11.55% in 2023 and 10.96% in 2022, and thus implying the lowest total assets per capita cluster within the SACCO industry. This is further depicted in Figure 25 which provides a comparative proportionate representation of Regulated SACCOs' total assets based on the fields of membership, with the proportionate membership as well the proportion of the Regulated SACCOs within the cluster. The 87-Community – based SACCOs on the other hand represents 24.37% of all the Regulated SACCOs while their proportion of membership to total Regulated SACCO membership was at 14%, but their proportion of the total assets was at just 11.79%.

Figure 25: Comparative proportional representation of Regulated SACCOs' total assets based on the Field of Membership with the proportion of membership and SACCOs.

Source: SASRA Database

7.2.3. DT-SACCOs vs NWDT-SACCOs By Total Assets

Table 15 provides the specific distribution of the total assets within the DT-SACCOs segment based on their asset size clustering with the 47-Large tiered DT-SACCOs having the largest proportion of the segment's assets amounting to Kshs 672.57 billion representing 80.75%; compared to 42-Large tiered DT-SACCOs which had a proportion of 77.56% in 2022. This shows that there was an exponential increase of the segment's assets within just the 47-DT-SACCOs, leaving the balance of 19.25% of the segment's assets to be shared by the remaining 127-DT-SACCOs. This implies that the

127-DT-SACCOs had their average share of the total assets decline thus making their average asset portfolio quite small as shown in **Figure 26** and **Figure 27.** Cognizant that assets are the revenue generation stream of Regulated SACCOs, it is apparent that a majority of the DT-SACCOs are generating and likely to generate very little revenue from their assets thus the likelihood of negative impact on their stability and sustainability.

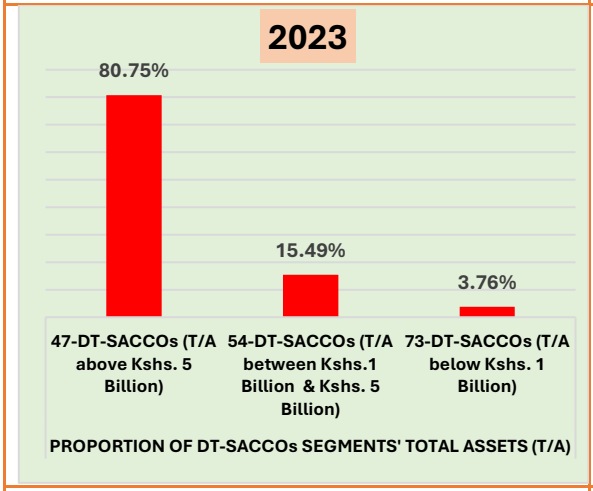

The number of DT-SACCOs with total assets ranging between Kshs 1 billion and Kshs 5 billion decreased from 56-DT-SACCOs in 2022 to 54-DT-SACCOs in 2023 with their proportionate market share also decreasing from 18.27% in 2022 to 15.49% in 2023. The decrease in the market share is attributed to the five (5) DT-SACCOs whose assets crossed over the Kshs 5 billion threshold to the large-tier category, while only three (3) DT-SASCCOs had their assets move from the small-tier category to the mid-tier category over the period.

Table 15: Distribution of the Total Assets within the DT-SACCOs segment

CATEGORY OF DT-SACCOs BY TOTAL ASSETS	SEGMENT OF REGULATED SACCOs			TOTAL ASSETS (KSH.BILLIONS)			PERCENTAGE PROPORTION TO TOTAL ASSETS		
	2021	2022	2023	2021	2022	2023	2021	2022	2023
Total Assets above Kshs. 5 billion	39	42	47	522.57	592.14	672.57	75.61%	77.56%	80.75%
Total Assets between Kshs.1 billion and Kshs. 5 billion.	55	56	54	135.21	139.49	129.02	19.56%	18.27%	15.49%
Total Assets below Kshs. 1 billion	82	78	73	33.32	31.88	31.30	4.82%	4.18%	3.76%
TOTALS	**176**	**176**	**174**	**691.10**	**763.50**	**832.89**

Figure 26: Proportion of Total Assets of DT-SACCOs in 2023

Source: SASRA Database

Figure 27: Proportion of Total Assets of DT-SACCOs in 2022

Source: SASRA Database

Table 16 on the other hand provides the specific distribution of the total assets within the NWDT-SACCOs segment based on their asset size with the 6-Large tiered NWDT-SACCOs having an asset proportion of 28.94% of the segment's total assets, which was an increase from a proportion of 24.83% in 2022 within the segment. This was largely due to the increase in the number of NWDT-SACCOs in the segment from 5-NWDT-SACCOs in 2022 to 6-NWDT-SACCOs in 2023. The small-tiered SACCOs accounted for 153-NWDT-SACCOs within the segment with the highest proportion of assets at 36.98% in 2023 which is a decline from a proportion of 38.81% reported in 2022 as summarised in **Figure 28** and **Figure 29.**

The slight drop in the proportion of assets within the segment was largely due to the one (1) NWDT-SACCO whose assets crossed the Kshs 1 billion mark to the mid-tiered NWDT-SACCOs. Similar to the DT-SACCOs segment, the majority of NWDT-

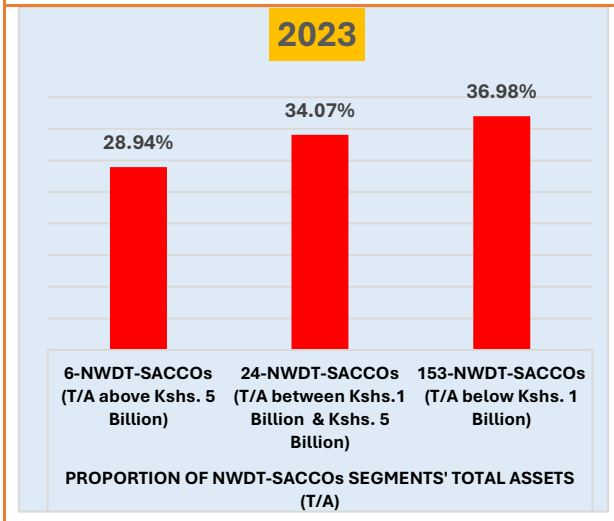

SACCOs remain quite small in size based on their average assets, implying therefore that they are also likely to generate very little revenue from their asset's portfolio and thus the likelihood of negative impact on their stability and sustainability.

Table 16: Distribution of the Total Assets within the NWDT-SACCOs segment

CATEGORY OF NWDT-SACCOs BY TOTAL ASSETS	SEGMENT OF REGULATED SACCOs			TOTAL ASSETS (KSH.BILLIONS)			PERCENTAGE PROPORTION TO TOTAL ASSETS		
	2021	2022	2023	2021	2022	2023	2021	2022	2023
Total Assets above Kshs. 5 billion	3	5	6	19.11	31.49	40.25	16.47%	24.83%	28.94%
Total Assets between Kshs.1 billion and Kshs. 5 billion	25	24	24	50.20	46.11	47.38	43.27%	36.36%	34.07%

7.3. Regulated SACCOs by Deposit Liabilities

7.3.1. General Distribution of Deposit Liabilities

The deposit liabilities within the Regulated SACCO industry are made up of the savings mobilised from the membership. There are three (3) main types of savings mobilised by Regulated SACCOs namely the non-withdrawable deposits (also known as the BOSA deposits; the withdrawable deposits (also known as the FOSA deposits); and in other cases, fixed or term deposits.

Table 17 provides a summary of the distribution of Total Deposit Liabilities of Regulated SACCOs by size of the deposits. The distribution shows that there was a significant increase of 7-Regulated SACCOs whose total deposit liabilities are above the Kshs 5 billion threshold to 39-Regulated SACCOs in 2023 from 32-Regulated SACCOs in 2022. Their respective proportion of total deposits also increased from 60.00% in 2022 to 65.27% in 2023 thereby implying increased concentration of deposits liabilities within just about a few of the Regulated SACCOs and calling for intensive supervisory measures in accordance with the Authority's risk based supervisory policy framework. This cluster of 39-Regulated SACCOs with deposit liabilities above Kshs 5 billion was made up of 35-DT-SACCOs and 4-NWDT-SACCOs, with 5-DT-SACCOs and 2-NWDT-SACCOs joining the cluster in 2023.

Table 17: Distribution of Total Deposit Liabilities of Regulated SACCOs by size of the deposits.

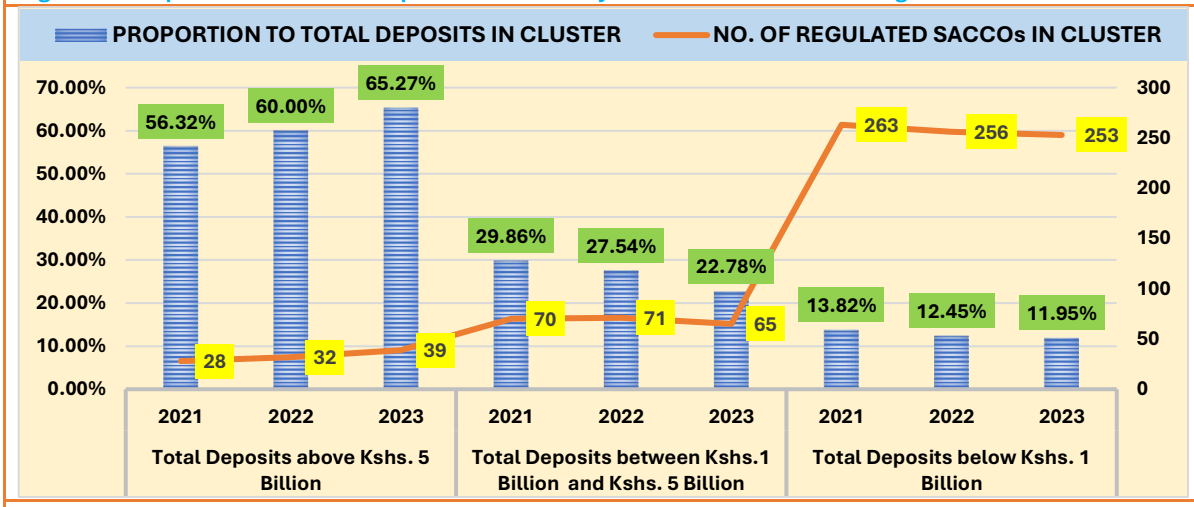

CATEGORY OF REGULATED SACCOs BY TOTAL DEPOSIT SIZE	SEGMENT OF REGULATED SACCOs	NUMBER OF SACCOs			TOTAL DEPOSITS (KSHS. BILLIONS)			PROPORTION TO TOTAL DEPOSITS		
		2021	2022	2023	2021	2022	2023	2021	2022	2023
Total Deposits above Kshs. 5 billion	DT-SACCOs	26	30	35	307.04	359.93	421.65	54.35%	58.01%	61.81%
	NWDT-SACCOs	2	2	4	11.09	12.35	23.64	1.96%	1.99%	3.46%
	TOTALS	**28**	**32**	**39**	**318.13**	**372.28**	**445.28**	**56.32%**	**60.00%**	**65.27%**
Total Deposits between Kshs.1 billion and Kshs. 5 billion	DT-SACCOs	51	51	47	131.54	128.45	117.64	23.29%	20.70%	17.24%
	NWDT-SACCOs	19	20	18	37.16	42.45	37.76	6.58%	6.84%	5.53%

	GRAND TOTALS	**361**	**359**	**357**	**564.88**	**620.45**	**682.19**			

Source: SASRA Database

The number of Regulated SACCOs whose total deposit liabilities ranged between Kshs 1 billion and Kshs 5 billion declined to 65-Regulated SACCOs in 2023 from 71-Regulated SACCOs in 2022 and largely attributed to the 6-Regulated SACCOs whose deposit liabilities surpassed the Kshs 5 billion threshold as shown in Figure 30. In tandem with the reduction in their total numbers, their respective proportion of total deposit liabilities also declined from 27.54% in 2022 to 22.78% in 2023.

Similarly, the number of Regulated SACCOs whose total deposit liabilities ranged below the Kshs 1 billion threshold dropped by three (3) from 256-Regulated SACCOs in 2022 to 253-Regulated SACCOs in 2023 and the decline is attributed to the two (2) of the SACCOs whose licenses were withdrawn, implying that only one (1) SACCO Society had its total deposits cross the Kshs 1 billion threshold in 2023.

Figure 30: Proportion of the total deposits' liabilities by size and the number of Regulated SACCOs

Source: SASRA Database

7.3.2. Growth Rates in Deposit Liabilities per Cluster

Despite the overall increase in the rate of growth of the deposit liabilities among the Regulated SACCOs by 9.95% and the segment rate of growth of 10.07% for DT-SACCOs and 9.34% for NWDT-SACCOs, an analysis of the rate of growth in deposit liabilities at the individual institutional levels shows varied rates of growth.

In respect of the DT-SACCOs segment, Figure 31 depicts the distribution of the rates of growth of the individual DT-SACCOs in 2023 and shows that a total of 156-DT-SACCOs had positive rates of growths in their deposit liabilities cumulatively adding to a sum of Kshs 52.99 billion to the DT-SACCOs' total deposit liabilities. This was a drop from the 158-DT-SACCOs which had positive rates of growth in their deposit liabilities amounting to Kshs 49.24 billion in 2022, implying that despite the drop in the number of DT-SACCOs with positive rates of growth in deposits in 2023, the total amount of deposits added increased by Kshs. 3.75 billion in 2023. The DT-SACCOs which registered positive rates of growth in deposits in 2023 included –

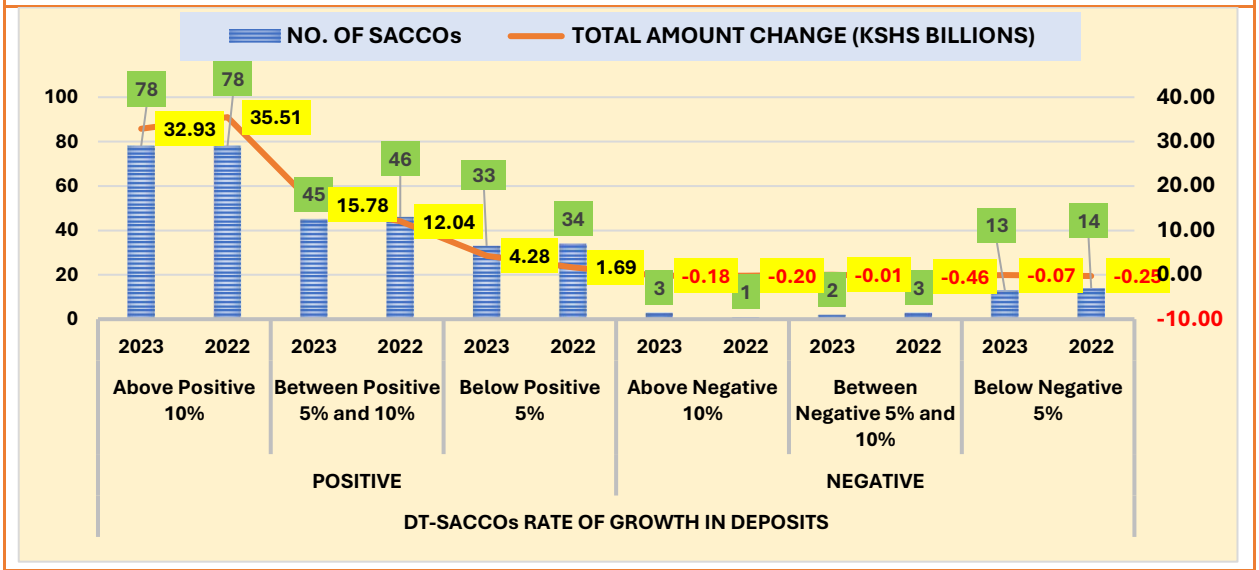

a) 78-DT-SACCOs whose deposits grew by over 10% amounting to Kshs 32.93 billion compared to the same number of DT-SACCOs in 2022 whose deposits grew by over 10% amounting to Kshs 35.51 billion.

b) 45-DT-SACCOs whose deposits grew by between 5% and 10% amounting to Kshs 15.78 billion compared to 46-DT-SACCOs in the same range in 2022 but whose deposits grew by Kshs 12.04 billion; and

c) 33-DT-SACCOs whose deposits grew by less than 5% amounting to Kshs 4.28 billion compared to 34-DT-SACCOs in the same range of growth in 2022 but whose deposits grew by Kshs 1.69 billion.

On the other side of the rate of growth spectrum, a total of 18-DT-SACCOs recorded negative rates of growth in 2023 implying that their respective total deposits liabilities declined by a total sum of Kshs 0.26 billion. The main reason for decline in deposit liabilities in Regulated SACCOs can be attributed to membership exits and refunds of deposits as a result of such withdrawal at higher rates than the rate at which the existing or remaining or new members are saving. In this range of DT-SACCOs whose deposit liabilities dropped are 13-DT-SACCOs whose deposit liabilities dropped by negative 5% and below (Kshs 0.07 billion); 2-DT-SACCOs whose deposits dropped by between negative 5% and negative 10% (Kshs 0.01 billion); and 3-DT-SACCOs whose deposits dropped by over negative 10% (Kshs 0.18 billion).

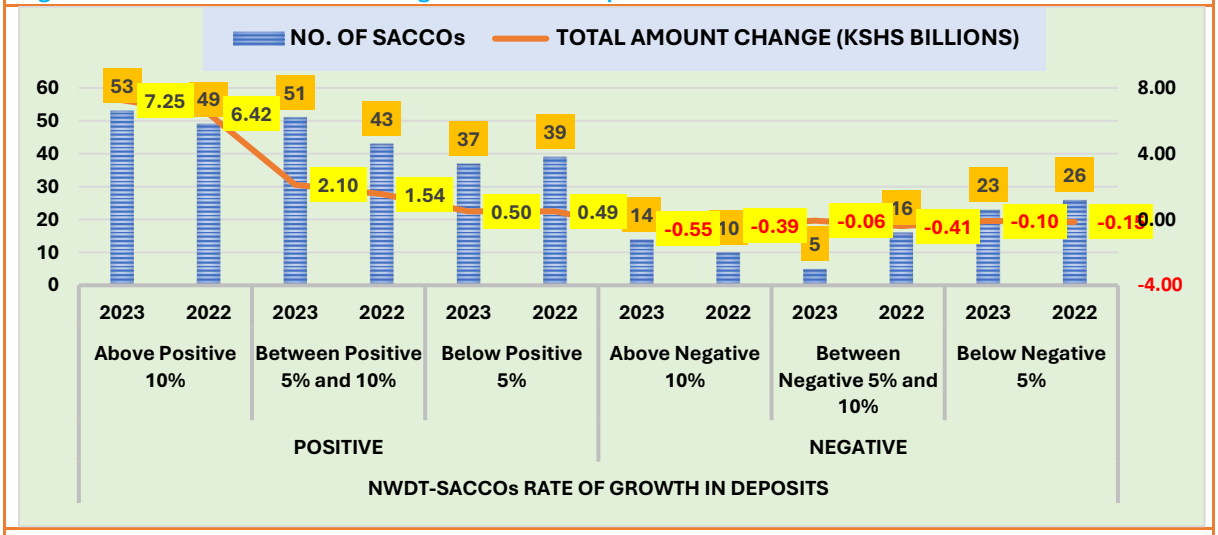

Figure 31: Distribution of the rates of growth in total deposits of DT-SACCOs in 2023

Source: SASRA Database

In respect of the NWDT-SACCOs segment, Figure 32 provides the distribution of the average segmental rate of growth of deposit liabilities of 9.34% among the 183-NWDT-SACCOs and shows that 141-NWDT-SACCOs recorded positive rates of growth in 2023 cumulatively adding up to a total sum of Kshs 9.85 billion in the segment's total deposit liabilities. This is an increase from the 131-NWDT-SACCOs with positive rates of growth in deposits, which added up to a cumulative deposit sum of Kshs 8.45 billion in 2022. Among the NWDT-SACCOs which registered positive rates of growth in the deposit liabilities included 53-NWDT-SACCOs whose deposits grew by over 10% (Kshs 7.25 billion); 51-NWDT-SACCOs whose deposits grew by between 5% and 10% (Kshs 2.10 billion); and 37-NWDT-SACCOs whose deposits grew by just under 5% (Kshs 0.50 billion).

Figure 32: Distribution of the rates of growth in total deposits of NWDT-SACCOs in 2023

Source: SASRA Database

On the other side of the spectrum of the rate of growth in deposit liabilities on NWDT-SACCOs are 42-NWDT-SACCOs which recorded negative rates of growths in their total deposits amounting to a total of Kshs 0.71 billion, thus signifying an overall decline in the deposits held, by the same margin. This was however a significant decrease from 52-NWDT-SACCOs which had negative growth rates in 2022 and which had shed-off a cumulative sum of Kshs 0.95 billion in 2022. In comparison with the DT-

SACCOs segment, it appears that in 2023 there were more NWDT-SACCOs which recorded negative rates of growth in deposits (42-NWDT-SACCOs) compared to the DT-SACCOs which recorded negative rates of growth in deposits (18-DT-SACCOs).

7.3.3. Distribution of Deposit Liabilities by Fields of Membership

Table 18 provides a pictorial view of the distribution of the total deposit liabilities based on the field of membership clusters in the Regulated SACCO industry and shows that the 116-Government based SACCOs continued to have the highest proportion of deposit liabilities amounting to Kshs 442.40 billion representing 64.85% of the total deposit liabilities in the industry in 2023. This is largely similar to the total assets' portfolio in respect of which the 116-Government based SACCOs controlled a market proportion of 64.84% during the same period.

It is also significant to note that the market share of the Regulated SACCOs within the Government-based cluster remained largely the same in 2023 as they were in 2022, with the 40-Teachers- based SACCOs having retained their market share of 30.15%; the 10-Universities based SACCOs having 1.08%; the 10-County Government based SACCOs having 3.34%; the 25-State Corporation based SACCOs having 8.66%; and the 31-General Services based SACCOs having 21.63% of the total deposit liabilities as shown in Figure 33. This implies that the all the sub-clusters of the Government based Regulated SACCOs grew their deposits at almost the same rate during the year 2023.

Table 18: Distribution of the Deposit Liabilities based on Field of Membership (common bond) clusters

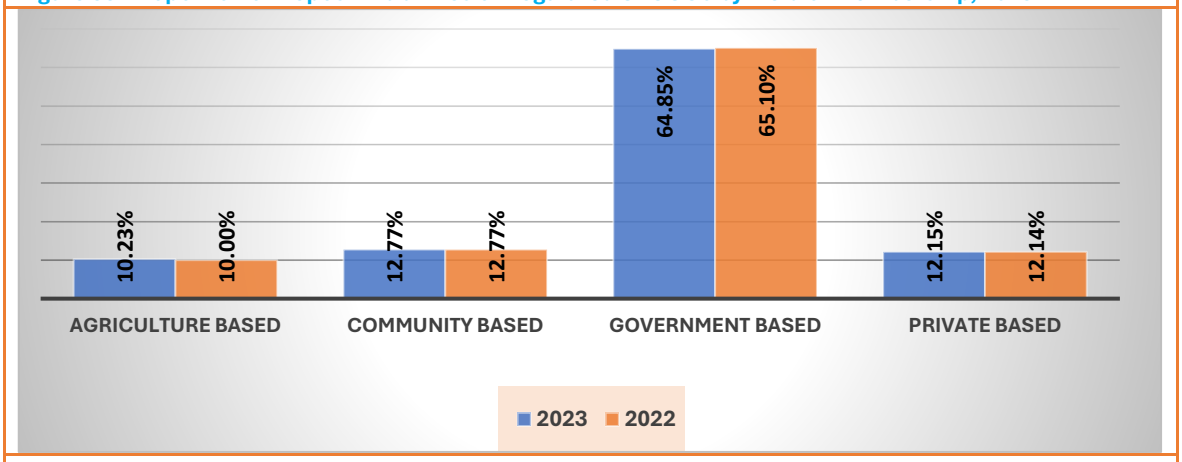

COMMON BOND	SECTOR /INDUSTRY	SACCO SEGMENT	No. of SACCOs		Total Deposits (Kshs Billions)		% to Total Deposits	
			2022	2023	2022	2023	2022	2023

Source: SASRA Database

The 87-Community based SACCOs had the second highest market share proportion of deposit liabilities in the SACCO industry at 12.77% in 2023 amounting to Kshs 87.10 billion which was nevertheless an increase from Kshs 79.21 billion reported in 2022, despite the market share remaining the same over the period. The 106-Private sector based Regulated SACCOs ranked third in terms of the market share proportion of deposit liabilities at 12.15% while the 48-Agriculture based

had the least proportion of the market share at 10.23%.

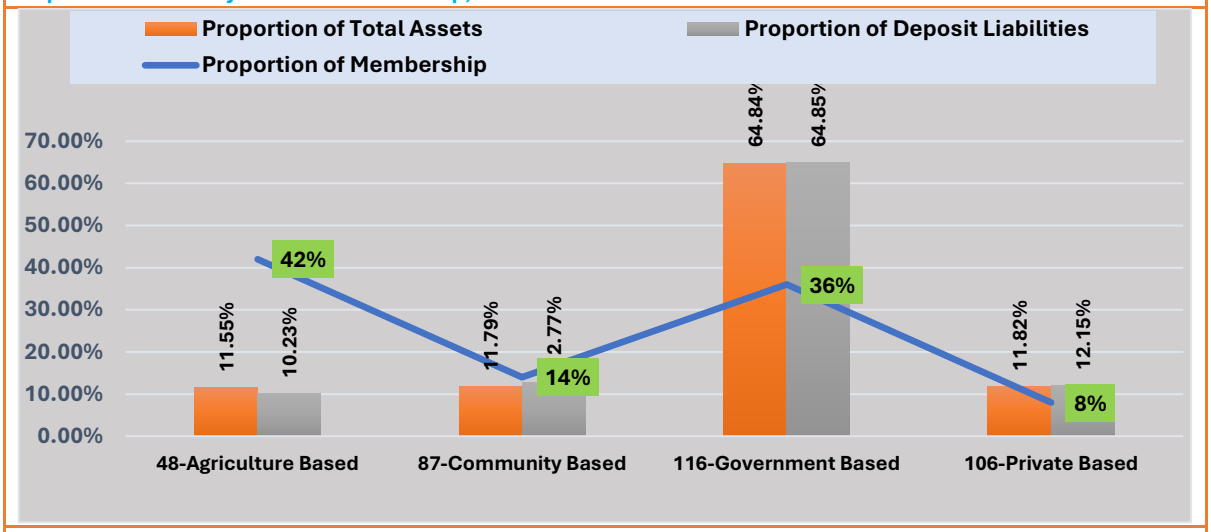

Figure 33: Proportion of Deposit Liabilities of Regulated SACCOs by Field of Membership, 2023

Source: SASRA Database

Figure 34 provides a comparative overview of the market share proportion of total membership, total assets, and total deposit liabilities of the Regulated SACCOs based on their field of membership clusters in 2023. The comparison depicts a very uneven distribution with concentration of membership being among the 48-Agriculture based Regulated SACCOs at 42%; while the total assets and deposits are concentrated among the Government based Regulated SACCOs at 64.84% and 64.85% respectively, thereby implying that the latter are the most dominant and active, but the former serves a relatively larger population base of membership than the rest of the clusters. A lot of effort is thus required towards improving the ability and capability of the agriculture based SACCOs to efficiently mobilise and retain more deposits, in order to fund their asset portfolio than they are currently doing. It is equally important to note that a majority of these agriculture based SACCOs actually fall within the small tier category with assets below Kshs 1 billion threshold, and therefore struggling to raise sufficient revenue for their operations.

Figure 34: Comparative market share of Regulated SACCOs' total membership, total assets, and total deposit liabilities by Field of Membership, 2023.

Source: SASRA Database

7.3.4. Distribution of Deposit Liabilities by Types of Deposits.

As already mentioned hereinabove, there are three (3) types of deposit liabilities within the Regulated SACCOs industry namely the non-withdrawable deposits (BOSA deposits); the withdrawable deposits (FOSA deposits); and the fixed or term deposits. **Table 19** provides the summary of the distribution of the deposit liabilities amounting to Kshs 682.19 billion in 2023 compared to the distribution of deposit liabilities of Kshs 620.45 billion in 2022 and shows that that the BOSA deposit liabilities constituted the largest amount of all the deposit liabilities amounting to Kshs 567.01 billion. This represented 83.12% of all the deposit liabilities in 2023 as depicted in **Figure 35** and an increase from a BOSA deposit liabilities of Kshs 515.65 billion recorded in 2022 and which represented 83.11% of all the deposit liabilities within the SACCO industry.

The withdrawable deposits (FOSA deposits) had the second highest proportion of the total deposit liabilities in the industry amounting to Kshs 89.28 billion representing 13.09% of total deposit liabilities. The FOSA deposits therefore grew in absolute terms from Kshs 83.78 billion in 2022 but its proportionate market share slightly declined from 13.50% which was reported in 2022. The decline was largely due to the fixed or term deposit liabilities which had the highest proportionate rate of growth during the year 2023 rising to Kshs 25.90 billion representing 3.80% of all the deposit liabilities during the year, an increase from Kshs 21.01 billion reported in 2022 which represented about 3.39% of the total deposit liabilities in 2022.

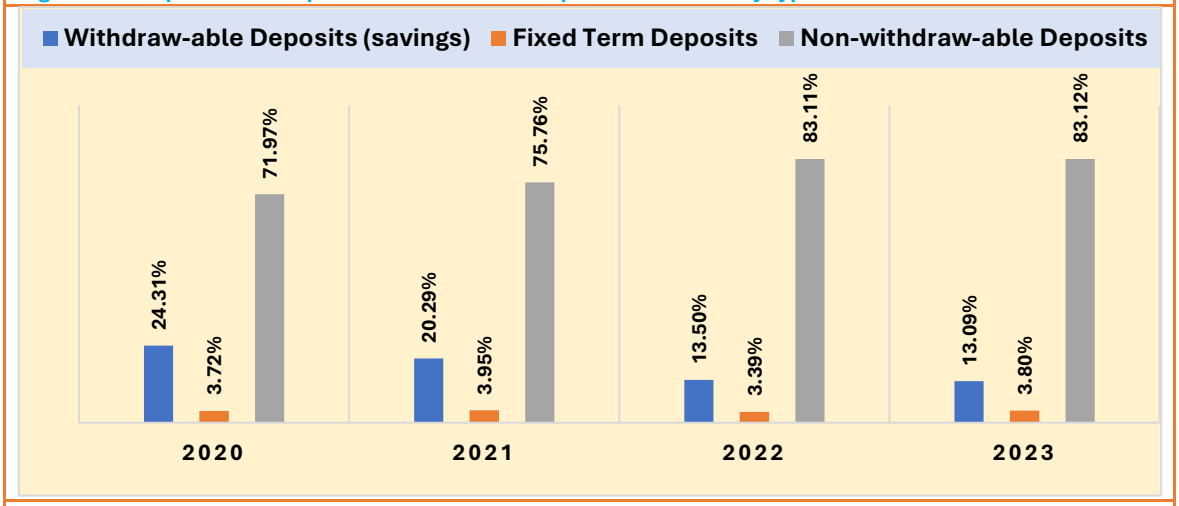

Table 19: Summary of the deposit liabilities based on their types

DISTRIBUTION OF DEPOSIT LIABILITIES	SEGMENT OF REGULATED SACCOs	TOTAL AMOUNT OF DEPOSITS (KSHS)			Y-TO-Y CHANGE (2022/23)
		2021	2022	2023	
Withdraw-able Deposits (savings)	DT-SACCOs	114,588,284,257	83,775,917,356	89,276,007,047	6.57%
Fixed Term Deposits	DT-SACCOs	22,332,173,531	21,019,332,049	25,901,094,588	23.23%
Non-withdraw-able Deposits (BOSA)	DT-SACCOs	337,330,027,889	417,794,134,988	460,012,069,807	10.10%
	NWDT-SACCOs	90,636,908,255	97,856,322,123	106,997,093,391	9.34%
	TOTALS	**427,966,936,144**	**515,650,457,111**	**567,009,163,198**	9.96%
Grand Totals		**564,887,393,932**	**620,445,706,516**	**682,186,264,833**	9.95%

Source: SASRA Database

It is also significant to note that the mobilisation of the fixed term and the withdrawable deposits (FOSA) business are restricted to DT-SACCOs only, while the mobilisation of the non-withdrawable deposits (BOSA) is undertaken by both the DT-SACCOs and NWDT-SACCOs. The distribution of the BOSA deposits between the DT-SACCOs and the NWDT-SACCOs shows that the DT-SACCOs segment had the highest proportion amounting to Kshs 460.12 billion representing 81.13% of the BOSA deposits and 67.43% of the total deposit liabilities within the SACCO system. The NWDT-SACCOs on the other hand had a BOSA deposit amount of Kshs 107.00 billion which represented 18.87% of the BOSA deposits and 15.68% of the total deposit liabilities. The analysis shows that the proportionate share of BOSA deposits to total deposit liabilities have largely remained the same and informed by the fact that the same are not withdrawable except upon exit from membership. The FOSA deposits which most often are accessible by the members on a need be basis however has witnessed significant decline in their proportions to the total deposit liabilities informed by the ease of access by members, while the proportion of the fixed term deposits have generally been on an upward trajectory, informed by the comparatively better returns associated with them.

Figure 35: Proportionate representation of total deposits liabilities by type.

7.3.5. Regulated SACCOs by Number of Deposit Accounts

The Statement of Deposit Return is an off-site statutory tool utilised by the Authority to monitor, evaluate, and report on the performance and changes in the deposits (savings) mobilised and held by Regulated SACCOs. The return reports on a quarterly basis the –

a) range of amounts of deposits held by Regulated SACCOs;
b) number of deposit accounts held by Regulated SACCOs in each range; and
c) amounts of deposits held by Regulated SACCOs in such accounts in each range.

Table 20 provides a summary of an analysis of the statement of deposit return for the 174-DT-SACCOs and shows that the total number of deposit accounts (BOSA and FOSA accounts) marginally increased from 14.52 million accounts in 2022 to 14.63 million accounts in 2023, consistent with the increase in the total membership of DT-SACCOs from 5.95 million members in 2022 to 6.32 million members in 2023. The majority of the deposit accounts numbering 13.12 million and representing 89.70%, held below Kshs 50,000 with a total cumulative value of Kshs 34.59 billion, which is an increase from Kshs 31.40 billion being the value of deposits held in the deposit accounts within the same range but representing only 6.01% of the total deposit liabilities of DT-SACCOs as shown in Table 21.

The members of DT-SACCOs with deposit accounts ranging from Kshs 300,000 to Kshs 1,000,000 had the largest amounts of deposits in their SACCOs amounting to an aggregate of Kshs 228.62 billion representing 39.45% of the total deposit liabilities held by the DT-SACCOs in 2023 compared to a sum of Kshs 212.39 billion representing 40.64% of the total deposit liabilities of DT-SACCOs in 2022. The total number of deposit accounts within this range stood at 452,000 accounts representing a mere 3.09% of all the deposit accounts held by the DT-SACCOs. The number of deposit accounts with over Kshs 1 million among DT-SACCOs increased to 98,000 accounts representing 0.67% of all the deposit accounts but held an aggregate sum of Kshs 188.93 billion representing 32.85% of the total deposit liabilities of DT-SACCOs. The foregoing analysis shows that 71% of the total deposit liabilities of DT-SACCOs (within the range of over Kshs 300,000) is held by just a few members represented by about 3.67% deposits accounts.

The range of deposit accounts holding the sums of between Kshs 50,000 and Kshs 100,000 increased from 350,000 accounts in 2022 representing 2.41% of the total accounts to 399,000 accounts in 2023 representing 2.73% of the total deposit accounts held by DT-SACCOs. The total amounts of deposits held in the accounts within this range also increased from Kshs 25.31 billion representing 4.84% of the total deposit liabilities in 2022 to Kshs 27.11 billion representing 4.71% of the total deposit liabilities of DT-SACCOs in 2023.

7.4. The Sectoral Lending Report of Regulated SACCOs

7.4.1. Overview

Sectoral lending reports is an important tool for periodic analysis of the economic sectors in respect of which the credit and other loan advances extended by Regulated SACCOs are intended to fund. It is also a tool for monitoring the risks associated with specific sectors of the economy, with a view to developing appropriate credit and loan products with sufficient safeguards to address the attendant risks, so as to reduce incidences of default. The Regulated SACCO industry has adopted a standard and uniform reporting for its annual sectoral lending based on eight (8) economic sectors namely agricultural sector; trade sector; manufacturing and servicing industries sector; education sector; human health sector; land and housing sector; and finance, investments, and insurance sectors.

Table 22 and Figure 36 provide the summary of the sectoral credit lending by SACCOs during the year 2023 and shows that the Regulated SACCOs cumulatively issued a total sum of Kshs 460.47 billion with the bulk thereof amounting to Kshs 124.16 billion and accounting for 26.97% of the total loans disbursed going to fund the land and housing sectors. This was however a decline from a proportionate share of 33.24% of the sectoral lending which was advanced by Regulated SACCOs towards the lands and housing sectors of the economy in 2022. The education sector took the second highest chunk of the credit disbursed by Regulated SACCOs amounting to Kshs 96.33 billion representing 20.92% of all the credit disbursements, and mainly to pay school fees and associated expenses for members of SACCOs and their dependants, but which was also a decline from the proportion of 21.98% of credit disbursements towards the education sector in 2022.

Table 22: Sectoral credit lending by Regulated SACCOs, 2023

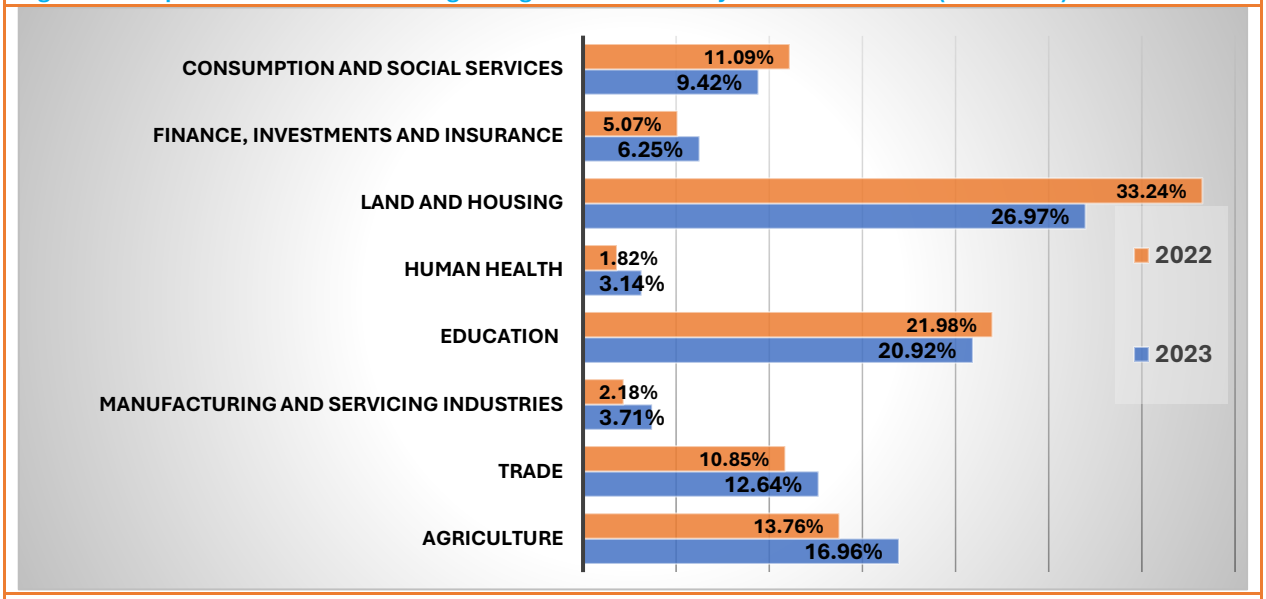

ECONOMIC SECTOR	REGULATED SACCO SEGMENT	AMOUNT GRANTED (KSHS)	PROPORTION TO TOTALS

The agricultural sector from which the Regulated SACCOs draw the bulk of their membership at 42% on the other hand received a total credit disbursement amounting to Kshs 78.09 billion

representing 16.96% of the total credit disbursements in 2023, and comparatively higher than a proportion of 13.76% disbursed in 2022. The foregoing demonstrated increased lending activities by Regulated SACCOs towards the agricultural sector in 2023 compared to 2022. Similar gains were also noted in the trade sector which received 12.64% of the credit disbursements in 2023 amounting to Kshs 58.19 billion compared to a proportionate disbursement of 10.85% in 2022.

Figure 36: Proportionate sectoral lending of Regulated SACCOs by Economic Sectors (2022 -2023)

Source: SASRA Database

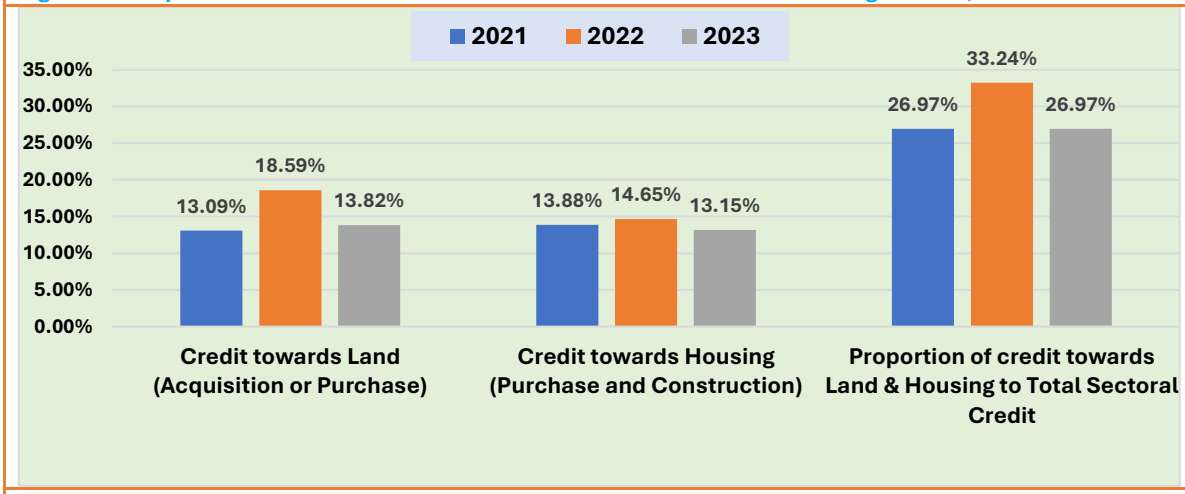

SACCOs are cooperative enterprises and are therefore by design and legal framework socio-economic business vehicles. As such they are expected to fund consumption and social activities or ventures of their members, such as payment of utilities, consumer durables and social or communal expenses. The proportion of credit disbursed in this regard however declined to 9.42% amounting to Kshs 43.37 billion of the total credit disbursements in 2023 compared to a proportion of 11.09% that was disbursed towards consumption and social services in 2022. This implies that Regulated SACCOs adopted a more cautious lending model towards non-productive activities or the membership of SACCOs had other available source of income to fund their consumption and other social activities.

7.4.2. Analysis of the Sectoral Lending by Economic Subsectors

As already mentioned herein above, the land and housing sectors of the economy received the highest amount of funding amounting to Kshs 124.19 billion in 2023 which constituted a proportion of 26.97% of the total credit disbursements by Regulated SACCOs in 2023. The aforementioned credit disbursements were distributed between the land (purchase and acquisition) which received Kshs 63.62 billion accounting for 13.82% of the total sectoral lending; while the credit disbursements to housing (outright purchase or construction) amounted to Kshs 60.57 billion accounting for 13.15% of the total credit disbursements made in 2023 as summarised in Figure 37. It is significant to note that comparatively, there was a drop in the proportion of credit towards land acquisition or purchase from 18.59% in 2022 to 13.82% in 2023, while the proportion of credit towards housing construction or purchase equally decreased from a high of 14.65% recorded in 2022 to 13.15% in 2023, thus resulting in the overall decrease in the proportion of credit disbursements towards land & housing

economic sector from 33.24% in 2022 to 26.97% in 2023.

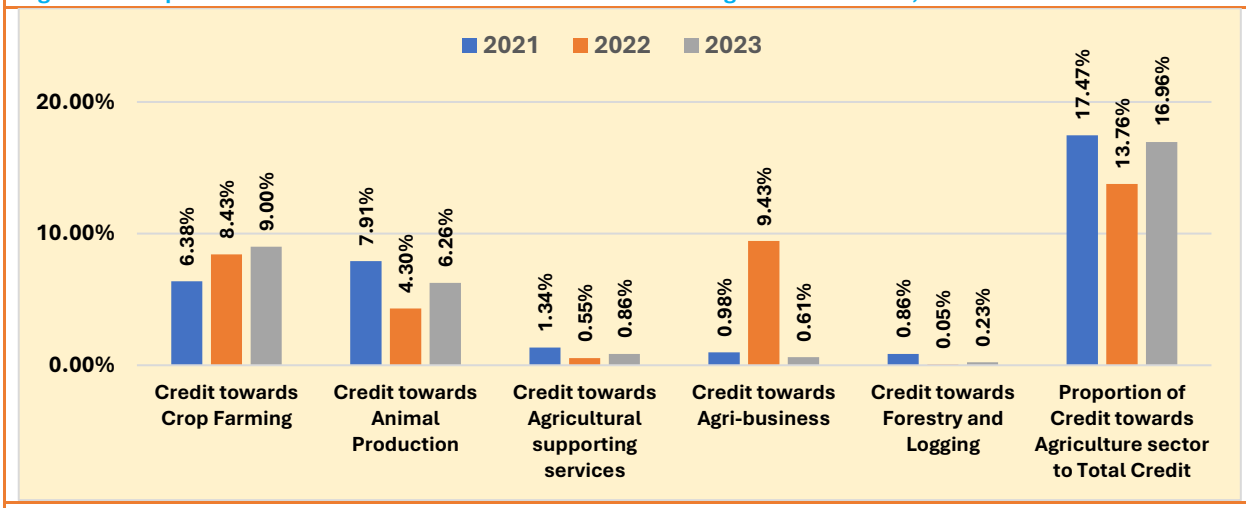

Figure 37: Proportionate distribution of credit disbursements to Land & Housing Sectors, 2023

Source: SASRA Database

The proportionate decrease in the credit disbursements towards land and housing sector of the economy is explainable by the sharp increase in the proportion of credit lending towards agricultural sectors of the economy which increased from 13.76% in 2022 to a proportion of 16.96% amounting to Kshs 78.10 billion in 2023. Figure 38 provides the general distribution of the credit disbursements of Kshs 78.10 billion within the agricultural sectors of the economy and shows that the highest portion thereof amounting to Kshs 41.42 billion representing 9.00% of the total credit disbursement funded the crop production mainly the cash crops of tea and coffee. The credit disbursements towards animal production amounted to Kshs 28.84 billion accounting for 6.26% of the total credit disbursements by Regulated SACCOs in 2023, with the remaining proportions funding agricultural support services (Kshs 3.96 billion), agri-business (Kshs 2.80 billion), and forestry (Kshs 1.07 billion).

Figure 38: Proportionate distribution of credit disbursements to Agricultural Sector, 2023

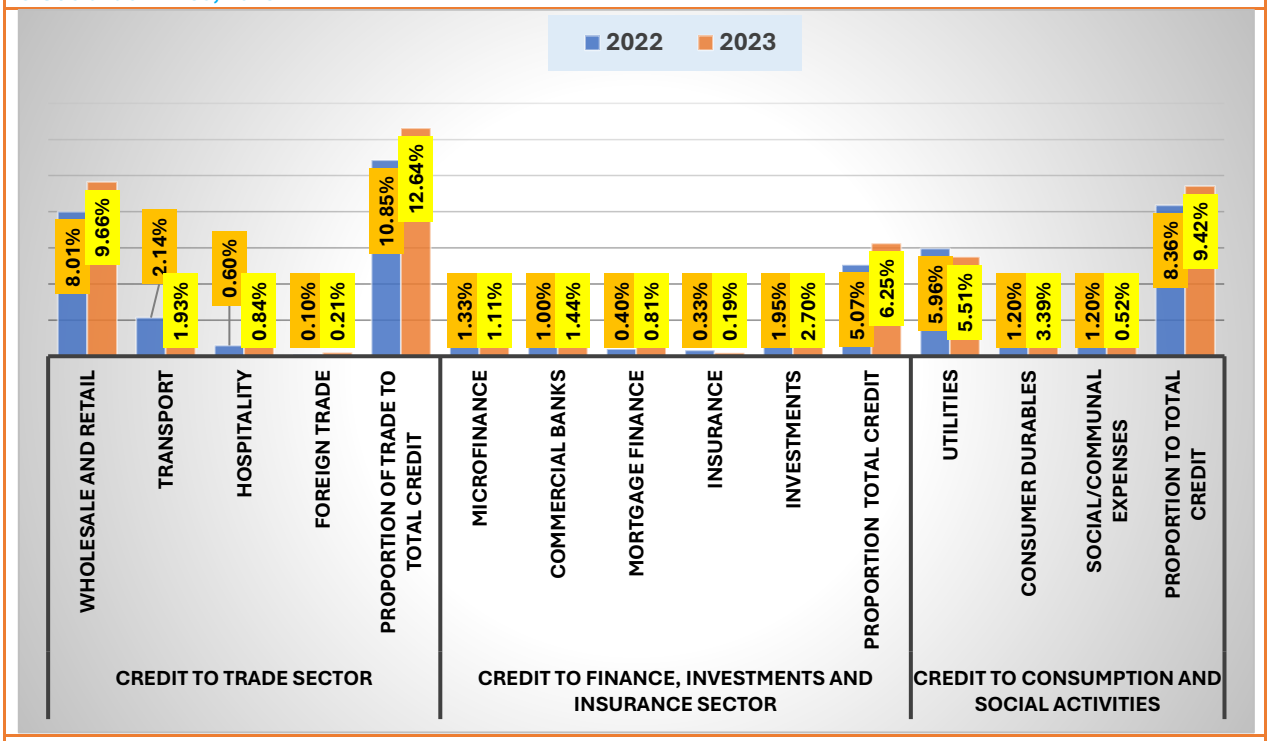

Source: SASRA Database

Figure 39 provides a summary of the credit disbursements by Regulated SACCOs towards the Trade sectors amounting to Kshs 58.20 billion distributed between wholesale and retail trade at

9.66% (Kshs 44.49 billion; the hospitality industry at 0.84% (Kshs 3.88 billion), transport industry at 1.93% (Kshs 8.88 billion), and foreign trade at 0.21% (Kshs 945.68 million). The credit disbursements towards consumption and social services activities amounting to Kshs 43.37 billion which funded payment of utilities at 5.51% (Kshs 25.36 billion), consumer durables at 3.39% (Kshs 15.62 billion), and lastly the social and communal expenses at 0.52% (Kshs 2.39 billion).

8.0. FINANCIAL STABILITY OF THE REGULATED SACCO INDUSTRY

8.1. Introduction

The Authority's risk based supervisory framework deploys the use of CAEL rating framework for assessing, monitoring, and reporting on the financial stability and safety of the Regulated SACCOs both at the sectoral (industry) and institutional levels. The CAEL rating framework assesses, monitors and reports on the SACCO industry and individual SACCOs' compliance and performance based on their capital adequacy, asset quality, earnings, and liquidity ratios. The performance thresholds are prescribed in the *Regulations 2010* for DT-SACCOs and the *Regulations 2020* for the NWDT-SACCOs, while others are premised of the best comparable industry practices.

Table 23 provides the comparative aggregate financial stability indicators for DT-SACCOs for the period ended December 2023 in comparison with the previous years and shows that cumulatively, the DT-SACCOs segment remained well capitalised beyond the prescribed minimum thresholds, as discussed in this report. Additionally, all the other financial stability indicators registered positive deviations during the period, with the exception of the non-performing loan ratio which had a negative deviation for the segment.

8.2. The Capital Adequacy Indicators for Regulated SACCOs

Core capital is defined as the "*fully paid-up members' shares, capital issued, disclosed reserves, retained earnings, grants and donations all of which are not meant to be expended unless on liquidation of the SACCO society*". The provisions of *Reg. 9 of the Regulations 2010* and *Regulations 11 of the Regulations 2020* prescribe the minimum core capital and capital adequacy requirements which every DT-SACCO and NWDT-SACCOs respectively must maintain at all times, even though in individual circumstances, the Authority has prescribed higher capital adequacy requirements for certain Regulated SACCOs, as a compliance and supervisory enforcement tool.

***The DT-SACCOs segment*:** For the DT-SACCOs segment, the *Regulations 2010* prescribes that a minimum of Kshs 10 million shall be maintained at all times together with a minimum of core capital to total assets ratio of 10%, core capital to total deposits of 10%; and institutional capital to total assets of 8%. **Figure 40** depicts a summary of the capital adequacy indices for the DT-SACCOs in 2023 as a comparison to the previous years and shows that in absolute terms the core capital for the 174-DT-SACCOs segment increased to Kshs 133.81 billion in 2023 from Kshs 124.89 billion reported in 2022, against the prescribed regulatory minimum of Kshs 10 million for each DT-SACCO. The capital adequacy ratios of core capital to total assets and core capital to total deposits; and institutional capital to total assets were also maintained above the prescribed minimum threshold at 16.07%, 23.26% and 9.11% respectively.

Figure 40: Trend Analysis of level of compliance with capital adequacy requirements by DT-SACCOs

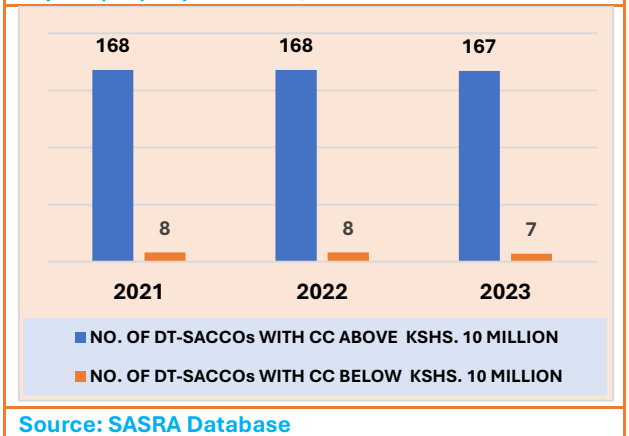

Source: SASRA Database

Although the analysis shows that the DT-SACCOs segment managed to maintain their core capital and related capital adequacy ratios above the prescribed minimum thresholds, thus signifying overall industry stability, it is apparent that there was a marginal drop in the core capital to total assets ratio from 16.36% in 2022 to 16.07% in 2023; and in core capital to total deposits from 23.90% in 2022 to 23.26% in 2023; and in the institutional capital from 9.58% in 2022 to 9.11% in 2023. The foregoing marginal drops showed that SACCOs grew their total assets and deposits at faster rates than the rate at which they grew their core capital. Cognizant of the fact that core capital of Regulated SACCOs is made up of share subscription of new members and retained earnings, the decline is evident that the DT-SACCOs' rate of retention of their surpluses was much less or static than the rate at which their assets grew. Indeed, the total amount of retained earnings for the DT-SACCOs decreased from Kshs 39.30 billion in 2022 compared to Kshs 38.60 billion in 2023.

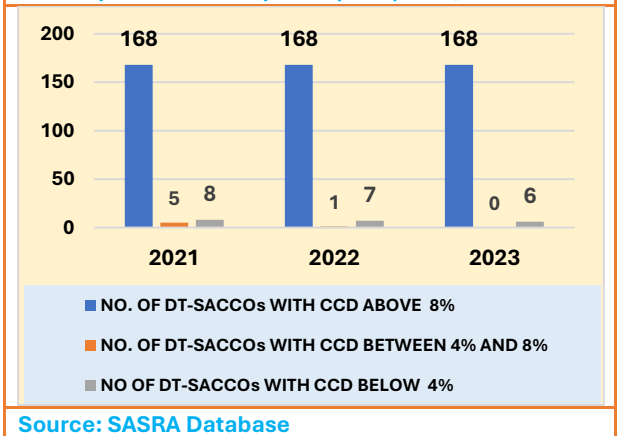

Figure 41 and Figure 42 provide a summary of level of individual compliance by DT-SACCOs with respect to core capital and core capital to total deposits respectively. The summary shows that 167-DT-SACCOs were fully compliant with core capital requirements and maintained a minimum of Kshs 10 million which is a drop from the 168-DT-SACCOs which maintained the prescribed core capital threshold in 2022; while 7-DT-SACCOs were not compliant and are operating on conditional licenses.

Figure 41: Number of DT-SACCOs complying with core capital (CC) requirements, 2023

Source: SASRA Database

Figure 42: Number of DT-SACCOs complying with core capital to total deposits (CCD) ratio, 2023

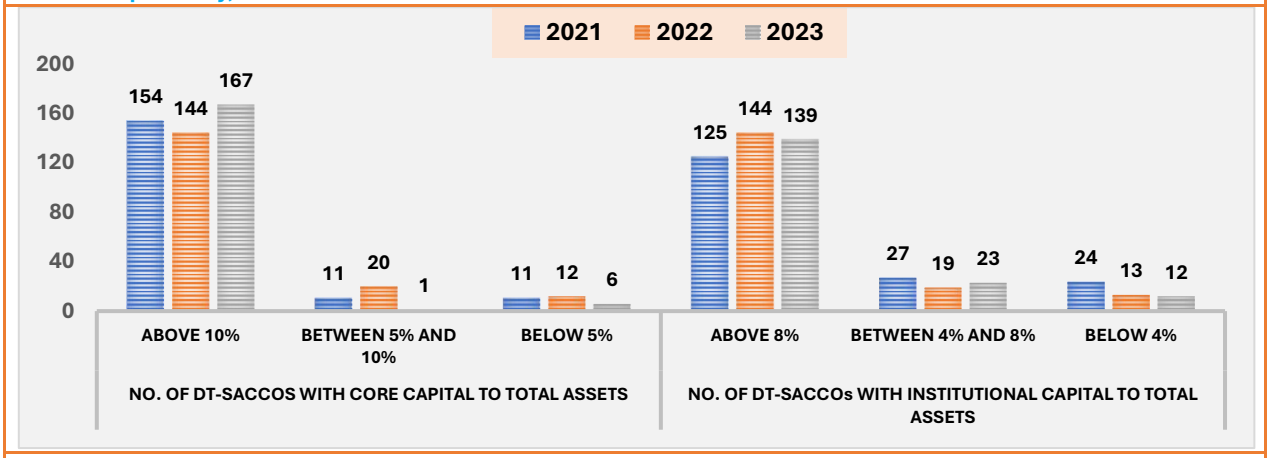

Source: SASRA Database

In regard to the core capital to total deposits, a total of 168-DT-SACCOs were fully compliant with their respective core capital to total deposits ratio, and maintained the ratio above the 10% threshold, with only 6-DT-SACCOs being non-compliant, which is a similar scenario recorded in 2022. Figure 43 on the other hand provides the number of DT-SACCOs complying with the core capital to total assets and

institutional capital to total assets ratios and shows that 167-DT-SACCOs were fully compliant with their core capital to total assets ratio and maintained the ratio above the 10% threshold, compared to 144-DT-SACCOs which were compliant with the ratio in 2022. Only 7-DT-SACCOs did not comply with this ratio, six (6) of which are operating below the 5% threshold and thus their respective licenses are due for revocation, but there are obtaining circumstances that makes the revocation inexpedient and unfair to the membership in accordance with *section 27 of the Act*.

Figure 43: Number of DT-SACCOs complying with core capital to total assets and institutional capital to total assets respectively, 2023.

Source: SASRA Database

The institutional capital to total assets ratio which is maintained mainly by retention of surpluses had 139-DT-SACCOs fully compliant therewith in 2023, which is a drop from the 144-DT-SACCOs which were compliant with the ratio in 2022. The number of DT-SACCOs whose institutional capital to total assets ratio ranged between 4% and 8% on the other hand, increased from 19-DT-SACCOs in 2022 to 23-DT-SACCOs in 2023, while those whose ratio fell below the 4% threshold declined from 13-DT-SACCOs in 2022 to 12-DT-SACCOs in 2023.

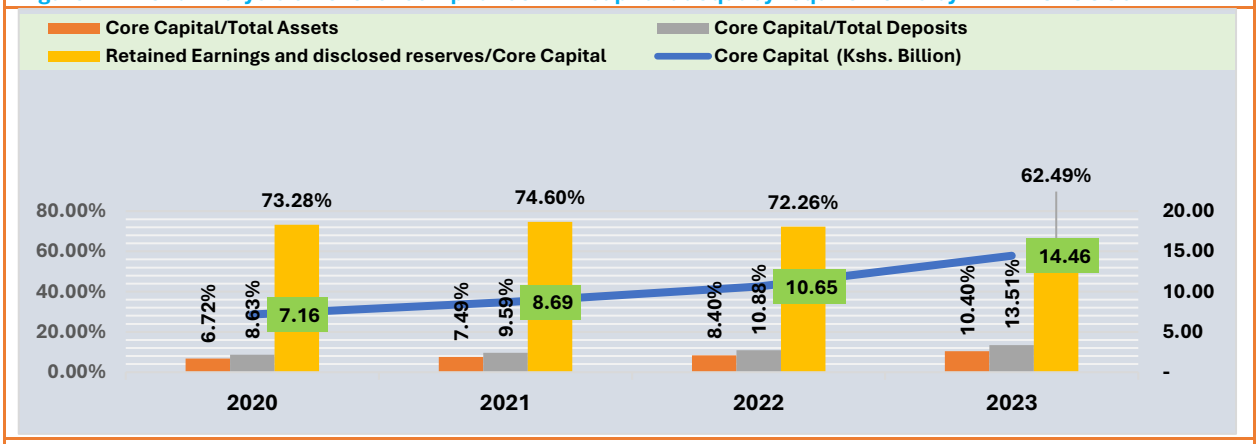

The decline in the number of DT-SACCOs complying with the institutional capital to total assets ratio is consistent with the aggregate decline in this ratio for DT-SACCOs from 9.58% in 2022 to 9.11% in 2023 as reflected in **Figure 40**. This calls for measures by DT-SACCOs to put in place strategies aimed at not just making surpluses, but retaining more from the surplus in order to cushion them from emergent economic shocks that may arise in the course of their operations.

***The NWDT-SACCOs segment*:** For the NWDT-SACCOs segment, the *Regulations 2020* prescribe that the minimum core capital to be maintained at all times as Kshs 5 million, together with a core capital to total assets ratio of 8% out which a half thereof (50%) should be composed of retained earnings. They equally prescribe that NWDT-SACCOs should have a core capital to total deposits of not less than 5%. **Figure 44** shows a summary of the trend analysis of compliance by NWDT-SACCOs, with the core capital and the related capital adequacy ratios. The analysis shows that the NWDT-SACCOs segment maintained a cumulative core capital and capital adequacy ratios above the prescribed minimum and thus deepening their continued stability following the commencement of their prudential supervision in 2021, with their aggregate core capital increasing from Kshs 10.65 billion in 2022 to Kshs 14.46 billion in 2023. Similarly, the associated core capital to total assets ratio grew from 8.40% in 2022 to 10.40% in 2023, but the retained earnings to the core capital dropped from a high 72.26% in 2022 to 62.49% in 2023, but still well above the prescribed statutory minimum of 50%.

The decline in the retained earnings to the core capital ratio is attributed to the mismatch between the average increase in their retained earnings of 17.40% in 2023 compared to the average increase in their core capital of 35.80% during the same period. It is also necessary to point out that the

share capital component for the NWDT-SACCOs was at Kshs 7.6 billion in 2023 which was an increase from Kshs 6.1 billion recorded in 2022, implying that several NWDT-SACCOs increased their minimum share capital during the period at a faster than retention of surpluses. This is not a good practise, and it is unsustainable in the long term, and should therefore be discouraged because it is inconsistent with the cooperative business model, whereby share capital ought to be as nominal as possible, and the largest proportion of capital ought to be institutional capital (through retention of surplus).

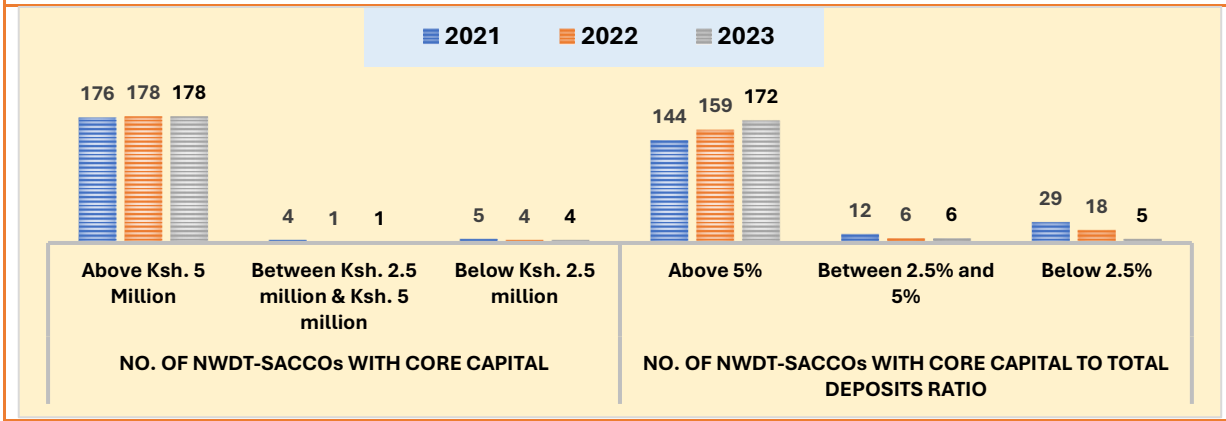

Figure 44: Trend Analysis of level of compliance with capital adequacy requirements by NWDT-SACCOs

Source: SASRA Database

At the individual NWDT-SACCOs level **Figure 45** provides a summary of the number of NWDT-SACCOs which were able to comply with and maintain the prescribed minimum core capital of Kshs 5 million and the prescribed minimum core capital to total deposits ratio of 5%. The analysis shows that 178-NWDT-SACCOs maintained their core capital above the Kshs 5 million threshold and therefore fully compliant, with only 5-NWDT-SACCOs failing to meet the threshold, and thus technically operating on capital restoration plan strategies. On the other hand, a total of 172-NWDT-SACCOs were fully compliant with the core capital to total deposits ratio by meeting the threshold of 5% in 2023, which is an improvement from 159-NWDT-SACCOs which maintained the threshold in 2022. Some 11-NWDT-SACCOs were however unable to meet the prescribed threshold in this ratio, with 5-NWDT-SACCOs operating below the 2.5% threshold.

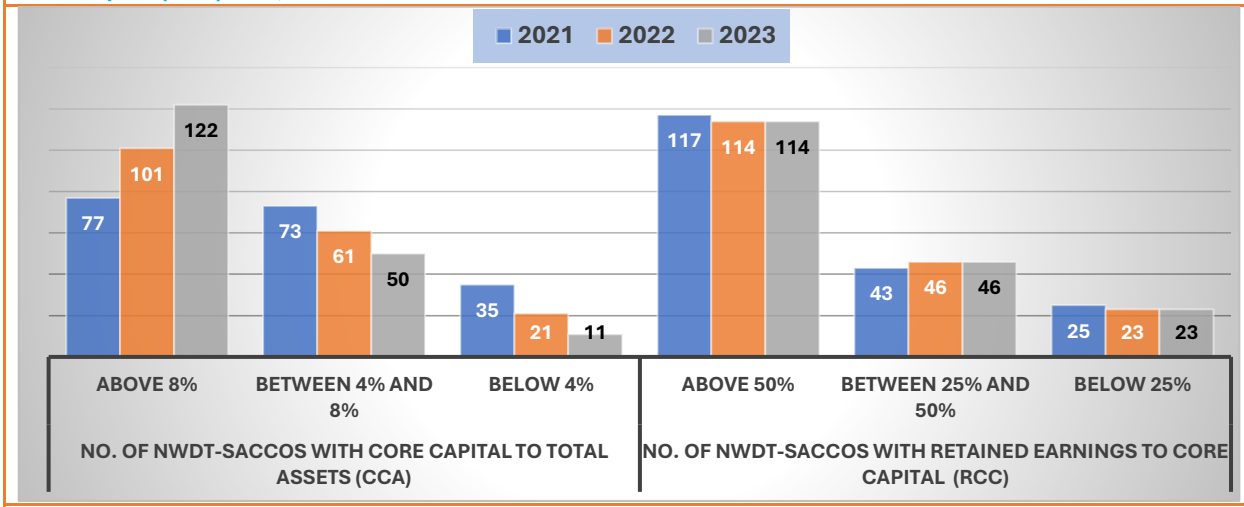

Figure 45: Number of NWDT-SACCOs complying with core capital (CC) and core capital to total deposits ratio, 2023

Source: SASRA Database

In regard to the capital adequacy ratios of core capital to total assets and retained earnings to core capital, Figure 46 provides the aggregated status of the individual NWDT-SACCOs level of compliance, with 122-NWDT-SACCOs maintaining their core capital to total assets ratio above the 8% prescribed minimum threshold, while 50-NWDT-SACCOs had their ratio between 4% and 8%. Some 11-NWDT-SACCOs however were not compliant with their ratio resting below 4%. The retained earnings to core capital ratio which requires NWDT-SACCOs to ensure that at least 50% of their core capital is at all times composed of retained earnings and reserves, was fully complied with by 114-NWDT-SACCOs in 2023 just like it was in 2022. A total of 46-NWDT-SACCOs had their ratio in this regard between 25% and 50% during the same period, while 23-NWDT-SACCOs were not compliant with their ratio resting below 25%.

Source: SASRA Database

8.3. The Assets and the Quality of Assets of Regulated SACCOs

8.3.1. The Composition of Assets of Regulated SACCOs

The total assets of the Regulated SACCO industry amounted to Kshs 971.96 billion for the period ended December 2023 which represented a 9.17% growth from a total asset value of Kshs 890.30 billion in 2022. Additionally, as already depicted in Table 12, the total assets of the Regulated SACCO industry in 2023 was made up Kshs 832.89 billion being the total assets of the DT-SACCO segment representing slightly over 85.69% of the total assets, and Kshs 139.06 billion being the total assets of NWDT-SACCOs segment. These total assets were composed of cash and cash equivalents; net loans; financial investments; prepayments and sundry receivables; and property and equipment as summarise in Table 25.

Table 25: The Composition of the Total Assets of the Regulated SACCOs in 2023

	TOTALS	**55.57**	**52.30**	**51.42**	**6.88%**	**5.87%**	**5.29%**
TOTAL ASSETS		**807.12**	**890.30**	**971.96**			

Source: SASRA Database

The net loan portfolio continued to constitute the highest proportion of the total assets of Regulated SACCOs and amounted to Khs 706.21 billion and representing 72.66% of the total assets in 2023, which is an increase from the sum of Kshs 640.72 billion being the net loans in 2022 representing 71.97% of the total assets. The foregoing shows an overall increase in the growth of the net loans during the period showing an overall increased demand for loans from Regulated SACCOs. The cash and cash equivalents of Regulated SACCOs (comprising the cash at hand and cash at the commercial banks) had the second highest proportion of the total assets amounting to Kshs 87.92 billion in 2023 and representing just about 9.05% of the total assets, which was a decline from the sum of Kshs 97.36 billion representing 10.94% of the total assets in 2022. The foregoing drop shows that Regulated SACCOs largely reduced the rate at which they held their assets in cash and cash equivalent form, largely driven by the increased demand for loans which normally peaks towards the end of the financial year.

Other components of the total assets of the Regulated SACCOs include the financial investments whose proportion total assets increased from 5.61% in 2022 to 7.09% in 2023; the prepayments and sundry receivables whose proportion to total assets also increased from 5.61% in 2022 to 5.91% in 2023. Property, equipment and other assets had the lowest proportion of total assets at 5.29% in 2023 representing a marginal decline from a proportion of 5.87% reported in 2022. Figure 47 presents the proportionate distribution of the composition of the total assets of Regulated SACCOs.

Figure 47: Proportionate composition of the Total Assets of Regulated SACCOs

Source: SASRA Database

8.3.2. The Financial Investments of Regulated SACCOs

The Financial Investments component of the assets' portfolio of Regulated SACCOs consists of investments in government securities, placement of deposits or savings with other SACCOs or Cooperatives, investments in the shares or equity of the National Cooperative Organizations (NACOs), investments in the shares or equity of listed companies, and other investments mostly in the money markets and unit trusts. Table 26 provides the overall composition of the financial investments by Regulated SACCOs in 2023 and shows that the bulk of the Regulated SACCOs financial investments are made up of the placements of deposits (savings) with other NACOs or Cooperatives which amounted to Kshs 28.77 billion representing 41.74% of the total financial investments, which is a substantial increase from the sum of Kshs 14.99 billion in 2022 which formed the placement with NACOs portfolio.

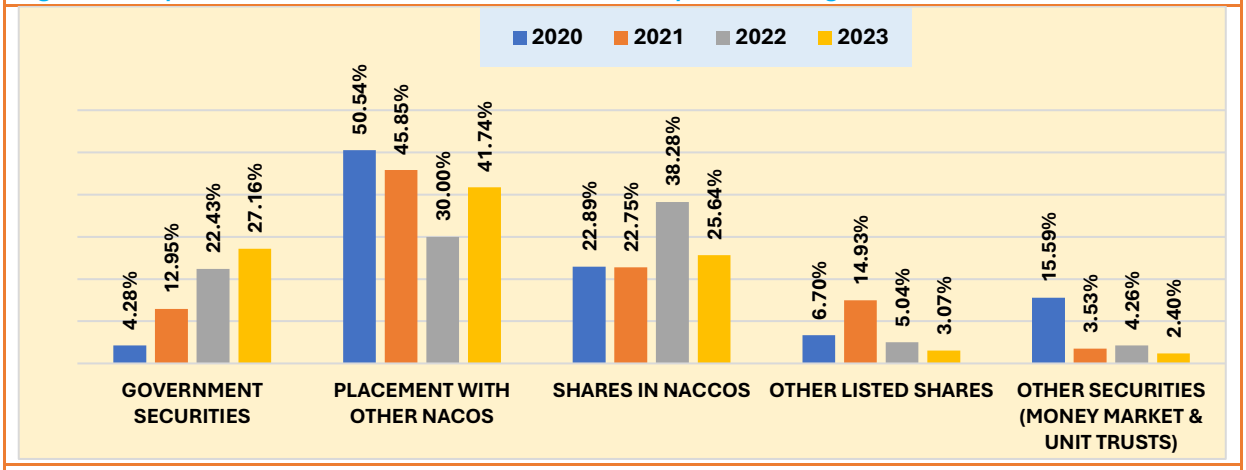

Table 26: Composition of the financial investments by Regulated SACCOs in 2023

	DT-SACCOs		NWDT-SACCOs		TOTAL		PROPORTIONS	
	2022	2023	2022	2023	2022	2023	2022	2023
GOVERNMENT SECURITIES (KSHS B)	9.61	16.71	1.59	2.02	11.20	18.72	22.43%	27.16%
PLACEMENT IN NACOs (KSHS B)	9.41	21.22	5.58	7.55	14.99	28.77	30.00%	41.74%
SHARES IN NACOs (KSHS B)	17.56	16.78	1.56	0.89	19.12	17.67	38.28%	25.64%
OTHER LISTED SHARES (KSHS B)	0.90	0.83	1.62	1.29	2.52	2.11	5.04%	3.07%
OTHER SECURITIES (MONEY MARKET & UNIT TRUSTS) (KSHS B)	1.41	1.14	0.72	0.51	2.13	1.65	4.26%	2.40%
TOTALS	**38.89**	**56.68**	**11.06**	**12.25**	**49.95**	**68.93**		

Source: SASRA Database

Figure 48 provides the proportionate trend analysis of the components of the financial investments showing the sharp spike in the placement with NACOs from 30% in 2022 to 41.74% in 2023. The trend analysis further shows a continuous trend in investments in government securities by Regulated SACCOs rising from a low of 4.28% of the total financial investments to a high of 27.16% of the total financial investments in 2023. The Authority expects that Regulated SACCOs will continue to grow their investments in government securities in the short-term, by taking advantage of the *CBK's Dhow CSD* electronic and digital platform which allows investors to open and operate CSD accounts at the Central Bank of Kenya for purposes of investment and trading in government securities. It is however important that Regulated SACCOs seeking to invest in government securities, do so at the primary market instead of using brokers or third parties at the secondary market which has been noted to result in losses in SACCOs.

Figure 48: Proportionate trends of financial investments components of Regulated SACCOs.

Source: SASRA Database

8.3.3. The Loans' Portfolio of Regulated SACCOs

Table 27 provides a summary of the comparative trend in the loan portfolio of Regulated SACCOs and shows the gross loans increasing by 11.50% in 2023 to reach Kshs 758.57 billion from Kshs 680.35 billion in 2022. The allowance for loan loss for Regulated SACCOs computed as the provisioning for the loans classified under the performing (1%), watch (5%), substandard (25%), doubtful (50%), and loss (100%) categories as prescribed by law, increased by 32.09% to Kshs 52.35 billion in 2023 from Kshs 39.64 billion in 2022. The increase in the allowance for loan loss shows that the Regulated SACCOs are adopting good financial practices to make adequate provisioning to cater for unforeseen circumstances in the performance of their loan portfolios.

Table 27: Summary of the trends in the Loan Portfolio of Regulated SACCOs, 2023

LOAN PORTFOLIO	CLUSTER OF SACCOs	AMOUNT IN KSHS. BILLIONS				Y-TO-Y CHANGE		
		2020	2021	2022	2023	2020/21	2021/22	2022/2023
Gross Loan Portfolio	DT-SACCOs	474.77	522.25	586.16	652.27	10.00%	12.24%	11.28%
	NWDT-SACCOs	80.28	86.50	94.19	106.30	7.75%	8.89%	12.85%
	TOTAL	**555.05**	**608.75**	**680.35**	**758.57**	**9.68%**	**11.76%**	**11.50%**
Allowance for Loan Loss	DT-SACCOs	24.19	34.05	36.95	49.11	40.76%	8.53%	32.91%
	NWDT-SACCOs	0.86	2.20	2.68	3.24	155.81%	21.86%	20.83%
	TOTAL	**25.05**	**36.25**	**39.64**	**52.35**	**44.71%**	**9.34%**	**32.09%**
Net Loans and Advances	DT-SACCOs	450.58	488.20	549.20	603.15	8.35%	12.49%	9.82%
	NWDT-SACCOs	79.42	84.48	91.51	103.06	6.37%	8.32%	12.61%
	TOTAL	**530.00**	**572.68**	**640.72**	**706.21**	**8.05%**	**11.88%**	**10.22%**

Source: SASRA Database

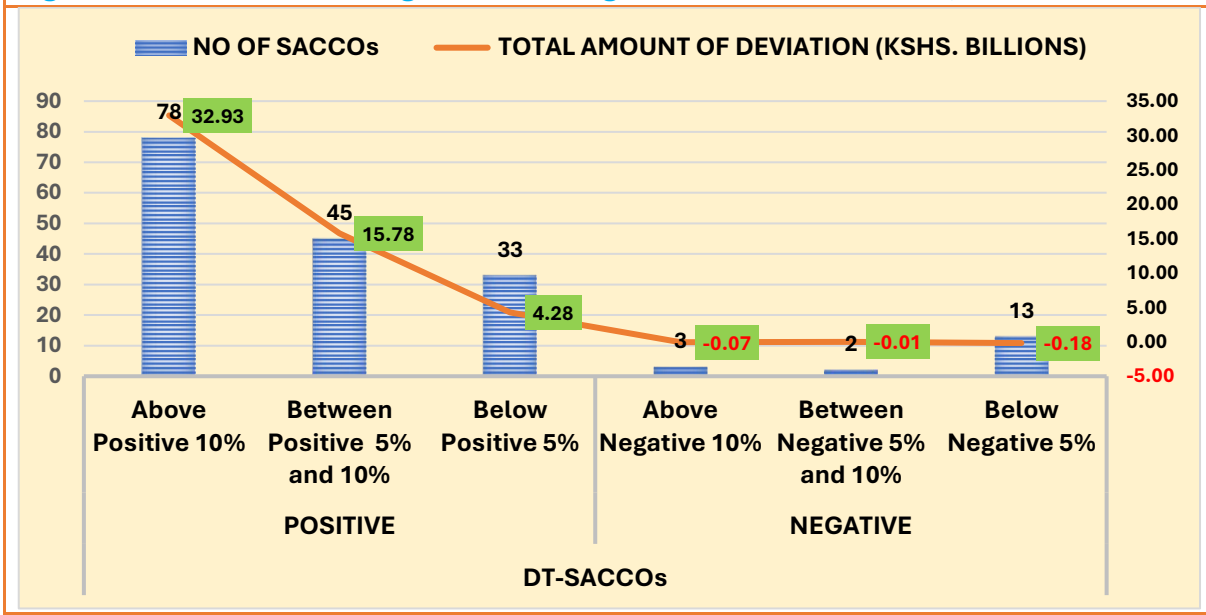

The net loans and advances for the Regulated SACCOs computed as the difference between the gross loans and the allowance for loan loss increased by 10.22% in 2023 to Kshs 706.21 billion from Kshs 640.72 billion in 2022. This was however a decrease in the growth rate of the loans and advances during the year 2022 which stood at 11.88%, and the drop is explained by the high allowance for loan loss provided by Regulated SACCOs in 2023 amounting to Kshs 52.35 billion, compared to a lower allowance for loan loss amounting to Kshs 39.64 billion in 2022.

8.3.4. Growth Rates of the Loans' Portfolio

As shown in Table 27 the gross loans increased by 11.50% in 2023 compared to an increase of 11.76% in 2022. The growth was however not even between each segment of the Regulated SACCO industry, in which the DT-SACCOs segment had their gross loans grow by an average of 11.28% in 2023 compared to 12.24% in 2022; while the NWDT-SACCOs segment registered a growth of 12.85% in 2023 compared to a growth of 8.89% in 2022. Figure 49 provides the analysis of the individual growth rates of the gross loans of DT-SACCOs in 2023, and shows that out of the 174-DT-SACCOs in operation for the period ended December 2023, 156-DT-SACCOs registered positive growth rates in their gross loans which cumulatively amounted to Kshs 52.99 billion as follows -

a) 78-DT-SACCOs growing at 10% and above with cumulative amounts of loans of Kshs 32.93 billion;
b) 45-DT-SACCOs growing at between 5% and 10% with cumulative amounts of loans of Kshs 15.78 billion; and
c) 33-DT-SACCOs growing at just below 5%. with cumulative amounts of loans of Kshs 4.28 billion.

Figure 49: Distribution of the growth rates in gross loans of DT-SACCOs, 2023

Source: SASRA Database

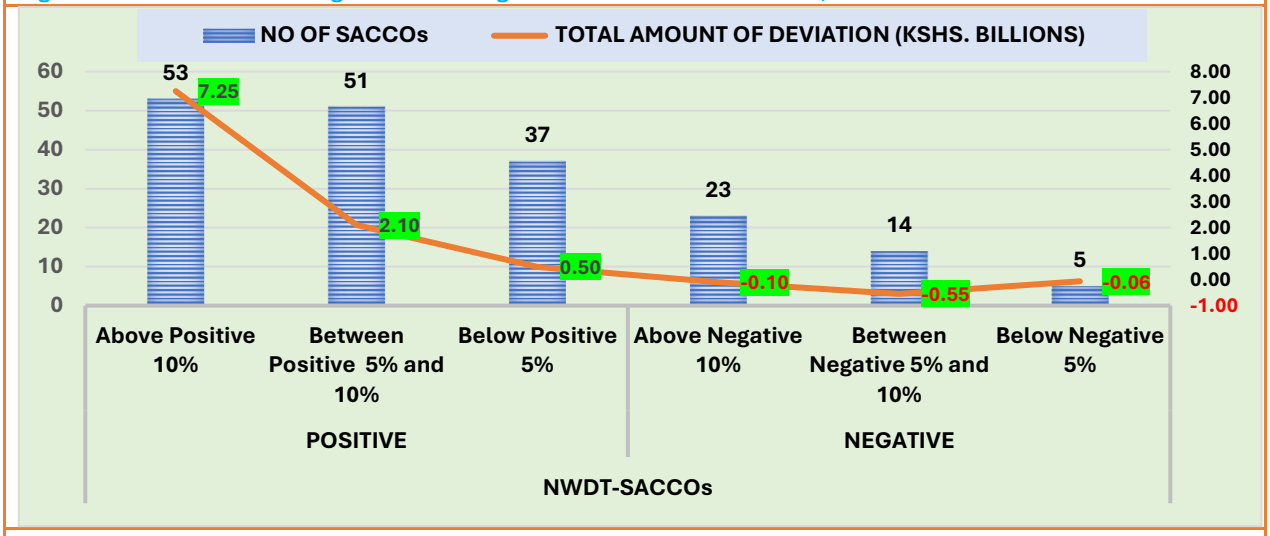

On the other side of the spectrum are the 18-DT-SACCOs which registered negative growth rates during the period and thereby implying that the gross loans declined during the period by Kshs 0.26 billion as follows –

a) 13-DT-SACCOs whose gross loans grew by negative 5% and below resulting in the shedding off of Kshs 0.18 billion;
b) 2-DT-SACCOs whose gross loans grew by between negative 5% and negative 10% resulting in the shedding off of Kshs 0.01 billion
c) 3-DT-SACCOs whose gross loans grew whose gross loans grew by negative 10% and above resulting in the shedding off of Kshs 0.07 billion.

In regard to the growth rates of the NWDT-SACCOs segment, **Figure 50** provides a summary of the growth rates of the 183-NWDT-SACCOs in operation as at December 2023 and shows that 141-NWDT-SACCOs recorded positive growth rates in their gross loans cumulatively adding a total of Kshs 9.85 billion to the segment's gross loans. The positive growth rates in the gross loans of the NWDT-SACCOs segment was distributed as follows –

a) 53-NWDT-SACCOs whose gross loans grew by over 10% with the cumulative gross loans of Kshs 7.25 billion;
b) 51-NWDT-SACCOs whose gross loans grew by between 5% and 10% with the cumulative gross loans of Kshs 2.10 billion; and
c) 37-NWDT-SACCOs whose gross loans grew by just under 5% with the cumulative gross loans of Kshs 0.50 billion.

Figure 50: Distribution of the growth rates in gross loans of NWDT-SACCOs, 2023

Source: SASRA Database

On the other side of the spectrum are the 42-NWDT-SACCOs which recorded negative growth rates in 2023 and which shed-off a portion of their gross loans amounting to Kshs 0.71 billion in 2023 as follows –

a) 5-NWDT-SACCOs which grew by negative 5% and below shedding off a total of Kshs 0.06 billion of their gross loans;

b) 14-NWDT-SACCOs which grew by between negative 5% and negative 10% and shed off a total of Kshs 0.55 billion of their gross loans; and

c) 23-NWDT-SACCOs which grew by negative 10% and above shedding off a total of Kshs 0.10 billion of their gross loans.

8.3.5. The Quality of the Loan Portfolio of Regulated SACCOs

Loans are the most important asset of Regulated SACCOs cognizant of the fact they have consistently continued to constitute over 72% of the Regulated SACCOs total asset base. The loan periodic assessment and monitoring of performance and quality of the loan portfolios of Regulated SACCOs is thereby of critical importance in the regulation and supervision of Regulated SACCOs. The assessment and monitoring framework is provided for by the Risk Classification of assets and Provisioning Return, prescribed in the law as read with *the Guidance Note on the Application of IFRS – 9 to outstanding Loans and Credit Advances by Regulated SACCOs dated 2nd October 2018*.

Table 28 provides the Consolidated Risk Classification of Assets and Provisioning Return for the Regulated SACCO industry. The analysis shows that a large proportion of the Regulated SACCOs loans amounting to Kshs 654.87 billion and representing 86.33% of the gross loans were performing in accordance with the contractual terms, implying that these loans were regularly being repaid by the borrowers. It is however noteworthy that the proportion of the performing loans of the Regulated SACCOs slightly dropped in 2023 to a proportion of 86.33% compared to a proportion of 86.61% in 2022, tacitly implying a deterioration of several loan accounts which were fully performing in 2022. The foregoing resulted in the increase in the proportion of loan accounts classified under the watch category to 5.22% in 2023 compared to a proportion of 5.05% in 2022 as depicted in **Figure 51**. The proportion of the loans classified under the substandard and doubtful categories to the gross loans however dropped from 3.28% in 2022 to a proportion of 2.61% in 2023; and from a proportion of 1.68% in 2022 to a proportion of 1.04% in 2023 respectively.

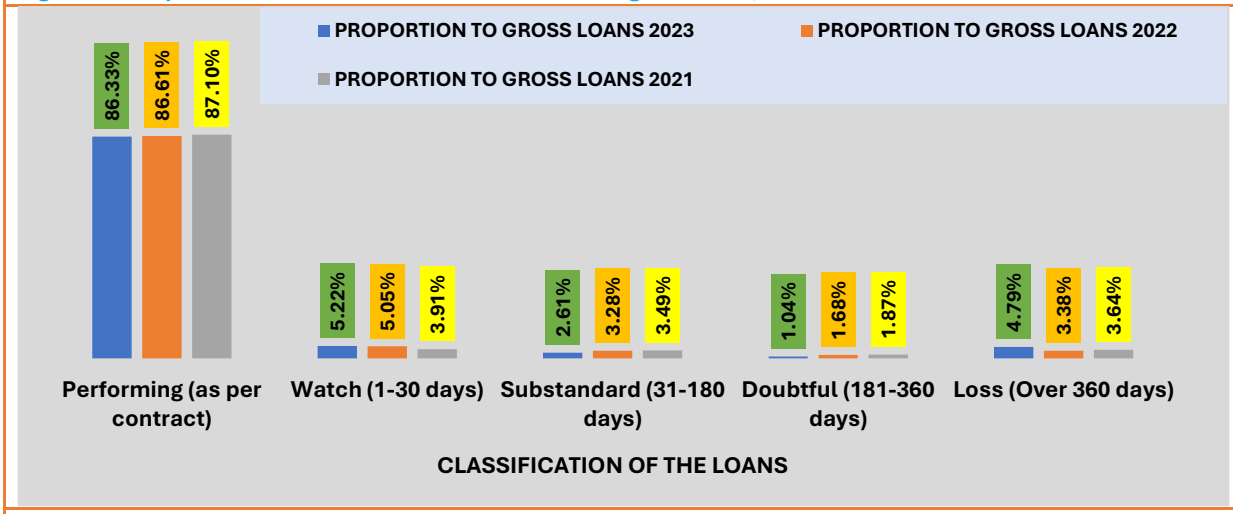

Table 28: Consolidated Risk Classification of Assets and Provisioning Return, 2023

CLASSIFICATION OF LOANS	PROVISIONING RATE	GROSS LOANS (KSH. BILLIONS)							% TO TOTAL GROSS LOANS		
		2021	2022			2023					
		ALL REGULATED SACCOS	DT-SACCOS	NWDT-SACCOS	TOTAL	DT-SACCOS	NWDT-SACCOS	TOTAL	DT-SACCOS	NWDT-SACCOS	TOTAL
Performing (as per contract)	1%	530.19	508.20	81.03	589.23	561.99	92.89	654.87	86.16%	87.38%	86.33%

Provisions/Gross Loan		6.51%	6.27%	5.49%	6.16%	7.44%	4.93%	7.09%			
Portfolio at Risk (NPL/Gross Loans)		**8.99%**	**8.40%**	**7.99%**	**8.34%**	**8.66%**	**7.12%**	**8.45%**			

Source: SASRA Database

Further analysis shows that the proportion of loans under the loss category, implying that the same had not been repaid for a period of over one year or more increased sharply from 3.38% of the gross loans in 2022 to a proportion of 4.79% of the gross loans in 2023. The increase of the loan categorised under the loss category means that a large number of loan accounts previously classified as either substandard or doubtful, deteriorated to the loss category with the amount involved increasing from Kshs 22.98 billion in 2022 to Kshs 36.35 billion in 2023. It is also worth noting that a proportion of these defaulted accounts are directly attributable to non-remitted loan repayment deductions due from various employers.

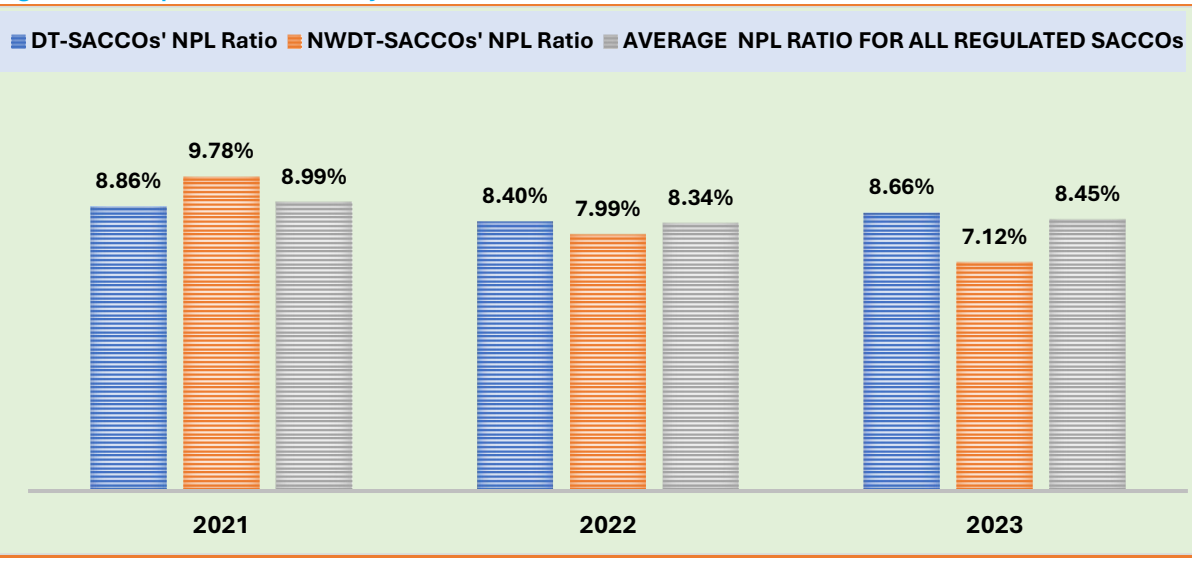

Figure 51: Proportion of the classification of the loans to gross loans, 2023

Source: SASRA Database

The analysis of the consolidated Risk Classification of Assets and Provisioning Return further shows that in the aggregate, the non-performing loans (NPL) ratio for the industry made up of loans categorised under the substandard, doubtful and loss cluster, increased from an average of 8.34% in 2022 to an average of 8.45% in 2023. This shows an overall deterioration of the quality of the loan portfolio of Regulated SACCOs during the period but mainly contributed by the DT-SACCOs segment whose NPL ratio increased from 8.40% in 2022 to 8.66% in 2023, compared to the NWDT-SACCOs segment whose NPL ratio improved from 7.99% in 2022 to 7.12% in 2023. The better loan quality of the NWDT-SACCOs segment compared to their DT-SACCOs counterparts is attributed to the former's model of business largely associated with restricted common bonds and employer-based loan recovery models; while the former has largely opened their common bonds and thus reliance of employers-based loan recovery models remains quite minimal. **Figure 52** provides a pictorial representation of the NPL ratios between the DT-SACCOs and the NWDT-SACCOs segments.

Figure 52: Comparative Trend Analysis of NPL Ratio for DT-SACCOs and NPL Ratio for NWDT-SACCOs

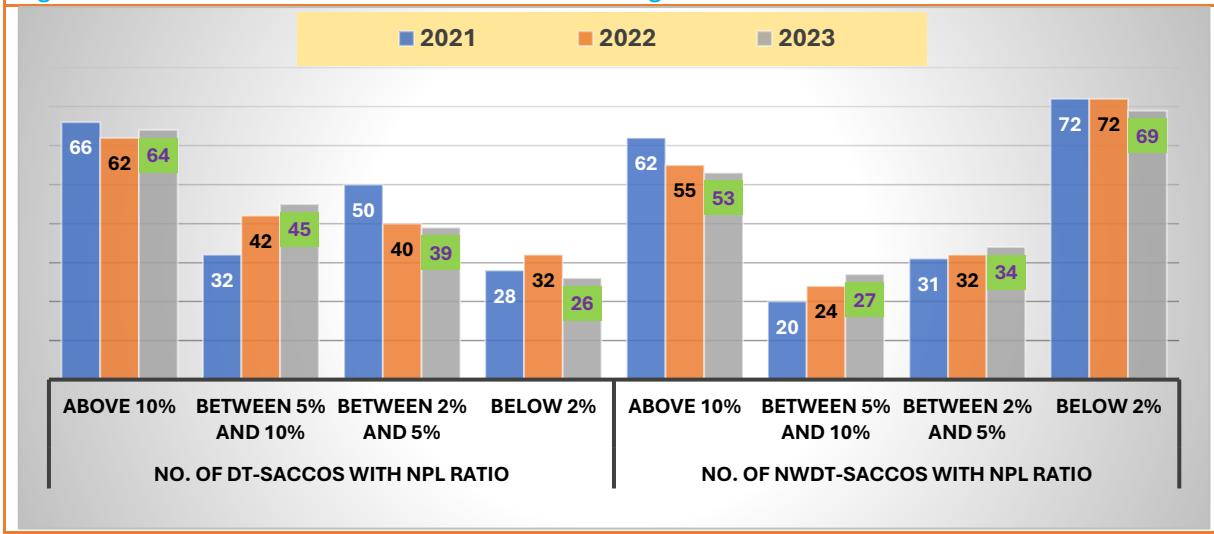

Source: SASRA Database

8.3.6. Distribution of the NPL Ratio within the Regulated SACCOs

Figure 53 depicts the distribution of the NPL ratio among the Regulated SACCOs within each segment. On the DT-SACCOs' segment the analysis shows that only 65-DT-SACCOs had their NPL ratio below the 5% maximum threshold, out of which 65-DT-SACCOs had their NPL ratio below 2% which signifies best loan quality. It is important to observe that the number of DT-SACCOs with NPL ratio below 2% dropped from 32-DT-SACCOs in 2022 to 26 DT-SACCOs in 2023, and similarly the number of DT-SACCOs with NPL ratio of between 2% and 5% also dropped from 40-DT-SACCOs in 2022 to 39-DT-SACCOs in 2023. A total of 109-DT-SACCOs had their NPL ratio above the 5% threshold with 64-DT-SACCOs of them recording NPL ratio above 10% thereby signifying serious deterioration in their loan quality and thus a threat to their compliance, performance, and sustainability.

Figure 53: Distribution of the NPL Ratio in the Individual Regulated SACCOs

Source: SASRA Database

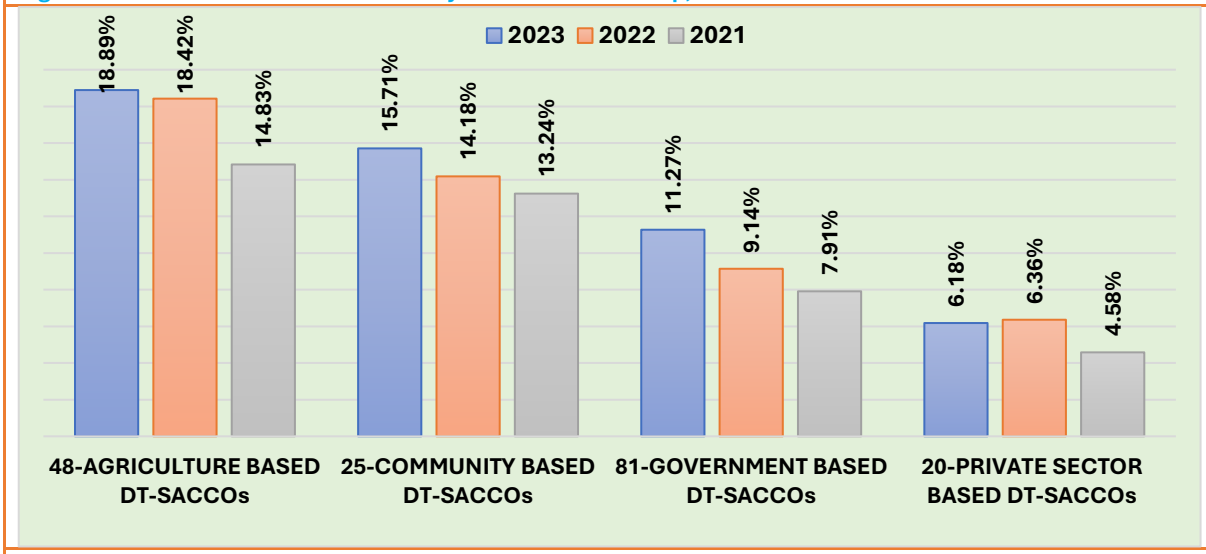

On the NWDT-SACCOs segment, a total of 103-NWDT-SACCOs had their NPL ratio below the 5% threshold therefore signifying high quality loan portfolios in 2023, out of which 69-NWDT-SACCOs had their NPL ratio below 2% while the other 34-NWDT-SACCOs had their NPL ratio between 2% and 5%. In comparison to 2022 however, it is noteworthy that the number of NWDT-SACCOs with NPL ratio below the 5% threshold dropped from 104-NWDT-SACCOs in 2022 to the 103-NWDT-SACCOs in 2023. On the other side of the divide, a total of 80-NWDT-SACCOs had their NPL ratio above the 5% threshold, with 53 of them reporting NPL ratios above 10% thereby signifying low quality of their loan portfolio. The remaining 27-NWDT-SACCOs on the other hand had their respective NPL ratio between 5% and 10%. In conclusion it is apparent that just like their DT-SACCOs counterparts, the NWDT-SACCOs segment are also struggling with the quality of the loan portfolios and must therefore put in place adequate loan recovery measures in order to improve the quality of their loan portfolio.

8.3.7. The Quality of the Loan Portfolio by Field of Membership

As pointed out earlier in this report, Regulated SACCOs are clustered into four (4) main categories based on the original common bonds or field of membership from where they drew the original members at the point of formation namely the agriculture based; the community based; the government based; and the private sector based Regulated SACCOs. The DT-SACCOs segment has Regulated SACCOs represented in each of the four (4) clusters while the NWDT-SACCOs segment are represented only three (4) clusters, with no representative among the agriculture based Regulated SACCOs.

Figure 54 shows the general distribution of the NPL ratio of the DT-SACCOs segment within each of the four (4) clusters of fields of membership. The analysis shows that there was a deterioration in the quality of the loan portfolio in each of the clusters except among the 20-Private sector – based DT-SACCOs whose loan quality improved with an NPL ratio of 6.18% in 2023 compared to an NPL ratio of 6.36% in 2022. The Community based DT-SACCOs which largely operate on free common bond, largely similar to DT-SACCOs which have opened their common bond had an NPL ratio of 15.71% in 2023 which is a deterioration from an NPL ratio of 14.18% reported in 2022. The agriculture-based DT-SACCO with the highest concentration of membership at 42% of all the members had an almost static NPL ratio of 18.89% in 2023 compared to 18.42% reported in 2022.

Figure 54: NPL ratio of the DT-SACCOs by Field of Membership, 2023

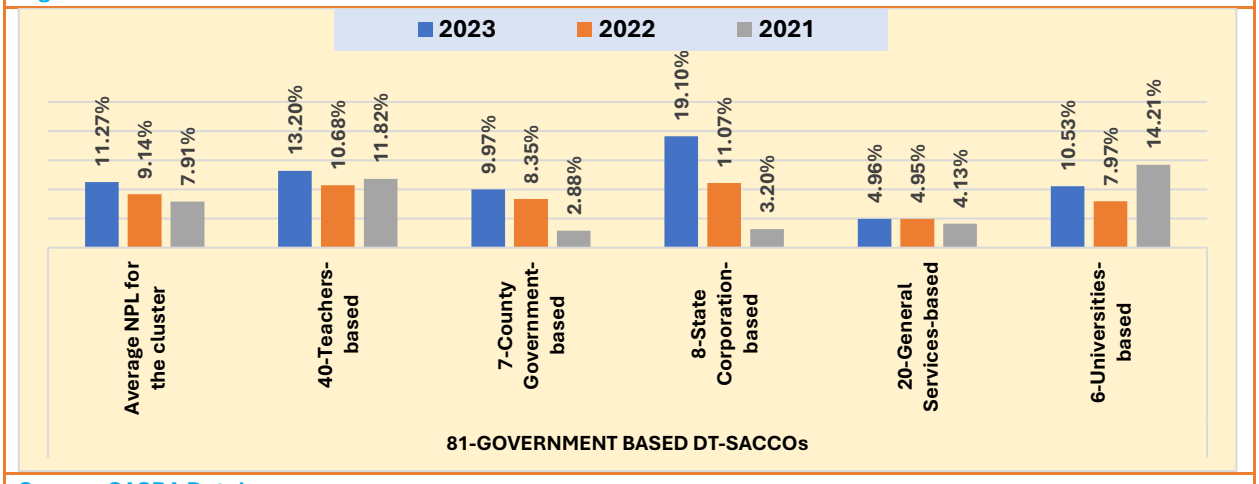

Source: SASRA Database

The Government-based DT-SACCOs had the highest deterioration in their loan portfolio with an NPL ratio of 11.27% in 2023 compared to an NPL ratio of 9.14% reported in 2022. The deterioration of the quality of the loan portfolio of the Government based DT-SACCOs is the clear result of the opening of the common bond (field of membership) thus reducing reliance on the employer-based loan repayment and recovery model by this cluster of SACCOs. Figure 55 provides the general quality of the loan portfolio of the 81-Government based DT-SACCOs within each subcluster and shows that the State Corporation based DT-SACCOs had the highest NPL ratio of 19.10% in 2023 from an NPL ratio of 11.70% thereby contributing towards the spike in the average NPL ratio for the Government based DT-SACCOs. At the institutional levels, it was noted that the spike in the NPL ratio of the State Corporation based DT-SACCOs was as a result of defaulted loans arising from non-remitted loan repayment deductions by the employer state corporation agency.

Similar scenarios were observed with regard to the Universities based DT-SACCOs and the County – Government based DT-SACCOs, all of which had their NPL ratios rise arising from defaulted loans occasioned by non-remitted loan repayment deductions by the employer state agency. The 6-Universities based DT-SACCOs had an NPL ratio of 10.53% in 2023, compared to an NPL ratio of 7.97% in 2022, while the NPL ratio of the 7-County Government based DT-SACCOs increased to 9.97% in 2023 from an NPL ratio of 8.35% in 2022.

Figure 55: NPL ratio of the Government based DT-SACCOs

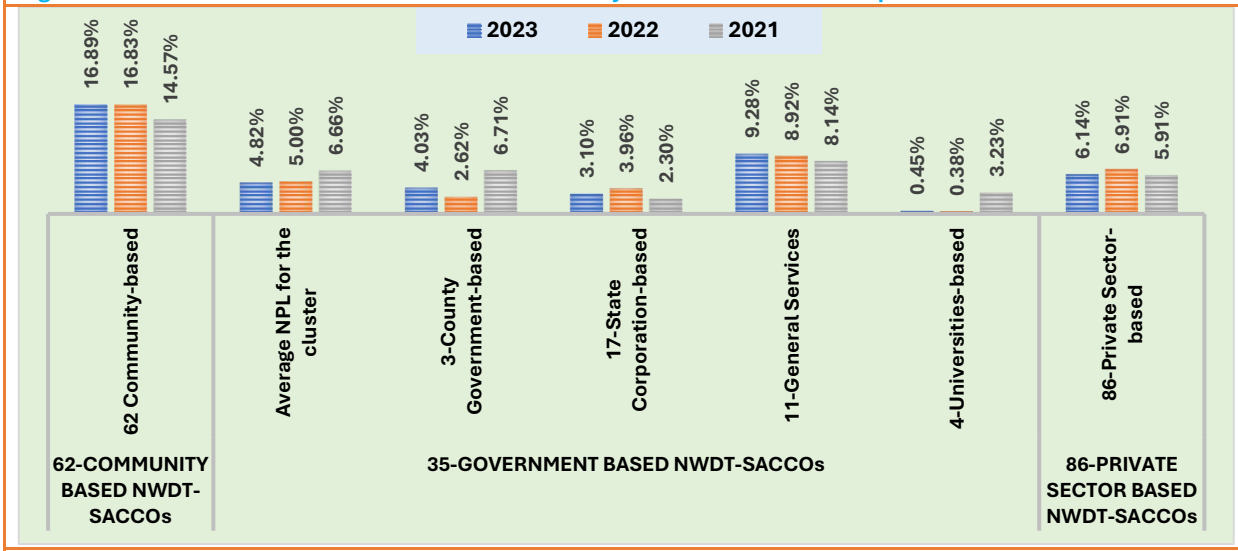

Source: SASRA Database

The 40-Teachers based DT-SACCOs which normally controls the single largest proportion of the cluster's assets and deposits also witnessed a deterioration in their quality of loans with an NPL of 13.20% in 2023 compared to an NPL ratio of 10.68% in 2022. The 20-General Services based DT-SACCOs had the lowest NPL ratio at 4.96% in 2023 which was the same as the NPL ratio for 2022, and thus showing continued high loan quality among them.

In regard to the NWDT-SACCOs segment, Figure 56 provides a pictorial snapshot of the distribution of the NPL ratio within the three (3) common bond clusters of Community based; Government based; and Private Sector based NWDT-SACCOs. The analysis shows that the 62-Community based NWDT-SACCOs had the highest level of NPL ratio at 16.89% in 2023 compared to an NPL ratio of 16.83% in 2022, showing continued deterioration in their quality of loans. The 35-Government based NWDT-SACCOs had an average NPL ratio of 4.82% in 2023, compared to an NPL ratio of 5.00% in 2022. It is thus apparent that the quality of loans of Government based NWDT-SACCOs at 4.82% was much better than the quality of the loans of the Government based DT-SACCOs which was 11.27%.

Figure 56: NPL ratio of the NWDT-SACCOs distributed by the Field of Membership.

Source: SASRA Database

8.3.8. The Investment Property, Equipment, and Other Assets

Table 29 provides the composition of the Regulated SACCOs investment property, equipment, and other assets (PPE) portfolio which is another important component of the Regulated SACCOs total assets, with the highest proportion being the property and equipment component with a value of Kshs 25.41 billion in 2023 which was a slight increase from a value of Kshs 24.41 billion in 2022. The 'other assets' component, which is often fraught to fraudulent activities also decreased to a sum of Kshs 9.58 billion in 2023 compared to a sum of Kshs 11.57 billion in 2022 showing increased intensity by Regulated SACCOs to reconcile their 'other assets' portfolios. At the same time, the investment properties component representing land and housing not utilised for SACCO business amounted to Kshs 12.01 billion in 2023 compared to Kshs 11.98 billion reported in 2022.

At the segment level, the DT-SACCOs still had the highest proportion of PPE and other assets portfolio amounting to Kshs 45.93 billion and representing 89.32% of the entire PPE and other assets portfolio in 2023; compared to the NWDT-SACCOs whose PPE and other assets portfolio amounted to Kshs 5.49 billion representing 10.68% of the total PPE and other assets of the Regulated SACCOs.

Table 29: Composition of Investment Property, Equipment & Other Assets of the Regulated SACCOs, 2023

PARAMETER	SEGMENT OF THE SACCOs	AMOUNT IN KSHS. BILLLIONS				PROPORTION TO TOTAL PPE			
		2020	2021	2022	2023	2020	2021	2022	2023
INVESTMENT PROPERTIES	DT-SACCOs	9.89	22.06	9.99	10.01	24.14%	42.89%	21.41%	21.79%
	NWDT-SACCOs	0.19	0.23	1.99	2.00	0.46%	0.46%	4.26%	4.36%

8.4. The Earnings of Regulated SACCOs

8.4.1. General Overview

The earnings of Regulated SACCOs are another key component of the CAEL supervisory paradigm which the Authority uses to observe the performance and growth of the Regulated SACCOs using the quarterly statement of comprehensive income return. It monitors and reports on the overall financial sustainability of the Regulated SACCOs both at sectoral and at institutional levels. Table 30 provides a snapshot of the consolidated Statement of Comprehensive Income for all the Regulated SACCOs for the period ended December 2023 and shows their total income increasing by 12.94% to Kshs 136.30 billion in 2023 from an income of Kshs 120.68 billion in 2022. It is significant to point out that the growth in total income at 12.94% in 2023 by far exceeded the growth in the total assets from which the same was generated at 9.17%, thus showing that Regulated SACCOs maximised the utilization of their assets to generate more income.

Table 30: Consolidated Statement of Comprehensive Income for Regulated SACCOs, 2023

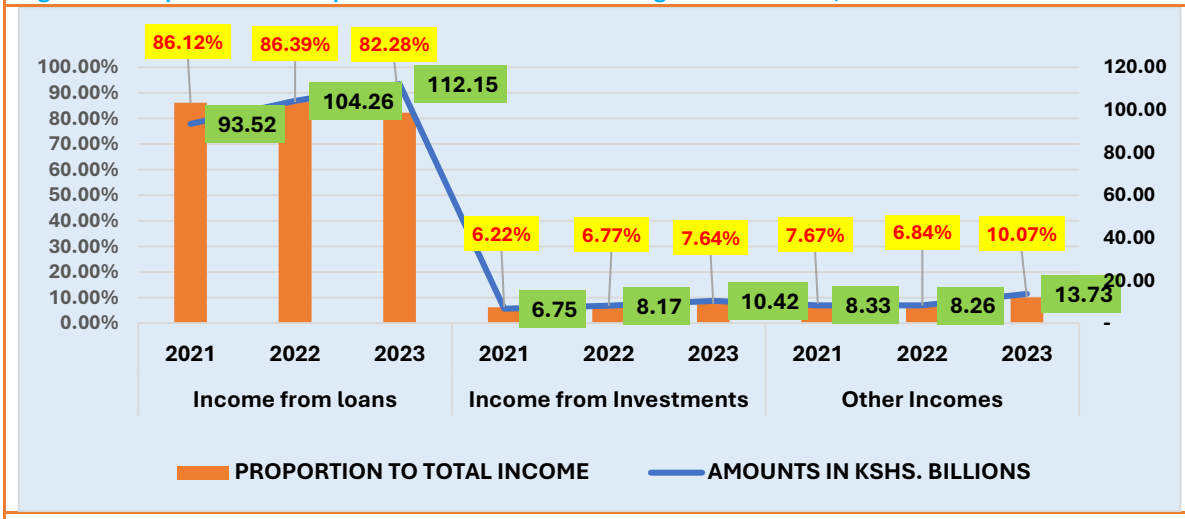

PERFORMANCE ITEMS	AMOUNTS IN KSHS. BILLIONS			PROPORTION TO TOTAL INCOME			Y-to-Y CHANGE	
	2021	2022	2023	2021	2022	2023	2021/22	2022/23

Source: SASRA Database

Income from loans constituted the highest proportion of the total income at Kshs 112.15 billion representing 82.28% of the total income in 2023 as shown in Figure 57, which was a 7.57% increase from the income from loans reported in 2022 of Kshs 104.26 billion. However, the rate of growth of

income from loans at 7.57% was below the rate of growth of gross loans at 11.50% in 2023 and explained by the increase in the NPL ratio from 8.34% in 2022 to 8.45% in 2023 as discussed in **section 8.3.5** of this report. The income from investments on the other hand increased by 27.56% in 2023 to reach Kshs 10.42 billion from Kshs 8.17 billion in 2022 showing a continued diversification investment portfolio by Regulated SACCOs towards government securities, money market funds and placement with other financial institutions as opposed to loans. The other operating income portfolio (made up of income from provision of financial services such as transaction fees, premiums, membership fees, issuance of cards etc.) however registered the highest growth rate of 66.32% in 2023 rising from Kshs 8.26 billion in 2022 to Kshs 13.73 billion in 2023.

Figure 57: Proportionate composition of Total Income of Regulated SACCOs, 2023

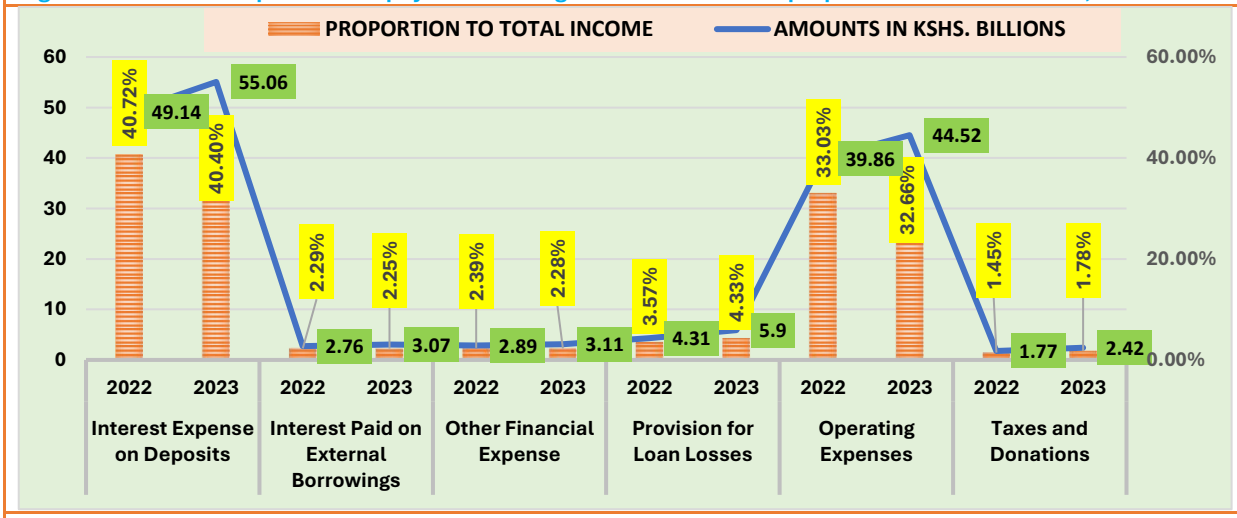

Source: SASRA Database

On the expenses side of the Statement of Comprehensive Income as shown in **Table 30** the interest expenses paid on deposits as well as the dividends paid to members increased by 12.06% in 2023 to Kshs 55.06 billion from Kshs 49.14 billion paid in 2022. This accounted for the highest proportion of expenses with a ratio of 40.40% to total income which was slightly less than the ratio of 40.72% paid in 2022 as summarised in **Figure 58**.

The expenses paid towards the external borrowings from third parties, mainly commercial banking institutions, marginally increased to Kshs 3.07 billion in 2023 compared to Kshs 2.76 billion in 2022. This represented an increase of 11.09% in 2023 compared to a negative increase of 14.59% between 2021 and 2022, in which the expenses paid towards externally sourced funding dropped from Kshs 3.24 billion to Kshs 2.76 billion. The sharp increase in the expenses associated with externally sourced borrowing is explainable by the increase in the Central Bank Rate (CBR) in 2023 as shown elsewhere in this report, which resulted in the increase in the interest rate charged by commercial banks on their lending. Additionally, the upward fluctuation in the Kenya currency witnessed in 2023 also occasioned high increase in the interest rate paid by Regulated SACCOs with foreign currency (United States Dollar) denominated debts. Consequently, Regulated SACCOs which relies on external borrowing whether foreign currency denominated or not must take note of the risks associated therewith in the coming future, especially if the Central Bank Rate is not lowered, and the foreign exchange rate does not stabilize.

The operating expenses of Regulated SACCOs increased by 11.69% in 2023 to Kshs 44.52 billion from Kshs 39.86 billion in 2022. The proportion of the operating expenses to total income however marginally dropped to 32.66% in 2023 compared to a proportion of 33.03% in 2022. The expenses incurred by Regulated SACCOs towards payment of taxes on the other hand increased by 36.78% to reach Kshs 2.42 billion in 2023 from Kshs 1.77 billion in 2022.

Figure 58: Selected expenses and payments of Regulated SACCOs as a proportion to total incomes, 2023

8.4.2. The Comparative view of Earnings of DT-SACCOs and NWDT-SACCOs

Table 31 provides the aggregate Statement of Comprehensive Income for DT-SACCOs in comparison to the aggregate Statement of Comprehensive Income for NWDT-SACCOs provided in Table 32 and shows a near correlation between the incomes generated from loans by the DT-SACCOs on the one hand and the NWDT-SACCOs on the other hand at 82.40% and 81.36% respectively. This correlation is testament that the bulk of income of Regulated SACCOs is always generated from the loan portfolio, and thus the need to have a robust monitoring framework to ensure their performance.

Table 31: Statement of Comprehensive Income for DT-SACCOs

PERFORMANCE ITEMS	AMOUNT IN KSH. BILLIONS			PROPORTION TO TOTAL INCOME			Y-TO-Y CHANGE	
	2021	2022	2023	2021	2022	2023	2021/22	2022/23

Source: SASRA Database

The DT-SACCOs segment however had a comparatively higher proportion of their total income being generated from its FOSA transactions in the form of other operating incomes which constituted 10.74% of the total income in 2023, while the NWDT-SACCOs which do not have FOSA operations had only 5.04% of their total incomes generated from their other financial transactions. The NWDT-SACCOs however generated 13.59% of their total income from investments in government

securities and market instruments, compared to DT-SACCOs which generated only 6.85% as income from investments.

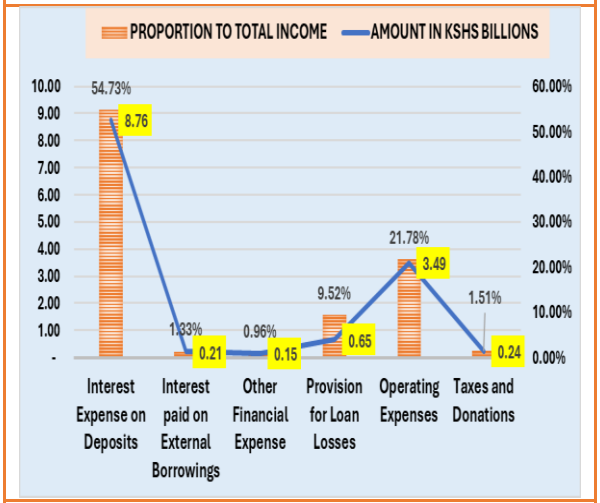

On the expenses side of the income statement, the DT-SACCOs paid a total sum of Kshs 46.30 billion as interest on the deposits held by the members in 2023 representing just over 38.49% of their total income as shown in Figure 59. The NWDT-SACCOs segment on the other hand paid a sum Kshs 8.76 billion as interest expense on the deposits held by members which accounted for 54.73% of their total income as shown in Figure 60. The foregoing is largely explained by the fact that the NWDT-SACCOs had relatively low operating expenses at 21.78% of their total income, while the DT-SACCOs segment had a high operating expenses at 34.11% of their total income.

8.5. The Liquidity Indicators of the Regulated SACCOs.

8.5.1. General Overview

Liquidity is another key component of the CAEL supervisory framework deployed by the Authority in the regulation and supervision of Regulated SACCOs. The liquidity indicators measure, assess, monitor and periodically report on the liquidity status of the Regulated SACCOs, including the availability of liquid assets to meet immediate and short-term financial obligations, especially to the members. The key statutory liquidity indicators are the liquidity ratio of liquid assets to saving deposits and other short-term liabilities; and the external borrowing ratio which measures the external borrowing to total assets.

Table 33 provides the aggregated liquidity indicators for DT-SACCOs segment as compared to the NWDT-SACCOs segment's liquidity indicators summarised in Table 34 and shows that in the aggregate, both the DT-SACCOs segment and the NWDT-SACCOs segment did maintain their respective statutory liquidity indicators within the prescribed statutory thresholds. The DT-SACCOs statutory liquidity ratio stood at 64.45% (a marginal decline from 64.72% in 2022) against the prescribed minimum of 15%, while the NWDT-SACCOs maintained their statutory liquidity ratio at 19.34% against the prescribed minimum of 10% (an increase from 18.92% in 2022), and thus confirming that in the aggregate Regulated SACCOs remain sufficiently liquid enough to meet their immediate and short-term financial obligations.

Table 33: Aggregate Liquidity Indicators for DT-SACCOs, 2023

LIQUIDITY INDICATOR	Prescribed Minimum	2021	2022	2023
Liquid Assets/Savings Deposits and Shoart-Term Liabilities	>=15%	55.34%	64.72%	64.45%
Liquid Assets/Total Deposits		21.79%	19.94%	19.83%
External Borrowings/Total Assets	<=25%	3.61%	3.20%	3.02%
Liquid Assets/Total Assets		14.96%	13.64%	13.70%
Gross loans /Total Assets		75.57%	76.77%	78.31%
Total Loans/Total Deposits		110.12%	112.16%	113.40%

Source: SASRA Database

Table 34: Aggregate Liquidity Indicators for NWDT-SACCOs, 2023

LIQUIDITY INDICATOR	Prescribed Minimum	2021	2022	2023
Liquid Assets/Short-term Liabilities	>10%	19.87%	18.92%	19.34%
External Borrowing/Total Assets	<25%	1.64%	1.48%	1.62%
Liquid Assets/Total Assets		10.70%	10.73%	16.53%
Gross loans /Total Assets		74.56%	74.29%	76.44%
Liquid Assets/Total Deposits		22.24%	21.23%	21.48%
Gross loans/Deposits		95.43%	96.26%	99.34%

Source: SASRA Database

The statutory external borrowing ratio which measures the extent to which Regulated SACCOs assets are financed by external funding sources, was equally maintained within the statutory threshold of not more than 25% of the total assets for both segments of the Regulated SACCO industry. The statutory external borrowing ratio for the DT-SACCOs stood at 3.02% in 2023 which is a drop from a ratio of 3.20% in 2022, showing reduced reliance by DT-SACCOs on external borrowing. This marginal gain was however overridden by the increased expenses incurred on the external borrowings arising from increase in the interest rate and foreign exchange rates. The NWDT-SACCOs segment on the other hand had their statutory external borrowing ratio increase marginally to 1.62% in 2023 from a ratio of 1.48% in 2022.

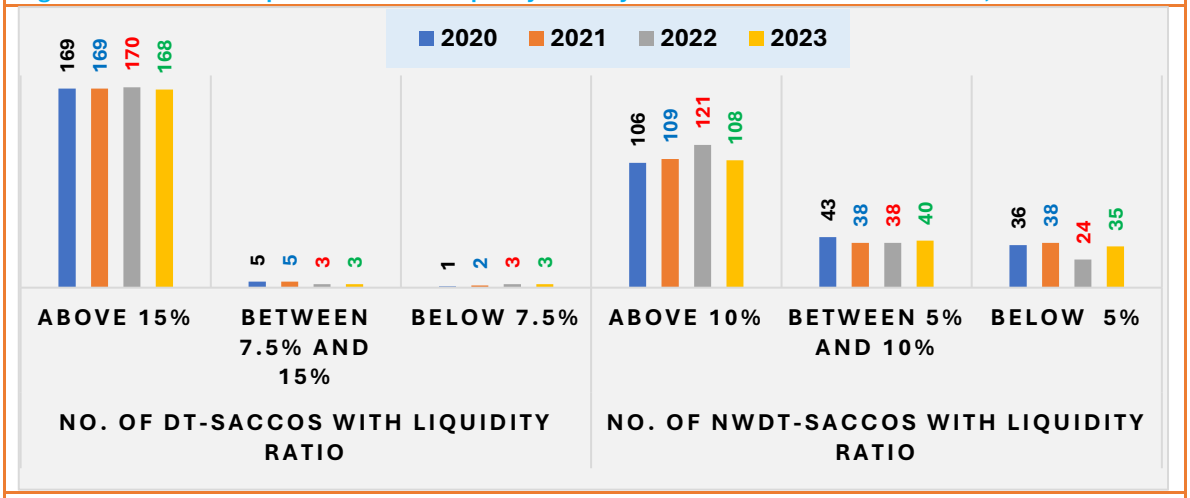

The gross loans to total deposits indicator measures, monitors and reports the extent to which Regulated SACCOs are funding their loan portfolios with internally generated funds in the form of members' deposits. The analysis shows that the DT-SACCOs gross loans to total deposits increased from 112.16% in 2022 to 113.40% in 2023, implying that over 13% of their loans are funded otherwise than through deposits. The NWDT-SACCOs segment on the other hand had their gross loans to total deposits at 99.34% in 2023 which is an increase from a ratio of 96.26%, implying a near match between the loans and deposits.

8.5.2. Compliance with the Liquidity and External Borrowing Ratios

Although there was in the aggregate compliance with the prescribed minimum statutory liquidity ratio of 15% by DT-SACCOs and 10% by NWDT-SACCOs at 64.45% and 19.34% respectively in 2023, there were various degrees of compliance levels at the institutional level as depicted in **Figure 61.** Among the DT-SACCOs a total of 168-DT-SACCOs were fully compliant with the liquidity ratio maintained above the statutory threshold of 15% while the remaining 6-DT-SACCOs had their liquidity ratios below the prescribed minimum, out of which 3-DT-SACCOs had their liquidity ratio below 7.5%.

The NWDT-SACCOs segment on the other hand had 108-NWDT-SACCOs fully maintaining their liquidity ratio above the 10% minimum threshold in 2023, which a drop from 121-NWDT-SACCOs which had their liquidity ratio above 10% in 2022. This shows that the liquidity ratio of the remaining 75-NWDT-SACCOs deteriorated during the period with 40-NWDT-SACCOs having a ratio of between 5% and 10% compared to 38-NWDT-SACCOs with a similar ratio in 2022; and the other 35-NWDT-SACCOs having a liquidity ratio of less than 5% which is another increase from 24-NWDT-SACCOs with a similar range of liquidity ratio in 2022.

Figure 61: Level of compliance with the Liquidity Ratio by DT-SACCOs and NWDT-SACCOs, 2023

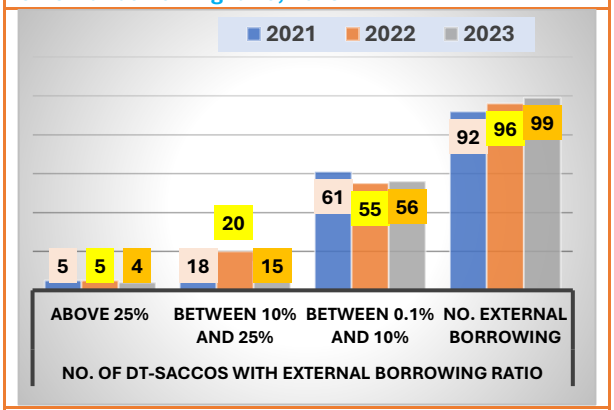

Source: SASRA Database

On the level of compliance with the statutory external borrowing ratio which must be maintained at below 25% of the total assets by both segments of Regulated SACCOs, Figure 62 shows that out of the 357-Regulated SACCOs, a total of 252-Regulated SACCOs had absolutely no external borrowing and thus were reliant on their own funds to finance their assets and activities. The distribution was made up of 99-DT-SACCOs and 153-NWDT-SACCOs which had no external borrowings, and a confirmation that 83.6% of NWDT-SACCOs had no external borrowing. However, the distribution of external borrowing within the DT-SACCOs segment was quite even with 99-DT-SACCOs having no external borrowing while the remaining 75-DT-SACCOs had external borrowings in various degrees. It is equally significant to point out that the number of DT-SACCOs with no external borrowings, increased from 96-DT-SACCOs in 2022 to 99-DT-SACCOs in 2023 implying that 3-DT-SACCOs fully cleared their external debts in 2023, while 2-NWDT-SACCOs which had no external debt in 2022 procured an external debt in 2023.

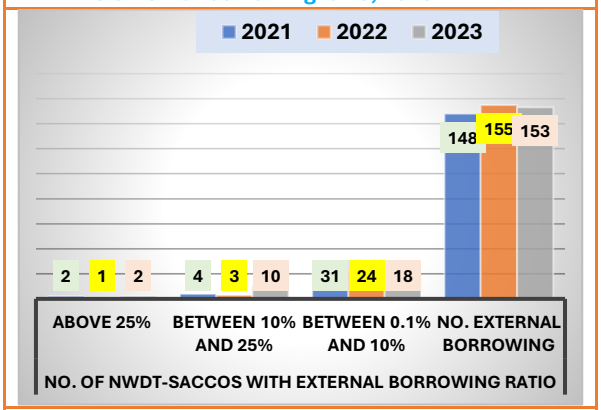

The analysis further shows that only 6-Regulated SACCOs had their external debt above the prescribed maximum of 25% to their respective total assets which was composed of 4-DT-SACCOs and 2-NWDT-SACCOs. In between the two extremes are the Regulated SACCOs whose external borrowing ratio ranged between 0.1% and 25% with 56-DT-SACCOs and 18-NWDT-SACCOs having external borrowing ratio of between 0.1% and 10% respectively, while the remaining 15-DT-SACCOs and 10-NWDT-SACCOs had their external borrowing ratio of between 10% and 25%.

Figure 62: Number of DT-SACCOs complying with the external borrowing ratio, 2023

Source: SASRA Database

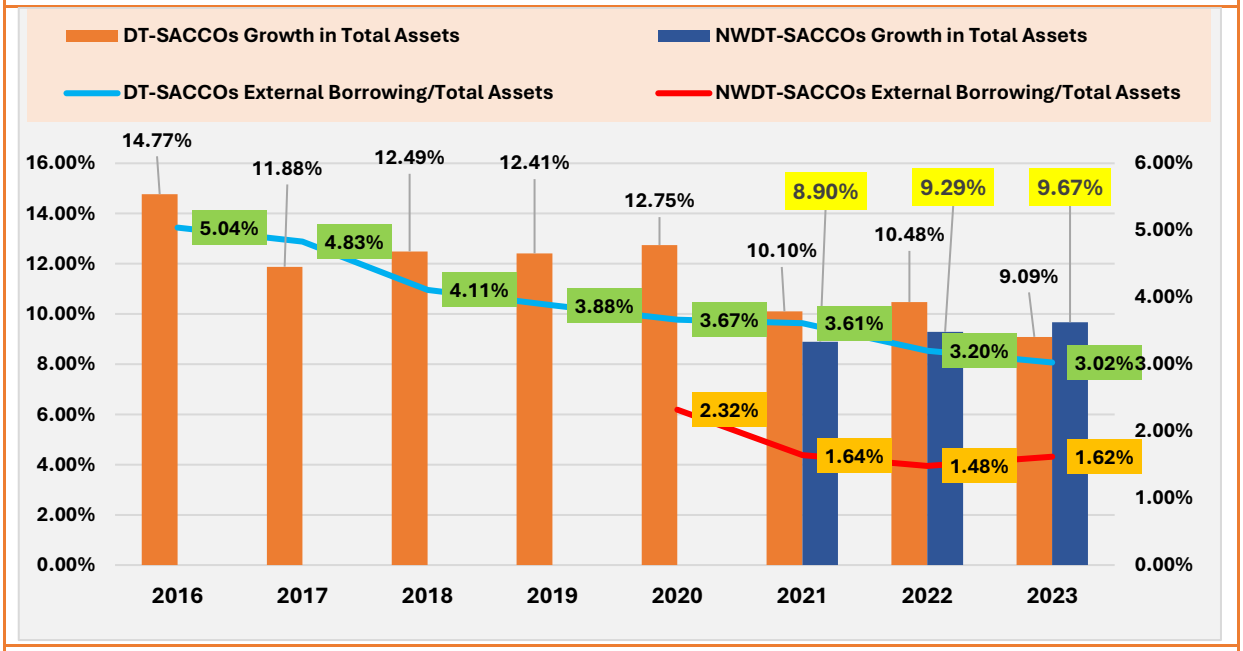

Figure 63: Number of NWDT-SACCOs complying with the external borrowing ratio, 2023

Source: SASRA Database

Since the external borrowing by Regulated SACCOs are normally procured to fund part or a portion of the Regulated SACCOs asset portfolios, the Authority constantly monitors the correlation between the rate of growth in the total assets of Regulated SACCOs against the changes in the external borrowing ratio. **Figure 64** provides the comparative movement in the rate of growth in total assets of the Regulated SACCOs against the changes in their external borrowing ratio and shows that, Regulated SACCOs have consistently continued to grow their assets despite the overall decline in their external borrowing. This shows that overtime, Regulated SACCOs have the potential and capacity to mobilise sufficient internal funding from members deposits to fund their assets portfolio, without reliance to external debts which are often expensive and subject to other macro-economic fundamentals like interest and foreign exchange fluctuations.

Figure 64: Comparative Movement of rate of growth in total assets and changes in the external borrowing ratio, 2023

9.0. OTHER ACTIVITIES AND OPERATIONS OF REGULATED SACCOs

9.1. The Governance of Regulated SACCOs

9.1.1. Overview

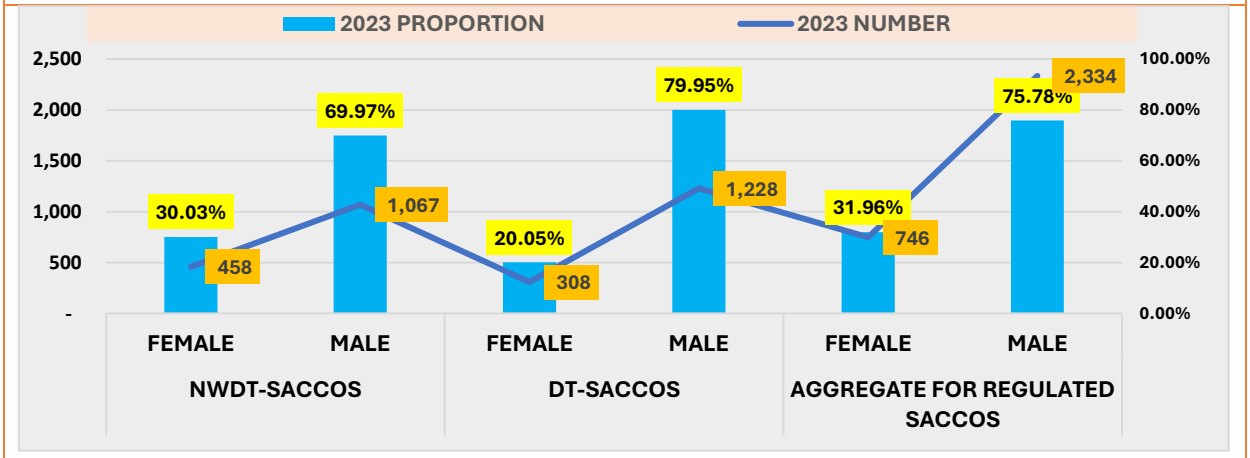

The governance frameworks of Regulated SACCOs consist of the general meetings of members which is the supreme decision-making organ of a Regulated SACCO; the Board of Directors, which is responsible for oversight and policy directions, the Chief Executive Officer responsible for the day-to-day management. The Chief Executive Officer is supported by appropriate staffing as prescribed by the Board of Directors, as well as statutory quality assurance and internal control structures including the Supervisory Committee which reports annually to the general meeting of the members, and periodically to the Authority, as well as the internal and external audit functions.

9.1.2. Board of Directors of Regulated SACCOs

Regulated SACCOs are governed by non-executive Board of Directors elected by members of SACCOs during the annual general meetings. The Boards of Directors are statutorily responsible for the overall oversight of SACCOs on behalf of members including but not limited to ensuring that the SACCO maintains proper and accurate records that reflect the true and fair position of the SACCO Society's financial condition; that the SACCO Society functions effectively and that an adequate and effective internal control system is put in place; that the SACCO makes adequate provisions for known and probable losses likely to occur; that the SACCO maintains a positive image within the industry and the economy as a whole, among others. The Board of Directors are accountable to members, as well as the Authority in the performance of their duties for which they are held accountable jointly and severally.

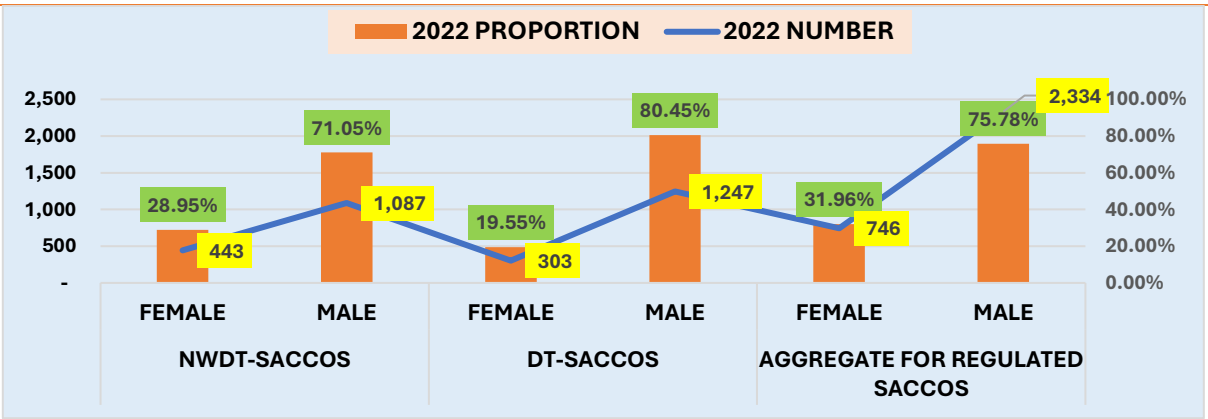

During the period ended December 2023, there were a total of 3,061 persons serving in the Board of Directors of the 357-Regulated SACCOs spread across the country, out of whom 74.98% were male and 25.02% were female as summarised in **Figure 65(a) and Figure 65(b)**. Among the DT-SACCO segment, 79.95% of the members of the Board of Directors within the segment were male while 20.05% were female. This was a marked gender improvement in the composition of the Board of Directors of DT-SACCOs which had reported only 19.55% as female in 2022.

Figure 65(a): Gender composition of the members of Board of Directors of Regulated SACCOs, 2023

Source: SASRA Database

Figure 65(b): Gender composition of the members of Board of Directors of Regulated SACCOs 2022

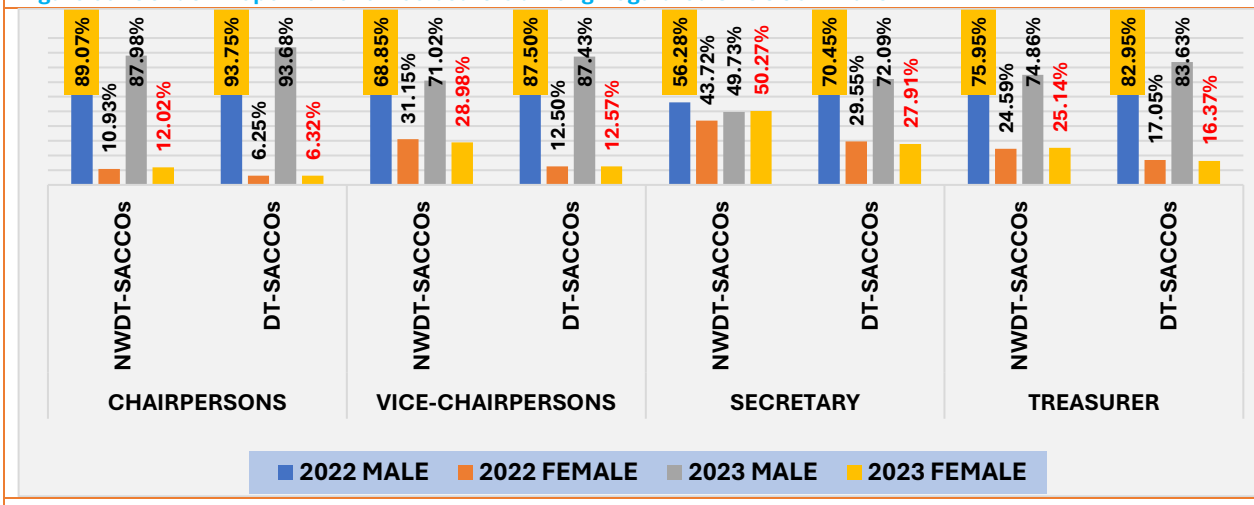

Source: SASRA Database

The NWDT-SACCOs segment on the other hand had their Board of Directors composed of 69.97% male and 30.03% female for the period ended December 2023. This was equally a slight improvement in the gender composition of the Board of Directors of NWDT-SACCOs which had reported 28.95% female members of Board of Directors in 2022.

Once elected, Board of Directors of Regulated SACCOs are required to constitute themselves into a committee of office bearers compromised of the chairpersons, vice-chairpersons, secretary, and treasurer.

Figure 66 provides a summary of the gender proportionate distribution of the office bearers of Regulated SACCOs with the offices still predominantly occupied by male officials. Among the DT-SACCOs segment, the male chairpersons constituted 93.68% of all chairpersons with a paltry 6.32% being female, while among the NWDT-SACCOs segment, the male chairpersons constituted 87.98% and 12.02% female. Similar dominance was replicated among the offices of vice-chairpersons and treasurer across the two segments of Regulated SACCOs. There was however a slight tilt in the gender parity in the office of secretary in which the female office bearers within the NWDT-SACCOs segment constituted 50.27% with their male counterparts being 49.73%, while among the DT-SACCOs segment still had the male dominance at 72.09% while their female counterparts accounted for 27.91%.

Figure 66: Gender Proportion of office bearers among Regulated SACCOs in 2023

Source: SASRA Database

The foregoing analysis shows that the leadership among the Regulated SACCOs is still largely male dominated as represented by the membership in the Board of Directors as well as office bearers and is still below the constitutionally aspired gender parity vision of not more than two-thirds of the same

gender in key leadership position. The Authority in line with its commitments to the Maya Declaration and its position as a member of the Alliance for Financial Inclusion (AFI) continues to monitor and report gender segregated financial data in the governance of Regulated SACCOs, in order to inform policy interventions, decision making and the development of appropriate financial products and services. Regulatory SACCOs are equally entreated to take and integrate affirmative action initiatives within the governance instruments in order to bridge the gender gap, cognisant of the fact that these leadership positions are subject to democratic elections.

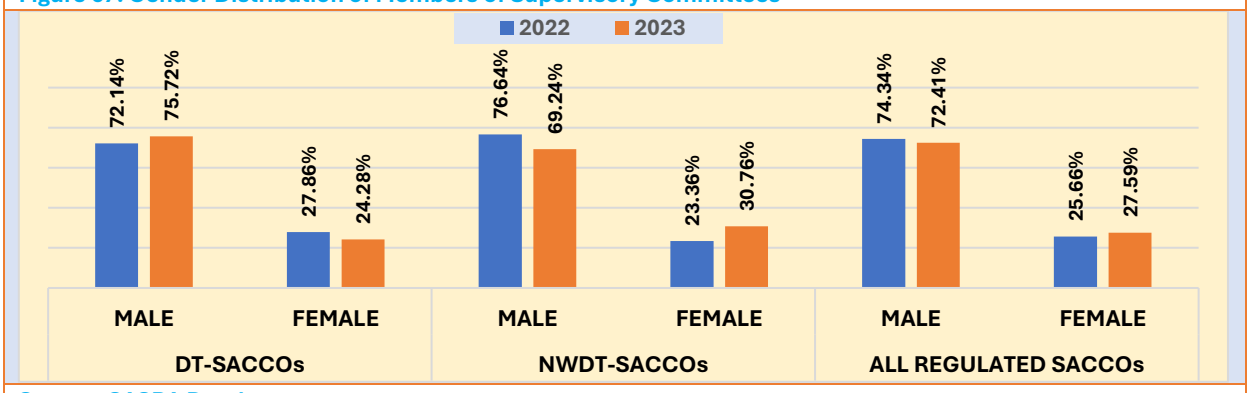

9.1.3. The Supervisory Committee

The Supervisory Committee is another unique but important governance organ within SACCOs as Cooperatives in general. Elected by the annual general meetings of the membership, the Supervisory Committee consists of not less than three (3) persons who provide general oversight over the Board of Directors activities on behalf of the members; and submits an annual report to the members during the general meetings. In particular, *Rule 28(1) of the Cooperative Societies Rules, 2004* states that "*every [Cooperative] shall have a supervisory committee consisting of three members, each elected at a general meeting for a period of three years and one member of the supervisory committee shall retire annually*". The said Rules further provides that the duties of the Supervisory Committee include verification of all transactions of the [Cooperative]; writing periodic reports of its findings to be tabled at Management Committee (Board of Directors] meetings; submission of its reports to the Commissioner for [Cooperatives Development]; and presenting its reports to the general meeting.

For the NWDT-SACCOs, the Supervisory Committee have an additional responsibility in accordance with *Reg 58 of the Regulations 2020* which states that the "Supervisory Committee provided for under the Cooperative Societies Act, 1997 shall, in addition to the duties assigned to it under the *Cooperative Societies Rules 2004 (L.N. 123/2004)*, perform the functions usually performed by Audit Committees of the Boards. To this extent the Authority has issued a *Guidance Note on Corporate Governance for Regulated SACCOs in Kenya (Ref. SASRA/2/2023)*, in which Regulated SACCOs are encouraged to merge their Audit Committees with the Supervisory Committees.

Figure 67 provides the comparative gender distribution of members of supervisory committees of the Regulated SACCOs with male members accounting for 72.41% of the total membership in 2023 which is a drop from the proportionate membership of 74.34% reported in 2022. Among the DT-SACCOs, the male members of the supervisory committee increased to 75.72% in 2023 from 72.14% in 2022, while there was a decrease in the female members to 24.28% in 2023 from 27.86% in 2022. The NWDT-SACCOs on the other hand witnessed a drop in the male members of the supervisory committee to 69.24% in 2023 from 76.64% in 2022, while the female membership slightly increased to 30.76% in 2023 from 23.36% in 2022.

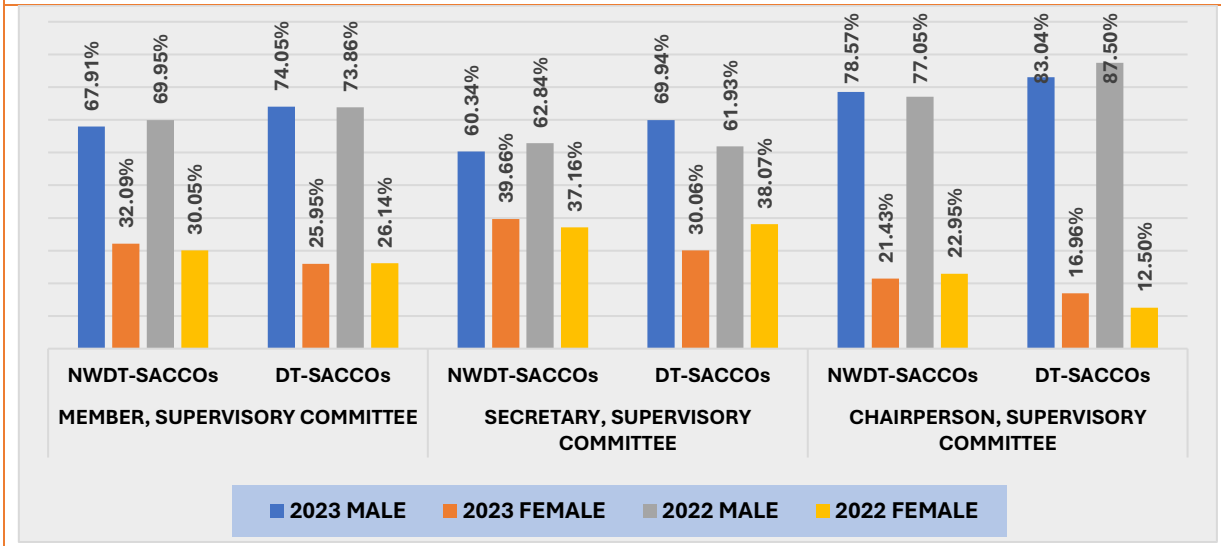

Figure 67: Gender Distribution of Members of Supervisory Committees

Source: SASRA Database

Once elected to office by the general meeting of the members, the members of the Supervisory Committee of a Regulated SACCO are required to constitute themselves into a committee of office bearers, consisting of a chairperson and a secretary and a member. Figure 68 provides the summary of the gender proportional distribution of members of the Supervisory Committee of the Regulated SACCOs, with the male members dominating the position of chairpersons at 83.04% among the DT-SACCOs and 78.57% among the NWDT-SACCOs. Similarly, the proportion of female members occupying the position of chairpersons of Supervisory Committees was for the second consecutive year, lowest at 16.96% among the DT-SACCOs and 21.43% among the NWDT-SACCOs. The composition of the office of secretary of the Supervisory Committee continued to have the highest proportion of female members at 39.66% among the NWDT-SACCOs and 30.06% among the DT-SACCOs. Nevertheless, the overall representation of women within the rank and file of Supervisory Committee membership as a critical governance organ of Regulated SACCOs, remained far too below the aspired constitutional threshold, and thus progressive affirmative action to bring more women into this level of leadership is required.

9.2. The Employment Trends in the SACCO Industry

9.2.1. General Overview

Regulated SACCOs in Kenya continued to provide stable employment opportunities to Kenyans which is part of their contribution towards the attainment of the United Nations Sustainable Development Goals. There were 11,883 persons employed by the 357-Regulated SACCOs for the period ended December 2023, which is an increase from 11,188 persons employed among the Regulated SACCOs for the period ended December 2022. Table 35 provides the employment trend analysis for Regulated SACCOs and further shows that DT-SACCOs had the highest number of employees at 10,622 persons in 2023, representing 89.39% of all the employees as summarised in Figure 69. This reflected an increase in the DT-SACCOs' employee base from 9,876 persons representing 88.27% in 2022.

The NWDT-SACCOs segment on the other hand had 1,261 employees in 2023 representing 10.61% of all employees, and which was a marked decrease from 1,312 employees reported in 2022 among the NWDT-SACCOs. The increase in the employee complement levels among the DT-SACCOs is commensurate with their increased growth during the period, in comparison to their NWDT-SACCOs counterparts.

In respect of the employees' terms of service, a majority of employees among the Regulated SACCOs numbering 9,810 persons served on permanent and pensionable terms and conditions, or long-term employment contracts of not less than three (3) years. This constituted 82.55% of all the employees as depicted in Figure 70, and thus cements the position of Regulated SACCOs as a provider of stable and sustainable employment opportunities. The majority of the employees on permanent employment terms numbering 8,786 persons, were drawn from the DT-SACCOs segment and the remaining 1,024 persons being drawn from the NWDT-SACCOs segment.

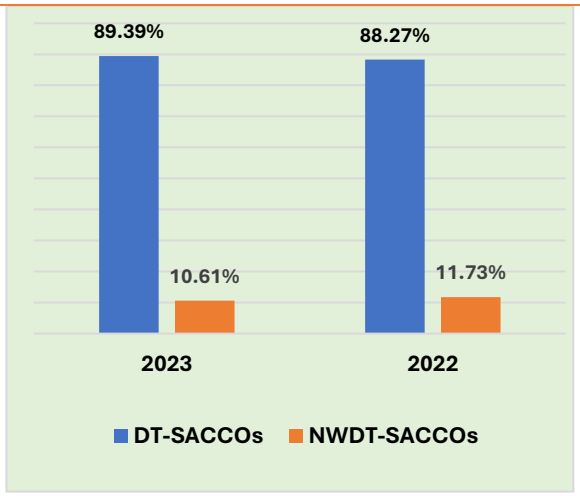

Table 35: Employment Trends in Regulated SACCOs

	YEAR	2023			2022		
	GENDER/TERMS OF SERVICE	MALE	FEMALE	TOTAL	MALE	FEMALE	TOTAL

	TOTAL	**5,776**	**6,107**	**11,883**	**5,526**	**5,662**	**11,188**

Source: SASRA Database

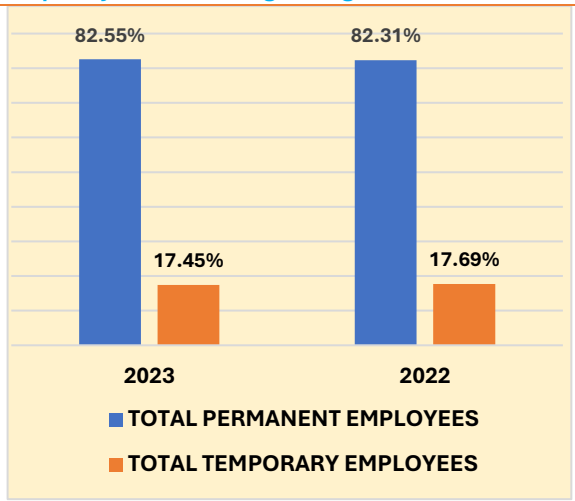

On the other hand of the spectrum, Regulated SACCOs continued to provide employment opportunities on temporary (casual or short-term contracts of less than three (3) years to many Kenyans. A total of 2,073 persons were employed by Regulated SACCOs on temporary basis during the period ended December 2023 constituting 17.45% of all the employees, with DT-SACCOs employing 1,836 persons while the NWDT-SACCOs employed only 237 persons on such temporary terms. In the overall the number of persons employed by Regulated SACCOs on temporary terms slightly increased from 1,979 persons reported in 2022.

Figure 69: Proportion of employees between DT-SACCOs and NWDT-SACCOs

Source: SASRA Database

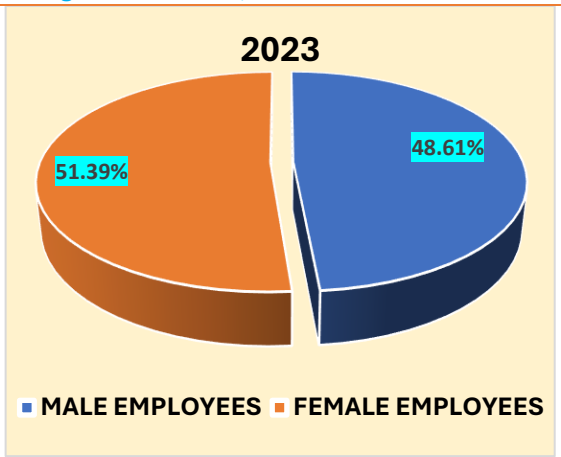

Figure 70: Proportion of employees on permanent and temporary service among all Regulated SACCOs

Source: SASRA Database

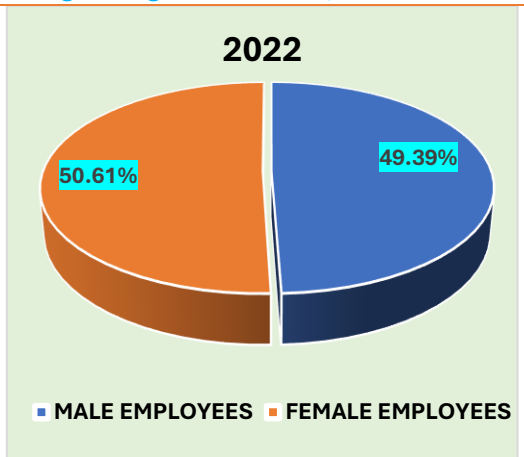

On the gender front, there were a total of 5,776 male employees among the Regulated SACCOs in 2023 representing 48.61% of the total employees a decline from 49.39% reported in 2022, with the female employees continuing to dominate the employment opportunities available numbering 6,107 persons and representing 51.39% of all employees, an increase from 50.61% reported in 2022, as summarised in **Figures 71 and 72**. The male employees within the DT-SACCOs segment numbered 5,171 persons, while the female employees numbered 5,420 persons. On the other hand, the male employees within the NWDT-SACCOs segment numbered 604 persons while the female employees numbered 657 persons. In conclusion, it can be said that gender parity has largely been attained or achieved in the employment opportunities available among the Regulated SACCOs.

Source: SASRA Database

9.2.2. The Chief Executive Officers of Regulated SACCOs

As already mentioned herein above, the day-to-day management of Regulated SACCOs is statutorily bestowed upon a chief executive officer, appointed by the Board of Directors and supported by an appropriate staffing level as determined by the Board of Directors. Some of the key statutory

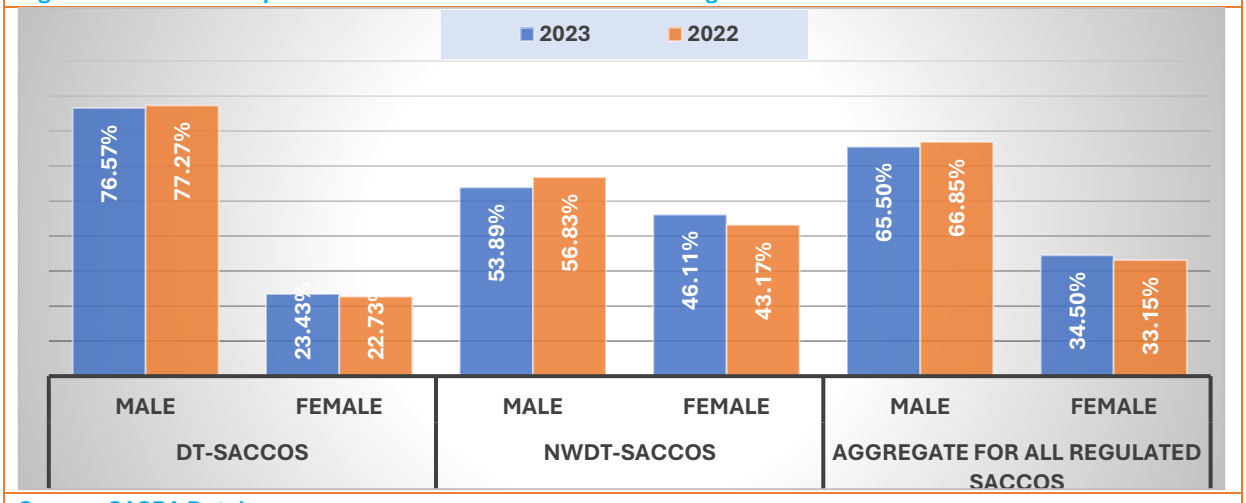

responsibilities of the Chief Executive Officer of a Regulated SACCO include -

a) the implementation and adherence to the prescribed policies, procedures, and standards.
b) ensuring that the systems are established to facilitate efficient operations and communication are functional.
c) developing and implementing a business plan to facilitate achievement of targets and objectives.
d) all staff matters, particularly human resource development and training.
e) adherence to the established Code of Conduct; and
f) the compliance with the Act, the Regulations made thereunder, the SACCOs' By-Laws, and any other applicable laws.

Additionally the Chief Executive Officers of Regulated SACCOs are required to ensure that the Board of Directors are frequently and adequately appraised of the operations of the SACCO through presentation of relevant Board papers which shall cover, among other areas periodic financial statements, showing current compared with past period actual performance, the budget compared with the actual expenditure, and with explanations for any variances; the capital structure and adequacy; the delinquent loan list, with particular reference to the growth in loans, loan losses, recoveries and provisioning; the statement of comprehensive income (monthly, quarterly and annual) comparison with budgeted against actual; the sources and distribution on profile of savings and deposits; all insider dealings in particular the non-performing insider loans if any; any reports on violation of the Act, the Regulations made thereunder, and any other applicable law, and remedial actions taken to comply; the large risk exposures; the investment portfolio; and any regulatory reports, and internal reports.

The Board of Directors of a Regulated SACCO is required to notify the Authority within a period of not less than fifteen (15) days any appointment, removal or casual vacancy in the office of the Chief Executive Officer of their respective SACCOs, and at any given time, it is expected that every Regulated SACCO shall be having a person designated by the Board of Directors to perform or discharge the statutory duties of a Chief Executive Officer. Consequently, each of the Regulated SACCOs in operation as of December 2023, had a designated Chief Executive Officer, the gender proportion of whom is depicted in **Figure 73**.

Figure 73: Gender composition of Chief Executive Officers of Regulated SACCOs.

Source: SASRA Database

The analysis shows that the majority of Chief Executive Officers of Regulated SACCOs in 2023 were male at 65.50% which is a slight drop from a proportion 66.85% in 2022. The female Chief Executive officers in 2023 constituted 34.50% of all Chief Executive Officer thereby breaking the expected gender parity threshold of not more than two-thirds of the same gender occupying the same

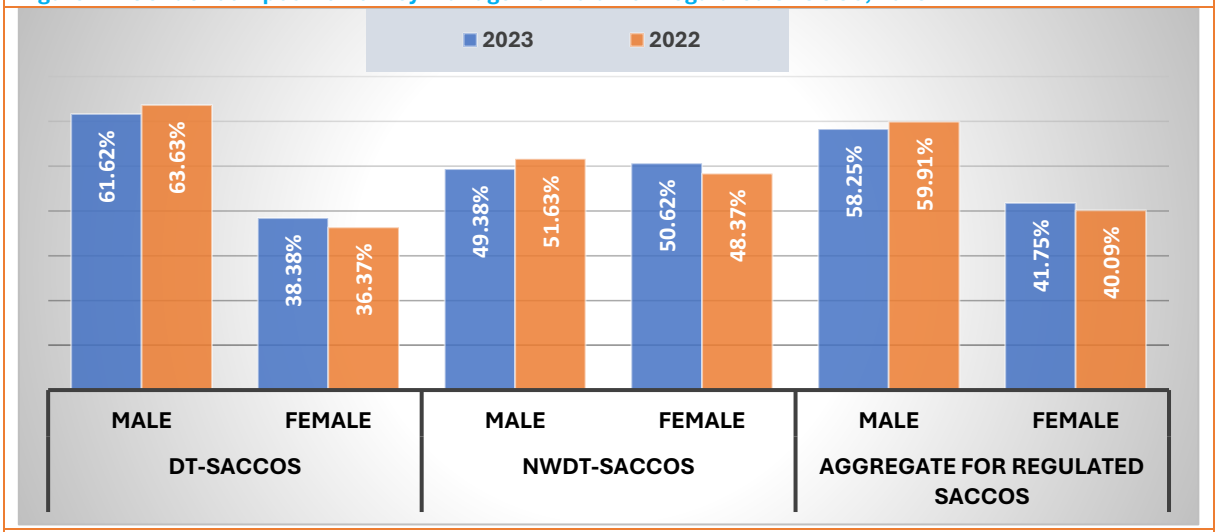

position. It is also significant to point out that the attainment of the gender parity threshold was largely driven by the NWDT-SACCOs segment in which the number of Chief Executive Officers constituted a respectful 46.11% of the segment's Chief Executive Officers an increase from 43.17% reported in 2022, while DT-SACCOs segment had only 23.43% of their Chief Executive Officers as female a marginal increase from 22.73% reported in 2022. Thus, a lot more affirmative action in the appointment of Chief Executive Officers among the DT-SACCOs in order to further bridge the prevailing gender gap.

9.2.3. Other Key Management Staff of Regulated SACCOs

Other key management staff of Regulated SACCOs normally include the heads of key functional departments like internal audit, ICT, credit, finance, operations, money laundering reporting function, and in some cases the human resource functions. These functional areas are critical for the efficient and effective operations of Regulated SACCOs, and their functional heads are subject to fit and proper test suitability criteria in the same manner as the Chief Executive Officer and the members of the Board of Directors and Supervisory Committees.

Among the disclosed key staff of the Regulated SACCOs, a proportion of 58.25% were male, a decline from 59.91% recorded in 2022, while 41.75% were female, an increase from 40.09% reporting in 2022, which also depicts an overall compliance with the gender parity threshold as shown in Figure 74. Similar to the scenario obtaining with respect to Chief Executive Officer, the compliance with the gender parity threshold was largely due to the key officers employed within the NWDT-SACCOs' segment, wherein the female staff constituted 50.62%, an increase from 48.37% recorded in 2022 of all the key staff, compared with the male staff which constituted 49.38% of the key staff, a decrease from 51.63% recorded in 2022. The DT-SACCOs segment on the other hand had 61.62% of their key management staff as male and 38.38% as female. In conclusion therefore, it is apparent that the NWDT-SACCOs have largely employed and entrusted proportionately more female managers to run the day-to-day operations of their SACCOs than the DT-SACCOs segment.

Figure 74: Gender composition of key management staff of Regulated SACCOs, 2023.

Source: SASRA Database

9.3. Non-Remittances owed to Regulated SACCOs

9.3.1. General Overview

SACCOs which draw their membership from employer-institutions or those linked to producer organizations operate on the strength of periodic deductions and remittances from such employer-institutions and organizations. Such deductions and remittances are premised on *section 35 of the Cooperative Societies Act*, which allows employees to instruct their employers to periodically deduct from the employees' emoluments such sums as the employee may determine, and to remit such deductions to the employees' designated SACCO or Cooperative Society. The provision also defines an employer as '*any person, firm or organization holding remuneration or payment for produce of a member of a co-operative society';* and an employee as including *'any person who receives remuneration or payment for produce from such persons or firm or organization'*.

A non-remittance situation occurs when an employer-institution deducts contributions meant for a SACCO from the employee's emoluments or other income but fails to remit the deduction to the employee's designated SACCO. The two traditional forms of remittances from employer-institutions are firstly, the remittances designated as non-withdrawable deposits (BOSA) deductions. These remittances are usually paid into the non-withdrawable deposits account held by the employee in the SACCO in which the employee is a member and are mainly utilised as collateral for borrowings or credit obtained by the employee from the SACCO. They are however refundable to the employee by the SACCO upon withdrawal from the SACCO's membership (less any debts owed). These remittances thus form the bulk of the source of funding of the loan asset portfolio of SACCOs, and any default in remittance of the same from an employee-institution often result into illiquidity of the affected SACCOs, as well as the inability of the individual member of the SACCO whose deductions is withheld, to obtain credit or loan facilities from the SACCO due to lack of or inadequate collateral.

The second form of remittances are those designated for periodic repayment of loans and credit facilities issued to the employee by the SACCO. In other words, SACCOs often advance loans and other credit facilities to their membership, on the tripartite agreement with the member and the member's employer, that the member's employer shall deduct the periodic loan repayment instalments from the member's emoluments, or other income and remit the same to the member's SACCO. Consequently, when such deductions are made by an employer-institution, but the same are not remitted to the designated SACCO, then the loan or credit facility advanced to the member goes into default thereby increasing the NPL ratio for the SACCO's loan book, but at the same time the liquidity position of the subject SACCOs become severely compromised.

9.3.2. Statistical Report on Non-remitted Funds owed to SACCOs.

Table 36 provides a summary of the total amount of non-remitted funds owed to Regulated SACCOs, while **Figure 75** provides a comparative proportion of the non-remitted funds between those owed as unremitted BOSA deductions and those owed as unremitted loan repayments. The analysis and summary show that the total amount of unremitted funds owed in 2023, amounted to Kshs 2.59 billion which is just a marginal drop from the total non-remitted funds of Kshs 2.70 billion owed to the Regulated SACCOs during a similar period in 2022. The number of Regulated SACCOs affected by the non-remittance issue increased from 80-Regulated SACCOs in 2022 to 82-Regulated SACCOs in 2023, while the number of individual members of the various SACCOs whose deductions were not remitted to their respective designated SACCOs dropped from 66,452 members in 2022 to 57,721 members in 2023.

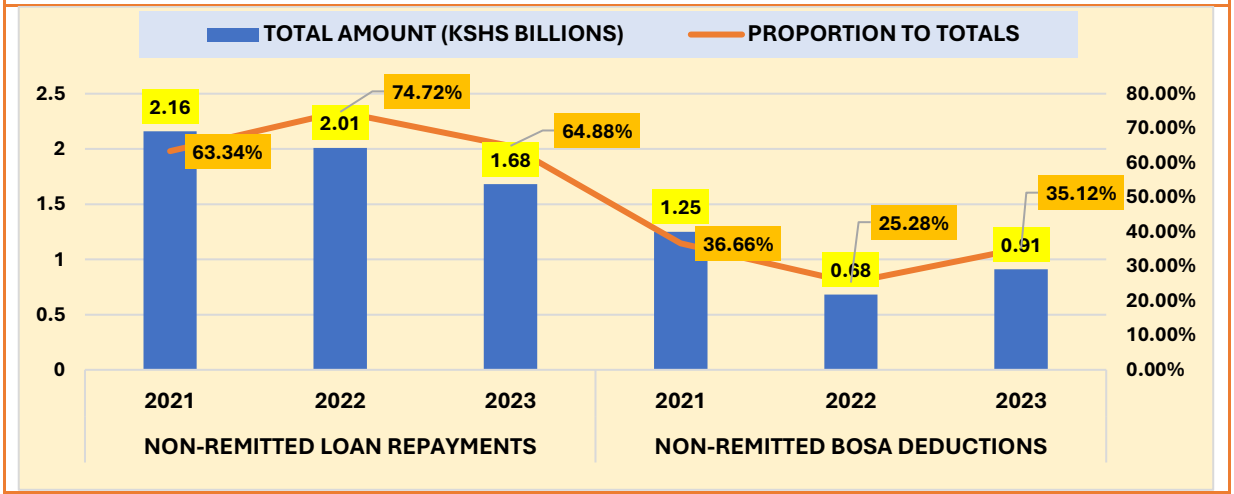

Table 36: Summary of Non-remitted funds owed to Regulated SACCOs (2021 – 2023)

	YEAR	No. of SACCOs Affected	No. of Members affected	Non-Remitted Funds on account of Loan Repayments (Kshs)	Non-Remitted Funds on account of Backoffice (BOSA) deductions (Kshs)	Total amount of Non-Remitted Funds (Kshs)
DT-SACCOs	**2021**	-	-	1,842,262,482.00	1,172,450,710.00	3,014,713,192.00
NWDT-SACCOs		-	-	313,312,448.00	74,904,884.00	388,217,332.00
TOTAL		**-**	**-**	**2,155,574,929.00**	**1,247,355,594.00**	**3,402,930,524.00**
DT-SACCOs	**2022**	57	57,766	1,752,458,915.25	607,016,353.69	2,359,475,268.94
NWDT-SACCOs		23	85,686	264,274,610.45	73,141,653.34	337,416,263.79
TOTAL		**80**	**66,452**	**2,016,733,525.70**	**680,158,007.03**	**2,696,891,532.73**
DT-SACCOs	**2023**	53	50,193	1,343,933,327.11	817,611,935.23	2,161,545,262.34
NWDT-SACCOs		29	7,528	336,035,744.85	91,879,819.81	427,915,564.66
TOTAL		**82**	**57,721**	**1,679,969,071.95**	**909,491,755.04**	**2,589,460,827.00**

Source: SASRA Database

The largest portion of the total non-remitted funds in 2023 was on account of deducted funds meant for the repayment loans and credit facilities which the SACCOs had issued to their members and amounted to Kshs 1.68 billion representing 64.88% of the total unremitted funds. This was an improvement from the Kshs 2.01 billion owed to SACCOs on account of loan and credit facilities repayment in 2022 and which represented 74.72% of the total unremitted funds owed to SACCOs in 2022. The non-remitted funds owed to SACCOs on account of BOSA deposits however increased to Kshs 909.49 million in 2023 representing 35.12% of the total unremitted funds, compared to Kshs 680.16 million representing 25.28% in 2022. The overall implication of the increased BOSA non-remitted funds is a reduction in the ability of the affected members of SACCOs to access loans and credit facilities from their respective SACCOs due to liquidity constraints as well as lack or want of adequate collateral (since such BOSA deposit deductions is normally used as collateral for lending).

Figure 75: Comparative proportions of non-remitted funds owed as loan repayment deductions vs BOSA deductions

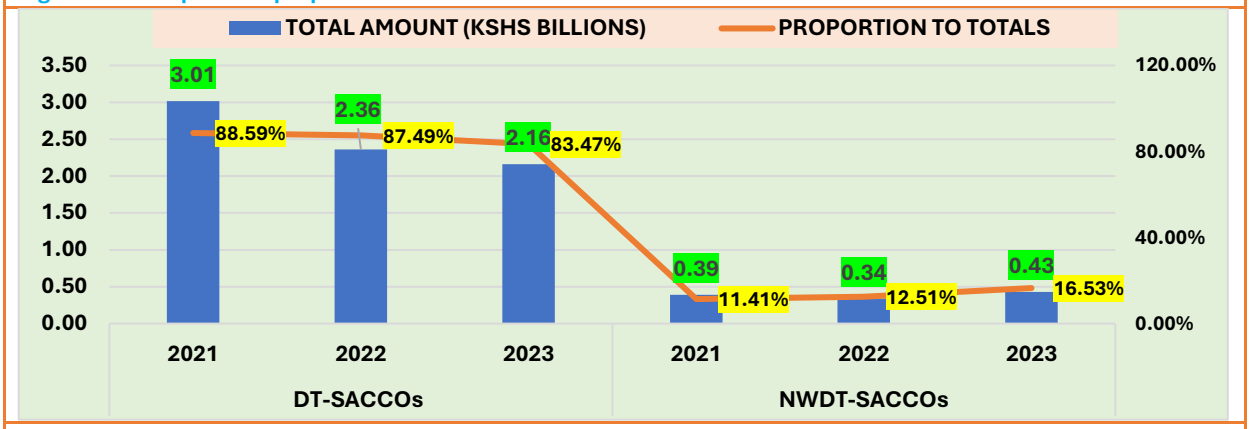

Source: SASRA Database

At the segmental levels, the DT-SACCOs were owed the highest amount of the non-remitted funds amounting to Kshs 2.16 billion in 2023, representing 83.47% of the total unremitted funds which is a drop from the sum of Kshs 2.36 billion which was owed in 2022 as summarised in Figure 76. This was made up of Kshs 1.34 billion being non-remitted funds owed towards the repayment of loans and other credit facilities advanced to the members, and Kshs 817.61 million owed towards the BOSA deposits of the individual members. The NWDT-SACCOs on the other hand were owed a total sum of Kshs 0.43 billion in 2023 representing 16.53% of the total unremitted funds. This was an increase from Kshs 0.34 billion, representing 12.51%, which was owed to the NWDT-SACCOs in 2022 and it is

also significant to note that the bulk of the non-remitted funds owed to the NWDT-SACCOs in 2023, amounting to Kshs 0.34 billion was on account of loan repayment deductions, meaning that loans and credit facilities of similar amount issued by NWDT-SACCOs were defaulted.

Figure 76: Comparative proportions of non-remitted funds owed to DT-SACCOs vs NWDT-SACCOs

Source: SASRA Database

9.3.3. Distribution of Non-remitted Funds by Employer-institutions

Table 37 and Figure 77 provide a comparative distribution of the non-remitted funds, owed to Regulated SACCOs by employer-institutions in 2023 and shows that the public universities and tertiary colleges owed the Regulated SACCOs the highest proportion of non-remitted deductions amounting to Kshs 958.07 million, representing 37% of the total non-remitted deductions. It is important to note that this was an increase in the amount of non-remitted deductions which was owed by public universities and tertiary colleges to Regulated SACCOs in 2022 which amounted to Kshs 620.52 million. The performance and growth of the 10-Universities based Regulated SACCOs which draws the bulk of their membership from the public universities and tertiary colleges thus continue to be undermined as evidenced by a high NPL ratio compared with other Government based clusters of Regulated SACCOs.

		NWDT-SACCOS	397	4,461,936	1,445,009	5,906,945
		TOTALS	397	4,461,936	1,445,009	5,906,945
12	OTHER ENTITIES	DT-SACCOS	-	-	-	-
		NWDT-SACCOS	15	352,500	81,000	433,500
		TOTALS	15	352,500	81,000	433,500

The County Governments comprising the county executive and the county assemblies had the second highest proportion of non-remitted funds owed to Regulated SACCOs and which amounted to Kshs 865.12 million and representing 33.41% of the total non-remitted funds owed to Regulated SACCOs. This was however a drop from the sum of Kshs 1.35 billion which the County Governments owed Regulated SACCOs in 2022, but still significant enough to have negative financial impairment of the liquidity of the 10-County Government based Regulated SACCOs which draws a majority of their membership from County Governments and Assemblies. The private sector companies on the other hand owed a total of Kshs 377.39 million in non-remitted deductions representing 14.57% of the total non-remitted deductions in 2023 which is a drop from Kshs 428.95 million which they owed in 2022.

Figure 77: Percentage Proportion of Non-Remitted Deductions owed to Regulated SACCOs distributed by Top Six (6) Employer Institutions by value of the amount owed in Kshs. Millions, 2023 (Top Six (6)

Source: SASRA Database

The state corporations which owed a total sum of Kshs 143.09 million in 2022 equally continued to default in the remittance of the deductions owed resulting in an increase to a sum of Kshs 162.89 million representing 6.29% of the unremitted funds owed to Regulated SACCOs in 2023, further undermining the performance of the Regulated SACCOs drawing membership from the state corporations.

10.0. ALTERNATIVE FINANCIAL DELIVERY CHANNELS AND PARTNERSHIPS

10.1. General Overview

In order to efficiently and effectively reach their membership and customers with their financial services and products, Regulated SACCOs have with the approval of the Authority ventured into partnership with other third-party service providers in order to have access the national payment system infrastructure as well as mobile money offering. These partnerships have been largely necessitated by the fact that SACCOs generally do not have a direct access to the national payment system, yet the member base of SACCOs continue to demand for real-time financial transactions which is not possible except through access to the payment system or mobile money connectivity.

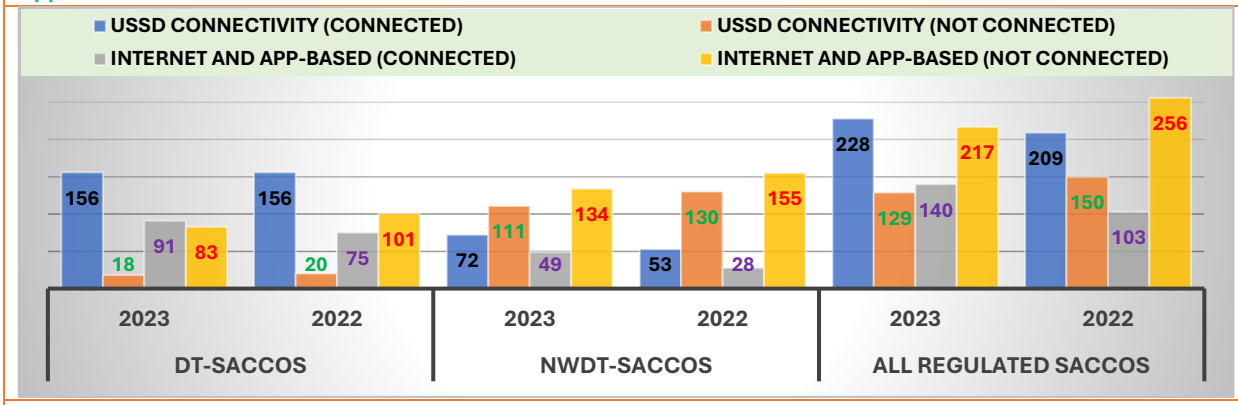

The main partnerships which have evolved over the years and been approved by the Authority, have been with regard to mobile money connectivity; ATM connectivity; cheque partnerships, and Pesalink connectivity. Other associated ventures include credit information sharing with the licensed Credit Reference Bureaus; digital credit and loan offerings; SACCO agency; and agency banking operations.

10.2. Mobile Money Connectivity

Mobile money refers to financial transactions and services by Regulated SACCOs that can be carried out using a mobile device such as a mobile phone or tablet. The connectivity to mobile money by Regulated SACCOs is either through subscription to USSD codes or internet-based applications. Figure 78 provides a summary of the Regulated SACCOs which had mobile money connectivity and shows that a total of 228 Regulated SACCOs (composed of 156-DT-SACCOs and 72-NWDT-SACCOs) had availed mobile money services to their membership through the USSD code platforms.

This is an increase from a total of 209-Regulated SACCOs which were offering the mobile money service through USSD codes in 2022, with the largest increase being within the NWDT-SACCOs segment which increased from 53-NWDT-SACCOs to 72-NWDT-SACCOs, while the DT-SACCOs segment remained static at 156-DT-SACCOs over the period. It is significant to note that the use of USSD code is critical to SACCO members without access to smart-phone or devices, as well as for members in geographical locations with no or slow or low internet access or connectivity.

Figure 78: Number of Regulated SACCOs with mobile money connectivity through USSD Codes or Internet based Applications

Source: SASRA Database

The number of Regulated SACCOs on internet-based application connectivity for mobile money also increased to 140-Regulated SACCOs in 2023, which was composed of 91-DT-SACCOs and 49-NWDT-SACCOs; from 103-Regulated SACCOs in 2022 which were composed of 75-DT-SACCOs and

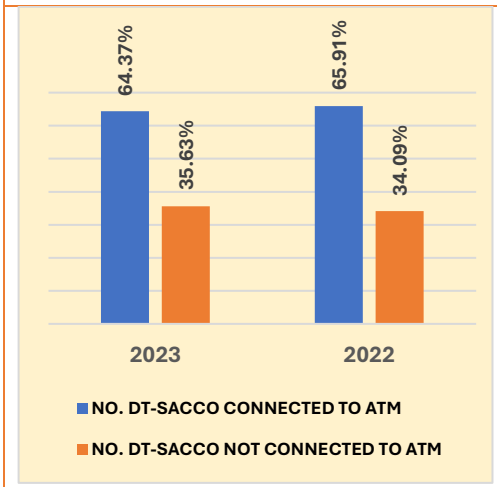

28-NWDT-SACCOs. The NWDT-SACCOs segment had the highest number of increases in the adoption of internet-based application for mobile money services with 21-NWDT-SACCOs embracing the technology in 2023, while only 16-DT-SACCOs adopted the technology in the same period. Nevertheless, the analysis shows that provision of mobile money services is progressively gaining momentum in all the segments of the Regulated SACCOs' spectrum.

10.3. ATM Connectivity

The provision of ATM financial services together with its associated card services, remains one of the most popular financial services for demand deposit-taking financial institution such as DT-SACCOs. Its popularity is directly linked to the ease with which it makes it easy for depositors to access their savings, either as cash withdrawals or for payment of goods and services, without the need to visit teller services.

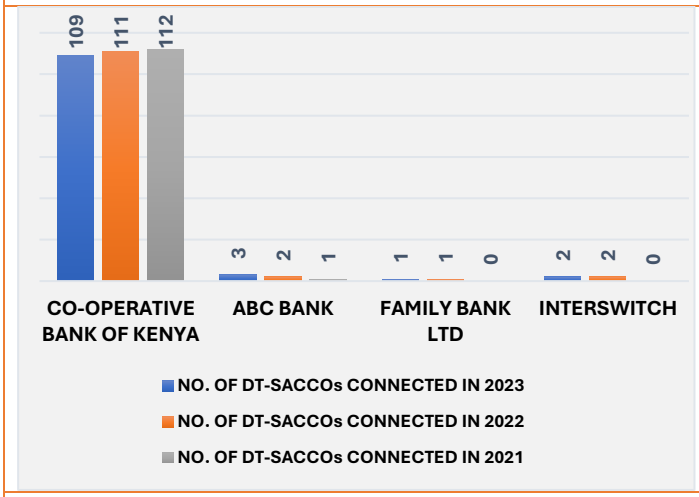

From the SACCOs' viewpoint, it is a means to reduce costs associated with teller services as well as the often expensive and capital-intensive brick and mortar physical branches. However, SACCOs are not direct participants in the national payment system, yet ATM financial services offering cannot be accessed except through access to the national payment system infrastructure. Consequently, DT-SACCOs have entered into agreements with commercial banks in order to offer ATM financial services and associated card transactions to their members. Figure 79 provides a summary of the level of ATM connectivity among the DT-SACCOs with 64.37% of all the DT-SACCOs being connected in 2023, which is a slight drop from a proportion of 65.91% of DT-SACCOs which were connected to ATMs in 2022.

Figure 79: Level of ATM connectivity of DT-SACCOs

Source: SASRA Database

Figure 80: Distribution of channels for ATM connectivity for DT-SACCOs.

Source: SASRA Database

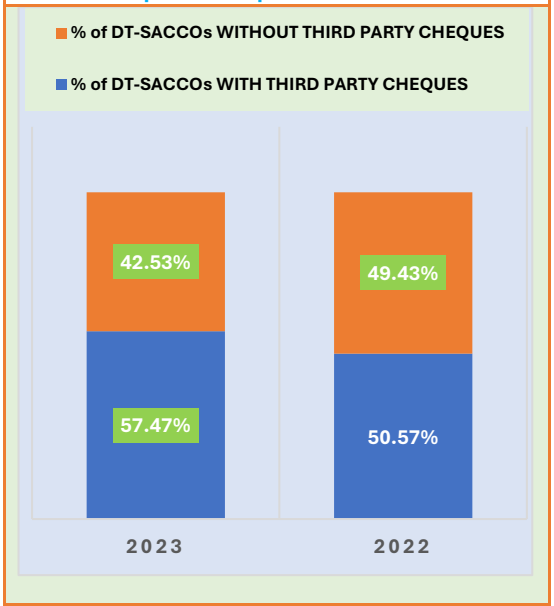

The Cooperative Bank of Kenya continued to provide the highest number of ATM financial services to the DT-SACCOs, with 109-DT-SACCOs using its ATM and associated SACCO link card services. This was however a marginal drop from the 111-DT-SACCOs which were reliant of the Cooperative Bank of Kenya for their ATM financial services, and consistent with the overall drop in ATM connectivity from 65.91% in 2022 to 64.37% in 2023. The ABC Bank Ltd, the Family Bank Ltd; and the Interswitch (verve) are other institutions which have partnered with DT-SACCOs, so as to enable DT-SACCOs provided ATM and card services to their members (customers) as summarised in Figure 80.

10.4. Cheque Partnerships

Members of the public including those who patronize the financial services of DT-SACCOs still regard cheques as an important bill of exchange especially for third-party payments of goods and services, instead of cash. The advent of mobile money and other forms of real-time electronic payments has not yet diminished the usage of cheques as a means of third-party payments. Cheque payments, settlements and clearance, like ATM financial services, is also a function embedded in the ability to access the national payment system infrastructure, and with SACCOs generally having no direct access to the national payment system, they have been forced to partner with third-party commercial banks in order to offer cheque financial services to their members.

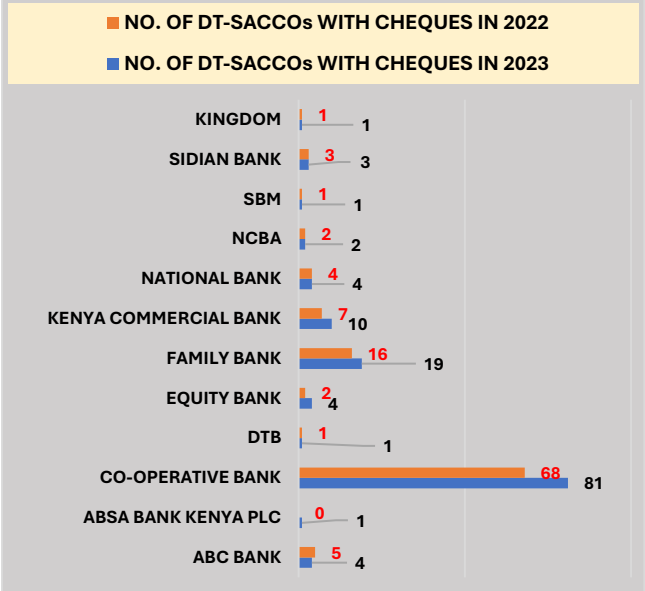

Figure 81 provides the level of usage of third-party cheque services by DT-SACCOs and shows that 57.47% of all the DT-SACCOs were having cheques services in 2023, which is an increase from a proportion 50.57% of DT-SACCOs which were offering the cheque services to their members in 2022. The foregoing underscores the fact that there is still a demand for cheque transactional services by members of DT-SACCOs despite, the options of mobile money as well as other forms of real-time electronic money transfers. The Cooperative Bank of Kenya is noted to be offering the cheque issuance, clearing and settlement services to the largest number of DT-SACCOs with 81-DT-SACCOs relying on them in 2023, compared to 68-DT-SACCOs which relied upon them in 2022 as summarised in Figure 82.

Figure 81: Level of cheque issuance and settlement partnership of DT-SACCOs

Source: SASRA Database

Figure 82: Distribution of Third-Party Financial Institutions providing cheques issuance and settlement for DT-SACCOs

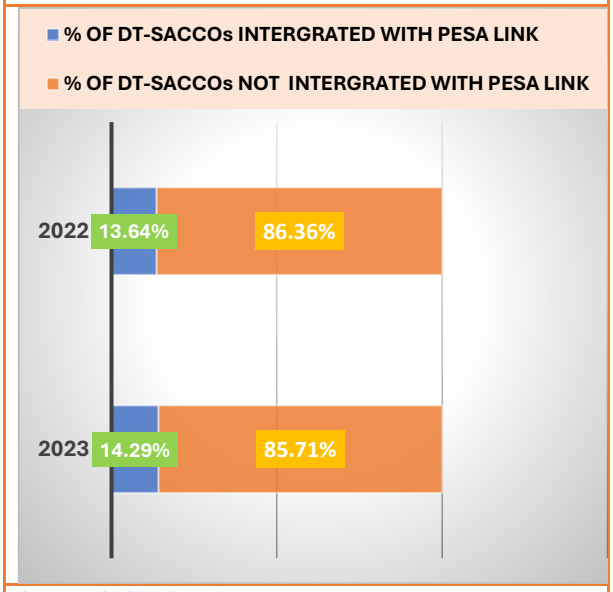

Source: SASRA Database

10.5. The Pesalink Connectivity

Pesalink electronic fund transfers offered by the Kenyan commercial banking system has continued to attract DT-SACCOs, largely driven by the convenience it brings to SACCO members when moving large amounts of money from their FOSA savings accounts to other accounts held in the SACCO system or the banking system. Similar to ATM and cheque transactions, DT-SACCOs have had to rely on the commercial banking systems for settlement and clearance of their Pesalink fund transfers, with 25-DT-SACCOs having and maintaining active settlement and clearance agreements with commercial banks as highlighted in Figure 83 and Figure 84. The Cooperative Bank of Kenya had the highest number of DT-SACCOs relying on it for the settlement and clearance

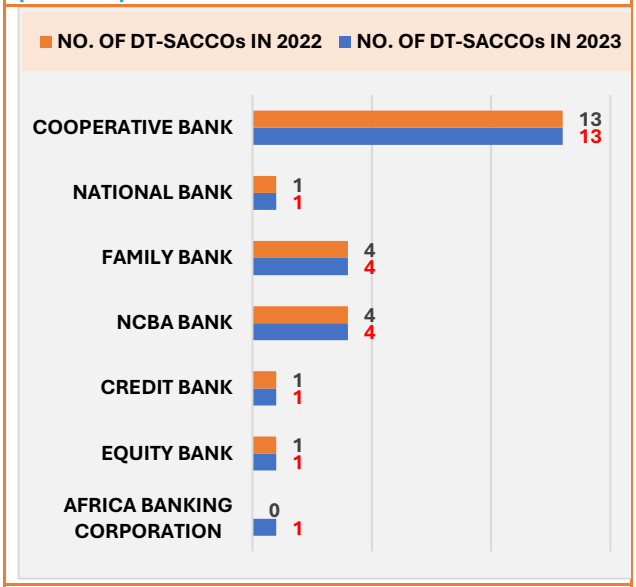

services in respect of pesalink transactions, with 13-DT-SACCOs in 2023, same as the previous year. Other commercial banks providing the settlement and clearance infrastructure for DT-SACCOs in this regard were NCBA Bank (4-DT-SACCOs); Family Bank (4-DT-SACCOs); National Bank, Credit Bank, Equity Bank and ABC Bank (one (1) DT-SACCO each).

Source: SASRA Database

10.6. The SACCO Agency Operations

Regulated SACCOs have continued to embrace the use of agents to transact their respective regulated business as a cost saving means instead of the often-expensive brick and mortar physical offices or branches. The use of agents in transacting regulated SACCO business also brings convenience and ease of access to members, especially those using cards and mobile money services. During the year 2023, a total of 37-DT-SACCOs had deployed 4,038 agents to transact SACCO business in various parts of the country on their behalf, with the most common transaction being cash deposits, cash withdrawals, account balance inquiries, payment of bills (including school fees) among others.

Table 38 provides a summary of the total SACCOs agency transactions and shows that the total number of transactions conducted by SACCOs' agents increased from 1.88 million in 2022 to 7.82 million transactions in 2023. The cumulative volume of transactions also increased from Kshs 26.50 billion in 2022 to Kshs 27.73 billion in 2023. It is significant to note that as the SACCO agency business model gains traction among the DT-SACCOs, cash withdrawals and deposits remain the most dominant with 66.58% and 24.11% of all transactions respectively in 2023. They also had the highest volume of transactions with cash deposits transacting a total of Kshs 15.32 billion representing 55.24% of the total volumes of the agency transactions, while the cash withdrawals transacted Kshs 12.30 billion representing 44.35% of the total agency transactions in 2023. There was also an increase in the number of transactions related to transfer of funds, account balance inquiries and requests for mini – statements for accounts.

Table 38: Number and Volume of Financial Transactions undertaken by SACCO agents, 2023

INDICATOR	YEAR	NO. OF TRANSACTIONS	% NO. OF TRANSACTIONS	VOLUMES OF TRANSACTIONS (KSHS)	% VOLUME OF TRANSACTIONS	AVERAGE PER TRANSACTION (KSHS)

10.7. Digital Credit and Loan Products Offering

Like many other commercial credit financial institutions, Regulated SACCOs have been heavily engaged in the development and rolling out of digital credit and loan products, particularly to ward-off competition from the mainstream commercial banks as well the emergent Digital Credit Providers. The definition of digital credit and loan products largely differs from jurisdictions to jurisdictions, with the only consensus being that digital credit or loans leverages on instant, automated and remote processing of micro-loans, thereby making access to credit fast and convenient. In Kenya however, digital credit financial services are regulated and supervised pursuant to the *Central Bank of Kenya Act (CAP 491)* as read with the *Central Bank of Kenya (Digital Credit Providers) Regulations 2022*, which defines "digital credit" to mean a credit facility or arrangement where money is lent or borrowed through a digital channel. Digital channel on the other hand is defined to mean the internet mobile devices, computer devices, applications, and any other digital systems. It is therefore significant to note that the domestic definition of digital credit or loan does not necessarily encompass the amount of credit or loan being lent or whether the same is a micro-loan on not.

In this regard, Regulated SACCOs have continued to embrace digital credit and loan offering to their members, with 182-Regulated SACCOs (composed of 116-DT-SACCOs and 66-NWDT-SACCOs) representing 50.98% of all the Regulated SACCOs offering digital credit and loans to their membership as summarised in **Figure 85**. The DT-SACCOs had the highest proportion of SACCOs offering digital credit and loans to their members at 66.67% of all the DT-SACCOs, compared to 36.07% of the NWDT-SACCOs which had embraced digital credit and loan services. There was however a marked increase in the number of both DT-SACCOs and NWDT-SACCOs offering the digital credit and loans to their customers (members), and the trend is expected to increase, driven by the efficiency and convenience provided by digital and electronic financial services.

Figure 85: Number and Proportion of Regulated SACCOs providing digital credit and loans.

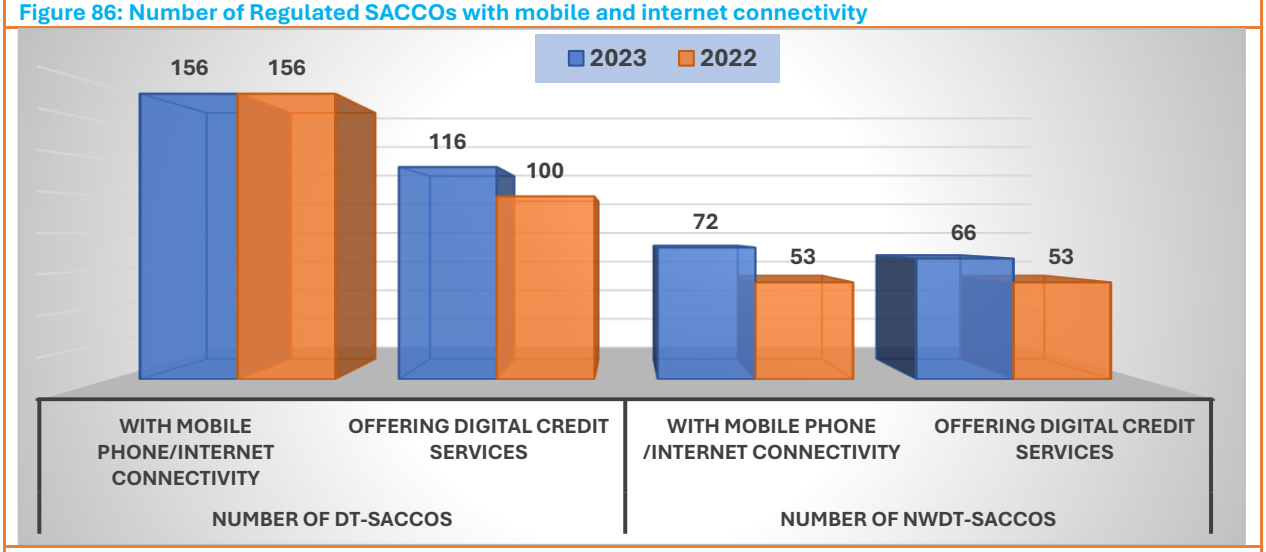

Source: SASRA Database

It is also significant to point out that that the delivery channels for digital credit and loan products remains through mobile and/or internet connectivity, either through the USSD codes or the internet-based applications. There is thus a correlation between the number of SACCOs with mobile and/or internet application connectivity as discussed in section 10.2 of this report, and the number of SACCOs offering digital credit and loan products their membership.

As depicted in **Figure 86**, the number of DT-SACCOs with mobile phone and internet connectivity remained the same at 156-DT-SACCOs during the two year period to 2023, but the number of DT-SACCOs offering digital credit and loan products to their members increased from 100-DT-SACCOs in 2022 to 116-DT-SACCOs in 2023 and it is expected that the remaining DT-SACCOs with mobile phone and internet connectivity will soon exploit the opportunity provided by the two platforms, and start offering digital credit and loan products. Additionally, the number of NWDT-SACCOs with mobile phone and internet connectivity rose from 53-NWDT-SACCOs in 2022 to 72-NWDT-SACCOs in 2023, while the number of NWDT-SACCOs offering digital credit services to their members also increased from 53-NWDT-SACCOs in 2022 to 66-NWDT-SACCOs in 2023.

Figure 86: Number of Regulated SACCOs with mobile and internet connectivity

Source: SASRA Database

Table 39 provides an analysis of the general features of the digital credit and loan products offered by Regulated SACCOs in 2023, either through the USSD code connectivity or through the internet-based applications. It is significant to note that the maximum amounts of the digital credit and loan products offered by a Regulated SACCO was Kshs 1 million, while there was no lower limit. It is however imperative to note that despite the digital credit and loan products being offered through digital channels, those credit and loan products with the maximum allowable range above Kshs 100,000 may not be considered as digital credit in the strict sense, since they are not micro-loans, but have the features of normal loan products, albeit available through the digital channels. This brings to fore the policy discourse on whether the definition of digital credit domestically, which excludes the amount of money involved in is sufficient or not.

Despite the controversy, the analysis in Table 39 shows that the vast amount of digital credit and loan products rolled out by SACCOs ranged below the Kshs 50,000 threshold, thus fitting in the definition of digital credit as a micro-loan, with 175 products out of the total 251 digital credit products; with 120 products being offered by DT-SACCOs and 55 products being offered by the NWDT-SACCOs. Similarly, the majority of SACCOs offering digital credit products, had their products ranged below Kshs 50,000 thus fitting the definition of a digital credit as a micro-loan product, with a total of 127-Regulated SACCOs having designed their digital credit to be below the Kshs 50,000 threshold.

Table 39: Characteristics of Digital Credit Products offered by Regulated SACCOs

LOAN AMOUNT CLUSTER	SEGMENT	NO. OF DIGITAL CREDIT/LOAN PRODUCTS	NO. OF SACCOS OFFERING DIGITAL PRODUCTS	AVERAGE INTEREST RATE PER MONTH
Between Kshs 500,000 & Kshs 1,000,000	DT-SACCOs	2	2	8.50%
	NWDT-SACCOs	1	1	0.83%
Between Kshs 300,000 & Kshs 500,000	DT-SACCOs	6	3	5.42%
	NWDT-SACCOs	0	0	0.00%

Below Kshs 50,000	DT-SACCOs	120	79	6.76%
	NWDT-SACCOs	55	48	6.99%

Source: SASRA Database

10.8. Credit Information Sharing

Regulated SACCOs continued to share the credit information of their members (customers) through the credit reference bureau framework established pursuant to the *Credit Reference Bureau (CRB) Regulations 2020*, which recognises licensed Regulated SACCOs (DT-SACCOs) as direct subscribers to the licensed Credit Reference Bureau (CRBs). There is however an existing conflict between the *Credit Reference Bureau (CRB) Regulations 2020* and *section 54 of the Sacco Societies Act* which anticipated the enactment of a parallel credit information sharing framework for Regulated SACCOs. In addition, the restriction created in the *Credit Reference Bureau (CRB) Regulations 2020* by reference to licensed SACCOs means that the NWDT-SACCOs which are not licensed under the Sacco Societies Act, but authorized pursuant to the Regulations 2020 made thereunder, are not bound to comply with them.

Despite the foregoing shortcomings of the prevailing legal framework for credit information sharing as it relates to SACCOs, it is apparent that the Regulated SACCOs have continued to partner with the licensed CRBs for purposes of periodic sharing of the credit information of their members. Table 40 and Figure 87 provide a summary of Regulated SACCOs which had and maintained active credit information sharing partnerships, with the three licensed CRBs and shows that the number of Regulated SACCOs reporting to CRBs decreased from 251-SACCOs in 2022 to 249-Regulated SACCOs in 2023. The NWDT-SACCOs increased

their portfolio reporting to CRBs from 99-NWDT-SACCOs in 2022 to 103-NWDT-SACCOs in 2023, while the number of DT-SACCOs reporting to CRBs dropped from 152-DT-SACCOs in 2022 to 146-DT-SACCOs in 2023. The drop included the two (2) DT-SACCOs whose licenses were revoked in 2023 namely *M/S Jacaranda SACCO Society Ltd* and *M/S Kenya Midlands SACCO Society Ltd*, as well as four (4) other DT-SACCOs which terminated their partnerships with the licensed CRBs, thus calling for legal reform to address the existing conflict in the credit information sharing framework in order to make it mandatory rather than discretionary.

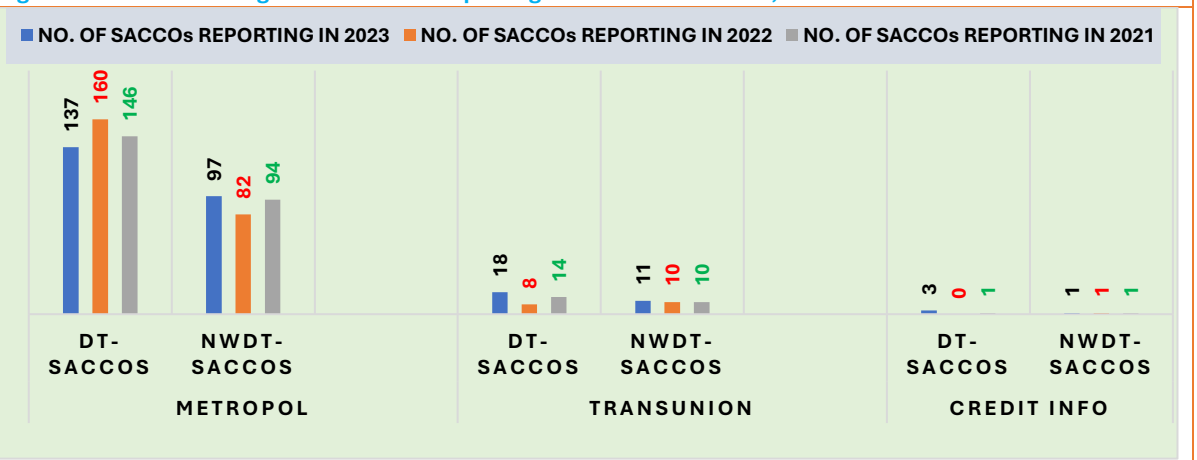

Table 40: Number of Regulated SACCOs sharing credit information with CRBs

	REPORTING STATUS	2023		2022	
		NUMBER OF SACCOs	% PROPORTION	NUMBER OF SACCOs	% PROPORTION
NWDT-SACCOs	NOT REPORTING TO CRB	80	43.72%	84	45.90%
	REPORTING TO CRB	103	56.28%	99	54.10%
	TOTAL	183		183	
DT-SACCOs	NOT REPORTING TO CRB	28	19.18%	24	13.64%
	REPORTING TO CRB	146	83.91%	152	86.36%
	TOTAL	174		176*	
ALL REGULATED SACCOs	NOT REPORTING TO CRB	108	30.25%	108	30.08%
	REPORTING TO CRB	249	69.75%	251	69.92%
	TOTAL	357		359*	

Source: SASRA Database. *Two DT-SACCOs had their licenses revoked in 2023.

A majority of the Regulated SACCOs reports to Metropol CRB with 137-DT-SACCOs and 97-NWDT-SACCOs in 2023 reporting there, but which was comparatively lower that the 160-DT-SACCOs and 82-NWDT-SACCOs in 2022 which had committed to sharing their credit information with Metropol CRB. The Transunion CRB on the other hand had 18-DT-SACCOs and 11-NWDT-SACCOs committing to share credit information with them, a marked improvement from 8-DT-SACCOs and 10-NWDT-SACCOs which had in 2022 committed to share their respective credit information. The Credit Info CRB also had 3-DT-SACCOs and one (1) NWDT-SACCO reporting to them. In accordance with best international credit information sharing practices, it is recommended that credit information is uniformly shared with all the licensed CRBs, from which financial service providers can access them in order to price their credit and loans to customers. Regulated SACCOs are thus encouraged to embrace the sharing of members credit information uniformly to all the CRBs, even as the legislative reforms to unlock the apparent conflicts are being pursued.

Figure 87: Number of Regulated SACCOs reporting to the licensed CRBs, 2023

Source: SASRA Database.

11.0. INSPECTIONS, SURVEILLANCE AND OTHER REGULATORY INITIATIVES

11.1. General overview

The supervisory framework of Regulated SACCOs is made up of inspections and surveillance as tools for assessing, monitoring, and reporting their performance and compliance. On-site inspections and surveillance entail physical visits of the Regulated SACCOs to assess their performance and compliance; while off-site surveillance entails the adoption of analysis of periodic, non-periodic and other covert intelligence information to monitor the activities and operations of the Regulated SACCOs. Under the Risk-Based Supervisory Policy deployed by the Authority, on-site inspections and surveillance are triggered by the risk ratings arrived at from the off-site analysis.

11.2. On-site Inspections

Onsite inspections in financial supervision of Regulated SACCOs, entails the physical visit of the Regulated SACCOs physical premises including the head offices, branches and/or any other place of business for purposes of assessing and ascertaining the overall level of compliance. *Section 49 of the Act* and the Regulations made thereunder requires the Authority to carry out on-site inspections of Regulated SACCOs from time to time including but not limited to determining the -

a) level of compliance with prescribed capital adequacy requirements.
b) composition of assets, liabilities, and equity accounts.
c) quality of earning assets; and
d) risks management framework.
e) any other matter which in the opinion of the Authority is relevant to the performance of its mandate under *the Act*, the Regulations made thereunder and any other applicable law.

In accordance with international best practices informed by constrain resources to conduct periodic on-site inspections, the Authority developed and continuously implements, a robust risk based supervisory framework which ensures that resources for on-site inspections are applied only in the riskiest situations, and proportionately among the Regulated SACCOs. There are three (3) main types of on-site inspections which the Authority is required to undertake in respect of the Regulated SACCOs namely –

a) ***On-site compliance Inspections***: These are physical inspections undertaken by the Authority for purposes of continuous monitoring of performance and compliance as provided under *Reg. 66 of the Regulations 2010* for DT-SACCOs and *Reg. 79 of the Regulations 2020* for NWDT-SACCOs. The frequency of undertaking these on-site compliance inspections, is informed by the risk based supervisory policy of the Authority following the off-site analysis and assessment.

b) ***New branch on-site inspections***: These are physical on-site inspections for purposes of licensing of new branches of DT-SACCOs as provided in *Reg. 16(3) of the Regulations 2010* which states that the '*Authority shall undertake the inspection of the branch premises and examine compliance with the standards and the operational readiness of the DT-SACCO for commencing operations*.'

c) ***Licensing and authorization inspections***: These are physical on-site Inspections conducted by the Authority prior to licensing of a new DT-SACCO, or authorization of a new NWDT-SACCOs on their head offices, to assess their level of compliance for purposes of licensing and authorization in accordance with *Reg. 4(4) of the Regulations 2010* for DT-SACCOs and *Reg. 5(4) of the Regulations 2020* for the NWDT-SACCOs.

11.2.1. On-site Inspections for Compliance.

Table 41 provides a summary of the onsite inspections conducted by the Authority over the last three (3) years, based on the county locations of the Regulated SACCOs inspected. In this regard, the Authority conducted 45 on-site compliance inspections in 2023, compared to 37 on-site compliance inspections in 2022. It is however important to note that the number of onsite compliance inspections was below the threshold earmarked by the Authority using its risk based supervisory policy framework, due to inadequate resources following the operationalization of Regulations 2020, which brought the NWDT-SACCOs under the supervisory oversight of the Authority and doubled the number of Regulated SACCOs being overseen by the Authority. Additionally, resources are thus necessary for the Authority to achieve the optimum number of onsite inspections of Regulated SACCOs, based on the risk based supervisory policy, and this excludes the mandatory onsite inspections for licensing and/or authorizations or for new branches.

Table 41: Number of onsite compliance inspections undertaken over the Regulated SACCOs (2021-2023)

NO.	COUNTY WHERE THE ONSITE INSECTION UNDERTAKEN	NO. OF REGULATED SACCOs IN THE COUNTY-2023	NO OF ONSITE-INSPECTIONS UNDERTAKEN			PERCENTAGE OF ONSITE TO TOTAL INSPECTIONS DURING THE YEAR			PERCENTAGE OF ONSITE TO TOTAL REGULATED SACCOs IN THE COUNTY

It is also significant to note that each onsite inspections yielded a statutory Inspection Report, which is also separately presented to the subject Regulated SACCO inspected in accordance with *section 49(7) of the Act*, which provides inter alia that a report of the findings of an onsite inspection shall in addition to any action that may be taken under the *Co-operative Societies Act* be presented by the Authority to the Board of Directors of the Regulated SACCO. Other recipients of such onsite inspections report for implementation are the Commissioner for Cooperative Development and the County Cooperative Office, in respect of whose jurisdiction the Regulated SACCOs' head office is situated.

11.2.2. On-site Inspections for Branch Licensing

In accordance with the requirements of the Act as read with *Reg. 16(3) of the Regulations 2010* applicable to DT-SACCOs, the Authority also conducted 25-statutory onsite inspections for purposes of approving and licensing new branch networks of some 24-DT-SACCOs as shown in **Table 42**. The onsite inspections were spread across 11–Counties and 25 different locations in town and market centres within the said Counties. These on-site inspections yielded reports on the standards and the operational readiness of the branch networks for purposes of undertaking deposit-taking business, including the appropriate recommendations thereto.

Table 42: Number of on-site inspections for branch licensing on DT-SACCOs in 2023

11.2.3. On-site Inspections for Licensing or Authorizations

In accordance with the provisions of the Act and Regulations made thereunder, the Authority also conducted statutory on-site inspections as part of the consideration of applications for licensing of new applicants to undertake deposit-taking businesses or authorization of new applicants to undertake specified non-deposit taking businesses. **Figure 88** provides the particulars of the ten (10) statutory on-site inspections conducted by the Authority in 2023 for purposes of assessing applications by various SACCOs for licensing and authorizations.

There was a total of six (6) on-site inspections for licensing of DT-SACCOs, all of which were within the Nairobi City County and out of which two (2) of the applicant SACCO Societies namely *M/S Njiwa SACCO Society Ltd* and *M/S Jogoo SACCO Society Ltd* had their applications approved and thus issued with deposit taking licenses to operate with effect from January 2024. Two (2) of the on-site inspections in Nairobi County, as well as one (1) on-site inspection each in Kiambu and Narok counties, were in relation to applications for specified non-deposit taking business and are at different stages of consideration by the Authority.

Figure 88: Number of on-site inspections for licensing/authorizations in 2023

Source: SASRA Database

11.3. Off-site Surveillance

Off-site surveillance as part of the supervision and regulation of Regulated SACCOs is composed of covert analysis of periodic reports or returns and/or other non-periodic reports or returns received by the Authority from Regulated SACCOs. Other sources of information for off-site surveillance include third-party information and documents as well as referrals from other government agencies. It is important to note that the results of off-site surveillance and analysis often result into the rating of the Regulated SACCOs for purposes of triggering any on-site inspection.

Table 43 provides a summary of the prescribed periodic statutory reports submitted by Regulated SACCOs for purposes of off-site surveillance, which includes the capital adequacy, the liquidity and the statement of deposit return forms which are submitted on a monthly basis; the risk classification of assets and provisioning, investments, sectoral lending, bank agency, and SACCO agency returns which are submitted quarterly; the statements of financial position and comprehensive income which are submitted monthly and annually; and other disclosures return which is submitted annually. Other non-periodic returns and reports which Regulated SACCOs are required to submit to the Authority for purposes of off-site surveillance include the insider lending, the

fit & proper test forms for members of the Board of Directors and supervisory committees as well as senior management, the appointments or removal or resignations of Chief Executive Officers, the appointment of external auditors, and any other information as the Authority may demand from the Regulated SACCOs.

Table 43: List of Statutory Returns and Reports used for off-site surveillance

	DESCRIPTION OF THE RETURNS	FREQUENCY OF SUBMISSION		OBJECTIVE/PURPOSE
	PERIODIC REPORTS AND RETURNS			
		DT-SACCOs	NWDT-SACCOs	
1.	Capital Adequacy Return	Monthly	Quarterly	Monitors if the Regulated SACCO maintains at minimum the prescribed minimum capital and associated ratios.
2.	Liquidity Statement	Monthly	Quarterly	Monitors if the Regulated SACCO is able to meet its short-term obligations, particularly to depositors
3.	Statement of Deposit Return	Monthly	Quarterly	Monitors the deposits and the spread of deposits within the Regulated SACCO.
4.	Risk Classification of Assets & Provisioning	Quarterly	Quarterly	Assess the overall performance of the loan portfolio of a Regulated SACCO, and flags off the non-performing loans for immediate action.
5.	Investment Return	Quarterly	Quarterly	Monitors the levels of investments by Regulated SACCOs in other institutions and also the fixed assets.
6.	Statement of Financial Position	Monthly & Annually	Quarterly & Annually	Monitors the financial position of Regulated SACCOs in terms of assets held against capital and liabilities.
7.	Statement of Comprehensive Income	Monthly & Annually	Quarterly & Annually	Monitors the performance in terms of incomes generated against expenses incurred to earn them.
8.	Other Disclosures	Annually	Annually	Monitors the capital strength, liquidity, insider lending, non-performing loans, investments and off-balance sheet items.
11.	Sectoral Lending Report	Quarterly	Quarterly	Provides data on the economic sectors financed by the loans and other credit facilities issued by Regulated SACCOs
12.	SACCO Agency Return	Quarterly		Provides the number and the volume of transactions undertaken by agents of Regulated SACCO Societies.
13.	Bank Agency Return	Quarterly		Provides the number and the volume of transactions undertaken by Regulated SACCO Societies on behalf of the Banks.
	NON - PERIODIC REPORTS AND RETURNS			
14.	Insider Lending Reports	Within 14 days after approval or ratification of the loan	Monthly (on 15th of the subsequent month)	Reduce the risks associated with insider dealing, conflicts of interest in insider lending, and abuse of insider information
15.	Fit & Proper Test Form	Immediately upon appointment of officer		Tool for assessment of the suitability of Directors and other senior officers serving or seeking to serve in Regulated SACCOs
16.	Appointment, resignation, or removal of Chief Executive Officer	Within 15 days of the appointment, resignation or removal.		Enables the Authority to determine reasons for removal/resignation, and verify suitability of the new officer, and update the database
17.	Appointment of external auditors	Within 30 days of the appointment by the AGM		Enables the Authority to verify that the auditor is approved, and that the Regulated SACCOs accounts shall be audited within time.
18.	Information requested by Authority	As advised by the Authority		Any other information that the Authority may need in the course of its supervision mandate

Source: SASRA Database

Considerations of requests and applications for corporate approvals is also another key off-site activity undertaken by the Authority in its supervision and regulatory processes. Corporate approvals refer to all prior statutory approvals or grant of letters of no objections, which Regulated SACCOs are required by law to seek from the Authority, in respect of any activity or proposed activity which a SACCO Society or an officer thereof is engaged in or proposes to engage in.

Table 44 provides a summary of the corporate approvals received and considered by the Authority in respect of the Regulated SACCOs in 2023, with the consideration and approval of the audited

statements of each of the Regulated SACCO taking the bulk of all the corporate approvals. This is because the approval of the financial statements of each of the Regulated SACCOs by the Authority is an annual statutory responsibility of the Authority pursuant to *section 41 of the Act* as read with the Regulations made thereunder which provides inter alia that every Regulated SACCO shall, not later than three months after the end of each financial year, submit to the Authority for approval, in the prescribed format, its financial statements and a copy of the external auditors report.

Table 44: Summary of the corporate approvals received and considered by the Authority in respect of the Regulated SACCOs in 2023.

REF	NATURE OR DESCRIPTION OF CORPORATE APPROVAL	REGULATORY & SUPERVISORY IMPLICATION OF THE APPROVAL	NUMBER OF REQUESTS OF APPLICATIONS			
			RECEIVED	GRANTED	NOT APPROVED	PENDING
1.	Approval of Audited Financial Statements	1. To maintain the integrity of the financial reporting by ensuring accountability, transparency and compliance with the relevant laws and standards. 2. Protect the members interest and confidence through the presentation of true and fair view of the financial performance of the SACCO.	359	357	2	0
2.	Approval of Loan Products, Savings and Digital Financial Services.	1. To ensure products and services are compliant, transparent, and fair to the members, protecting them from exploitative and discriminatory practices. 2. To ensure the SACCOs maintain sufficient capital and liquidity to offer the products and services and develop robust systems to manage credit risk, ML/TF/PF risks, liquidity risk and operational risk.	62	47	13	2
3.	Opening of new branch and other places of business.	Deepening of financial inclusion and ensuring the SACCO has necessary operational infrastructure to support the new place of business and it aligns with the market demand and overall business strategy.	29	28	1	0
4.	Bank Agencies	The SACCO agencies operate within the legal frameworks and maintain financial stability, whilst protecting members interests and enhancing financial inclusion	12	12	0	0
5.	SACCO Agency	Deepening Financial Inclusion and protecting SACCOs from agents associated risks such as cybersecurity.	6	2	1	3
	Insurance Agency	To preserve the subsidiary as an asset of the SACCO and prevent it from cannibalizing the assets of the SACCO	1	0	0	1
6.	Approval for Relocation, closure, and temporary closure of a SACCOs place of Business	To ensure continuity of operations and minimise disruption of services to members and preserve the integrity of the SACCOs data during transitions.	23	22	1	0
7.	Approval for capital Expenditures	To ensure prudent utilization of SACCOs resources, its impact on the capital adequacy, cashflows and overall financial position of the SACCO.	9	6	3	0

11.4. Complaints Resolution and Management

The supervision of Regulated SACCOs as provided under the *Act* and the *Regulations* made thereunder, encompasses both the prudential and market conduct supervision of the regulated entities. Whereas prudential supervision is largely concerned with the solvency, safety, and soundness of Regulated SACCOs, the market conduct supervision addresses the manner in which the Regulated SACCOs treat their customers (members) and integrates financial integrity supervision. An important component of market conduct supervision relates to consumer (member) protection and fair treatment of the consumers, which includes resolution of complaints. To this extent the Authority continuously receives and resolves general complaints and/or addresses specific inquiries from members of the public, with

regard to operations and activities of Regulated SACCOs.

Table 45 depicts a summary of the complaints and/or inquiries received and processed in one way or the other by the Authority and shows that the number of complaints and/or inquiries increased to 715 complaints/inquiries in 2023, compared to 276 complaints/inquiries received and processed by the Authority in 2022. The sharp increase in the number of complaints/inquiries received and processed by the Authority in 2023, is largely informed by the revamping of the Authority's consumer (member) protection initiatives and awareness campaigns, whereby the Authority's regulatory and supervisory roles, especially in resolution of complaints have been highlighted.

Table 45: Summary of the complaints and/or inquiries received and processed by the Authority from the members of the public

Some of the initiatives include the issuance of the *Guidelines on Complaints Management by Regulated SACCOs (SASRA/MC/1/2023) dated 15th June 2023* which provides the manner and procedures for complaint management by Regulated SACCOs, including the reporting framework of the complaints to the Authority. The Authority has also been at the forefront of using its social media platforms and accounts to sensitize the public on their rights and obligations as members of Regulated SACCOs, including the complaints management and resolution framework. The majority of the complaints or inquiries related to claims by members of the Regulated SACCOs for refund of savings or deposits at 57.48% of all the complaints/inquiries in 2023, which is a slight increase from 53.99% of the complaints/inquiries relating to claims for refund of deposits reported in 2022 as summarised in **Figure 89**. The complaints/inquiries relating to loans and loans issuance were the second highest for the third-consecutive year at 14.97% in 2023, but a significant proportionate drop from 17.75% in 2022.

It is, however, significant to note that most of the complaints/inquiries relating to loans and loan issuance, arose due to failure by the members (customers) of the various SACCOs to read, understand and comply with their respective

SACCOs' loan/credit policies, the terms and conditions of the loan contracts and the applicable loan repayment schedules. At the segmental level, the highest number of complaints/inquiries related to the operations and activities of DT-SACCOs at a high of 628 complaints/inquiries, representing 87.83% of all the complaints/inquiries received and processed, compared to 87 complaints/inquires representing 12.17% of all the complaints/inquiries received and processed which related to the NWDT-SACCOs in 2023.

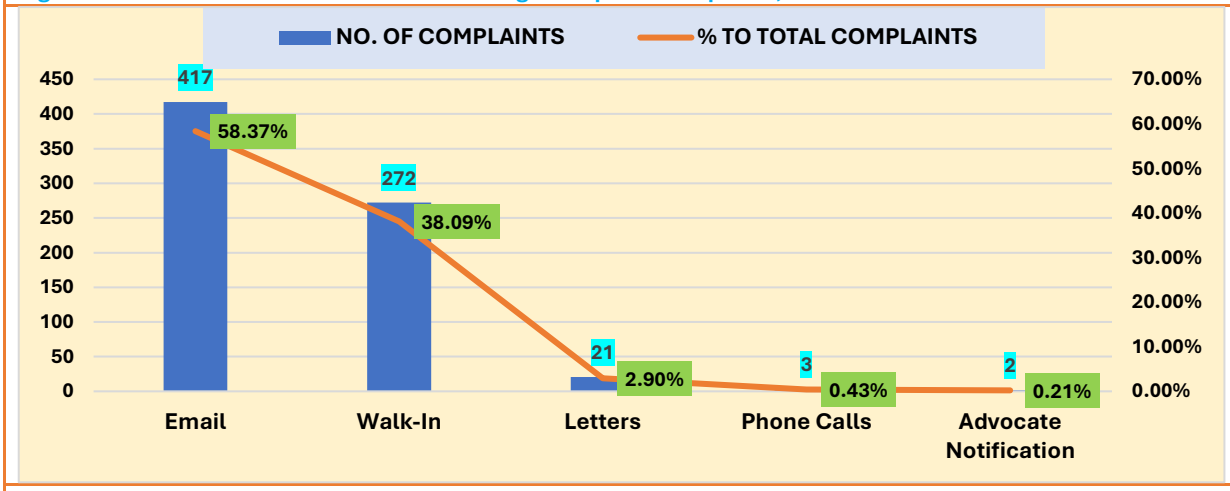

Figure 89: Level of prevalence of the complaints/inquiries received and processed by the Authority by nature

Source: SASRA Database

In accordance with the Authority's guidance on submission of complaints/inquiries, the majority of complaints/inquiries were received and processed by the Authority through email communications from the various complainants or inquirers and accounted for 58.37% all the complaints/inquiries received and processed in 2023 as summarised in **Figure 90**. The walk-in complainants or inquirers who physically visited the Authority's offices accounted for 38.09% of the complaints/inquiries received and processed, and thus underscores the importance of electronic media of communication through emails as a channel for the implementation of an effective complaints' resolution mechanism. Indeed, the fact that Regulated SACCOs draw membership domiciling in different geographical locations of the country, technically makes email communication the most preferable channels of accessing the Authority's public services.

Figure 90: Distribution of channels used to lodge complaints/inquiries, 2023

11.5. Criminal Investigations by the Fraud Investigations Unit

The SACCO Societies Fraud Investigations Unit (SSFIU) was established in 2020, with the mandate of detection, prevention, and apprehension of offenders perpetrating fraud within the Regulated SACCO industry. They also investigate and make appropriate recommendations to the Office of the Director of Public Prosecution incidences of fraud within the SACCO industry. **Table 46** provides a summary and status of the details of the criminal cases being pursued by the SSFIU for the period ended December 2023.

11.6. Regulatory Initiatives for Regulated SACCOs

Regulatory initiatives are the activities of the Authority geared towards the development and issuance of supervisory regulatory instruments, or tools aimed at providing guidance to Regulated SACCOs from time to time, and with specific reference to key thematic or emergent issues. Regulatory tools and instruments are a critical mainstay of the success of all the supervisory initiatives of the Authority, and indeed of any financial regulator cognizant of the fact that the financial services sector is always in a state of flux with new risks emerging all the time. During the year 2023 the following regulatory initiatives were undertaken –

a) The Authority finalised and issued the *Guidance Note on Corporate Governance for Regulated SACCO Societies in Kenya (Ref. No. SASRA/GG/2/2023 dated June 2023)*. The issuance followed validation of the Guidance Note in 2022 and provides Regulated SACCOs with the best practices in corporate governance, as highlighted in section 12.2 of this report.

b) The Authority finalised and issued a *Circular on the Minimum Requirements for Engagement with Third-Party System Integrators and Vendors (Ref.*

SASRA/GG/1/2023 dated 6th June 2023). The circular prescribes the minimum considerations which Regulated SACCOs must take into account when engaging the services of third-party system integrators and vendors for purposes of their mobile money services. The object of the circular is to reduce incidences of third-party related cyber violation and threats on the financial services offered by Regulated SACCOs especially the DT-SACCOs.

c) The Authority developed and issued *Guidelines on Complaints' Management by SACCO Societies (Ref. SASRA/MC/1/2023 dated 15th June 2023)*. The Guideline was issued following public consultations, held across the regional locations of the Country and validation at a meeting held in June 2023 (Naivasha). The Guideline provides Regulated SACCOs with a succinct framework for complaints resolution as more particularly highlighted in *section 12.3 of this report*.

As part of its regulatory initiatives the Authority has established international relationships with other international regulatory agencies and stakeholders for purposes of exchange of information and knowledge management in the SACCOs' supervision and regulatory sphere. In this regard, the Authority hosted several international agencies and stakeholders in 2023 as summarised in **Table 47**.

Table 47: Particulars of International Delegations hosted by SASRA on Regulatory Initiatives in 2023

	COUNTRY OF ORIGIN	PARTICULARS OF DELEGATION	DATE	NUMBER OF PARTICIPANTS
1	Rwanda	Technical Officers from the Central Bank of Rwanda (National Bank of Rwanda)	27th February to 3rd March 2023	Three (3) senior technical staff from the Central Bank of Rwanda
2	Malawi	Central Bank of Malawi	7th to 18th August 2023	one (1) Technical regulatory compliance officer from the Reserve Bank of Malawi

11.7. Capacity Building Initiatives for Regulated SACCOs

The Authority has continued to provide capacity building initiatives within the SACCO industry with a view to deepening compliance with the prudential standards. It is also part of the Authority's knowledge management and information sharing framework on the best practices in the SACCO cooperative business model, as well as emergent legal and regulatory trends. The capacity building initiatives by the Authority takes two (2) models, namely those which are initiated by the Authority and those which are initiated by individual SACCOs but facilitated by the Authority in accordance with the Regulated SACCOs' specific needs. **Table 48** provides a summary of the capacity building initiatives which were initiated by the Authority in 2023.

11.8. Anti-Money Laundering Initiatives for Regulated SACCOs

Kenya as part of the community of nations is obligated to combating Money Laundering (ML), Terrorism Financing (TF) and the Proliferation Financing (PF) in accordance with the standards set out by the Financial Action Task Force (FATF). These obligations have been domesticated pursuant to the provisions of the *Proceeds of Crime and Anti-Money Laundering Act (POCAMLA)* and the *Prevention of Terrorism Act (POTA),* as read with the regulations made thereunder. SACCO Societies are classified as reporting institutions in accordance with the provisions of *POCAMLA*, which also imposes critical statutory obligations on SACCOs as such reporting institutions.

These obligations include but are not limited to mandatory registration with the Financial Reporting Centre, statutory reporting of suspicious financial transactions or activities, continuous screening of customers or persons whom SACCOs undertakes or seeks to undertake financial transactions among others. The Authority on the other hand is classified under *POCAMLA* as a Supervisory body with specific supervisory duties with regard to AML/CTF/CPF for the SACCO industry. In this regard therefore the Authority has continued to integrate AML/CTF/CPF initiatives in its supervisory activities as highlighted in its *Strategic Plan 2022 – 2023*. During year 2023, the Authority in collaboration with Financial Reporting Centre (FRC), launched a mass registration of Regulated SACCOs with FRC as reporting institutions as provided in the POCAMLA and the Regulations made thereunder.

Figure 91 provides a snapshot of the status of registration of Regulated SACCOs with FRC and shows that a total of 212-Regulated SACCOs representing 59.38% of all the Regulated SACCOs had been registered and activated by FRC as reporting institution. The remaining Regulated SACCOs had their application for registration either returned for re-submission due to inadequate information disclosures (70-Regulated SACCOs) or rejected and required for fresh application (43-Regulated SACCOs). It is the Authority's expectation that all the Regulated SACCOs shall be fully registered by FRC during the year 2024, with those required to re-submit additional information or make fresh application for registration being at various stages of doing so, with the registration process being undertaken electronically through the *goAML application* available on https://goaml/frc.go.ke.

Figure 91: Number of Regulated SACCOs registered with FRC as Reporting Institutions pursuant to POCAMLA.

Source: SASRA & FRC Database

Additionally, the Authority in collaboration with the FRC conducted a one-day capacity building and sensitization training for the Regulated SACCOs industry which was held virtually on 27th July 2023 on the topic of '*Regulated SACCOs' Obligations under the POCAMLA'*. The training was attended by slightly under 400 senior officers of Regulated SACCOs drawn from a total of 168-Regulated SACCOs in Kenya as summarised in **Table 49**. This consisted of 92-DT-SACCOs which had 258 participants and 76-NWDT-SACCOs which had 133 participants, while the Authority had over 19 technical staff drawn from the compliance and regulatory policy functions.

Table 49: Details and particulars of attendance of virtual sensitization training for Regulated SACCOs by FRC and SASRA held on 27th July 2023.

	NAME OF INSTITUTION	NO. OF INSTITUTIONS	NO. OF PARTICIPANTS

Source: SASRA Database

In addition, and in compliance with the requirements of *Proceeds of Crime and Anti-Money Laundering Act (POCAMLA)* and Regulations made thereunder and the *Prevention of Terrorism Act (POTA)* and Regulations made thereunder, the Authority received and circulated to Regulated SACCOs the relevant circulars from FRC on AML/CTF/CPF initiatives. The FRC circulars circulated to Regulated SACCOs as reporting institutions in 2023 are summarised in **Table 50.**

Table 50: Summary of FRC Circulars relating to Regulated SACCOs on AML/CFT/CPF issued in 2023

	DESCRIPTION OF CIRCULAR FROM FRC	CIRCULAR NUMBER AND DATE ISSUED	PURPOSE OR OBJECTIVE OF THE CIRCULAR
1	Registration of SACCOs with the Financial Reporting Centre	FRC Circular No. 3 of 2023 dated 30th August 2023	Directing all SACCOs to register with the FRC as reporting institutions in accordance with section 47 of POCAMLA & Regulations, 2023 with a deadline of 15th September 2023 but extended to 16th October 2023.
2	Reporting of Cash Transactions by Reporting Institutions.	FRC Circular No. 4 of 2023 dated 19th October 2023	Advising Regulated SACCOs as reporting institutions under POCAMLA of the setting of the threshold for reporting all cash transactions of US Dollar 15,000 and above or equivalent currency to the FRC.

CHAPTER THREE

DEVELOPMENTS IN THE SACCO INDUSTRY

12.0. POLICY DEVELOPMENTS

This section discusses some of the key policy developments that took place in the international arena as well as domestically with direct or indirect impact or potential impact on cooperative enterprises, and more specifically the SACCO industry.

12.1. Declaration of 2025 as the 2nd International Year of Cooperatives

The 47th plenary session of the United Nations General Assembly held on 3rd November 2023 adopted a resolution on cooperatives in social development calling for the proclamation of 2025 as an International Year of Cooperatives. The text of the resolution encourages all member states, as well as the United Nations and all other relevant stakeholders, to take advantage of the International Year of Cooperatives as a way of promoting cooperatives and raising awareness of their contribution to the implementation of the Sustainable Development Goals and to overall social and economic development.

The initiative comes after the success of the first International Year of Cooperatives in 2012, which highly contributed to raise awareness of the important role of cooperatives in promoting sustainable development. The resolution further draws governments' attention to the recommendations of the 2023 United Nations Secretary General report, on cooperatives in social development, to focus support on cooperatives as sustainable and successful business enterprises by strengthening the entrepreneurial ecosystem for cooperatives enabling them to further contribute directly to decent employment generation; poverty and hunger eradication; education; social protection - including universal health coverage; financial inclusion; and the creation of affordable housing options across a variety of economic sectors in urban and rural areas.

The text also recommends reviewing existing legislation and regulations to make the national legal and regulatory environment more conducive to the creation and growth of cooperatives by improving existing laws and regulations and/or by establishing new ones, especially in the areas of access to capital, autonomy, competitiveness, and fair taxation. In addition, the resolution calls on the United Nations' member states to consult cooperatives in the preparations for the voluntary national reviews for the High-level Political Forum on Sustainable Development. It also invites governments, relevant international organisations, the specialised agencies, and local, national, and international cooperative organisations to continue to observe the *International Day of Cooperatives* annually, on the first Saturday of July, as proclaimed by the UN General Assembly in its resolution 47/90.

The Kenya cooperative movement being the largest in Africa, with the SACCO industry being the most active and vibrant are therefore expected to participate in observing 2025 as the International Year of Cooperatives through various initiatives, including the observation of the annual *International Cooperative Day (Ushirika Day).* In addition, the UN resolution on the importance of Cooperative has come at a time when Kenya is in the process of reviewing its primary cooperative legislative framework and it is hoped that the review shall take into considerations the clarion calls by the UN.

12.2. The Guidance Notes on Corporate Governance for Regulated SACCOs

The Authority issued a *Guidance Note on Corporate Governance for Regulated SACCOs (SASRA/GG/2/2023) in 2023,* which documents the international best practices on corporate governance for implementation by the Regulated SACCOs. The Guidance Notes emanated from the overall realization that good corporate governance remains a key cornerstone for the success of any organization and thus a critical success factor for businesses across the world, and Regulated SACCOs are not an exception. Additionally, good corporate governance practices always play a critical role in entrenching trust and confidence of the members of the public, from whom such Regulated SACCOs mobilize deposits, and in the absence of which deposits' flight is a common occurrence.

The Guidance Note adopts the definition of corporate governance for Regulated SACCOs as the system of rules, practices, and processes by which Regulated SACCOs are governed, managed and or operated by the Board of Directors, Chief Executive Officers, and Senior Management, and oversighted and held accountable by the Supervisory Committee and general membership including their relationships, powers and checks and balances. It also expands the scope of its coverage to include the Regulated SACCOs' subsidiaries and related entities, and incorporates the aspirations contained in the *National Cooperative Policy, 2019 (National Assembly Sessional Paper No. 4 of 2020)*. The Guidance Note is expected to improve the effectiveness and efficiencies in the management and operations of Regulated SACCOs while, promoting transparency and accountability thereby empowering members thereof to hold their officers accountable. Some of the key features of the Guidance Note are summarised in **Appendix II**.

12.3. The Guidelines on Complaints' Management by Regulated SACCOs

The Authority continues to adopt and integrate supervision of conduct of business in its supervisory and regulatory framework, as a way of protecting members of the Regulated SACCOs and the public in general with regard to the financial transactions undertaken by them with their respective individual Regulated SACCOs. As shown in *section 11.4 of this report*, one of the key issues arising from conduct of business of Regulated SACCOs is complaints management and resolutions.

It is in this regard that the Authority in collaboration with the industry stakeholders developed and issued a comprehensive Guideline on Complaints Management for Regulated SACCOs. The Guideline which has been directly shared with Regulated SACCOs is also available from the Authority's website www.sasra.go.ke and **Appendix III** provides a summary of the key thematic issues contained therein for ease of reference.

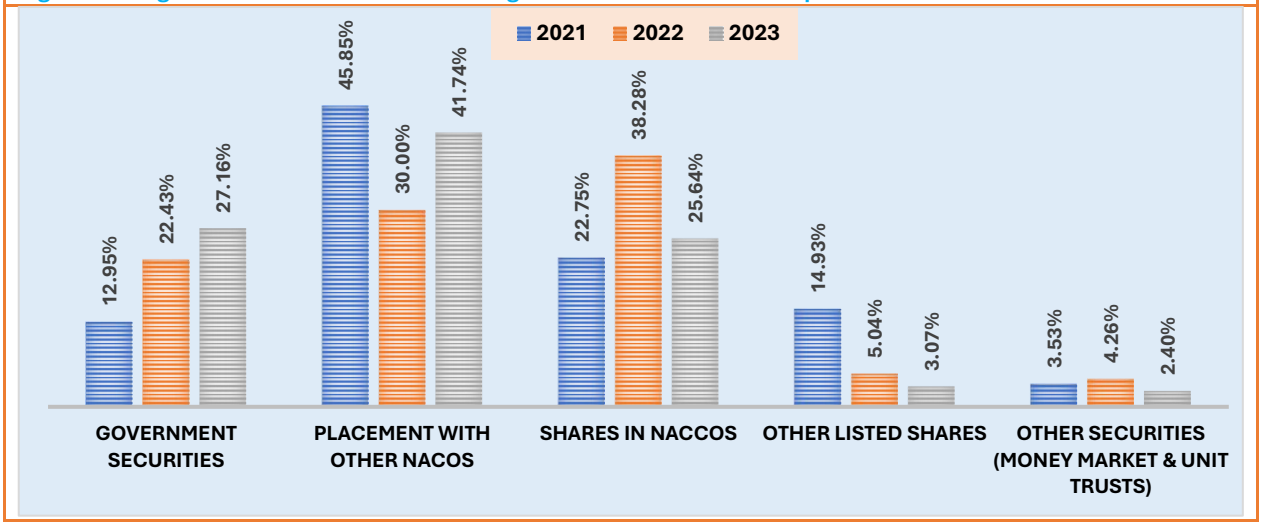

12.4. The Central Bank of Kenya's Dhow CSD

The Central Bank of Kenya launched the *CBK's Dhow CSD* platform which went live in July 2023 and was officially launched in September 2023. The CBK Dhow CSD enables investors to open and operate CSD accounts electronically and remotely using digital platforms such as mobile devices, and without having to undertake a physical visit to the CBK. The CBK's Dhow CSD platform will enable ordinary individual investors to invest in the Kenya Government securities (bills and bonds) as well as trade in them. In this regard, the CBK also issued a user guide on how to register and thereafter transact in government securities on the Dhow CSD titled '*CBK Dhow CSD User Guide – Investor Portal and Mobile Apps*', which is available on their website at www.centralbank.go.ke,

The CBK Dhow CSD platform therefore presents an easy opportunity for Regulated SACCOs to diversify their investment portfolios to tap into the government securities market, which is risk free,

contributes towards their liquidity ratio, and offers comparatively attractive returns than other investment portfolios and at very minimal costs. It is noteworthy that whereas the composition of the total assets' portfolio of Regulated SACCOs has always included government securities as part of their financial investments, the government securities portfolio has remained comparatively minimal. While the total financial investments by Regulated SACCOs amounted to Kshs 68.93 billion as discussed in *section 8.3.2 of this report*, the investments in government securities constituted a proportion of only 27.16% with an amount of Kshs 18.72 billion as shown in **Figure 92**, and thus calling upon Regulated SACCOs to make good use of the CBK Dhow CSD platform to deepen their investments in government securities.

Figure 92: Regulated SACCOs investments in government securities compared to other investments.

Source: SASRA Database

It is significant for Regulated SACCOs to note that the CBK's Dhow CSD platform is open to both individual investors and legal entities and based on the comparatively attractive returns offered by government securities as well their reasonably liquid character, it is very likely that the platform will provide Regulated SACCOs with another layer of competition for deposits in the marketplace. Equally, members of Regulated SACCOs may liquidate their existing deposits for purposes of investments in the government securities through the Dhow CSD platform. In this regard, Regulated SACCOs must continue to devise ingenious ways to ward-off any competition which the platform may portend in order to continue attracting and retaining savings and deposits from their members.

13.0. LEGAL DEVELOPMENTS

This section discusses some of the key legislative, legal, and regulatory developments that took place in the international arena as well as domestically with direct or indirect impact or potential impact on cooperative enterprises, and more specifically the SACCO industry.

13.1. Publication of the Deposit Levy Order for NWDT-SACCOs

The Authority published the *SACCO Societies (Specified Non-Deposit Taking) (Levy) Order, 2023* vide the *Legal Notice No. 178 dated 2nd November 2023*. The Levy Order was published by the Authority following extensive stakeholder consultations and validation in 2022 and provides a framework for NWDT-SACCOs payment of the deposit levy prescribed in *section 15 of the Act*. In particular the Levy Order prescribes that NWDT-SACCOs shall pay to the Authority annual levy to be known as the Annual Sacco Societies Levy at the following rates –

a) A rate of 0.10% from the 1st January, 2024, to the 31st December, 2024.
b) A rate of 0.13% from the 1st January, 2025, to the 31st December, 2025.
c) A rate 0.14% from 1st January 2026 to 31st December 2026.
d) A rate 0.15% from 1st January 2027, until reviewed.

Additionally, the Levy Order further provides that the amount payable shall be assessed by the Authority through a notification to the NWDT-SACCOs, based on the non-withdrawable deposits held by the NWDT-SACCOs as contained their audited financial statements for the preceding year. Upon notification of the amount payable NWDT-SACCOs have thirty (30) days to pay the same to the Authority in default, the penalty prescribed in *section 15 of the Act* sets in.

It is expected that the Levy Order shall be implemented in 2024 upon being approved by the Parliamentary Committees responsible for delegated legislations as provided in the Statutory Instruments Act. It is also significant to point out that that the said Levy Order is based on a cost recovery basis on the regulatory and supervisory services rendered by the Authority to the NWDT-SACCOs, just like the DT-SACCOs segment which have been paying to the Authority a Levy Order modelled along the same lines since the commencement of their prudential supervision in 2010.

13.2. Key Amendments to the Anti-Money Laundering Legislations in Kenya

In order to strengthen the legal and regulatory framework for supervision of Anti-Money Laundering, Combating Terrorism Financing and Countering Proliferation Financing in conformity with the standards issued by the Financial Action Task Force (FATF), Parliament enacted the *Anti-Money Laundering and Combating of Terrorism Financing Laws (Amendment) Act, 2023* which amended several domestic legislations on Anti-Money Laundering and Combating of Terrorism Financing including the following financial sector legislations; *the Capital Markets Act*, *the Insurance Act, the Banking Act, the Central Bank of Kenya Act, the Microfinance Act, the Anti-Corruption and Economic Crimes Act, the National Payment Systems Act; the Proceeds of Crimes & Anti-Money Laundering Act (POCAMLA)* among other legislations. Some of the key implications of the amendments to the Regulated SACCO industry are summarised in **Appendix IV.**

In order to deepen the understanding of the SACCO industry on the ongoing Anti-Money Laundering initiatives in the Country, including the impact of the foregoing legislative amendments, the Authority shall in the short-term collaborate with other government agencies to develop and issue appropriate circulars, Guidelines and Guidance Note to be applied by the Regulated SACCOs. These

shall be in accordance with the Authorities new powers as a supervisory body of Regulated SACCOs under *Section 36 C of POCAMLA*.

14.0. FUTURE OUTLOOK OF THE SACCO INDUSTRY

This section considers the key and material issues which are likely to impact the future performance of Regulated SACCOs in the short and long term. It also unpacks the various risks attendant to the business operations and activities of Regulated SACCOs, drawing largely from the macro-economic environment in which Regulated SACCOs operate as well as the trend analysis of critical data and information. It calls upon Regulated SACCOs to take cognizance of the issues as well as the risks both at the macro-level and at their individual institutional levels, and to put in place adequate mitigation measures in their respective business strategies.

14.1. Macro-Economic Factors

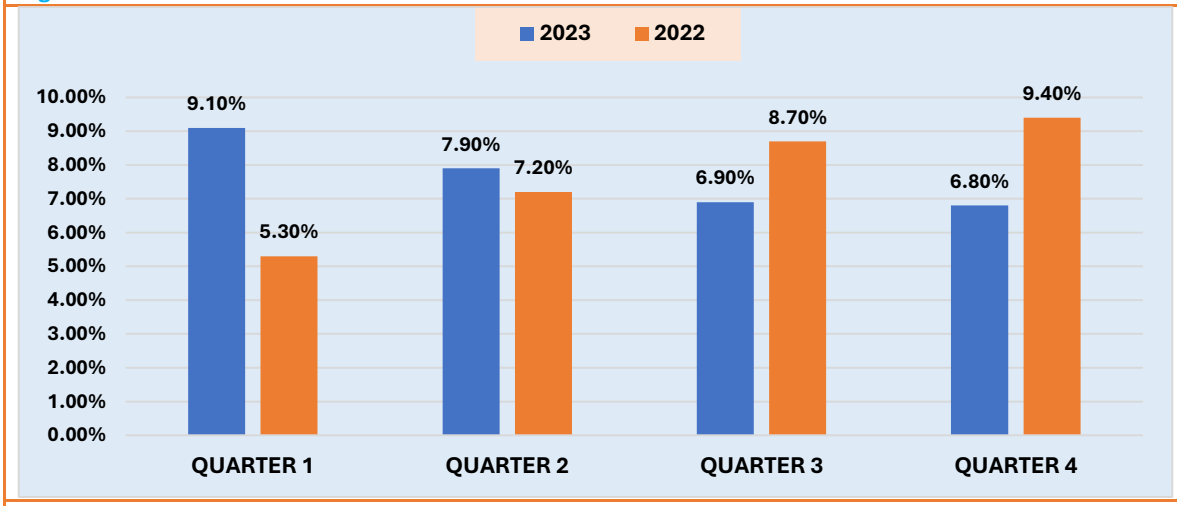

Regulated SACCOs are part and parcel of financial services providers in the domestic economy and thus the macro-economic factors affecting the domestic economy will always continue to have a direct or indirect impact on their operations, performance, and activities. It is therefore always imperative that Regulated SACCOs incorporate these macro-economic facts into their business strategies in order to mitigate any adverse effects associated therewith, but also to reap any gains which they may present, for the benefit of their membership. Some of these factors include but are not limited to vagaries associated with weather and climate changes; employment; inflation, interest, foreign exchange rates; and other national monetary and fiscal policies.

On the changes in weather and climatic conditions, the forecasts by the domestic meteorological agencies projecting increased rainfall during the first half of the year 2024, which started in the last quarter of the year 2023 presents great opportunities to agriculture based Regulated SACCOs (including other Regulated SACCOs lending to agricultural sectors), with expected increase in both crop and animal production. It is expected that that the quality of the loan portfolio of these Regulated SACCOs as well as their income is going improve in the coming year. On the same note however, there is likelihood of increased demand for loans by members of SACCOs who will want to take advantage of the improved weather and climatic conditions to engage in agricultural activities which is already evidenced by the growth in sectoral credit disbursements towards the agricultural sector, from 13.76% in 2022 to 16.96% in 2023.

Regulated SACCOs like other deposit taking credit financial institutions largely rely on deposits (savings) mobilised from their members (customers) to fund their asset portfolios, especially the loan asset. However, savings is a direct function of individual disposable income. Thus, the ability of members of Regulated SACCOs to save will continue to be impacted by the prevailing rates of inflations, as well as other governmental fiscal policies which have a correlation on the public's disposable income.

Figure 93 provides the inflation trends in the economy in 2023 which commenced at a high of 9.1% in the first quarter but gradually dropped to 6.8% in the last quarter, with the annual average of 7.68% in 2023, compared to an annual average of 7.65% in 2022. This had effect on the rate at which members of Regulated SACCOs were able to save which just like the average annual inflation largely remained almost similar at 9.95% in 2023, compared 9.84% in 2022. With the projected reduction in the inflation rate in 2024, buoyed by improved weather and climatic conditions in the form of enhanced rainfall and the appreciation of the domestic currency, it is projected that the Regulated SACCOs deposits (savings) will grow in 2024 at almost the same rate as in 2023.

Figure 93: Overall Domestic Inflation Trends in 2022 and 2023

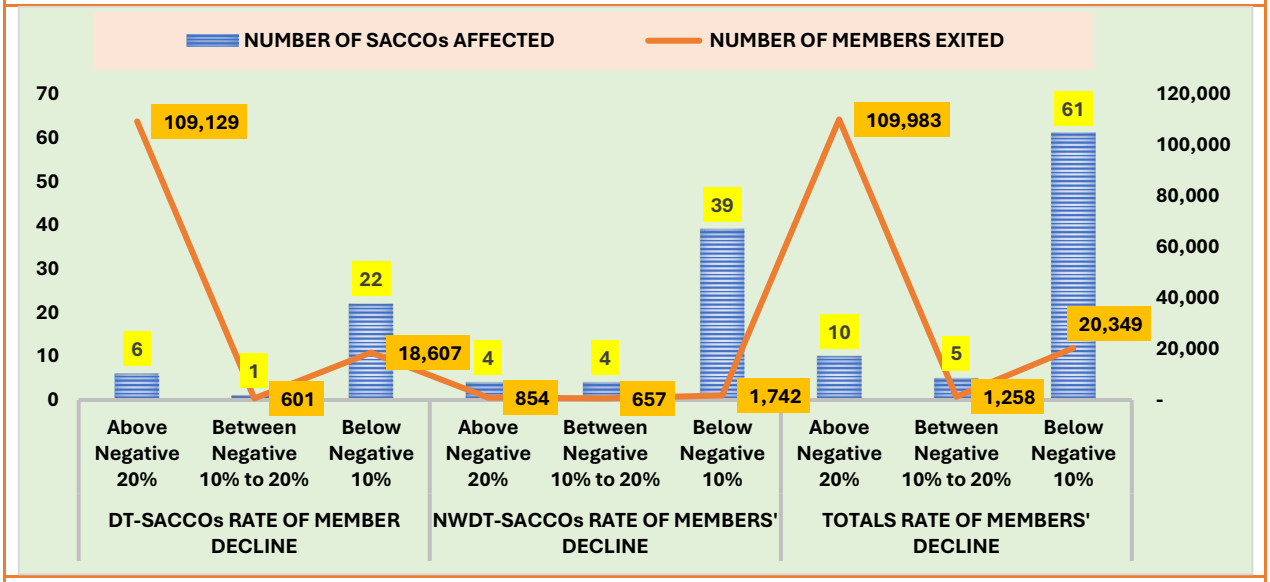

Source: Central Bank of Kenya's Quarterly Economic Reviews

14.2. Unemployment and Member exits.

The SACCO cooperative business model is anchored on open and voluntary membership thereby implying that members may exit at any time without any restrictions. Members exits arising from unemployment or retirement or dissatisfaction with services offered has been a common feature in the statistical performance reports of Regulated SACCOs. Such exits without new members joining the SACCOs, are likely to result into unsustainability risks as much as concentration risks whereby SACCOs end up serving just a few members. For instance, the Regulated SACCO industry shed-off a total of a total of 131,590 members during the year ended December 2023 as summarised in Figure 94, without an equivalent proportion of new members recruited, with one Regulated SACCO losing up to 601 members without replacement.

Figure 94: Decline in Membership of Regulated SACCOs with negative membership rate of growth in Membership, 2023

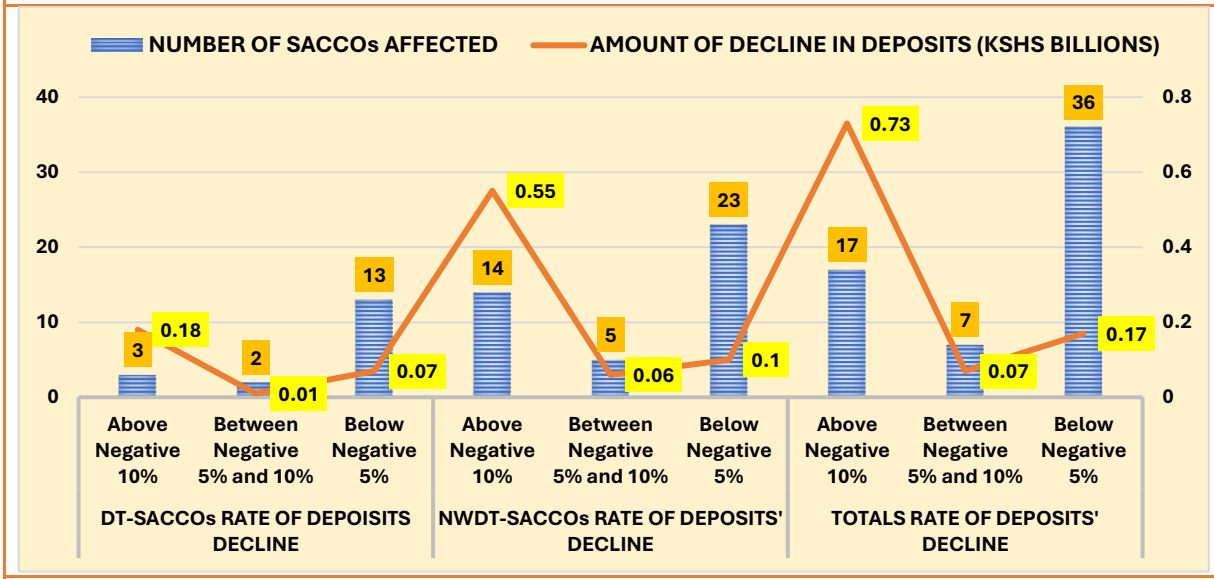

Source: SASRA Database

It is also significant to note that among the 29-DT-SACCOs which reported a decline in the membership in 2023, eight (8) of them recorded a decline in membership by 16,389 in 2022 with the

very same DT-SACCOs losing 4,198 members in 2023, implying that the said 8-DT-SACCOs have cumulatively lost 20,578 members over a two (2) year period. An almost similar scenario is replicated with regard to the 47-NWDT-SACCOs whose membership declined in 2023 with 18-NWDT-SACCOs of them having lost 1,719 members in 2022 and the same 18-NWDT-SACCOs having lost a further 447 members in 2023 resulting into a cumulative loss of 2,166 members them over the two years period.

Similarly, any time a member of a Regulated SACCO exits through withdrawal of membership, the affected Regulated SACCO is statutorily bound to refund the members any deposits or savings owed (less any obligations owed by the exiting member). This is one of the main reasons for decline in the deposit liabilities held by Regulated SACCOs which is usually the main reason for funding their assets unless the affected SACCO is concurrently able to mobilise fresh deposits equivalent to or more than the amounts being refunded to the exiting members. For instance, in 2023 the Regulated SACCOs shed-off a total of Kshs 0.97 billion attributable to about 60-Regulated SACCOs which had declines in their deposit liabilities in 2023 as summarised in Figure 95.

Figure 95: Decline in Deposits of Regulated SACCOs with negative membership rate of growth in Deposits, 2023

Source: SASRA Database

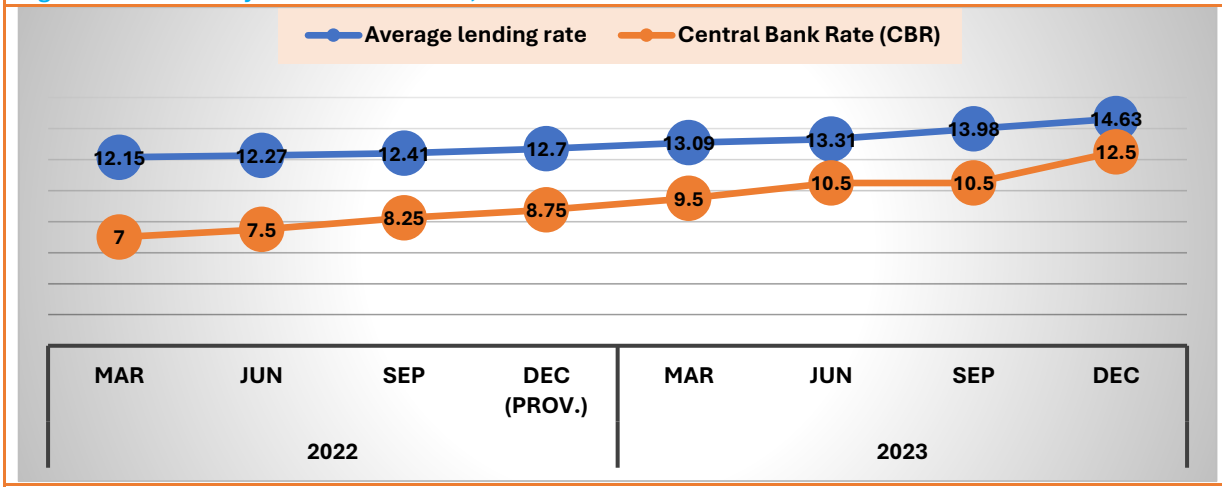

Consequent to the foregoing, it is therefore apparent that the future performance, stability, and sustainability of the Regulated SACCOs which are experiencing negative growth in their members and their deposits, will be negatively impacted by the rate at which member's exits and deposits decline take place. Regulated SACCOs must therefore work round the clock towards member retention through entrenchment of trust and confidence in the financial services and products in order to reduce any apathy driven member exits. Concurrently, the financial services and products of Regulated SACCOs must henceforth be tailored around the members' needs cognizance of the demographic composition of the membership, in order to mitigate against the retirement or unemployment driven member exits. In the same breadth, the development and roll out of financial services and products that address the needs of the younger generation as well as the business community remain an urgent priority for each individual Regulated SACCO.

14.3. Interest Rates

Regulated SACCOs which rely on external borrowing to fund portions of their asset portfolios, will continue to be impacted by the interest rate fluctuations which is pegged on the Central Bank of Kenya base lending rate (CBR). **Figure 96** shows the trend analysis of the interest rates in the domestic economy between 2022 and 2023 and shows that the commercial interest lending rates have been on the upward trajectory resting at an average of 14.63% in December 2023. This shows that the expenses associated with debts sourced by Regulated SACCOs from commercial banks will continue to rise, thereby eating into the SACCOs' surpluses.

Indeed, the impact of the rising commercial lending interest rates is already evidenced by the increase in the expenses paid by Regulated SACCOs on their external debts, which increased by 11.09% to Kshs 3.07 billion in 2023 from Kshs 2.76 billion in 2022, against a backdrop of a largely stable external borrowing ratio of 3.20% in 2022, compared to 3.02% in 2023 for DT-SACCOs and 1.48% in 2022 compared to 1.62% in 2023 for NWDT-SACCOs as discussed in *section 8.5.2 of this report*. The fact that the interest rates charged by Regulated SACCOs on their loans and credit facilities often does not change with the changes in the commercial lending rates also complicates the situation for Regulated SACCOs relying on such loans, especially for on-lending or supplementing their lending to members.

Figure 96: Trend Analysis of Interest Rates, 2022 - 2023

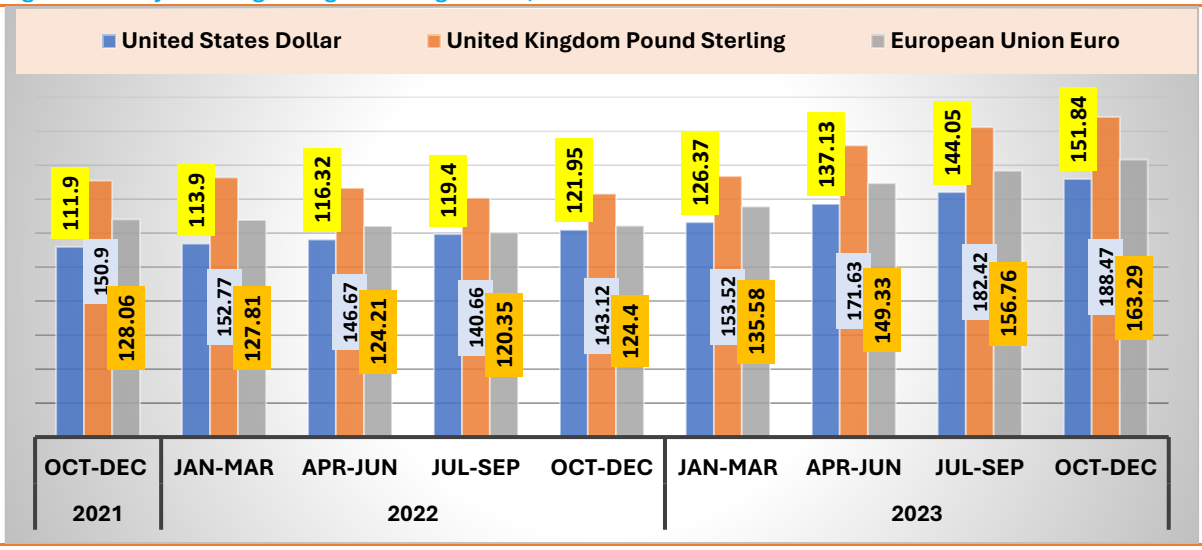

Source: Central Bank of Kenya Quarterly Economic Reviews.

14.4. Foreign Exchange Risks

The foreign exchange fluctuations means that Regulated SACCOs which have been obtaining external credit in foreign currencies but lending the same to their members in the local currency will continue to be exposed to the foreign exchange risks. In this regard, Regulated SACCOs are cautioned against obtaining the foreign denominated debts while those having such foreign currency denominated debts must put in place measures aimed at absorbing the risks associated with foreign exchange volatilities. **Figure 97** provides the comparative trends in the foreign exchange rates between the world's major currencies against the Kenya Shilling.

Figure 97: Kenya Shilling Foreign Exchange Rates, 2023

Source: Central Bank of Kenya Quarterly Economic Reviews.

The foreign exchange risks, especially the fluctuation of the Kenya Shilling will also continue to impact the financial condition and performance of Regulated SACCOs, with a large proportion of their membership based in foreign countries (diaspora). In addition, Regulated SACCOs exploring the development and rollout of foreign currency denominated financial products and services, ought to be cognizant of the risks associated with fluctuations in foreign exchange rates.

14.5. Cyber Security Threats

The Regulated SACCO industry in Kenya especially the DT-SACCOs segment has continued to embrace the usage of electronically enabled financial services and products as more particularly discussed in *section 10 of this report*. Indeed, a majority of the Regulated SACCOs have deployed mobile money, ATM, Pesalink and money transfer services, as well as a variety of digital credit products. These electronically enabled financial services offer customers convenience and ease of access and usage of financial services, while at the same time reducing costs associated with physical financial services transactions. However, these electronically enabled financial services potent high risks of cyber threats, attacks, and related frauds, which was hitherto unknown to the traditional cooperative financial business model. Additionally, cyber-attacks or breaches often result in loss of trust and confidence, and thus has the potential of undermining the efficient mobilisation and retention of deposits by SACCOs.

The trend analysis of the fraud incidents in the Regulated SACCO industry shows that over 75% of the incidences are related to breaches and violation of SACCOs' ICT infrastructures and Management Information Systems (MIS). Such breaches and violations are however almost always aided by insider connivance and has resulted in SACCOs losing large amounts of money, siphoned through mobile phones, ATMs, and fraudulent transfers to other third-party accounts. The reliance by Regulated SACCOs on third party ICT infrastructures and systems (vendors), to bridge the provision of their electronic financial services, continues to further enlarge the exposure surface area for cyber breaches and violations.

In this regard, Regulated SACCOs especially those which have deployed electronic financial services in one form or another, are advised to concurrently put in place adequate measures, aimed at detecting and mitigating the risks associated with cyber-attacks and breaches. The Authority also issued a *Circular on the Minimum Requirements for*

Engagement with Third-Party System integrators and vendors dated 6th June 2023 (SASRA/GG/1/2023), to Regulated SACCOs prescribing the minimum requirements to be observed while procuring the services of Third-Party system integrators and vendors in the delivery of mobile money services. The Circular provides mitigation measures and safeguards associated with cyber risks and risks associated with reliance on third -party ICT and MIS infrastructure.

14.6. Competition from other Financial Institutions and Fintechs

The financial landscape has evolved over the past decade driven by shifting customer/member expectations and rapid technological advancements. The emergence of digital financial technologies, money markets assets and other collectives has intensified competition in the financial sector challenging traditional financial institutions such banks and SACCOs as not being the first point of call for credit and banking needs. Today, many individuals especially the millennials prefer accessing all the banking services through their smartphone, rather than visiting a physical office. This trend has prompted a re-evaluation of where individuals choose to conduct their financial transactions, with many opting for more convenient and technologically driven options that offer attractive opportunities for managing their short-term liquidity constraints.

Regulated SACCOs must therefore adapt to changing market dynamics by embracing technology and fostering collaborations with fintech partners. By leveraging on the expertise and cutting-edge technology of these partners, SACCOs can tailor their products and services to better meet the preferences of their members. Furthermore, Regulated SACCOs should explore strategic partnerships with other collectives where mutually beneficial, by pooling resources and expertise to enhance their offerings to solidify their position as the financial partner of choice, ensuring sustainable growth and stability in the face of increased competition.

In doing so however, Regulated SACCOs must be wary of the risks posed by the third-party fintechs, especially those associated with financial transactions within the cyber-space. In this regard, Regulated SACCOs are constantly reminded to adhere to the Authority's Circular on *Minimum Requirements for Engagement with Third-Party System Integrators and Vendors Ref. No. SASRA/GG/1/2023 dated 6th June 2023*. The Circular provides minimum requirements which Regulated SACCOs must observe when engaging the services of third-party ICT systems integrators and vendors, particularly for the mobile money and other electronic financial services delivery in order to protect members funds against risks associated with third-party ICT systems integrators and vendors.

APPENDICES

APPENDIX I: OPERATING SUPERVISORY GUIDELINES AND CIRCULARS

SUPERVISORY OPERATING CIRCULARS AND GUIDELINES			
	DESCRIPTION OF CIRCULAR OR GUIDELINE	**REFERENCE AND ISSUE DATE**	**PURPOSE AND OBJECTIVES**
1	**Guidelines on Management Information Systems (MIS) for Deposit-Taking Sacco Societies**	**SASRA/GG/2/2013** **July, 2013**	Guide DT-SACCOs on implementation of MIS
2	**General Procedures for opening and closing of Branches and other places of business**	**SASRA/GG/1/2013** **May, 2013**	Provide a procedure for compliance with Section 32 of the SSA with concerning the opening, closure and relocations of DT-SACCOs branches and other places of business.
3	**Circular on submission and approval of audited financial statements**	**SASRA/GG/1/2015** **January, 2015**	Provide the procedure and timelines for submission and approval of DT-SACCOs' audited financial statements.
4	**Circular on Approval of Agency Banking by DT-SACCOs**	**SASRA/Circular No. 14/2011** **May, 2011**	Provide the procedure for application and approval of agency banking by DT-SACCOs under Reg. 17 of the Regulations 2010
5	**Circular of Application of Cooperative Societies Act to DT-SACCOs.**	**SASRA/Circular No. 16/2011** **June, 2011**	Expound on the application of the Co-operative Societies Act to DT-SACCOs pursuant to Section 67 of the SSA
6	**Directives on the raising of capital through offers of sale of shares through media and other public advertisement**	**SASRA/5/V.1 (83)** **September 2012**	Ensure that DT-SACCOs complies with the regulatory frameworks on raising capital from the public
7	**Circular on the role of Directors of DT-SACCOs**	**MCDM/2/32/VOL.1/ 157** **April 2011**	Expound on the oversight role and responsibility of Directors of DT-SACCOs to limit conflict of responsibility with management.
8	**Circular on procurement of goods and services by DT-SACCOs**	**SASRA/Circular No. 11/2011** **April, 2011**	Reinforces the duty of DT-SACCOs to comply with Public Procurement and Disposals Act, 2005 and Regulations made thereunder while undertaking all procurements.
9	**Guideline on Risk Management Practices for Deposit-Taking Sacco Societies**	**SASRA/RG/03** **June 2015**	Provides the Board of Directors and Senior Management Staff of the Sacco societies with minimum standards in terms of policies, procedures and structures for effective risk management practices in the Sacco societies.

SUPERVISORY OPERATING CIRCULARS AND GUIDELINES			
	DESCRIPTION OF CIRCULAR OR GUIDELINE	**REFERENCE AND ISSUE DATE**	**PURPOSE AND OBJECTIVES**
10	**Circular on imposition of levies and financial penalties prescribed in the law**	**SASRA/GG/2/2015** **July, 2015**	Provides details of the circumstances under which the Authority may impose a levy or financial penalty for any violations or breaches in accordance with Section 51(p) of the Sacco Societies Act.
11	**Circular authorizing the limited use by DT-SACCOs of the Authority's name and acronyms**	**SASRA/GG/1/2016** **January, 2016**	To differentiate DT-SACCOs from other Sacco Societies, the Authority allowed DT-SACCOs to use the words *"Regulated and/or Licensed by SASRA"* in their advertisements, correspondences, brochures, and other marketing materials.
12	**Circular on the application of ISA No. 701 (*Communicating Key Audit Matters in the Auditor's Report*) to DT-SACCOs.**	**SASRA/700/721/ VOL. 1 (1310** **21st November 2016**	The circular extends the application of ISA No. 701 to DT-SACCOs. Henceforth, external Auditors of DT-SACCOs must communicate all Key Audit Matters (KAM) in their opinions on Financial Statements.
13	**Circular and Guidance Note on the Application of the International Financial Reporting Standard (IFRS) 9 to Outstanding Loans and Credit Advances Issued by Deposit-Taking Sacco Societies in Kenya**	**SASRA/700/721/VO L. I (134)** **2nd October 2018**	General guidance to DT-SACCOs on the application of *IFRS - 9* to outstanding loan portfolios with effect from Financial Statements for the period commencing in January, 2018
14	**Circular and Guidance Note on the Withdrawal of the Old Generation Kshs 1000 currency note and introduction of new currency notes**	**SASRA/800/GG/1/20 19** **7th June 2019**	Advisory and sensitization note to SACCOs to comply with the CBK's directive on withdrawal of the old generation Kshs 1,000 note by 1st October 2019; the introduction of new generation currency notes as per the Kenya Gazette Notice No. 4849 dated 31st May 2019; and the need to fully comply with the AML/CTF requirements during the exercise.
15	**General Advisory Note on Non-Remitted deduction due to SACCOs from various employer-institutions**	**SASRA/800/2/2019** **11th June 2019**	An advisory to SACCOs on measures to take and/or put in place to reduce and/or mitigate against the perennial risks of default by various employer-institutions to promptly remit deductions due to SACCOs.
16	**Circular on the Sectoral Lending Reporting Framework for SACCO Societies in Kenya**	**SASRA/GG/2/2019** **10th December 2019**	Guidance to SACCOs on the quarterly reporting of the economic sectors in respect of which the loans and credit facilities issued by the SACCOs are aimed at financing. The Circular lists the sectoral areas in respect of which the loans and credit advances by SACCOs shall be reported, including the respective codes and sub-codes for each sector and subsector.
17	**Guidance Note on the Revised Procedures for Application for renewal of deposit taking licenses for**	**SASRA/GG/1/2022** **31st August 2022**	Provides guidance to DT-SACCOs on the manner of application for renewal of their respective deposit taking licenses, as well as the minimum data and data

SUPERVISORY OPERATING CIRCULARS AND GUIDELINES			
	DESCRIPTION OF CIRCULAR OR GUIDELINE	**REFERENCE AND ISSUE DATE**	**PURPOSE AND OBJECTIVES**
	DT-SACCOs and Data Collection Template		sets required for consideration of application for renewal of deposit taking licenses.
18	**Guidance Note on Registration & Approval of External Auditors for Regulated SACCOs; and Procedures for Appointment of External Auditors**	**SASRA/GG/2/2022** **23rd September 2022**	Guidance to SACCOs and their external auditors on a uniform and standard framework and criteria for the approval and registration of external auditors for Regulated SACCOs, as well as preparation and publication of the list of approved and registered auditors.
19	**Guidance Note on the Revised Procedures for Application for renewal of authorization for NWDT-SACCOs and Data Collection Template**	**SASRA/GG/3/2022** **12th October 2022**	Provides guidance to NWDT-SACCOs on the manner of application for renewal of their respective authorization certificates, as well as the minimum data and data sets required for consideration of application for renewal of authorization certificates.
20	**Minimum Requirements for Engagement with Third-Party System Integrators and Vendors**	**SASRA/GG/1/2023** **6th June 2023**	Provides minimum requirements which Regulated SACCOs must observe when engaging the services of Third-Party ICT systems integrators and vendors, particularly for the mobile money and other electronic financial services delivery.
21	**Guidance Note on Corporate Governance for Regulated SACCOs in Kenya**	**SASRA/GG/2/2023** **June 2023**	Codifies the best international corporate governance practices and their application to Regulated SACCOs in contemporary times. The Guidance Note replaces the previous Guidelines on Good Governance which was issued by the Authority inn 2015.
22	**Guidelines on Complaints Management by Regulated SACCOs**	**SASRA/MC/1/2023** **15th June 2023**	Provides the manner and procedures for complaint management by Regulated SACCOs, including the reporting framework of the complaints to the Authority.

APPENDIX II: SUMMARY OF THE GUIDANCE NOTES ON CORPORATE GOVERNANCE

NO.	DESCRIPTION OF THE CORPORATE GOVERNANCE SUBJECT	KEY REQUIREMENTS AND RESPONSIBILITIES REQUIRED OF REGULATED SACCOs AND THEIR OFFICERS
1	**The Co-operative Identity**	Regulated SACCOs are required to incorporate in their By-laws and strictly operate on the basis of the Cooperative values, ethical beliefs and principles as established by the International Cooperative Alliance (ICA).
2	**Member Representation and Responsibility**	1. The Board of Directors shall ensure that the SACCO By-laws and all its policies provide for an adequate and effective framework for member representation and democratic control of the affairs of the Regulated SACCO as specified in the Guidance note. 2. Where a Regulated SACCO has adopted delegated mode of representation through delegates meeting, a framework for members participation at the Electoral Zones for each elected delegate shall be developed and implemented.
3	**The Structure, Roles, And Responsibility of The Board of Directors**	1. Regulated SACCOs shall Develop and implement a Board Charter which at the minimum conforms to *the Act*, Regulations made thereunder and the SACCO By-Laws and clearly defining the roles of the Board of Directors and the sub committees. 2. Regulated SACCOs with assets amounting to and or exceeding Kshs.5 billion encouraged to recruit and appoint a qualified person to provide professional corporate legal and governance services to the SACCO. 3. A person who has served or is serving as a member of the Board of Directors shall not be eligible to be elected as members of the Supervisory Committee of the SACCO until after the expiry of five (5) years after ceasing to serve as a member of the Board of Directors and vice versa. 4. A Regulated SACCO may as a best corporate governance practice restrict the chairperson from being a substantive member of any of its committees but provide a framework for allowing the chairperson to attend and participate in the meetings of any committees upon invitation or on a need be basis. 5. Regulated SACCO shall develop and implement a Compensation Policy for its members of the Board of Directors, the Supervisory Committee and delegates (where applicable) which shall be subject to prior approval by the Authority before presentation to the General Meeting of members for adoption.
4	**Board Committees**	1. DT-SACCOs shall constitute Credit Committee, Audit and Risk Committee and any other two Committees as maybe defined in their respective By-Laws. 2. NWDT-SACCOs shall constitute Credit Committee and any other two Committees as maybe defined in their respective By-Laws. 3. The functions of an Audit and Risk Committee of the Board of Directors of NWDT-SACCOs shall be performed by the Supervisory Committee of the

NO.	DESCRIPTION OF THE CORPORATE GOVERNANCE SUBJECT	KEY REQUIREMENTS AND RESPONSIBILITIES REQUIRED OF REGULATED SACCOs AND THEIR OFFICERS
		NWDT-SACCO in accordance with the requirements of the *Reg 58 of Regulations 2020*, whereas the DT-SACCOs may at their discretion allow the functions of their Audit and Risk Committee to be performed by their Supervisory Committees, in which case *Reg.58 of Regulations 2020* shall apply *mutatis mutandis*.
5	**Supervisory Committee**	1. Regulated SACCOs are required to ensure that the constitution, independence, duties, and responsibilities of the supervisory committee are in accordance with *the Act* and Regulations made thereunder, addressing all the specific line items provided in the sections of the Guidance notes. 2. The internal audit function of the Regulated SACCO shall provide support, technical and secretarial services to the supervisory committee in the performance of its duties and responsibilities. 3. The Supervisory Committee in consultation with the Chief Executive Officer and Internal Audit function shall develop a workplan for its activities for the ensuing year which should be approved during a joint meeting with the Board of Directors prior to the commencement of the ensuing financial year. 4. The Chief Executive officer in consultation with the Board of Directors shall facilitate the Supervisory Committee in the discharge of its functions, duties and responsibilities including provision of adequate resources within the approved budget, working space etc.
6	**Regulated SACCOs' Subsidiaries and Related Entities.**	1. Regulated SACCO shall not establish or propose the establishment of a corporate body or any other legal entity as its subsidiary without a written approval from the Authority and approval of members in General Meeting. 2. A Regulated SACCO shall provide a comprehensive framework for representation of the SACCO society's interest in the subsidiary and clear distinction of the role of board in the subsidiary which shall be incorporated in the SACCO Society's By-Laws, provided that the chairman, treasurer, and secretary of the SACCO shall not be eligible to be a member of the board of the subsidiary company or legal entity. 3. Other than the initial capital investments in the Subsidiaries or related entities, a Regulated SACCO shall not make any further or additional capital injected into a subsidiary or related entity except with prior written approval from the Authority and subsequent resolution in the General Meeting. 4. A Regulated SACCO shall not provide, guarantee or provide a credit or loan facility or make an undertaking securing a credit or loan facility or any other obligation on behalf of its subsidiary or related entity; or place any deposits with and or in favour of any subsidiary or related entity, except with a prior written resolution obtained from the General Meeting in that particular regard.
7	**Chief Executive Officer and Senior Management**	1. Appointment of the Chief Executive Officer by the Board of Directors is subject to prior or consequential written approval of the Authority.

NO.	DESCRIPTION OF THE CORPORATE GOVERNANCE SUBJECT	KEY REQUIREMENTS AND RESPONSIBILITIES REQUIRED OF REGULATED SACCOs AND THEIR OFFICERS
		2. The Board of Directors shall notify the Authority of al changes in the office of the Chief Executive Officer and senior Management staff within fourteen (14) days of such changes, including but not limited to;- a) The resignation or suspension or removal of the Chief Executive Officer or any other Senior Management staff including reason thereof; b) The retirement of the Chief Executive Officer or any other Senior Management staff; and, c) The appointment of the Chief Executive Officer or any other Senior Management staff.
8	**Organizational Values and Code of Conduct**	The Board of Directors of the Regulated SACCOs are required to inculcate an ethical and value-based climate for all operations of a Regulated SACCO Society, including observing confidentiality, compliance with the Third Schedule of Code of Conduct, Public officer Ethics Act, indemnity, Anti-Bribery Act 2015, Fit and proper test Framework, Conflict of interest and prohibition against insider dealings and other fiduciary responsibilities.
9	**Internal and Risk controls**	Regulated SACCOs are required to develop and implement effective internal and risk control systems; regularly review policies, processes, and controls with senior management and/or internal control functions.
10	**Planning for the Future**	The Board of Directors and Management are required to establish a comprehensive Strategic Plan for appropriate strategies to ensure financial stability and sustainability.
11	**Governance Of Information Communication Technology (ICT)**	1. The Board of Directors shall be responsible for Information Communication Technology of the Regulated SACCO including cyber security governance and ensure that its ICT governance framework supports effective and efficient management of operations to achieve its strategic objectives. 2. The Management should regularly demonstrate to the Board of Directors and Supervisory Committee that the Regulated SACCO has adequate business resilience arrangements in place for disaster recovery and business continuity.
12	**Transparency and Accountability Disclosures**	The Board of Directors shall be responsible for considering the legitimate interests and expectations of the institution's stakeholders in its deliberations and disclose information in a manner that enables stakeholders to make an informed analysis of the SACCO Society's performance, and sustainability.
13	**Corporate Governance Reporting**	Regulated SACCO Societies shall adopt corporate governance reporting frameworks which communicates the SACCO Society's corporate governance standards, policies and practices.
14	**Governance and Legal Audit**	The Board of Directors may conduct or cause to be conducted periodic governance and or legal audit of the Regulated SACCO Society and its activities and operations to ensure that the SACCO complies with and or conforms with the best governance practices as well as prevailing laws.

NO.	DESCRIPTION OF THE CORPORATE GOVERNANCE SUBJECT	KEY REQUIREMENTS AND RESPONSIBILITIES REQUIRED OF REGULATED SACCOs AND THEIR OFFICERS
15	**Corporate Social Responsibility of Regulated Saccos**	A Regulated SACCO Society intending to participate in corporate social responsibility shall develop a Corporate Social Responsibility Policy which upon approval shall guide all its corporate social responsibility activities.

APPENDIX III: SUMMARY OF THE GUIDELINES ON COMPLAINT'S MANAGEMENT FOR REGULATED SACCOs

NO.	DESCRIPTION OF THE GUIDELINES	KEY REQUIREMENTS AND RESPONSIBILITIES REQUIRED OF REGULATED SACCOs AND THEIR OFFICERS
1	**Confidentiality and Anonymity**	Regulated SACCOs to - 1. adopt measures that facilitate anonymous reporting and safeguard the confidentiality of complainants to encourage open and honest feedback without fear of retaliation or reprisal. 2. establish clear policies and procedures to ensure that any personal information gathered during the complaints process is treated with the utmost discretion and sensitivity, adhering to relevant data protection and privacy laws.
2	**Training and Capacity building**	Regulated SACCOs to - 1. consistently invest in the training and capacity building of staff members responsible for handling complaints. 2. provide comprehezz\nsive training on the SACCO's complaints handling policies and procedures, as well as developing essential soft skills that can facilitate successful resolution of issues.
3	**Complaint Handling Process**	Regulated SACCOs to establish a transparent and straightforward complaints handling process that is easily accessible and comprehensible for members. This process should encompass the following steps. 1. Providing clear information on how to lodge a complaint, including any necessary forms. 2. Acknowledging the receipt of the complaint within a specified timeframe. 3. Conducting a thorough investigation of the complaint. 4. Undertaking a fair and unbiased assessment of the complaint and determining the appropriate action or resolution based on the findings of the investigation. 5. Communicating the outcome of the complaint to the complainant. 6. Documenting and maintaining records of all complaints. 7. Conducting regular reviews and analyses of complaints data to identify patterns, trends, and areas for improvement.
4	**Timelines**	Regulated SACCOs to establish reasonable timelines for handling complaints, taking into consideration the complexity of the complaint and the need for a comprehensive investigation. As a general guideline, the following timelines should be observed: a) acknowledgment of receipt of the complaint: within 3 working days. b) completion of the investigation: within 14 working days. c) communication of the outcome to the complainant: within 7 working days after the completion of the investigation. If a complaint cannot be resolved within the established timelines, the complainant should be informed of the reasons for the delay and given an updated timeline for resolution.
5	**Escalation and Appeals**	Regulated SACCOs to establish a clear escalation process for complaints that cannot be resolved through the initial complaints handling process. This may involve referral to a higher level of management, such as a senior manager or executive, or an independent internal review conducted by a separate department or impartial party within the Regulated SACCO.
7	**Reporting and Monitoring**	Regulated SACCOs to - 1. maintain accurate and up-to-date records of all complaints received, the investigations undertaken, and the outcomes of those investigations.

NO.	DESCRIPTION OF THE GUIDELINES	KEY REQUIREMENTS AND RESPONSIBILITIES REQUIRED OF REGULATED SACCOs AND THEIR OFFICERS
		2. ensure the Board of Directors regularly review complaints data to identify trends, areas for improvement, and any necessary updates to the complaints handling policies and procedures. 3. report complaints data to the Authority as required by any relevant regulations or guidelines and cooperate fully with any investigations or inquiries conducted by the Authority.
8	**Enforcement and Sanctions**	1. The Authority may take enforcement action against Regulated SACCOs that fail to comply with the requirements of this Guideline, including issuing directives, imposing penalties, or taking other appropriate measures as provided for under the Act and Regulations, 2. The enforcement action may be based on the severity and frequency of non-compliance, and the impact of such non-compliance on the SACCO's members and the overall stability of the SACCO sector.

APPENDIX IV: SUMMARY OF KEY AMENDMENTS TO POCAMLA IN 2023 WITH IMPLICATION TO REGULATED SACCOs.

Table xx: Summary of key amendments to the Proceeds of Crime and Anti-Money Laundering Act effected in 2023 with implication Regulated SACCOs.

	KEY ISSUE OF AMENDMENTS	GENERAL IMPLICATION OF AMENDMENTS	KEY NOTES TO REGULATED SACCOs
1	Scope of application of POCAMLA to extend to Terrorist Financing and Proliferation Financing (Section 2A of POCAMLA)	The provisions of POCAMLA now applies to Terrorist Financing and Proliferation Financing, and thus the obligations of reporting institutions under POCAMALA, and the legal mandate of supervisory bodies, competent Authorities, and the Financial Reporting Centre (FRC) under POCAMLA, also includes terrorism financing (TF) and proliferation financing (PF), in addition to money laundering.	In addition to their obligations Anti-Money Laundering obligations, Regulated SACCOs now have new obligations with regards to CTF and CPF.
2	Timelines for reporting suspicious transactions (Section 44 (2) of POCAMLA)	All suspicious transactions activities to be reported to the FRC within two (2) days after suspicion arose.	
3	Increased reporting threshold for Cash Transactions (Fourth Schedule and Section 44(6) of POCAMLA)	All cash reporting threshold on transactions raised to USD 15,000 and above (or any other equivalent currency).	The reporting threshold is provided as material transactions are more likely to be suspicious.
4	Risk-based approach to supervising ML/TF/PF risks by FRC and the Supervisory bodies) (Section 36 D of POCAMLA)	FRC and the supervisory bodies (such as SASRA) are required by law to adopt a risk-based approach in fulfilling their obligation to effectively monitor reporting institutions. This requires them to have adequate understanding of ML/TF/PF risks in specific sectors and base the frequency of their supervision on the risks identified and any new sectoral developments.	A risk-based approach supervisory framework would necessitate a risk-based approach program management for the reporting entities. It also implies the undertaking of a risk assessment so as to establish the extent of risk the organization faces in different geographies, portfolios, channels etc.
5	Increased scope of due diligence for higher risk countries (Section 45(A) (2) of POCAMLA)	Reporting Institutions (such as Regulated SACCOs) required to independently adopt counter-measures over and above the usual Customer Due Diligence, proportionate to the risk presented by countries.	Reporting institutions (Regulated SACCOs) can now exercise their discretion and adopt additional due diligence measures over and above the ordinary due diligence procedures taking into account the level of risk associated with that country. This places an increased obligation on reporting institutions (Regulated SACCOs) to regularly assess the risk posed by institutions in high-risk countries before transacting with them.
6	Increased scope of due diligence by reporting	Increased scope on due diligence requirements of a	This is an enhancement of the pre-existing 'enhanced due diligence' procedures.

Table xx: Summary of key amendments to the Proceeds of Crime and Anti-Money Laundering Act effected in 2023 with implication Regulated SACCOs.

	KEY ISSUE OF AMENDMENTS	GENERAL IMPLICATION OF AMENDMENTS	KEY NOTES TO REGULATED SACCOs
	institutions to include "materiality and risk" (Section 45 (2) of POCAMLA)	reporting institution, on existing customers, to extend to assessment on the basis of materiality and risk taking into account whether due diligence measures have previously been undertaken and the adequacy of the data obtained.	Reporting institutions now have a greater obligation to consider the nature of entity/ individual they are transacting with and the level of risk they pose, as part of due diligence on their existing customers.
7	Increased AML/CFT mandate for supervisory bodies (Section 36 C of POCAMLA)	Provision for a comprehensive list of powers of supervisory bodies including but not limited to conducting inspections, imposing sanctions for failure to comply with AML/CFT provisions, compel production of information and issue AML/CFT sector specific guidelines.	Previously, AML/CFT mandate of supervisory bodies was not elaborated in the POCAMLA and sectoral acts. The provisions were general, requiring supervisory authorities to adopt appropriate measures to ensure compliance with the act. Although the supervisory authorities had certain powers such as conducting inspections, and compelling production of documents, this did not extend to AML/CFT. Additionally, the supervisory authorities did not have express authority to impose sanctions on supervisees for non-compliance with POCAMLA provisions.

This is a summary of the key amendments to POCAMLA made in 2023 and is not meant to be exhaustive. It is not a legal opinion, nor does it constitute legal advice.
